Glossary

Community Forum - Community Forums were established to create a two way communication process with representatives of local communities, establish and build relationships, provide timely updates on the designs and plans, whilst listening to the issues and concerns raised by members of the community. Membership of the Community Forums comprised of two representatives from local resident and community associations, all disability groups or special interest groups, business organisations and public representatives along each scheme.

Signal-controlled Bus Priority - Signal-Controlled Priority uses traffic signals to enable buses to get priority ahead of other traffic on single lane road sections, but it is only effective for short distances. This typically arises where the bus lane cannot continue due to obstructions on the roadway. An example might be where a road has pinch-points where it narrows due to existing buildings or structures that cannot be demolished to widen the road to make space for a bus lane. It works through the use of traffic signal controls (typically at junctions) where the bus lane and general traffic lane must merge ahead and share the road space for a short distance until the bus lane recommences downstream. The general traffic will be stopped at the signal to allow the bus pass through the narrow section first and when the bus has passed, the general traffic will then be allowed through the lights.

Bus Gate - A Bus Gate is a sign-posted short length of stand-alone bus lane. This short length of road is restricted exclusively to buses, taxis, and cyclists plus emergency vehicles. It facilitates bus priority by removing general through-traffic along the overall road where the bus gate is located. General traffic will be directed by signage to divert away to other roads before they arrive at the Bus Gate.

Cycle Lane - A cycle lane is a lane on the carriageway that is reserved either exclusively or primarily for cycling and is separated from general traffic or bus lanes by road markings.

Cycle Track - A cycle track is a separate section of the road dedicated for cycling only. This space will generally be isolated from other vehicular traffic by a physical kerb.

Virtual Bus Priority - This refers to cases where physical bus priority (i.e. bus lanes) is not provided, and instead, bus priority is provided within the general traffic lane through the use of signal-controlled priority or bus gates to control the movements of general traffic.

Protected Junctions - Refers to junctions, which provide physical kerb buildouts to protect cyclists through the junction. Due to the inherently complex nature of mixed mode movements at junctions, the provision for cyclists at junctions is a critical factor in managing conflict and providing safe junctions for all road users. As such, this is the preferred layout for signalised junctions as part of the CBC Infrastructure Works.

Greenway - A greenway is a recreational corridor for non-motorised journeys, developed in an integrated manner which enhances both the environment and quality of life of the surrounding area. These routes should meet satisfactory standards of width, gradient and surface condition to ensure that they are both user-friendly and low risk for users of all abilities.

Carbon - The term Carbon is used to refer to carbon emissions or Green House Gas Emissions interchangeably

1. Introduction

1.1 Report Objectives

The main objective of this report is to outline the extensive public consultation and stakeholder engagement undertaken for the **Kimmage to City Centre Core Bus Corridor Scheme** (herein after called the Proposed Scheme), which is one of the schemes of the **BusConnects Dublin Core Bus Corridors Infrastructure Works (herein after called the CBC Infrastructure Works)**.

The Proposed Scheme is one of twelve stand-alone Core Bus Corridor (CBC) schemes to be delivered under the **BusConnects Dublin - Core Bus Corridors Infrastructure Works**. The CBC Infrastructure Works, once completed, will deliver the radial core corridors identified in the Greater Dublin Transport Strategy Area 2016-2035 (herein after called the GDA Transport Strategy).

The BusConnects Dublin Programme is the National Transport Authority's (NTA) programme to greatly improve bus services in the Greater Dublin Area and the CBC Infrastructure Works is one element of that Programme, itself containing 12 stand-alone Proposed Schemes. It is a key part of the Government's policies to improve public transport and to contribute to addressing climate change in Dublin and other cities.

The NTA established a dedicated BusConnects Infrastructure team to advance the planning and construction of the CBC Infrastructure Works. It comprises an in-house team including technical and communications resources and external service providers procured from time-to-time to assist the internal team in the planning and design of the 12 Proposed Schemes.

The CBC Infrastructure Works will deliver a major component of the overall Core Bus Routes as identified in the GDA Transport Strategy, encompassing the delivery of approximately 230km of dedicated bus lanes and 200kms of cycle tracks along 12 stand-alone Core Bus Corridors Proposed Schemes. In addition, the programme of works is also a critical element of the National Development Plan 2018 - 2027, the National Development Plan 2018-2027, National Development Plan 2021-2030, Climate Action Plan 2019, Climate Action Plan 2021 and Climate Action Plan 2023.

The 12 stand-alone Core Bus Corridor Schemes to be delivered under the CBC Infrastructure Works are:

- The Clongriffin to City Centre Core Bus Corridor Proposed Scheme;
- The Swords to City Centre Core Bus Corridor Proposed Scheme;
- The Ballymun / Finglas to City Centre Core Bus Corridor Proposed Scheme;

- The Blanchardstown to City Centre Core Bus Corridor Proposed Scheme;
- The Lucan to City Centre Core Bus Corridor Proposed Scheme;
- The Liffey Valley to City Centre Core Bus Corridor Proposed Scheme;
- The Tallaght / Clondalkin to City Centre Core Bus Corridor Proposed Scheme;
- **The Kimmage to City Centre Core Bus Corridor Proposed Scheme;**
- The Templeogue / Rathfarnham to City Centre Core Bus Corridor Proposed Scheme;
- The Bray to City Centre Core Bus Corridor Proposed Scheme;
- The Belfield / Blackrock to City Centre Core Bus Corridor Proposed Scheme; and
- The Ringsend to City Centre Core Bus Corridor Proposed Scheme.

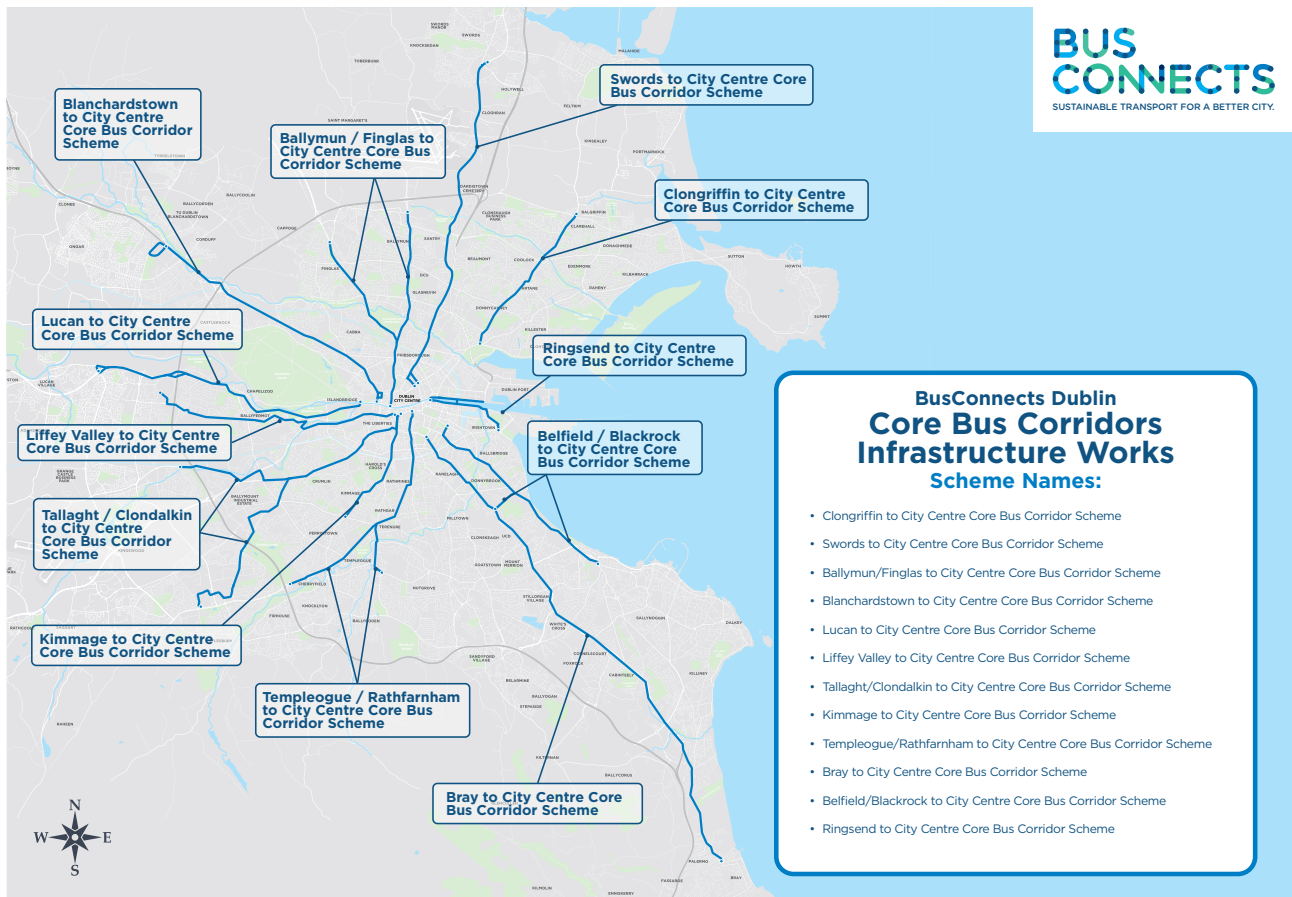

Figure 1.1 - 12 Scheme Map

1.2 Proposed Scheme Overview

The Proposed Scheme will have an overall length of approximately 3.7km (kilometres) and will be routed along Kimmage Road Lower, Harold's Cross Road, Clanbrassil Street Upper and Lower, and New Street South from the Kimmage Cross Roads to the Patrick Street Junction, predominantly in the Dublin City Council (DCC) administrative area. However, a portion of the Kimmage Cross Roads is located within the administrative area of South Dublin County Council (SDCC). The Proposed Scheme will involve works on existing streets to facilitate pedestrian, cyclist and bus priority as well as the widening of Robert Emmet Bridge over the Grand Canal with the construction of shared user bridges.

Please see Figure 1.2.

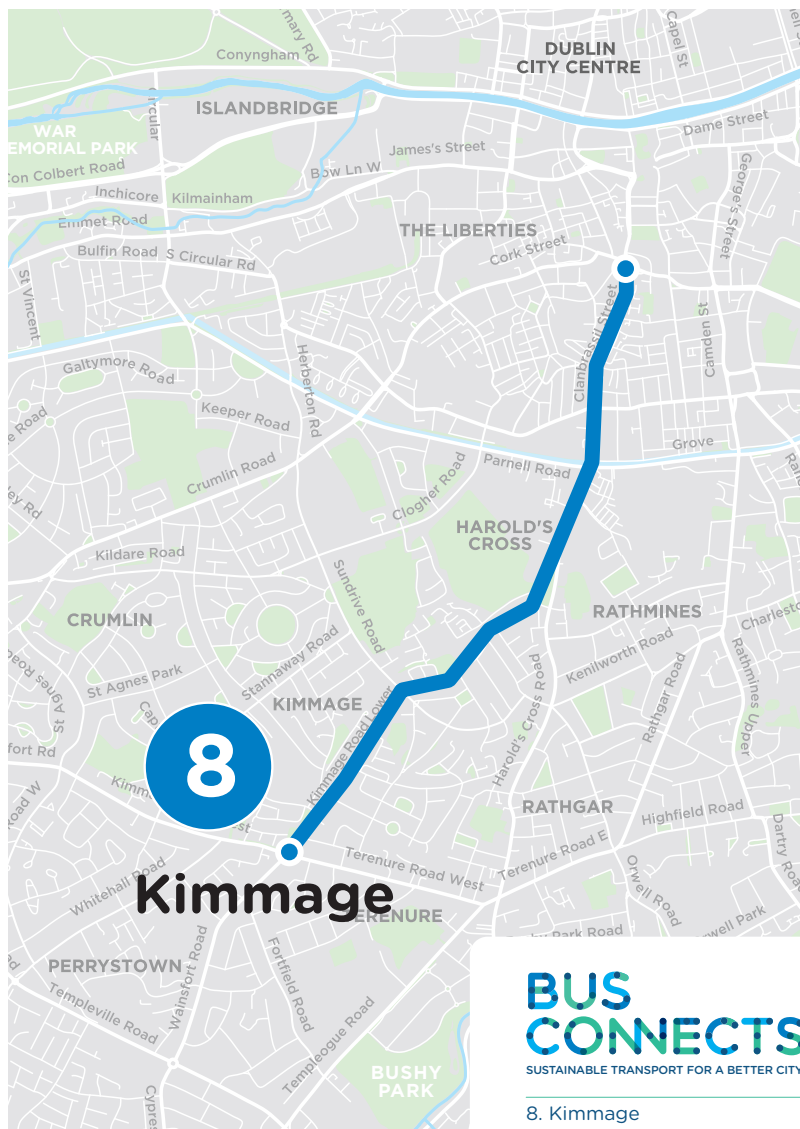

Figure 1.2: Route of the Proposed Scheme

1.3 Report Components

This report has two key components – a comprehensive summary of the Non-Statutory Public Consultations and Stakeholder Engagement processes **for the CBC Infrastructure Works as a whole**. It also provides a detailed record of the individual consultation and engagement processes for the **Kimmage to City Centre Core Bus Corridor Scheme** through each round of consultation.

The rationale for the two components, is that, although the **consultations on all the Proposed Schemes were carried out individually, they also formed integral parts of the overarching CBC Infrastructure Works public consultation process**.

It is important to not only review the consultations for each Proposed Scheme on a standalone basis, but also with the full context of the whole CBC Infrastructure Works consultations. Therefore, the report structure is set out to provide a complete and inclusive assessment of the strategy framing the consultation process, the timeline of activity, the communication tools and processes as well as the dedicated engagement framework for reaching out to key stakeholders.

Copies of all the non-statutory public consultation and stakeholder engagement material for both the **Kimmage to City Centre Core Bus Corridor Scheme** and the complete CBC Infrastructure Works are in the Appendices of this report.

The structure for the remainder of the report is set out as follows:

Chapter 2 – Consultation Strategy on the overall Core Bus Corridor Infrastructure Works

Chapter 3 – Consultation Timeline on the Core Bus Corridor Infrastructure Works

Chapter 4 – Communication Tools and Engagement Practices on Core Bus Corridor Infrastructure Works

Chapter 5 – Direct Engagement with Key Stakeholder Groups on Core Bus Corridor Infrastructure Works

Chapter 6 – Consultation on Kimmage to City Centre Core Bus Corridor Scheme

Chapter 7 – Summary and Conclusions

2. Consultation Strategy on Core Bus Corridor Infrastructure Works

2.1 Objectives

As one of the largest infrastructural works currently being undertaken by the State, the NTA, through its BusConnects Infrastructure team, set out to undertake a lengthy period of non-statutory public consultation to take account of the views of a significant range of key stakeholders across the Dublin area including the general public and importantly those directly affected by the CBC Infrastructure Works.

The first aim of the non-statutory consultation process was to inform stakeholders about the proposal, the reasoning for its development, its linkage to public policy priorities, its benefits and potential impacts on the city.

Secondly, the BusConnects Infrastructure team sought to open up a two-way channel of communication to help inform the development of the CBC Infrastructure Works. The feedback received through this engagement would prove critical in reassuring stakeholders about the consultation process as being an effective and informative process to inform the draft designs and planning. Some amendments, adaptations and mitigating measures on the impact along Proposed Schemes were included as a direct result of the consultation process.

Thirdly, the development and execution of a comprehensive engagement and communications strategy would help to keep stakeholders updated on the development of the plans along each of the 12 stand-alone Core Bus Corridor Schemes. Given the complexity of the CBC Infrastructure Works, it was vital to continually communicate the evolution and changes to the Proposed Scheme.

Finally, rolling out the non-statutory consultation process would ultimately help to enhance aspects of the original proposals and ensure the final designs for the CBC Infrastructure Works took into account local concerns and mitigating strategies.

2.2 Approach

A strategic approach to engagement was adopted from the very outset of the launch of the BusConnects Dublin CBC Infrastructure Works. Detailed processes and structures were put in place regarding stakeholder engagement and communicating to the public regarding the consultations. Public awareness, consultation, feedback and stakeholder engagement have been important to inform the extensive planning and design process of the BusConnects Dublin Core Bus Corridors Infrastructure Works. A dedicated BusConnects communications team was established in 2017. This team works closely with the technical members of the BusConnects Infrastructure team at every stage of planning and design to facilitate good communications.

The communications approach taken has been:

- ▶ To continually raise public awareness and understanding about the CBC Infrastructure Works and our objectives;
- ▶ Have the widest possible range of stakeholders and general public engaged in the consultations;
- ▶ To inform and build relationships with our key stakeholders;
- ▶ To consistently provide information through a range of communication channels and accessible formats;
- ▶ To be proactive regarding public information and stakeholder engagement;
- ▶ To listen and learn especially where submissions and observations demonstrate informative local knowledge and experience;
- ▶ To where practical respond constructively to consultees' comments throughout the design and planning processes;
- ▶ To have active and sustained two-way communication and stakeholder engagement not just during the non-statutory public consultation rounds but consistently since 2017.

2.3 Plan Development

Comprehensive consultation and engagement arrangements were developed to deliver the non-statutory public consultation rounds. A wide range of communication channels were used to raise awareness of the consultations at each round and inform stakeholders and the general public of the latest proposals. Details of the consultation communications and engagement practices are set out in Chapters 3 and Chapter 4.

2.4 Execution and Impact

The following is a summary of the whole CBC Infrastructure Works communication channels and level of engagement since the first round of consultation was launched in November 2018.

These included:

- ▶ One to One/Face-to-face meetings with Potentially Impacted Properties: 579
- ▶ Public Information Events & Attendees: 18 public information events with approx. 1,600 attendees
- ▶ Community Forums & Attendees: 41 community forums with membership of 1,400 (Approx. 5,000 attended across all forums)
- ▶ Resident Group Meetings: Meeting with 39 groups across the 12 schemes with approx. 90 meetings.
- ▶ No. of submissions received in total - 17,132
- ▶ Printed Brochures - no. in total: 32,650
- ▶ Website visitors - Total to-date: 143,775
- ▶ Twitter: 3.6 million tweet impressions, 4,316 followers
- ▶ Emails and Freephone numbers: 11,630 emails (excluding submissions)
- ▶ Freephone: 3672 calls received
- ▶ Virtual Room visitors - Total: 6,039
- ▶ Number of letters issued: Approx. 4,732 to-date
- ▶ Public information advertisement campaigns: 81 newspaper advertisements, 418 radio advertisements, 776 bus shelter public consultation information messages, on bus - Dublin Bus A2 x 500, GAI A2 x 40, 55 x Luas Portraits, 150 x Luas Straplans, 15 x Luas Columns, various social media campaigns also took place

(Audience Reach for these campaigns was 9,821,969 for print and online reach was 33,685,566. Audience reach data is sourced from MediaTel and gives an indication of the potential audience your coverage has reached. Online reach is derived from unique daily user figures and is adjusted for Ireland internet audience size.)

Figure 1.3 Summary of Key Engagements & Communication Metrics

3. Consultation Timeline on the Core Bus Corridor Infrastructure Works

3.1 Background

In May 2017 the NTA launched the BusConnects Programme and then in June 2018 published the Core Bus Corridors Project Report. The report was a discussion document outlining proposals for the delivery of Core Bus Corridor Routes across Dublin. **Details of the Programme launches and associated Documents can be seen in Appendix 1 and 2 respectively.**

3.2 Rounds of Consultation

Since the commencement of the non-statutory period of the CBC Infrastructure Works, there has been a total of three rounds of non-statutory public consultation.

First Round of Non-Statutory Public Consultation - The first round of non-statutory public consultation on the **Emerging Preferred Route Options** was from November 2018 until May 2019 divided into three phases (See Figure 3.1 below). The reason it was divided into three phases was primarily due to the fact that the BusConnects Infrastructure team carried out all aspects of the first round without external design service providers having been appointed at that stage. Moreover, the BusConnects Infrastructure team sought to gain maximum engagement from the public from the commencement of the CBC Infrastructure Works to raise awareness, establish relationships and gain immediate insight and knowledge of the issues at an early stage.

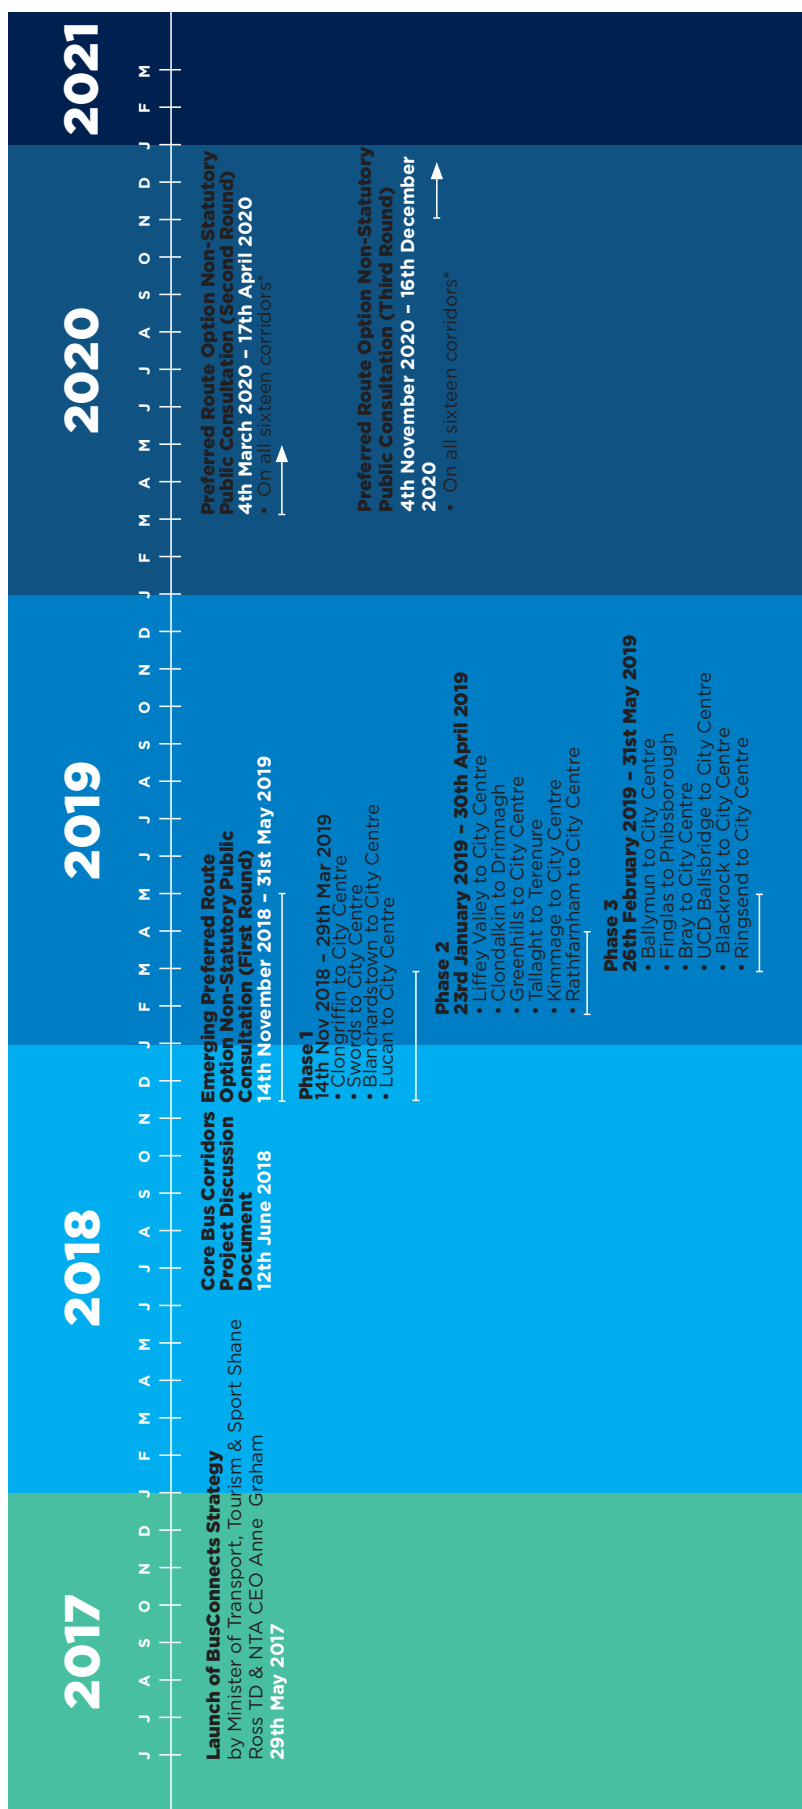

It was also important that at the start of the non-statutory consultation that considerable time and resources were dedicated by the BusConnects Infrastructure team to initiate contact with potential impacted properties. Each of the potentially impacted property owners were offered the opportunity to meet with members of the BusConnects Infrastructure team on a one-to-one basis which meant a significant amount of resources had to be dedicated to this process.

Second Round of Non-Statutory Public Consultation - The non-statutory public consultation for the **Preferred Route Options** ran from March 2020 to April 2020 as Ireland entered the first lockdown due to the Covid-19 pandemic. The consultation continued in deference to the number of online submissions received during this period. A number of public facing elements of the consultation were cancelled in line with Government health guidelines, however, all other elements of the consultation including online versions of the brochures, supporting documentation were available. Other communication tools including the Freephone, email and digital aspects remained active for submissions to be received.

Third Round of Non-Statutory Public Consultation - This round of non-statutory public consultation for the **Preferred Route Options** from November 2020 to December 2020 was added due to the disruption caused to the second-round consultation process. It was important that further engagement was facilitated to communicate design development changes prior to

concluding the determination of the Preferred Route Options. Methods had emerged whereby traditional public information events could be replaced by virtual online alternatives to offset the restrictions that continued associated with the Covid-19 Pandemic. Accordingly, all elements of the public consultation and stakeholder engagement were conducted virtually or online in line with the Government health guidelines.

3.3 Calendar of Engagements

* Because of geographic proximity and other interactions, a number of the sixteen individual corridors were amalgamated resulting in 12 Core Bus Corridor Schemes

4. Communication Tools and Engagement Practices on the Core Bus Corridor Infrastructure Works

4.1 Background

The public consultation tools included a dedicated website, public information events, community events, range of digital channels, traditional published material, press and radio advertising, outdoor advertising, presentations, infographics and virtual formats. The following paragraphs sets out the public consultations at a CBC Infrastructure Works level for all schemes. Chapter 6 provides specific details for the **Kimmage to City Centre Core Bus Corridor Scheme** consultation and engagement.

4.2 Published Material

Brochure - At each phase of the three non-statutory public consultations an individual brochure was recreated for each of the Core Bus Corridor Routes. The brochures were printed both in hard copy and online to view and download on the BusConnects website. They were available in a range of formats including PDF, HTML, Irish and Audio on the website.

Over the three rounds of non-statutory public consultation, 32,000 hard copies were printed and made available. The Core Bus Corridor Brochures for the Emerging Preferred Route for each of the routes were made available to all key stakeholders – commencing with a copy for all potentially impacted property owners – and available at all public information events, Community Forums, posted free of charge to members of the public by emailing or contacting the Freephone. Public Representatives were also provided with large volumes of copies of brochures on request.

For the second and third round of non-statutory public consultation, an updated version of each of the Core Bus Corridor Brochures for the Preferred Route was produced for both rounds. Each round of brochure contained the latest updated designs and key changes to previous versions of the proposals. The second and third round brochures were made available in online, accessible and hard copy formats as per the first round. Due to Covid-19 restrictions, the print version was made available on request only and provided to all potentially impacted properties owners. All other formats were available online.

Copies of Brochures were available at all public information events and community forums pre Covid-19. The brochures were also a feature of the virtual consultation rooms which are outlined further in this chapter.

Each brochure provided information of the BusConnects objectives, route maps along the particular Proposed Scheme, accompanied with a route description, key changes and facts, and details for queries and submission process including timelines and next steps.

See Appendix 3A, 4A and 5A for a copy of the three versions of the Brochure for this Proposed Scheme.

Below is an extensive but not exhaustive list of other published material which supported the non-statutory process of public consultation – all of which were made available to download, print or view on the BusConnects website. These included the following:

- Brochures for each Core Bus Corridor
- Summary “What is BusConnects” information leaflet
- BusConnects Core Bus Corridor Project Discussion Document June 2018
- Fact Sheets
- Preferred Route Option reports
- Background and Technical Documents including Draft Traffic Impact Assessments Reports, Approach to Environment Impact Assessments Report, Feasibility and Options Reports per Scheme
- Consultation Reports – (following first round of public consultation)
- Community Forum Presentations
- Public Realm Design Document
- Graphics and infographics
- Press releases
- Infographics
- Comment Sheets
- Online Web Forms
- A range of animations and videos
- Press advertisements

For a complete list of published materials available to view and download see Appendix 3F, 4E, 5F.

The published materials illustrated the level of detail, preparation and proactive engagement that has gone into both the stakeholder and public consultations. The published materials were continually updated with key changes as the proposals evolved from the Emerging Preferred Route Options to the Preferred Route Options.

4.3 Digital Communications

The BusConnects Dublin programme launched the BusConnects website, www.busconnects.ie during May 2017. The website is the main repository for all initiatives related to BusConnects. For the CBC Infrastructure Works all brochures, supporting technical documents, fact sheets, maps, associated documents, consultation reports, contact information and a range of other information is available to view and download.

In addition, the BusConnects Dublin Core Bus Corridors Infrastructure Works section of the website provides key documents in a range of accessible formats including pdf, HTML, Easy to Read and Audio. The required documents have also been translated to provide Irish language versions.

To ensure that busconnects.ie was accessible to everyone including blind, low-vision, keyboard only and switch users, the BusConnects Infrastructure team is committed to achieving a minimum of conformance level Double-A with the Web Accessibility Initiative (WAI) Web Content Accessibility Guidelines and complying with the National Disability Authority IT Accessibility Guidelines.

4.4 Social Media Channels

Twitter and Facebook – A BusConnects Twitter account (@busconnects) and Facebook page (BusConnects) were established to provide timely and regular updates on the progress of the BusConnects Programme. These online and digital tools have been used extensively to inform, educate and advertise the public consultation phases, public events, animations, timelines and closing dates. These information channels provided regular updates as the CBC Infrastructure Works designs evolved, as well as keeping stakeholders informed on the progress of the consultation process.

See Appendix 6F for examples of Twitter and Facebook activity.

4.5 Email, and Freephone and Post Channels

From the commencement of the BusConnects Dublin Core Bus Corridors Infrastructure Works, it was important to provide a range of two-way communication options for all stakeholders, including the general public, to be able to contact the BusConnects Infrastructure team with queries, send submissions and also requests for brochures or additional supporting documents to be issued.

The Freephone service (1800 303 653) – is available Monday to Friday 9am to 5pm and is for both general queries and also for potentially impacted property owners to contact to schedule an individual meeting with a BusConnects Infrastructure team member for one-to-one meetings in person or via zoom depending on Covid-19 restrictions.

Emails – A number of separate email addresses were established to deal with the different types of information requests and also for the volume of emails related to the CBC Infrastructure Works.

General queries and requests for information and brochures can be sent to info@busconnects.ie or cbc@busconnects.ie. These queries are responded to by members of the BusConnects Infrastructure team.

Submissions and observations on the proposals were invited via the following channels:

- Online form – this could be found on our website www.busconnects.ie
- Submission box at available at public information events
- Email – to cbc@busconnects.ie
- Or by post to the NTA offices in Dún Scéine

Public representatives – All public representatives have been able to engage and send queries into the NTA via a dedicated email facility for public representatives.

Media – All press and media related queries are received into the press@busconnects.ie email address.

4.6 Public Information Events

A series of Public Information events were held for the first round of consultation and a number also took place for the second round prior to the pandemic. These information events took place in accessible venues at locations along each of the Proposed Schemes. These venues were chosen to maximise the level of local engagement and attendance where possible. The dates and locations of each Public Consultation Event are listed in the tables below. These events allowed members of the public to speak directly and in detail with members of the BusConnects Infrastructure team about the proposals.

At each event, the following was available:

- ▶ Personnel from the BusConnects Infrastructure team and relevant Engineering Design service providers were on site to engage with stakeholders.
- ▶ Large scale overall route maps to view.
- ▶ Individual Large scale “pull-up” display maps (2mtrs x 1mtrs) for each section of the proposed route to view.
- ▶ Hard copies of the Scheme brochures for members of the public to view and take away.
- ▶ A1 and A2 large copies of the route maps for review.
- ▶ Electronic interactive screens to access other information like Google Maps were also used.
- ▶ Comment sheets for members of the public to make comments or provide their submission in writing on the day.
- ▶ Copies of previous Feasibility and Option Documents were available to view; etc.

These non-statutory Public Information Events were advertised in local newspapers, through radio, on the BusConnects website, through extensive email reminders to public representatives, Local Authorities’ Public Partnership Networks (PPN’s), emails to Community Forum members, promoted through social media and digital channels.

During the second round of non-statutory public consultation in March 2020, some of the scheduled Public Consultation Information Events had to be cancelled due to the Covid-19 pandemic and Government health guidelines at that time. Covid-19 restrictions were still in place during the third round of non-statutory public consultation, but an alternative method to facilitate interactive engagement to replace public information events was devised.

A list of the public consultation information events as well as sample images of the events can be seen in Appendix 6A.

First Round of Non-Statutory Public Consultation Information Events on the Core Bus Corridor Emerging Preferred Route Option:

Phase 1			
Corridor	Venue	Date	Time
Clongriffin to City Centre	The Hilton Hotel, Clongriffin.	Thursday 10th January 2019	1pm - 9pm
Swords to City Centre	Carnegie Court Hotel, Swords.	Friday 11th January 2019	1pm - 9pm
Blanchardstown to City Centre	Crowne Plaza, Blanchardstown	Tuesday 15th January 2019	1pm - 9pm
Lucan to City Centre	The West County, Chapelizod	Wednesday 16th January 2019	1pm - 9pm
Dublin City Centre Venue	The Gresham Hotel, Upper O'Connell St.	Thursday 17th January 2019	1pm - 9pm

Phase 2			
Corridor	Venue	Date	Time
Clondalkin to Drimnagh	Our Lady's Hall, Mourne Road	Tuesday 19th February 2019	3pm - 8pm
Greenhills to City Centre	Red Cow Morans Hotel	Tuesday 26th February 2019	3pm - 8pm
Clondalkin to Drimnagh/ Liffey Valley to City Centre	Clayton Hotel, Liffey Valley	Thursday 28th February 2019	3pm-8pm
Kimmage to City Centre	Dublin City Council, Civic Offices	Tuesday 5th March 2019	3pm - 8pm
Tallaght to Terenure	St. Mary's RFC, Templeville Road	Thursday 7th March 2019	3pm - 8pm
Rathfarnham to City Centre	Hilton Hotel, Charlemont Place	Monday 11th March 2019	3pm - 8pm
Combined Location	Dublin City Council, Civic Offices	Tuesday 12th March 2019	3pm - 8pm

Phase 3			
Corridor	Venue	Date	Time
Bray to City Centre	Talbot Hotel Stillorgan	Thursday 26 March 2019	3pm - 8pm
UCD Ballsbridge to City Centre / Blackrock to Merrion	Clayton Burlington Hotel	Wednesday 27th March 2019	3pm- 8pm
Ringsend to City Centre	The Convention Centre, Spencer Dock	Monday 1st April 2019	3pm - 8pm
Ballymun to City Centre / Finglas to Phibsborough	Ballymun Axis Arts Centre	Wednesday 3rd April 2019	3pm - 8pm

Second Round of Non-Statutory Public Consultation Information Events on the Core Bus Corridor Emerging Preferred Route Option:

Corridor	Venue	Date	Time
Clongriffin to City Centre & Swords to City Centre	The Bonnington Hotel, Whitehall	Wednesday 11th March 2020	11.30am - 7.30pm
Bray to City Centre	The Talbot Hotel, Stillorgan	Thursday 12th March 2020	11.30am - 7.30pm
Other CBC Public Information events cancelled due to Covid 19			

4.7 Virtual Consultation Rooms

Due to the Covid-19 pandemic, which commenced with restrictions in March 2020 and continued throughout the second and third public consultation rounds, the BusConnects Infrastructure team developed online and virtual elements to assist the public in viewing and reading the proposals.

Our primary virtual interactive tool during the final third phase of public consultation was the use of **virtual consultation rooms** available through the BusConnects website. These rooms were online for a six week period (24hrs x 7 days a week) and received over 7,000 views. In these virtual rooms, all Scheme materials were available for perusal, such as the brochure, maps and all associated support documentation. There was also audio description of the brochure information.

There was also a call back facility within the virtual rooms for any stakeholder to book a phone call back from a member of the BusConnects Infrastructure team for additional information or more detailed queries.

These Virtual Consultation Rooms replaced the more traditional Public Information Events due to the Covid-19 restrictions on face-to-face interactions, typically used during non-statutory public consultation. Compared to the face-to-face Public Information Events utilised during the first round of Non-Statutory Public Consultation the numbers of the public that engaged increased significantly due to the online access available through this facility.

Appendix 5C shows examples of a virtual room layout and content.

4.8 Public Information and Advertising Campaigns

In order to reach as wide-ranging an audience as feasible across the Core Bus Corridor Schemes each phase of the non-statutory public consultation was supported by a comprehensive public information and advertising campaign. The campaigns were run across a range of media channels in a range of different formats. All the public information campaigns provided clear information and contact details with the BusConnects and NTA brand and logos so they could be easily recognised and read.

The advertisements detailed where stakeholders could access further information on the Schemes including viewing the proposals, joining community forums, making submissions and attending public information events were published in local and national newspapers. These advertisements were also placed on social media channels. Radio adverts played on local and national stations as well as Out of Home (OOH) bus shelters, on board buses and Luas advertisements. Targeted adverts were placed on Twitter, Instagram and Facebook.

See Appendix 2F, 3H, 4G and 5H for all advertisement material.

A press release was released for each round and phase of public consultation and was followed up by media briefings and presentations. The BusConnects Infrastructure team met with various media outlets and publications to discuss the proposals in detail and give media interviews. Press coverage of each phase was important in ensuring that details reached as wide an audience as possible, capturing those who may not ordinarily see advertisements or NTA announcements online and on social media.

For details on press coverage and reach of the BusConnects Programme from 2018-2021, please see appendix 3G, 4F and 5G.

5. Direct Engagement with Key Stakeholder Groups on the Core Bus Corridor Infrastructure Works

5.1 Background

In addition to developing and implementing an extensive process of consultation on the CBC Infrastructure Works, the BusConnects Infrastructure team put in place a dedicated engagement plan for key stakeholders interested and potentially impacted by the Schemes.

Over the course of three years, the BusConnects Infrastructure team established new processes of engagement with potential directly impacted property owners along each of the routes as well as members of their communities who demonstrated an interest in the CBC Infrastructure Works.

5.2 Potentially Impacted Properties

Across the 12 Schemes at the Emerging Preferred Route Options stage, a number of properties were identified that would potentially be impacted by the proposals in terms of property acquisition. The potential impact on the properties may include loss of front gardens, walls, and gate/entrances/parking.

At each phase of the non-statutory public consultation all such properties were contacted in advance of the publication of each set of proposals through registered post. The letters were sent in advance of any wider public communications regarding the plans. This was to allow the property owners and/or those renting the opportunity to receive details of any potential impact on their property before the public consultation information was published. These letters offered a direct line of one-on-one communication with the BusConnects Infrastructure team and details of the engagement process and copies of the full brochure and relevant route maps followed.

During the Emerging Preferred Route Option non-statutory Public Consultation, 1543 letters were issued to potentially impacted properties.

Public Consultation Round	Potentially Impacted Property
Emerging Preferred Route Option Public Consultation (14 Nov 2018 - 31 May 2019)	1543

Similarly, during the following second and third Preferred Route Option Public Consultations launched in March and November 2020, over 3,000 letters were issued to continually impacted, newly impacted and no longer impacted property owners as seen in the table below.

Public Consultation Round	Letter Type: Continually Impacted Property	Letter Type: Newly Impacted Property	Letter Type: No Longer Impacted Property
Preferred Route Option Public Consultation (04 March 2020 - 30 April 2020)	990	294	766
Preferred Route Option Public Consultation (04 Nov 2020 - 16 Dec 2020)	962	32	100

Appendix 3E, 4D and 5E - examples of each type of letter and sample map types issued.

5.3 One to One meetings

As there are a considerable number of potentially impacted properties it has been important that the BusConnects Infrastructure team provide a one to one meeting provision for any property owner who expressed an interest. This meeting service has been in place since the first round of consultation began and has been continuous since. The one to one meetings are with experienced BusConnects Infrastructure team members who have direct responsibility for the specific Scheme that the property is on. There has been almost 600 meetings to-date and in addition to the meetings there has been continuous phone calls and emails to maintain and support the engagement. These meetings continued during Covid-19 restrictions in a virtual capacity and are anticipated to continue throughout the planning and construction stages of each Scheme.

5.4 Community Forums

A number of Community Forums were established during the first round of non-statutory public consultation in 2018 and have continued through all three rounds of consultation. The aim of the Community Forums was to create a two-way communication process with representatives of local communities, establish and build relationships, provide timely updates on the designs and plans, whilst listening to the issues and concerns raised by members of the community. There are currently 13 individual Community Forums.

The table below details the names of each Community Forum, the number of meetings held to-date and the number of participants registered.

Community Forum	Average Number of Attendees	Number of Meetings Held
Clongriffin to City Centre Community Forum	24	3
Swords to City Centre Community Forum	105	4
Ballymun to City Centre & Finglas to Phibsborough Community Forum	75	3
Blanchardstown to City Centre Community Forum	94	4
Lucan to City Centre Community Forum	38	3
Liffey Valley to City Centre Community Forum	48	3
Clondalkin to Drimnagh & Greenhills to City Centre Community Forum	62	3
Tallaght to Terenure Community Forum	215	3
Kimmage to City Centre Community Forum	185	3
Rathfarnham to City Centre Community Forum	285	3
Bray to City Centre Community Forum	83	3
UCD Ballsbridge to City Centre & Blackrock to City Centre Community Forum	166	3
Ringsend to City Centre Community Forum	28	3
Total:	1,408	41

Community Forums have a current membership of over 1400 members and are a productive and valuable process to allow constructive ideas to be brought forward to inform the overall proposals.

Membership of the Community Forum comprises of typically two representatives from local resident and community associations, all disability groups or special interest groups, business organisations and public representatives along each scheme (Please note the number of representatives was increased from a single attendee per group to two following feedback). The terms of reference for the Community Forums can be seen in Appendix 3D, 4C and 5D

At the establishment of the Forums, all public representatives were invited to attend and become members. The BusConnects Infrastructure team also emailed all public representatives to inform their constituents about the Forums and relay the registration process and encourage local participation ([Appendix 3B](#), [4B](#) and [5B](#) respectively).

Advertisements and press adverts (**Appendix 3H, 4G and 5H**) detailing the aims for establishing Community Forums were placed in local and national newspapers. These adverts also detailed how to nominate/become a representative at a Community Forum. Promotion of the Community Forums was published on the website and through social media channels and stakeholder emailing.

Each Community Forum meeting was chaired by a dedicated independent chairperson. The Community Forums took place from 6.30pm/7.00pm to 8.00pm/8.30pm to encourage participation. The venues for each Forum were identified along each Scheme to be accessible and allow local participation. Where possible all Forums were held in the same venue repeatedly for consistency.

At each Community Forum, personnel from the BusConnects Infrastructure team provided a detailed presentation on the particular scheme. The independent chairperson then proceeded to open the floor to a question-and-answer session for the remainder of the meeting.

During the third round of non-statutory Public Consultation, the Community Forum process needed to be adapted to function due to the government's Covid-19 restrictions on gatherings. The decision was taken to host these meetings via Zoom Webinars. The forum was again chaired by an independent chairperson with members of the BusConnects Infrastructure team responsible for the scheme presenting the proposals followed by a Q&A session. Attendees were invited to submit questions via the chat-box feature, these questions were addressed sequentially. In advance of the Community Forum Webinar, a Community Forum Webinar Protocols document was issued to all members outlining how the webinar would be run on the night. **Please see Appendix 5D for a copy of the Community Forum Webinar Protocols document.**

Community Forum presentations were made available to view and download on our website www.busconnects.ie following each Forum. Members were also emailed a note of the Forum and a copy of the presentation subsequently.

Appendix 6B provides images of the Community Forum “set-up” as well as listing all the Community Forum meetings which took place.

The Community Forum presentations specific to this Scheme are available in Appendix 3D, 4C and 5D respectively.

As part of the ongoing communications with community forum members, CBC Infrastructure Works Status Update emails were issued in July 2019, April 2021 and August 2021.

These Updates provided the latest information available at the time of the draft designs and plans. They also gave indications of next steps and any relevant presentations or materials.

See Appendix 3D, 4C, 5D and 6E for copies of these emails.

5.5 Residents Groups

Throughout the BusConnects Dublin Core Bus Corridors Infrastructure Works planning since early 2019, there has been extensive engagement with local resident's groups. Numerous residents' groups sent representatives to the BusConnects Community Forums but in addition to the Forums a significant amount of other meetings were held with local resident groups.

As the public consultation phases commenced, the BusConnects Infrastructure team has been contacted by individual and collective resident groups across many of the schemes. Over the last three years, the BusConnects Infrastructure team has engaged extensively with about 35 local groups. Almost 90 meetings have been held between these groups and the BusConnects Infrastructure team to address local issues and consider alternative options and proposals for specific areas. Overall, these meetings have been productive and insightful and will continue throughout the planning and construction stages.

The vast majority of the meetings were scheduled and hosted by the BusConnects Infrastructure team following requests from the groups to meet. On occasion, the BusConnects Infrastructure team has instigated engagement with resident groups to get particular views or provide relevant updates of the proposals.

The meetings were held in the NTA offices with attendees of average 10 representatives on behalf of the residents' group along with the BusConnects Infrastructure team members in relation to the relevant scheme. This engagement continued virtually on Zoom when the Government restrictions were introduced as a result of the Covid-19 pandemic.

A full list of resident group meetings including those specific to the Kimmage to City Centre Core Bus Corridor Scheme and details can be seen in Appendix 6D.

5.6 Public Representatives

The NTA engages with public representatives, at local and national level, in an ongoing manner across all its projects and responsibilities. The CBC Infrastructure Works aims to greatly improve bus, cycling and sustainable transport services, and therefore, engagement and communication at all levels of local and national public representatives is a key component of the public consultation campaigns.

Since the launch in June 2018 of the BusConnects Core Bus Corridor Discussion Document, public representatives are regularly informed at the commencement of each round of non-statutory public consultation via email and were invited to attend specific briefings at each launch date in November 2019, March 2020 and again in November 2020.

Public representatives are provided with additional brochures, maps and documents upon request and the BusConnects Infrastructure team respond to many queries forwarded by public representatives on behalf of their constituents.

All Community Forum presentations, dates of events, invitations and regular CBC Infrastructure Works updates are sent to public representatives via email as a matter of process.

As part of the ongoing communications with public representatives and stakeholders, CBC Infrastructure Works Status Update emails were issued in July 2019, April 2021 and August 2021.

See Appendix 3D, 4C, 5D and 6E for copies of these emails.

These Updates provided the latest information available at the time of the draft designs and plans. They also gave indications of next steps and any relevant presentations or materials. These same Updates were sent to all Community Forum members also.

See Appendix 3B, 4B and 5B for copies of these emails.

Briefings with party groupings and individual elected members were facilitated as well as attendance by the NTA at the Oireachtas Transport Committee meetings a number of times over the last three years. The BusConnects Infrastructure team has provided regular updates to Local Authorities Transport Strategic Planning Committees (SPC's).

Engagement with public representatives from both the Oireachtas and the various Local Authorities is a continuous process which takes place not only during the consultation phases but as requested. This is an important process to reach as many people as possible in the communities surrounding each scheme.

5.7 Relevant Local Authorities and TII

The Local Authorities and Transport Infrastructure Ireland (TII) are key stakeholders for the CBC Infrastructure Works. These include Dublin City Council (DCC), Fingal County Council (FCC), Dun Laoghaire Rathdown County Council (DLRDCC), South Dublin County Council (SDCC), Wicklow County Council (WCC) and TII. All 12 Proposed Schemes of the CBC Infrastructure Works run within the DCC's geographical area, while sections of many of the Proposed Schemes run within the geographical areas of the other county councils. A number of the Proposed Schemes intersect with sections of LUAS lines and cross or run on sections of the national road network under the operational responsibility of TII.

Regular lines of communication and technical engagement have been established and grown over the lifetime of the CBC Infrastructure Works planning process with these key stakeholders. This has ensured that the key planning and traffic departments within the local authorities and TII are aware of the status of the draft designs and plans. Meetings are held as necessary on design development or specific issues.

There are dedicated liaison teams within each local authority and TII to act as a direct link to the BusConnects Infrastructure team. There are monthly update meetings presented by the Director of Infrastructure to the liaison teams to brief them collectively on aspects of the design development. These meetings are an effective means to ensure each stakeholder is aware of each other's projects across the areas covered by Schemes and an opportunity to raise issues or queries. In addition, there is ongoing interactions through meetings, emails and phone calls between the BusConnects Infrastructure team and the relevant stakeholder liaison personnel for onward engagement and dissemination of information with their wider organization's departments.

5.8 Special Interest Groups

Disability Representative Groups and other special interest groups have also had opportunities to engage with the BusConnects Infrastructure team in the context of Community Forums. These special interest groups are diverse and representative of commuters, cyclist advocacy groups, disability groups, environmental and business groups. These groups were provided with maps and brochures as requested, and encouraged to make submissions on behalf of their members. They were also invited to public meetings and there have been a number of specific meetings between the BusConnects Infrastructure team, Disability Groups and Cycling Advocacy Groups. These meetings broadened the number of stakeholders significantly and allowed their specific areas of interest and concern to be considered.

Public Participation Networks (PPN) in the relevant local authorities, a network which allows local authorities to connect with community groups, were also informed regularly on updates surrounding the CBC Infrastructure Works. Various community and voluntary groups/organisations register to join the PPN in their local authority area such as residents' associations, TidyTowns, disability groups, sporting clubs and environmental groups. The PPNs in Dublin City Council, South Dublin County Council, Dún Laoghaire-Rathdown County Council, Fingal County Council and Wicklow County Council were contacted and asked to forward information to their PPN members regarding the CBC Infrastructure Works non-statutory Public Consultations as well as the Community Forums relevant to their local authority. These PPN's had a combined membership of over 1,000 community and voluntary groups.

6. Consultation on Kimmage to City Centre Core Bus Corridor Scheme

6.1 Background

The BusConnects Dublin Core Bus Corridors Infrastructure Works was launched on 29 May 2017 by Minister for Transport, Tourism and Sport Shane Ross TD and NTA CEO Anne Graham at an event held in the Irish Film Institute, 6 Eustace Street, Temple Bar, Dublin 2. This announcement and launch was supported by a press release. The BusConnects website www.busconnects.ie as well as specialised social media channels for BusConnects were also launched. Further details on the launch and supporting documents can be found in [Appendix 1](#).

Following on from the initial announcement, the National Transport Authority published the Core Bus Corridors Project Report on 12 June 2018. This was announced via press release which was made available on busconnects.ie and nationaltransport.ie. A media briefing was held to launch the report which was then followed by a drop in briefing for public representatives. This discussion document set out draft proposals to vastly improve bus journey times and cycling priority along an increasing number of congested corridors in the Dublin region. The report identified the Kimmage to City Centre Core Bus Corridor as one of the proposed CBCs. The brochure for each CBC as well as supporting documents can be seen in [Appendix 2](#).

6.2 Emerging Preferred Route Option: First Round of Non-Statutory Public Consultation

A. Overview

The first non-statutory round of public consultation on the CBC Infrastructure Works took place on a phased basis. The first phase of consultation occurred from 14th November 2018 to 29th March 2019. The second phase ran from 23rd January 2019 to the 30th April 2019 and the final phase ran from 26th February 2019 until the 31st May 2019.

The Kimmage to City Centre Core Bus Corridor Scheme Emerging Preferred Route Option formed part of the second phase of consultation, which closed on the 30th April 2019. There were 644 submissions relating to the Kimmage to City Centre Core Bus Corridor. These submissions ranged from individual submissions by residents, commuters and local representatives, to detailed proposals from public bodies, various associations and private sector businesses.

The second phase of the first round of Public Consultation was launched on 23 January 2019 via press release. Please see [Appendix 3A](#) for documents relating to this launch.

Advertisements detailing where interested parties could access further information on the CBC including viewing the proposals, joining community forums, making submissions and attending information events were advertised in local and national newspapers as well on social media. ([Appendix 3H](#)).

B. Engagement

i. Potentially Impacted Properties

Letters were delivered to each individual potentially impacted property affected by the Kimmage to City Centre Core Bus Corridor on 18 January 2019. Each potentially impacted property was also sent a copy of the Emerging Preferred Route brochure for the Kimmage to City Centre Core Bus Corridor (Please see [Appendix 3E](#) for a copy of this letter).

In total, 88 letters were delivered on 18 January 2019 along the Kimmage to City Centre Core Bus Corridor, with 26 property owners availing of the one-to-one meetings.

Emerging Preferred Route Option Public Consultation (14 Nov 2018 – 31 May 2019)	
Core Bus Corridor	Letter Type: Potentially Impacted Property
Kimmage to City Centre CBC	88

ii. Public Representatives

An email was issued to all TDs, Senators and Councillors in the area in tandem with the press release, detailing the CBC and inviting them to view the proposals and to discuss with their constituents. Individual or party grouping briefings were also offered as well as information on joining Community Forums. Please see [Appendix 3B](#) for correspondence with public representatives.

iii. Public Consultation Information events

For the Kimmage to City Centre Core Bus Corridor, a dedicated information event was held at Dublin City Council Civic Offices on 05 March 2019 from 15.00-20.00. A subsequent information event covering all of the CBCs for Phase 2 took place at the Dublin City Council Civic Offices on 12 March 2019 from 15.00 – 20.00.

The information events were advertised in local and national newspapers and on social media ([Appendix 3H](#)).

iv. Community Forums

The first Community Forum meeting for the Kimmage to City Centre Core Bus Corridor took place on 18 February 2019 at the Hilton Hotel, Charlemont from 18.30 – 20.00 with approximately 180 representatives in attendance.

The presentation for this meeting was made available to view and download on our website. Subsequently, a report on the meeting was issued to all registered attendees (**Appendix 3D**).

v. Resident Groups

Throughout the CBC Infrastructure Works, residents' groups have been engaged with. Members of the BusConnects Infrastructure team met representatives from Lower Kimmage Road Residents Association (LOKRA) on a number of occasions between April 2019 and December 2019 to discuss the proposals on the Kimmage to City Centre Core Bus Corridor scheme. **Please see appendix 6D for a complete list of residents groups that the BusConnects Infrastructure team have engaged with.**

vi. Digital and Online Resources

A brochure for the Kimmage to City Centre Core Bus Corridor was developed and made available to view and download on the BusConnects website (**Appendix 3A**). In addition to the brochure, the following technical reports for each Core Bus Corridor were also available to view and download on the website:

- Route Selection Report
- Concept Design Drawings
- Appendix A - MCA Tables
- Appendix C - Technical Note on Junctions
- Appendix D - Junction modelling report

Following the conclusion of the public consultation, a Consultation Submission Report was also made available to view and download on our website. Hard copies were available upon request.

For a complete list of published materials that were available to view and download during this round of non-statutory consultation, please see **Appendix 3F**.

6.3 Preferred Route Option: Second Round of Non-Statutory Public Consultation

A. Overview

Following the first round of consultation, all submissions were reviewed and considered in the design process for each CBC. In March 2020, the Draft Preferred Route Option was published and a public consultation covering the Preferred Route Option for each CBC including the Kimmage to City Centre Core Bus Corridors commenced on 04 March 2020 and ran until 17 April 2020. The consultation was announced via press release and a media briefing (**Appendix 4F**) that took place in the Alex Hotel, Fenian Street from 10.00 - 12.00.

Due to the COVID-19 pandemic, all events scheduled after 12 March 2020 were cancelled. In deference to the submissions we had already received, the decision was made not to cancel the consultation.

Consequently, there were just 51 submissions received for the Kimmage to City Centre Core Bus Corridor. These submissions ranged from individual submissions by residents, commuters and local representatives, to detailed proposals from various associations and private sector businesses.

Advertisements detailing where interested parties could access further information on the CBC including viewing the proposals, making a submission and attending information events were placed in local and national newspapers, online and in highly visible areas around the Greater Dublin Area (**Appendix 4G**).

B. Engagement

i. Potentially Impacted Properties

Following the review of the proposals, there were some changes to the number of properties that were potentially impacted. Three different versions of a letter (**see Appendix 4D**) were prepared and the appropriate version delivered to each of these potentially impacted properties on 02 March 2020, with recipients invited to schedule meetings with the BusConnects Infrastructure team if they wished to discuss the proposals on an individual basis. There was a version of the letter for those who had been previously written to in the first round launch and who were continuing to be potentially impacted. There was a version of the letter for those who had not been previously written to in the first round launch and who were now newly potentially impacted, and there was a version of the letter for those who had been previously written to in the first round launch and who were no longer continuing to be potentially impacted.

116 letters were distributed along Kimmage to City Centre Core Bus Corridor Proposed Scheme with no meetings taking place.

Preferred Route Option Public Consultation (04 March 2020 – 17 April 2020)

Core Bus Corridor	Letter Type: Continuing Potentially Impacted Property	Letter Type: Newly Potentially Impacted Property	Letter Type: No Longer Potentially Impacted Property
Kimmage to City Centre	45	9	62

ii. Public Representatives

An email was issued to all public representatives on the morning of the launch, in advance of the press release. An invitation was sent on 02 March 2020 to all public representatives inviting them to attend a drop-in briefing for all public reps in the Alex Hotel from 14.00–17.30 on the date of the launch (**Appendix 4B**). TDs, Senators and Councillors were invited to attend to view the new proposals, speak with members of the BusConnects Infrastructure team and pick up hard copies of the proposals and maps.

iii. Public Consultation Information Events

Members of the public were invited to attend to review the changes made to the proposals since the first round of consultation in 2018/2019 and to discuss concerns and observations with members of the BusConnects Infrastructure team. While this public consultation was completed, due to Covid-19 restrictions being imposed by Government in mid-March, planned Public Information Events for the Kimmage to City Centre CBC scheme and other schemes were impacted and had to be cancelled.

iv. Community Forums

The second Community Forum for the Kimmage to City Centre Core Bus Corridor was held in the Hilton Hotel, Charlemont on 24 September 2019 from 18.30 – 20.00, with approximately 160 in attendance. This round of Community Forums were held for each CBC in advance of the launch of second round of non-statutory public consultation. The meeting aimed to keep members updated on the design process between the first and second consultation. The presentation was emailed to attendees following the meeting and was also made available to view and download on our website. Subsequently, a report on the meeting was issued to registered attendees. **Both the presentation and report can be seen in Appendix 4C.**

v. Resident Groups

Throughout the CBC Infrastructure Works, residents' groups have been engaged with. Members of the BusConnects Infrastructure team met representatives from Lower Kimmage Road Residents Association (LOKRA) and the Kimmage & Crumlin Representatives Group throughout 2019 and 2020 to discuss the proposals on the Kimmage to City Centre Core Bus Corridor scheme. **Please see appendix 6D for a complete list of residents groups that the BusConnects Infrastructure team have engaged with.**

vi. Digital and Online resources

As with the first round of consultation, all materials relevant to the CBC were made available to view and download on our website www.busconnects.ie. The brochure was available in Easy to Read format, plain text and audio description as well as an Irish version. Hard copies of the brochures were also available upon request. Traffic Count Data 2019 - 2020 was also published for consideration during this round of consultation, with information on each CBC.

For a complete list of published materials that were available to view and download during this round of non-statutory consultation, please see Appendix 4E.

6.4 Preferred Route Option: Third Round of Non-Statutory Public Consultation

A. Overview

The third round of non-statutory public consultation for the CBC Infrastructure Works took place from 4th November 2020 until 16th December 2020 on the updated Draft Preferred Route Option, including for the Kimmage to City Centre Core Bus Corridor Scheme. With the continuing effect of the Covid-19 pandemic and associated Government restrictions, the third Public Consultation was held largely virtually. Our regular consultation communication methods were adapted to allow the process to take place using virtual and online facilities. The consultation was announced via press release, on our website and on social media **(Appendix 5G)**.

All relevant information including the updated Information Brochures and the public consultation reports were made available on the BusConnects website (www.busconnects.ie) to view and download.

Advertisements detailing where interested parties could access further information on the CBC including viewing the proposals, making a submission and attending information events were placed in local and national newspapers, online and in highly visible areas around the Greater Dublin Area **(Appendix 5H)**.

There were 643 submissions received as part of the Kimmage to City Centre Core Bus Corridor during this round of non-statutory public consultation.

B. Direct Engagement with Key Stakeholders

i. Potentially Impacted Properties

Those continuing to be potentially impacted; newly potentially impacted; or no-longer potentially impacted properties were written to directly (Appendix 5E) to receive information on the consultation in advance of any wider publication of the proposals.

One-to-one meetings were offered via Zoom or over the phone for those who wished to discuss the proposals further in relation to their own property as part of the consultation process.

20 letters in relation to the Kimmage to City Centre Core Bus Corridor were sent between 01 and 03 November 2020.

Preferred Route Option Public Consultation (04 March 2020 – 17 April 2020)

Core Bus Corridor	Letter Type: Continually Potentially Impacted Property	Letter Type: Newly Potentially Impacted Property	Letter Type: No Longer Potentially Impacted Property
Kimmage to City Centre	18	1	1

ii. Public Representatives

Public representatives were made aware of the publication of the revised proposals via email. This email also contained information on Community Forums for TDs, Senators and Councillors to assist in spreading awareness of the meetings. A briefing session was organized via Zoom to take place on 4 November 2020 from 14.00 – 15.00. Members of the Transport & Communications Networks Oireachtas Committee were separately made aware of the launch. Please see [Appendix 5B](#) for engagement with public representatives.

iii. Public Consultation Virtual Information Rooms

Due to ongoing Government restrictions, traditional information events required a rethink. Virtual rooms were created for each CBC that could be accessed for the entirety of the consultation dates. The rooms could be accessed via the BusConnects website and contained all of the information needed to make an informed submission. This included a description of each Preferred Route from start to finish with supporting maps and included information of all revisions made, if any, since the previous rounds of public consultation as well as other supporting documents. Please refer to Appendix 5C for material in relation to the public consultation virtual information rooms.

All boards were equipped with audio description. Over the seven weeks of the consultation, 243 unique users visited the virtual information room for the Kimmage to City Centre Core Bus Corridor scheme.

The virtual rooms also contained a feature for members of the public to request a call back service from a member of the BusConnects Infrastructure team should they require more information. There were 19 call back requests for the Kimmage to City Centre Core Bus Corridor Scheme.

The consultation period remained open until 16th December 2020 and submissions could be made by email, through the virtual consultation room or by post.

iv. Community Forums

iv. Community Forums

A further round of Community Forums were run during the third round of Public Consultation. Members of each Community Forum were contacted directly on the day of the launch of the public consultation via email. As with the public information events, the Community Forum process needed to be adapted to function during government restrictions on gatherings. The decision was taken to host these meetings via Zoom Webinars. The forum was again chaired by an independent chairperson with members of the BusConnects Infrastructure team responsible for the CBC presenting the proposals, followed by a Q & A session. Attendees were invited to submit questions via the chat-box feature, these questions were addressed in order of submission.

The Kimmage to City Centre Core Bus Corridor Community Forum meeting took place on 10 November 2020 from 18.30 – 20.00 with approximately 150 representatives in attendance.

Materials in relation to these Community Forums can be seen in [Appendix 5D](#).

v. Resident Groups

All Resident Groups along the Proposed Scheme were alerted to the publication of the consultation via email. Zoom meetings were available for any groups that wished to meet with the BusConnects Infrastructure team to discuss the impact of the proposals on their community and express their views.

Throughout the CBC Infrastructure Works, residents' groups have been engaged with. Members of the BusConnects Infrastructure team had Zoom meetings with representatives of the Lower Kimmage Road Residents Association (LOKRA), the Kimmage & Crumlin Representatives Group, Stannaway Road Residents and Kimmage Business Group & Residents throughout 2020 and 2021 to discuss the proposals on the Kimmage to City Centre Core Bus Corridor scheme. **Please see appendix 6D for a detailed list of residents groups that the BusConnects Infrastructure team have engaged with.**

vi. Digital and Online resources

Due to Covid-19 restrictions, all communications were done online via the BusConnects website and Zoom. In addition to the virtual rooms, the following documents were available on our website to view and download:

- Information Brochure for Revised Preferred Route Option (in English and Irish)
- Audio version of Brochure
- HTML version of Brochure
- Draft Preferred Route Option Consultation Report
- Proposed Approach to Environmental Assessment
- Draft Transport Modelling Report

For a complete list of published materials that were available to view and download during this round of non-statutory consultation, please see Appendix 5F.

7. Summary and Conclusions

Figure 1.4 Timeline for the Core Bus Corridor Process

The BusConnects Infrastructure team carried out three rounds of non-statutory public consultation between November 2018 and December 2020. The lengthy and extensive public consultation phases ensured the views and observations of a large number of key stakeholders and the general public were received and considered. From the first to the third round of public consultation over 17,000 submissions were received and reviewed by the BusConnects Infrastructure team. These submissions played a significant role to inform the draft designs and plans whereby a range of amendments and adaptations were included as a direct result of the stakeholder and consultation process. In summary, the stakeholder engagement and public consultation allowed for an effective two-way communication to inform and build relationships with our key stakeholders.

Since 2018, the BusConnects Infrastructure team has provided an active and prominent level of communication and engagement. This has included the provision and publication of a large number of draft designs, communication materials and support documents to assist in informing stakeholders from the Emerging Preferred Route phase all the way to the Preferred Route designs. The public consultation and engagement process has resulted in a considerable level of public awareness and understanding of the BusConnects CBC Infrastructure Work’s aims and objectives. It has also led to the BusConnects Infrastructure team having a keen appreciation of the many stakeholder issues and to be able to consider them during the draft design and planning phases of each individual Scheme.

In conclusion, the non-statutory public consultation rounds provided local and informative insights; allowed for considerable discourse and engagement and in many cases enhanced aspects of the draft designs. The public consultation has ensured that the BusConnects Infrastructure team were cognisant of stakeholder feedback and appraised of many local considerations as the designs evolved.

Launch of BusConnects Strategy by Minister for Transport, Tourism & Sport Shane Ross TD & NTA CEO Anne Graham - 29th May 2017

1A

BusConnects Transforming City
Bus Services Brochure May 2017

BUS CONNECTS

TRANSFORMING CITY BUS SERVICES

“The average daily traffic at the tolling point on the M50 for example, was almost 18% higher in 2016 than two years earlier in 2014.”

BusConnects Transforming City Bus Services

Ireland in 2017 has left behind the worst of the recession caused by the economic crises in 2007/2008. The economy is growing strongly; more and more people are at work; the number of visitors to the country is at record levels. But threats and challenges remain, with traffic and transport among the key problems facing the region.

Congestion is in danger of strangling the life out of our cities, and we need an ambitious public transport plan to get to grips with it.

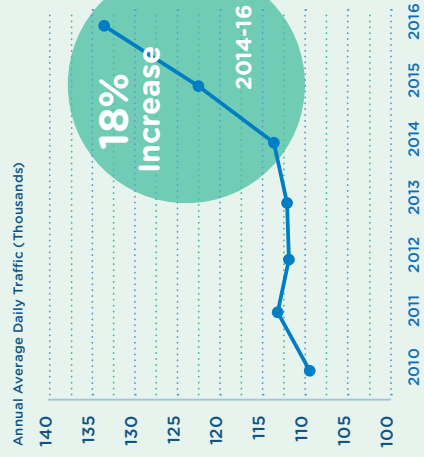

The number of cars on the roads is increasing. It takes longer to travel to work, to college and to school than last year or the year before. The working day is getting longer as traffic delays force people to leave earlier for work and return later each day.

As a barometer for the region, the average daily traffic at the tolling point on the M50 was almost 18% higher in 2016 than two years earlier in 2014.

Increased traffic means slower speeds and longer journeys. On the M50, the average journey from Junction 3 (at the M1) to Junction 6 (at the N3) took three times longer in 2016 than in 2010.

We see this across all of the major routes in the region. Using data from car navigation units, we know that average traffic speeds on main roads during the 8am to 9am peak hour, across the region, fell by almost 5.5% between 2014 and 2015.

Traffic at the M50 Toll

“Journeys by car in the morning peak hour take, on average, over 18% longer than just two years ago.”

This trend accelerated during 2016 with the average traffic speed across the region in the morning peak decreasing from 39.1 km per hour in 2015 to 33.7 km per hour in 2016, a fall of 13.8%.

As traffic speeds decrease, peoples’ journey times by car increase. On average, journeys by car across the region during the morning peak hour take over 18% longer than two years ago.

The situation facing the Dublin region is that:

- without decisive action, traffic congestion will continue to grow;
- it will impact the ability of the region to grow economically;
- longer journey times and increased travel stress will diminish many people’s quality of life; and
- environmental emissions targets will not be met.

If we want to make Dublin a better place to live, work and visit, we need a solution.

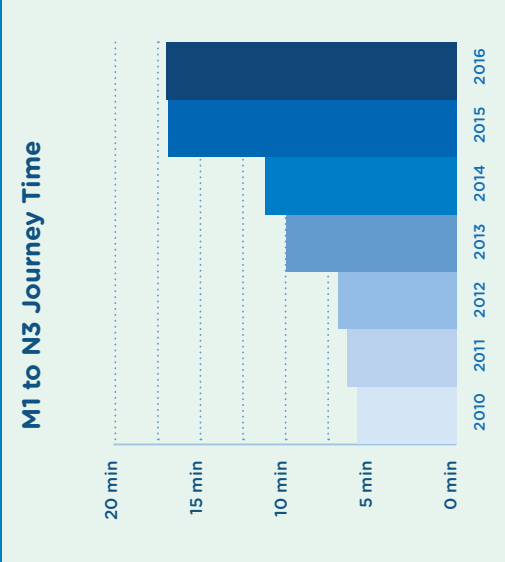

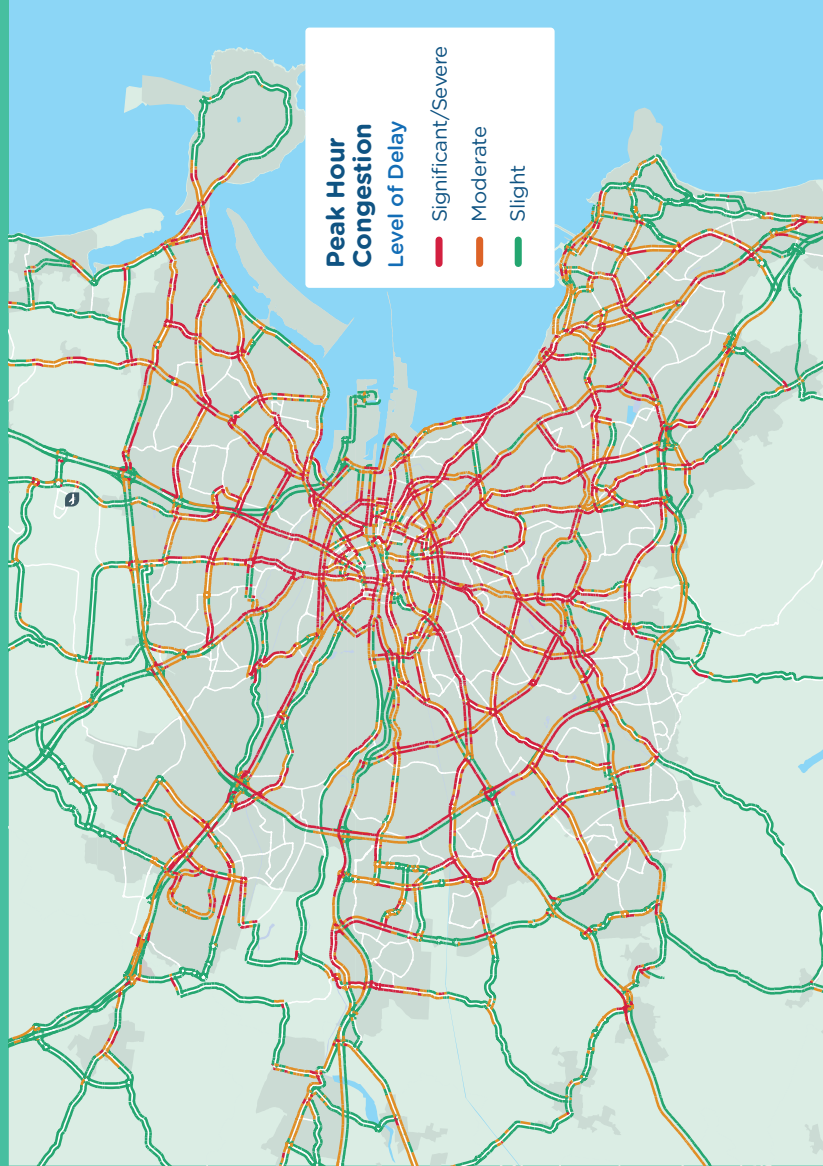

Fig 1: Peak Hour Congestion

Our solution

The Transport Strategy for the Greater Dublin Region 2016-2035 (“Transport Strategy”) provides a framework for transport development across the region over the next two decades. It identifies rail, metro and Luas projects that need to be implemented but, significantly, it recognises that the bus system will be the main form of public transport for most people and that the bus system needs to be fundamentally transformed to serve the needs of the region.

Dublin is a low density city - we don't have skyscrapers, and most people live in single house units. This means that very few areas of Dublin have the size and concentration of population to support rail-based public transport. For most corridors in Dublin, bus transport represents the optimum public transport solution.

We now need sweeping changes to our bus system to enable it to fully meet the needs of a modern public transport system; one which enables more people to travel to more places, conveniently and efficiently.

BusConnects is a plan to fundamentally transform Dublin's bus system, so that journeys by bus will be fast, reliable, punctual, convenient and affordable.

It will enable more people to travel by bus than ever before, and allow bus commuting to become a viable and attractive choice for employees, students, shoppers and visitors.

BusConnects aims to overhaul the current bus system in the Dublin region by:

- building a network of “next generation” bus corridors on the busiest bus routes to make bus journeys faster, predictable and reliable;
- introducing Bus Rapid Transit, a higher quality of bus system, on three of the busiest corridors;
- completely redesigning the network of bus routes to provide a more efficient network, connecting more places and carrying more passengers;
- developing a state-of-the-art ticketing system using credit and debit cards or mobile phones to link with payment accounts and making payment much more convenient;
- implementing a cashless payment system to vastly speed up passenger boarding times;
- revamping the fare system to provide a simpler fare structure, allowing seamless movement between different transport services without financial penalty;

- implementing a new bus livery providing a modern look and feel to the new bus system;
- rolling out new bus stops with better signage and information and increasing the provision of additional bus shelters; and
- transitioning - starting now - to a new bus fleet using low-emission vehicle technologies.

BusConnects represents a reimagining of the bus services for the Dublin region. It encompasses the revamping of all aspects of the bus system: from the ticketing technology to the road infrastructure; from the bus stops to the network of routes; and from the fare structure to the vehicle livery.

It represents a bold solution to a complex problem.

6 BusConnects Transforming City Bus Services

“The bus system needs to be fundamentally transformed to serve the needs of the region.”

A network of “Next generation” bus corridors

At the heart of the **BusConnects** project is the proposal to develop continuous bus lanes, as far as is practicable, along the busiest bus corridors.

The Transport Strategy sets out a network of bus corridors forming the “Core Bus Network” for the Dublin region. There are eleven radial bus corridors planned in addition to the Bus Rapid Transit routes, as well as three orbital bus corridors.

At present, these busy bus routes only have dedicated bus lanes along less than one third of their lengths. This means that for most of the journey, buses are competing for space with general traffic and so are affected by the increasing levels of congestion.

The resultant delays are a source of real frustration for people looking for consistent and predictable journey times. This makes the overall bus system less efficient, less reliable and less punctual. As a result, many people do not see any benefit in choosing bus transport.

Our objective is to develop these eleven radial bus corridors and three orbital bus corridors so that each will have continuous bus priority – in other words, a continuous bus lane in each direction. This “next generation” of bus corridors will deliver a transformation in the performance of these routes, making it easier and quicker for you to come and go by bus, whether your journey is related to your job, your studies, or your social life and family life.

We want to remove the current delays and uncertainties, so that in the future, bus journeys will be faster, more punctual and more reliable. Making those changes is an essential part of delivering a vastly improved service for passengers.

Achieving this will, in some instances, require a widening of the road and changes to parking arrangements, but the end result will not just be better services for bus passengers, but will benefit all users of the corridor.

Cyclists will be provided with safe cycling facilities, largely segregated from other traffic, along these routes. Pedestrians will benefit from additional safe pedestrian crossing points and reconstructed footpaths. Car users will have reduced interactions with cyclists and buses as well as resurfaced roadway providing smoother journeys with less wear on vehicles.

We will also take the opportunity of enhancing key local centres on the corridors with additional landscaping and other works aimed at improving the local environment in these centres.

Fig 2: Proposed Radial Bus + BRT Corridors

Fig 3: Proposed Orbital Bus Corridors

“BRT will be a great solution on some of the busiest routes forming the Core Bus Network.”

Bus Rapid Transit

Bus Rapid Transit (BRT) is a high-quality bus based transit system that delivers a service with higher speeds and quality of service than traditional bus services.

We’re planning to do this by improving road infrastructure and providing specially designed vehicles, with rapid, frequent operations and faster boarding and alighting.

We are proposing that a number of the Core Radial Bus Corridors will be developed as Bus Rapid Transit routes, where the passenger numbers forecast are approaching the limits of conventional bus route capacity.

BRT will represent a major step-change in the provision of bus services on some of the busier bus corridors in the Dublin region.

A typical BRT system uses multi-door vehicles, higher platforms for level boarding and stops that are spaced further apart than those that serve conventional buses. Using different vehicles than normal buses, a BRT route can cater for a higher volume of passengers than a normal bus corridor.

In designing the BRT details, we will ensure that it is fully integrated into the overall bus system, providing a coordinated overall network.

“Under BusConnects we are undertaking a major redesign of the bus network.”

Reimagining our network

The current system of bus routes and services in Dublin is complex. With about 130 different bus routes forming the Dublin Bus network, very few people would be able to describe the routes of more than a handful of those services and most users limit themselves to a few familiar routes.

In fact the foundations of much of the bus network dates back to tram routes that first ran in the 19th century! As a result, the bus network in Dublin is very radially focused, with most routes emanating outwards from the City Centre. Orbital bus services – routes that skirt the city – are few and far between. As a result, many bus journeys can only be made by firstly traveling into the City Centre on one radial route, and then taking another radial bus service out. Understandably, many people are not inclined to take the bus in these circumstances

Connecting between one bus route and another as part of the same journey is part and parcel of public transport in cities around the world, but for historic reasons it is not really part of the public transport culture in Dublin. We believe that a system

with greater scope for interconnection between routes, and where connecting passengers don't necessarily have to travel to the city centre, is one that would be far more attractive and convenient.

We want to move towards a system that minimises the overall period of time needed for most journeys and focusses transfers onto high frequency routes, cutting down waiting and journey times.

While much has already been achieved by Dublin Bus in making the network more efficient, the bus system across the Dublin region has the potential to operate much more effectively than it currently does. This will require a fundamental reconfiguration of routes and services.

Under **BusConnects** we are undertaking a major redesign of the bus network. As part of this we will establish exactly what people want from their bus service; where they want to go and when they need to get there. In a process of extensive consultation, we will figure out the best way to apply the wide array of resources we have available to us: infrastructure, fleet, staff, road space, subvention funding, etc, in a way that not just meets the expectations of the travelling public, but actually makes shifting to the bus an attractive proposition for more and more people. The proposals that come out of this process are likely to be radical and transformational.

Fig 5: Complexity of current network (high-frequency routes only shown)

“Currently over 70% of fare payments are made by Leap card.”

Fares and Ticketing Systems

Without changing the ticketing systems and the bus fares structure, the overall project would not deliver the full benefits that are possible under this transformation.

The second biggest source of bus delays, after traffic congestion, is the payment process at bus stops. Payment of fares by cash is still commonplace, slowing down the boarding time. Even when using the Leap Card, the complexity of payment stages means a high percentage of passengers have to interact with the driver, with resultant delays at bus stops. At busy bus stops these delays can be for several minutes. Multiply by the number of busy stops on a route, and those delays accumulate to add significantly to the overall journey time.

Under **BusConnects** we will simplify and streamline the process of paying for bus journeys. We want to make the fare system simpler, and we also want to make movement between different bus services seamless and easy, without financial penalty. This

will require a move to either a “tag-on” and “tag-off” facility, similar to Luas and DART, or a single “flat fare” approach in order to reduce the need to interact with the driver for fare payments.

As part of this process, cashless operation will be introduced on all buses, to remove the delays caused by cash payments. Currently over 70% of fare payments are made by Leap card. As this increases over the next couple of years, the transition to a cashless regime will become easier.

BusConnects will incorporate the latest developments in account-based ticketing technology, potentially allowing use of credit / debit cards or mobile devices as a convenient means of payment. This will also allow integration with other transport payments such as parking facilities and bicycle hire.

Fig 6: Sample Bus Livery Designs

Bus Livery

Legislation requires that the National Transport Authority “shall for the purposes of promoting public transport, design, develop and secure the implementation of a single brand to be used by all public transport operators providing services in accordance with a public transport services contract with the Authority.”

Under **BusConnects** we are proposing a new, fresh and modern look for the bus system by introducing a redesigned bus livery, which is the painted exterior of the buses. As well as reflecting the overall ambition of transforming the bus system, this will also accommodate the potential of additional operators providing bus services as part of overall network.

We will ensure that the new bus livery is attractive and conveys the image of a modern, effective transit system. We will seek people’s views on potential designs before a final bus livery is selected.

16 BusConnects Transforming City Bus Services

Bus Stops

Roadside facilities and roadside information are essential components of a modern bus system. Across the region, the current facilities do not reflect the standard needed to make the overall system attractive and easy to use.

Under **BusConnects** we will introduce a new style of bus stop to be rolled out across all bus stops in the Dublin region, with better route and fare information provided in each case and with timetable information specific to each stop. All operators will adopt this style and the current assortment of poles at multi-operator stops will be removed.

We will install more Real Time Passenger Information (RTPI) signs along the new bus corridors and elsewhere across the region, providing accurate next-bus arrival information.

Bus shelter provision will be significantly expanded as part of the **BusConnects** plan. A large number of additional bus shelters will be provided in new locations, particularly where connecting services are being provided.

18 BusConnects Transforming City Bus Services

“Complete transition to low-emission vehicles will begin in 2018.”

Low Emission Vehicles

Tackling the challenges of climate change is a national priority. **BusConnects** will contribute significantly to that objective.

Moving people from cars onto sustainable transport is essential in reducing CO₂ emissions and addressing congestion. In addition, we intend to transition to a fleet of low emission vehicles, further enhancing the environmental contribution of the bus system.

The exact low emission technology remains to be determined. Research is currently on-going into electric bus solutions, with the technology evolving rapidly and several manufacturers now bringing different vehicle options to market. Compressed natural gas / biogas are relatively mature technologies which are now extensively available to bus fleets.

As part of the **BusConnects** project, a decision on the optimum fleet technology will be made by the end of 2017, and either a single technology or a combination will be selected. A fleet acquisition plan will be developed to transition the bus fleet to low emission vehicle types, with the first vehicles under that strategy to go into service during 2018.

By 2023 half of the bus fleet, approximately 500 buses, will be converted to low emission vehicles. Full conversion will be completed by 2030.

Cycling facilities

The implementation of “next generation” bus corridors as part of **BusConnects** doesn’t just address the bus requirements along those routes – it also allows the creation of a “next generation” network of cycling facilities.

The major bus corridors also represent the major cycling arteries for the city. The reconstruction of these roads to provide the essential bus lanes that are needed for **BusConnects** also provides the opportunity to similarly transform the cycling infrastructure.

On each of the Core Bus Network corridors, we will provide high quality cycling facilities, segregated from the bus lanes and general traffic lanes as far as is practicable. When implemented, this will mean that inexperienced cyclists, as well as experienced cyclists, will be able to use these routes safely. A typical planned layout is shown above.

This benefits the bus system as well. It avoids cyclists sharing bus lanes with buses, where the bus speed can be limited to the speed of the slowest cyclist in the lane, and removes many of the conflicts that bus drivers have to deal with.

Accordingly, the implementation of **BusConnects** will also see the delivery of a network of key cycle routes, which form the foundation of the overall cycle network that has been planned for the Greater Dublin Area.

Park and Ride Facilities

Maximising the potential of the **BusConnects** project means enabling more people to use the bus services instead of private cars.

For those travelling longer distances, the optimum strategy is a park and ride arrangement, where they can make part of the journey by car, then leave the car in a dedicated car park and complete the journey by bus.

Bus-based Park and Ride needs careful siting of the car parks, coupled with a high frequency of bus service, to operate successfully. Ideally, the location of the parking facilities should be just outside the area of congestion and conveniently located for car users on the particular corridor.

As part of **BusConnects**, a network of park and ride facilities will be developed at key locations along the radial road network. Indicative locations are shown in Figure 8 - these will be subject to more detailed assessment as part of the project's delivery and may change. Additional locations may be added.

At each location, we are planning a high frequency bus service, primarily availing of the redesigned bus network. Where supplementary services are needed to ensure a comprehensive operation, these will be provided.

Parking charges and bus fares will be integrated, ensuring a seamless connection between the parking facility and the bus system.

Fig 8: Indicative Locations of Park and Ride Facilities

Overall Benefits

BusConnects is a plan to transform Dublin's bus system so that journeys by bus will be fast, reliable, punctual, convenient and affordable. It will enable more people to travel by bus than ever before, and allow bus commuting to become a viable and attractive choice for employees, students, shoppers and visitors.

For passengers

BusConnects will deliver:

- reliable and punctual bus services;
- faster journey times for passengers;
- comfortable, modern vehicles;
- high frequency service on busy routes;
- an easy to understand network;
- universal passenger information - at roadside, on apps and on vehicles;
- simpler fare structures and easier payment; and
- seamless integration with other transport types.

For businesses

BusConnects will:

- by improving transport, make Dublin a more attractive location for employers;
- increase potential employment catchment areas by providing new transport links;
- reduce commuting time for employees; and
- reduce car congestion and enhance the attractiveness of urban centres for shopping and social purposes.

**For cyclists
BusConnects will:**

- deliver a step-change in cycling facilities on the key radial routes into the city centre;
- provide safe cycling facilities, largely segregated from other traffic, along these corridors; and
- provide the opportunity for more people to cycle to work, school, college or for recreational purposes.

**For the environment
BusConnects will:**

- enable more people to use sustainable transport;
- transition the bus fleet to low emission vehicles;
- assist Ireland to meet its climate change targets; and
- provide a greener transport system for everyone.

**For visitors
BusConnects will:**

- ensure a simpler and more understandable bus transport system;
- enable easy use of the bus system, without the need to purchase advance tickets or payment cards;
- make more places accessible for visitors and tourists; and
- reduce the impacts of traffic congestion in urban centres.

Costs and Delivery

Transforming the bus system requires investment. Delivering all of the elements of **BusConnects**, inclusive of bus lanes, BRT and ticketing systems, will cost over €1 billion. The exact cost will be finalised when the designs of the various components of the project have been progressed.

Delivering **BusConnects** will take a number of years, with the exact time period dependent on the level of funding each year.

But implementation can start quickly. The bus network redesign is already underway and the rollout of the revised network can commence in 2018. Early stage engineering designs have been advanced on some of the Core Bus Network corridors and on the BRT routes. Following receipt of planning consent, construction of each of these corridors could be completed over two to two and a half years, with several of the corridors able to be constructed concurrently.

Other elements of the overall **BusConnects** project can also be quickly progressed subject to the availability of the necessary funding. With sufficient investment and subject to the appropriate planning approvals, the benefits of the **BusConnects** project can start coming on-stream from 2019.

4

What's the Solution?

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

- Dublin's low density layout means the bus system forms the backbone of the region's public transport system
- Tackling the region's congestion issues means focussing on the bus system
- BusConnects** is a plan to fundamentally transform Dublin's bus system, so that journeys by bus will be fast, reliable, punctual, convenient and affordable.
- BusConnects** will enable more people to travel by bus than ever before, and allow bus commuting to become a viable and attractive choice for employees, students, shoppers and visitors.

5

BusConnects: What is it?

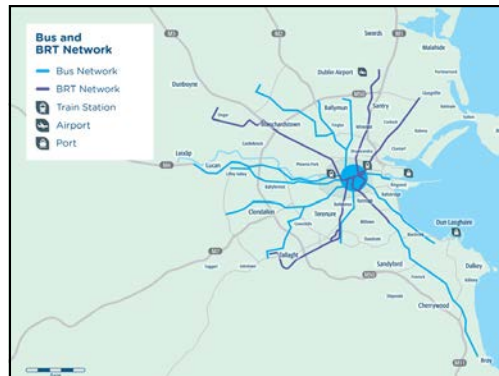

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

- A Network of "Next Generation" Bus Corridors with segregated cycling
- Three Bus Rapid Transit Routes
- Complete Redesign of Bus Network
- Simpler Fare Structure
- Cashless Payment System
- State-of-the-art Ticketing System
- New Bus Livery
- New Bus Stops + Shelters
- Use of Low Emission Vehicles

6

7

8

9

10

11

12

Bus Rapid Transit (BRT)

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

- To provide extra passenger capacity on certain busier corridors Bus Rapid Transit is proposed.
- BRT will represent a major step-change in the provision of bus services on some of the busier bus corridors in the Dublin region.
- A typical BRT system uses multi-door vehicles, higher platforms for level boarding and stops that are spaced further apart than those that serve conventional buses.
- Using different vehicles than normal buses, a BRT route can cater for a higher volume of passengers than a normal bus corridor.

National Transport Authority

Bus Network Redesign

14

Redesigning the Bus Network

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

- With over 130 routes (excluding Nitelink and Expresso) the current system of bus routes is complex, radially focussed and with limited orbital connections.
- The system is not designed to allow easy interchange between services.
- Under **BusConnects** we will undertake a major redesign of the bus network.
- The objective of this redesign is to make the system more efficient and to carry more passengers to more places for broadly the same cost as the current system.
- The proposals that come out of this process are likely to be radical and transformational.

15

Auckland, New Zealand

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

- Map of frequent bus route **before** redesign

16

Auckland, New Zealand

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

- Map of frequent bus route **after** redesign
- No increase in operating budget
- Achieved through reduction of service duplication and enabling interchange
- 19% increase in passenger journeys following redesign

Náisiúnta Iompair
National Transport Authority

Ticketing Systems and Fares

18

Ticketing Systems and Fares

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

- Without changing the fares structure, moving to cashless travel and investing in new ticketing systems, the full benefits of the **BusConnects** project wouldn't be delivered.
- Fares will be made simpler, and the financial penalty of taking a second bus for one journey removed.
- Will consider a single fare structure but more likely will move to a tag-on **Leap** tag-off arrangement.
- This will remove the current major delay at bus stops where a high proportion of passengers still have to interact with the driver, even when paying by Leap Card.
- BusConnects** will incorporate the latest developments in account-based ticketing technology, potentially allowing use of credit / debit cards or mobile devices as a convenient means of payment. This will also allow other transport payments such as parking facilities & bicycle hire.

Bus-Based Park and Ride

26

Park and Ride

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

- Bus-based Park & Ride will supplement the network of rail-based Park & Ride sites.
- A number of potential locations have been identified along the key radial road routes - more locations may be added
- Will be integrated into the Bus Network Review to optimise efficiency

27

Outcomes

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

- **BusConnects** will deliver a transformation of the bus system in Dublin
- It will provide a real choice for thousands of people – a fast, reliable bus journey versus traffic delays and congestion
- With continuous bus lanes, journey times on many bus routes will reduce by a third or more. More importantly, those times will be reliable and people can plan their bus journey with confidence
- The redesigned network will connect more people to more places
- **BusConnects** delivers across the whole region – not just focussed on one corridor
- For cycling it delivers the most important sections of the planned cycle network, providing high quality, safe, largely segregated cycling facilities
- It transitions Dublin from a congested city with inadequate public transport to a city with a modern, efficient and effective bus system providing a world-class bus transport service.

28

Some Next Steps

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

- First public consultation on the Bus Network Redesign element will be in early June. This will involve a strategic "Choices Report" setting out the competing network concepts at a high level.
- Public engagement in relation to the details of the redesigned services will be undertaken in Q1 of 2018.
- A major public consultation to commence later this year, giving details of the proposals for the individual corridors including the BRT routes.
- Planning process for bus lanes and BRT proposals is likely to require An Bord Pleanála approval.
- Tender for low emission bus vehicles later this year.
- Roll-out of new bus stops to commence next year.

Thursday, 24th May - You are cordially invited to attend the launch of the NTA's "BusConnects" strategy on Monday 29th May in the Irish Film Institute located at 6 Eustace Street in Temple Bar. The Minister for Transport, Tourism and Sport Shane Ross TD will launch "Bus Connects" alongside the CEO of the NTA, Anne Graham. The launch event will feature opening remarks, a video presentation of the new strategy and a short Q&A session.

ENDS/

Press Release issued on 29th May 2017:

PRESS RELEASE

BUSCONNECTS CAN INCREASE BUS PASSENGER NUMBERS BY 50% - NTA

Ambitious suite of initiatives will transform bus services in Dublin region

BusConnects, a suite of initiatives to radically transform public transport in the Dublin region, was launched today by Minister for Transport Sport and Tourism Shane Ross, and Anne Graham, Chief Executive Officer of the National Transport Authority.

The ambitious proposals will put bus services at the heart of the solution when it comes to addressing congestion in the capital.

The total cost of BusConnects is estimated to be over €1b, some €300m of which is already committed under “Building on Recovery”, the 2015 capital plan.

BusConnects proposals include:

- ▶ Next generation bus corridors
- ▶ Bus Rapid Transit
- ▶ Redesigning the network of bus routes
- ▶ State-of-the-art ticketing system
- ▶ Cashless fare payment system
- ▶ Simpler fare structure
- ▶ Refreshing the bus livery
- ▶ Rolling out new bus stops with better signage and information
- ▶ Cleaner technology

When there are so many better things we could be doing -

whether that’s spending time with family, out with friends, going to a movie or a match - nobody wants to be stuck in traffic.

Anne Graham said: “Thanks to BusConnects, just about everybody will be able to beat the congestion by using the bus rather than a car, to get around.

“We believe that there is potential to increase bus passenger numbers by at least 50% over the lifetime of the project, which would represent a significant step-change in how people get from place to place.

“This can only happen if measures are put in place to make bus travel more convenient, more reliable and more appealing and we believe that BusConnects will do precisely that.

“In 2015, the Government’s Capital Plan earmarked €3.6b for investment to progress public transport projects. These included Metro North, Dart Expansion to Balbriggan and

Maynooth, Dart Underground, Luas Cross City and the Phoenix Park tunnel among others.

“As we approach the mid-term review of the capital plan, a strong commitment to these projects remains. In fact Phoenix Park Tunnel is now operating very successfully and Luas Cross City is close to completion.

“But Dublin is a low density city which means that that very few areas of Dublin have the size and concentration of population to support rail-based public transport. For most areas, bus transport represents the best public transport solution.

“In any case, rail projects typically have lead-in times of 8-10 years, and with congestion continuing to worsen every month, more immediate solutions are required.

“That is why today, the plans we are publishing are primarily about investing in bus transport. They sit alongside our longer-term commitments to the rail

corridors, and complement them. These solutions will generally have a much shorter turn-around time, which means that we can make travel by bus an increasingly attractive option for commuters all across the network, sooner rather than later.

“By investing in our bus services, we will make the city a better place, and a more attractive place to work, play or invest in.”

Minister Ross said: “We have seen remarkable growth in our economy in recent years, and that recovery is continuing.

“That means more jobs, more people at work, more people out socialising, and more people visiting, all of which is to be welcomed.

“But it does place a strain on our transport infrastructure, and we’ve all seen the congestion in the city and across the region, that arises as a result.

“The proposals being put forward today can transform

Dublin’s bus system in a fundamental way, so that when it comes to speed, punctuality, reliability and convenience, journeys by bus can be better than ever before.

“BusConnects will mean more people travelling by bus and will allow bus commuting to become a more viable and attractive choice for employees, families, students, shoppers and visitors.

“It will mean that using the bus rather than the car to get around, will make more sense for more people.

“And it will add to the energy, vibrancy and dynamism of a great city.”

1. Introduction

1.1 Overview

A major investment programme to improve public transport in Dublin is underway. The three major elements of that overall programme are:

1. The **MetroLink** project which is the development of a north-south urban railway service that will run between Swords and Sandymount, connecting key destinations including Dublin Airport and the City Centre along the 26km route;
2. The **DART Expansion Programme** will see the implementation of high frequency DART services to Drogheda on the Northern Line, Celbridge/Hazelhatch on the Kildare Line, Maynooth and M3 Parkway on the Maynooth/Sligo Line, while continuing to provide DART services on the South-Eastern Line as far south as Greystones; and
3. **BusConnects Dublin**, a plan to fundamentally transform Dublin's bus system, so that journeys by bus will be fast, reliable, punctual, convenient and affordable in addition to radically enhancing our cycling infrastructure.

Once completed this integrated public transport network will provide new opportunities for travelling. It will enable easier, more reliable and flexible travel across a range of modes. There will be new destinations for people. The network will facilitate new ways to get to work, education and leisure purposes. It will also ensure much quicker travel times than currently possible. Figure 1 shows the network of high capacity public transport corridors – bus, rail, metro and Luas – that will be in place in 2027.

This document is an update on the infrastructure aspects of the BusConnects Dublin project which is the building of a core bus corridor network. This consists of 16 radial core bus corridors, which will be supplemented at a later stage with a network of orbital corridors.

1.2 What is BusConnects Dublin?

BusConnects Dublin provides the foundation to this overall transport system, with the revised bus system projected to carry the majority of passengers across the region and provide key linkages to serve the needs of Dublin into the future.

BusConnects Dublin aims to overhaul the current bus system in the Dublin region by:

- building a network of new bus corridors on the busiest bus routes to make bus journeys faster, predictable and reliable;
- completely redesigning the network of bus routes to provide a more efficient network, connecting more places and carrying more passengers;
- developing a state-of-the-art ticketing system using credit and debit cards or mobile phones to link with payment accounts and making payment much more convenient;
- implementing a cashless payment system to vastly speed up passenger boarding times;

- revamping the fare system to provide a simpler fare structure, allowing seamless movement between different transport services without financial penalty;
- implementing a new bus livery providing a modern look and feel to the new bus system;
- rolling out new bus stops with better signage and information and increasing the provision of additional bus shelters; and
- transitioning - starting now - to a new bus fleet using low emission vehicle technologies.

BusConnects Dublin is a programme of integrated actions which, together, will deliver a bus system that will enable more people to travel by bus than ever before, and allow bus commuting to become a viable and attractive choice for employees, students, shoppers and visitors. Many of these initiatives are already underway including the core bus corridor project and the Dublin area bus network review.

But it is not just the bus system that will be transformed under BusConnects Dublin. The same corridors that are important for buses are also the main cycling routes into the city centre. BusConnects Dublin will see safe cycling facilities provided along each corridor, segregated as far as practicable from other traffic. The cycling infrastructure delivered under this programme will form the core of the region's cycling network and deliver a radical step-change in cycling facilities in Dublin.

1.3 Consultation Timeline

Over the coming months we intend to undertake two major public consultations in relation to **BusConnects Dublin**. These are:

While comments in relation to this document are welcome and can be submitted, there will be a full opportunity to provide comprehensive feedback and views as part of the Sept/Oct consultation process, when fuller details of the proposals are developed.

July 2018:	Public consultation on the redesigned network of bus services. Work is on-going on redesigning the network of bus services that operate throughout Dublin. We want to redesign the overall network of bus services to allow more people to get to more places in a shorter time than is the case at present. Plus we want the network to be simpler and easier to use. A report setting out proposals for the revised system of bus routes will be published and feedback sought.
Sept/Oct 2018:	Public consultation on the bus infrastructure proposals – the bus lane project for the radial Core Bus Corridors identified later in this document. It is intended that fuller details of the various corridors will be developed and made available as part of this consultation process.

2. Growing Congestion

2.1 Congestion Issue

Ireland continues to emerge from the severe economic recession of recent years and the associated high levels of unemployment that existed during that time. The economy is growing strongly; more and more people are at work; the number of visitors to the country is at record levels. Alongside the recovery, however, are growing challenges, with traffic and transport among the key issues facing the Dublin region.

During the recession transport levels fell dramatically due to factors such as reduced business activity, people spending less money, emigration and unemployment. Travel in and out of Dublin City Centre each morning (7am to 10am) dropped from 207,379 people in 2006 to 181,042 in 2010, a decrease of 13%. Overall numbers using bus fell by 16% while rail passengers decreased by 30%. As well as reduced public transport usage, the number of cars and commercial vehicles on our roads also decreased. Congestion during this time was less and travel times became shorter as the roads had fewer vehicles using them.

Now in 2018 that position has changed dramatically. Traffic levels have grown steadily since the economy began to recover and congestion is now one of the most significant challenges facing the region. It is predicted that the population for the Dublin region will grow by 25% by 2040, bringing the population to almost 1.5 million in the region.

Forecast Population Growth in Dublin Region

2.2 Impact on Bus Travel

Congestion impacts many aspects of people's lives negatively, and without intervention it will continue to diminish people's quality of life while also putting economic growth at risk.

From the perspective of public transport, congestion is a major problem. On the busiest bus routes, bus lanes are only in place for less than one third of the corridor. This means that for most of the journey, buses are competing for space with general traffic and so are also affected by the increasing levels of congestion.

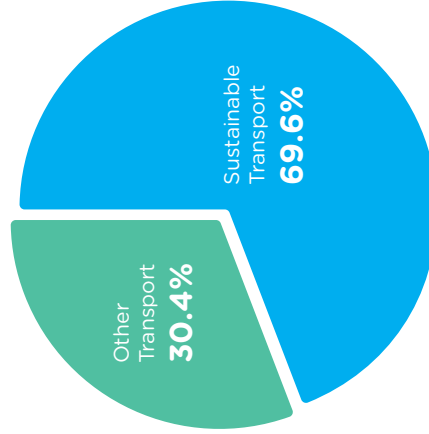

As a result, whereas bus journeys should be fast, reliable and predictable, the increasing impact of congestion is undermining that objective. Additional buses are being added to the system simply to compensate for delays in journey times. So, where a bus could complete a route journey in 90 minutes during peak hours and return after a short turnaround, that journey is now taking longer and an additional bus and driver is needed to provide the return leg in order to maintain the timetable of services.

More people are now travelling into Dublin City Centre each day than ever before. In 2017, a total of 211,000 people crossed the "canal cordon" to access the city centre during the 7am to 10am morning peak. This is higher than during the 'Celtic Tiger' boom years, and the numbers are increasing year on year.

The means by which people access the city centre has changed over the last decade. Now 70% approximately of people travelling into the city each morning do so by sustainable transport- walking, cycling, bus, rail or luas. Cars only account for 30% of travel.

Of these numbers entering Dublin City each day, the majority use the bus for this journey. As those numbers grow, and as congestion worsens, it is becoming increasingly difficult to operate a reliable bus system with sufficient capacity to cater for the needs of the region.

Canal Cordon average daily trips

Sustainable transport: Bus, Rail, Luas, Taxi, Walk, Cycle
Other transport: Car, Goods Vehicles, Motorcycles

2.3 Why is the bus system important?

The bus system is important because, simply put, it is the main component of the solution to address our current congestion problem and to meet our future transport needs. As Dublin is a low density city there are few areas with the size and concentration of population for rail-based public transport. This means that for most corridors in Dublin, bus travel represents the optimum form of public transport.

Dublin Bus carried 137 million passengers in 2017. When combined with Bus Eireann commuter services in the Dublin region, 143 million passengers were carried on State operated bus services in the Dublin area, compared with 38 million on Luas and 33 million passengers on the DART and rail commuter services.

In percentage terms, the bus system accounts for over 67% of public transport passenger journeys in the Greater Dublin Area. That means that whilst the bus carries two thirds of all public transport passengers, the Luas carries 18% and DART and commuter rail services deliver the remaining 15%.

In terms of geographical reach and coverage, bus operations extend across every corridor in the Dublin region. Luas operates only two fixed lines - Red and Green and rail services are limited to four railway services - Kildare, Maynooth, Northern and South-eastern lines.

Because of its regional coverage and its flexibility, the bus system is, and will continue to be, the main form of public transport for most people across the Dublin region. It is the backbone of public transport services and carries multiples of the numbers of passengers carried by Luas and DART/Commuter Rail.

As such the bus system is the foundation for the future of Dublin's public transport service. It is vital that we invest now in ensuring that it can properly perform this role into the future.

Percentage of passenger journeys per mode in the Dublin Region

3. Details of the Core Bus Corridor project

3.1 Overview

The focus of this part of the BusConnects Dublin programme is the delivery of the Core Bus Network, the bus lanes that are needed to make the bus system operate efficiently, reliably and punctually. Our intention is to develop these bus corridors so that each will have continuous bus priority – in other words, a continuous bus lane in each direction. This will remove the delays currently being experienced, which will grow worse as congestion increases, and allow the buses to transport their many thousands of passengers with greater certainty about the arrival times to their destinations.

Our plan is being developed using all available data and forecasting to understand past trends and events. It takes into consideration the current situation and the challenges and opportunities that Dublin will face over the coming decades. Projections of a future without BusConnects Dublin clearly indicate that journey times will continue to erode and congestion will worsen. The following outlines the plans to vastly improve and enhance the travelling experience of bus users and cyclists.

16. Ringsend to City Centre

3.2 What a typical layout will achieve

Overall, the proposal envisages the provision of about 230 kilometres of bus lanes on sixteen of the busiest bus corridors in Dublin, which we refer to as “Radial Core Bus Corridors”. These corridors are shown in Figure 2.

In addition to the radial core bus corridors, there is also a plan for enhancement of the orbital bus corridors as part of BusConnects Dublin. These proposals will form a separate plan which will be advanced at a future date. The proposed orbital routes are shown in Figure 3.

Our objective is to provide a continuous bus lane in each direction as well as maintaining two general traffic lanes. In addition, we also want to provide a dedicated cycle track on each side of the road, providing safe cycling facilities, segregated from other vehicular traffic. The typical road layout also includes footpaths for pedestrians and supporting elements such as pedestrian crossings at all key road crossing points, and bus shelters for waiting passengers.

The typical road layout that we want to achieve on these radial core bus corridors is set out as shown in Figure 4.

However, this typical road layout is difficult to achieve in practice and the next section sets out the challenges that we face in trying to implement this layout. Further information on the difficult choices that have to be made are included in the preliminary route maps detailed in the Appendix.

Figure 3: Future Orbital Bus Corridors

Figure 4: Typical Road Layout

3.3 Preliminary route maps

The Appendix to this document provides preliminary route maps for the sixteen Radial Core Bus Corridors. These maps set out a preliminary proposal for each of the bus corridors, together with some of the key impacts, issues and challenges that relate to the particular corridor. All of the routes and options are indicative only at this stage.

Without the transformed road infrastructure, the bus system will deteriorate in performance. Growing congestion will mean that bus journeys will take longer and become more unreliable. It simply will not be a realistic alternative for many people and will not provide the capacity to transport the many thousands of extra passengers that it will need to move each day to deal with the growing traffic congestion problems of the region.

As detailed in Section 1.3, there will be a formal public consultation phase later this year seeking feedback and comments on the emerging proposals.

16 BusConnects Transforming City Bus Services

4. The Challenges

It's important to acknowledge that the choices required to deliver this step-change in the performance of the bus system will be difficult. However, the decision-making needs to be done now and not postponed until the problem is far greater. Some of the decisions may be hard but they are being made because we believe in these plans and in their potential to fundamentally transform the way public transport works in Dublin.

Dublin is a medieval city. Its streets and roads have developed and evolved over centuries dating back to the Viking era. Needless to say the streets were not designed to move the number of people that now need to travel in and out of the city each day. Some of the city's inner suburbs date back to Victorian times, with road layouts designed for far more modest levels of traffic than we see today.

It could never have been envisaged over the centuries, that Dublin would become the metropolitan city it is today and that hundreds of thousands of people would be moving through the city centre on a daily basis.

Our challenge now is to respond to the needs of a modern city by providing a fit-for-purpose bus system, built on a streetscape that dates back centuries. That means difficult decisions will have to be made.

- Will we need to widen roads?
- Will we have to convert current traffic lanes to bus lanes?
- Will we need to restrict on-street parking?
- Will we need to remove trees or parts of front gardens?

The answers to the above questions will be yes. These are tough choices which cannot, and will not, be made lightly. Not all the impacts will be felt equally and some locations will require more changes than others. Over the years modifications that were easier to implement - the ones that caused little or no disruption - have been made. This means that there are no longer any simple changes which we can make that would generate meaningful benefits.

So we now need to make significant changes if we are to allow Dublin to grow and flourish into the future. Quite simply, if we genuinely want to put in place a much better public transport system, our bus system, which carries over two-thirds of Dublin's transport passengers, has to be upgraded to meet the future demands that are going to be placed upon it.

If we decide not to make these changes now, then we need to accept that Dublin will become increasingly congested and a less attractive place to live and work, both for us and for future generations.

BusConnects Transforming City Bus Services

4.1 Likely impacts

Traffic movement

By creating more priority for buses and cycling there will be changes to how traffic currently moves around the streets. Some roads may become one-way, new bus-only sections will be introduced and in some places general traffic will have to take new routes in and out of the city. Additional cycle routes which will be built, generally segregated from vehicular traffic and pedestrian crossings will be added and moved in some areas.

Acquisition of Parts of Gardens

Because there is so little unused space along these busy roads, it will often not be possible to accommodate the bus lanes and cycle lanes in the width available. In order to achieve the required space it will be necessary, in places, to acquire parts of front gardens and land in front of commercial properties to allow the bus and cycle lanes to be provided. This would require rebuilding new garden walls a short distance back from the existing road boundary.

Reduction of On-Street Parking

Because the roads we are widening travel through residential and business areas there will be a need to reduce the amount of on-street parking to accommodate the new layout.

Removal of Trees

As with the need to remove some parts of front gardens and footpaths, there will be also be a need to remove trees along some of the corridors. The Public Consultation stage later this year will have details and locations of the trees and lands impacted, once the initial designs are developed.

Road Works and Construction Sites

Widening roads, and building bus and cycle lanes, requires a certain amount of construction work. There will be excavation of the existing roads, plus parts of gardens and footpaths where needed. There will be resurfacing, kerbing, replanting and landscaping. During the construction stages, the construction sites will be localised and managed on a road by road basis. As with any work site and road works, there will be a certain level of noise, dust and temporary traffic diversions.

The size of each work site and the hours of working will have to take into consideration the residential nature of many of the roads. Traffic management will be very important to keep the traffic moving and ensuring local access for people and deliveries is always maintained.

20 BusConnects Transforming City Bus Services

4.2 Our plans to mitigate those challenges

Obviously these challenges and impacts are significant. Some roads will be impacted more than others. Some of the impacts will mean different things to different people depending on where they live and their homes. We are in no way underestimating or making light of the issues people will face, and that is why we are stating them clearly at this early stage.

Every feasible option will be looked at to minimise the disruption to people, their properties and the wider local community. Where there is simply no viable alternative, and where we know we have to remove trees, parts of gardens or parking, we will ensure appropriate mitigation measures are put in place, wherever practicable.

A defined set of guidelines and principles for mitigation, compensation and reparation will be developed in advance of planning permission being sought. Below are some of the measures that we envisage will be included. This list is not exhaustive and we anticipate that there will be other concerns.

- Where lands, such as parts of gardens, are being acquired for widening – we will purchase the portion of front gardens from property owners; ensure new landscaping and replanting of the gardens as well as providing compensation for the garden portion loss and disruption.

- Where trees are removed from roadsides and footpaths – we will put in place a comprehensive replanting programme. This programme will use mature or semi-mature ready-grown trees where appropriate and, where it is feasible, plant them as close as possible to the original locations.
- Where there is a loss of on-street parking or private parking space – we will seek to provide, where feasible, alternative parking close by for residents and businesses.
- Where private and public walls or fencing are removed – we will rebuild new garden walls and replace fencing where gardens have been affected and shortened. Also, where public or commercial walls and fencing have been taken they will be rebuilt and replaced.
- We will look for areas along the busy corridors where it is possible to improve the existing local spaces and the existing landscaping. It is important to use this opportunity to not only replace what is removed but to enhance the local areas. To do so, we will provide funding support for urban centre improvements and creating attractive local environments.
- Where traffic is diverted and re-routed, adequate signage and road markings will be provided for people to find their way. Also, local access will be maintained where new bus-only sections or one-way systems are brought in for residents and commercial properties.

22 Bus Connects Transforming City Bus Services

5. The Benefits

5.1 How will this plan benefit cyclists and pedestrians?

This plan is not just about buses, in fact, this plan will provide much needed cycling facilities and make it easier and more attractive to cycle around the city region. Given the increasing number of cyclists across Dublin there is an imperative to provide safe and segregated cycling facilities where possible.

The major bus corridors across Dublin city are also the main cycling arteries. The widening of these roads for bus lanes provides the opportunity to transform the cycling infrastructure at the same time.

On each of the 16 radial core bus corridors our objective is to provide high quality cycling facilities, segregated from the bus lanes and general traffic lanes as far as is feasible. We calculate that over 200kms of cycle tracks/lanes will be either built or current lanes improved upon. A better cycling network is good for all transport users. It avoids cyclists sharing bus lanes with buses and will remove many of the conflicts between buses and cyclists. This initiative is the foundation of the overall cycle network that has been planned for the Greater Dublin Area.

In addition, we will also use this unique opportunity to make a better environment for pedestrians as we improve these corridors. In particular, we will improve the quality of footpaths and pedestrian crossings as well as improving pedestrian facilities at junctions. We will also enhance key local centres with additional landscaping and outdoor amenities.

5.2 Journey Time Savings

In 2017 almost 13,000 people took part in a survey regarding the current bus network and services. Of those who took part the most important goals for public transport for them are - reduce the dependence on private cars, limit traffic congestion and make the city an attractive place to live and work. These things clearly matter to people and how they value their quality of life and use of their time. These goals can be achieved by providing dedicated bus lanes to ensure punctuality, reliability and increased frequency of services.

The core bus corridor project will deliver journey time savings of up to 40-50% on each corridor. With the implementation of BusConnects Dublin people travelling on these routes will reach their destinations much faster than they currently do. Just as importantly, they can have greater certainty about when they will arrive at their destination, because their bus will no longer be affected by general traffic congestion. However, the future without BusConnects Dublin will see a significant deterioration in journey time; people will spend more time stuck in traffic and take longer to get to their destinations.

The core bus corridor project will deliver on improving journey times and creating certainty and confidence in the bus system. Improving the current journey times on the key bus corridors will make bus travel more attractive, will improve the efficiency of the services and give people the reliability of knowing exactly how long their journey will take.

5.3 Building a sustainable, living city for families and communities

BusConnects Dublin is about making travelling by bus a better option. By providing a high-quality, frequent and reliable bus service, we can make Dublin a more attractive place to live, work and visit.

With proper bus prioritisation measures in place, it will be much easier to provide a bus service that is quick and efficient, and that gets people where they need to be, with a minimum of stress. That means that for anybody that needs to get around the city, or from one part of Dublin to another, taking the bus will make more and more sense.

With quicker journeys and services whose reliability is not undermined by traffic congestion, the city will seem like a smaller, more accessible place and everywhere will be within an easy bus ride of just about anywhere else.

All of Dublin – all of its colleges, offices, retail streets; all of its coffee shops, old and new; all of its pubs and bookshops; all of its restaurants and theatres; all of its character – will be opened up, to all of its citizens and all of its visitors.

26 Bus Connects Transferring Key Bus Services

5.4 Taking seriously our climate change responsibilities

Tackling the challenges of climate change is a national priority and BusConnects Dublin will contribute significantly to that objective.

Already significant progress has been made in this regard and the days of buses spewing out black plumes of diesel exhaust are thankfully consigned to history. But more needs to be done to protect our communities from the harmful effects of gases and other emissions.

Moving people from cars onto sustainable transport is a key component in reducing CO2 emissions, in addition to addressing congestion with its adverse environmental impacts. But in addition to those beneficial impacts, we want to transition to a fleet of low emission vehicles, further enhancing the environmental contribution of the bus system.

Substantial research is currently on-going into electric bus solutions, with the technology evolving rapidly and several manufacturers now bringing different vehicle options to market.

A fleet acquisition plan will be developed to transition the bus fleet to a low emission vehicle type (or types), with the first vehicles under that strategy to go into service very soon.

5.5 Supporting the economy and jobs

A well-functioning public transport system is a basic requirement for any metropolitan area that aspires to providing plenty of good employment opportunities for its people into the future. With bus, rail and trams, Dublin boasts some really great services but if we are to maintain our capacity as a city, a region and a capital, to continue to attract the best jobs and the best employers, we will have to do more, and urgently.

By improving the overall public transport offering, these proposals will make commutes shorter and more reliable, and will therefore make Dublin a more attractive location for employers.

It will also make it easier for people to get out and enjoy the city and all it has to offer, which is good news for businesses in the city centre and beyond.

BusConnects Transforming City Bus Services

6. Contact Us

This document provides an update on BusConnects Dublin and the work being undertaken in planning the bus lane infrastructure which is at the heart of BusConnects Dublin. Please feel free to contact us for further information or queries you may have.

In relation to the individual corridors, work is continuing on assessing options and developing proposals which will be published for public consultation in September / October this year. Accordingly, more detailed information on the individual corridors will not be available until that later consultation stage.

The www.busconnects.ie website will provide regular updates as the project develops. In addition the email address is info@busconnects.ie and Freefone **1800 303 653**. If you would like to contact us by post or to receive printed copies of this document you can also write to us:

The preliminary route maps shown on the following pages are indicative only and are subject to change following consultation and as part of the design development process.

Clongriffin > City Centre

Core Bus Corridor (bus & cycle infrastructure)

1

Key Facts

- Route length **10kms**
- Current bus journey time up to **65mins**
- BusConnects journey time **30-35mins**
- Future bus journey time without BusConnects **85mins +**

Potential Impacts

- Parts of front gardens removed
- Loss of parking spaces
- Changes to traffic movements
- Loss of trees

Additional Specific Challenges on Route

- Malahide Road between Fairview and Griffith Avenue: Due to restricted road width in this area, a proposal is to re-route cyclists via Brian Road and Charleton Road.
- New public transport only road link between Clarehall and Belmayne Avenue.

- Bus Route
- Alternative Cycle Route

Swords > City Centre

Core Bus Corridor (bus & cycle infrastructure)

2

Key Facts

- Route length **12kms**
- Current bus journey time up to **71mins**
- BusConnects journey time **40mins**
- Future bus journey time without BusConnects **80mins +**

Potential Impacts

- Parts of front gardens removed
- Loss of parking spaces
- Changes to traffic movements
- Loss of trees

Additional Specific Challenges on Route

- Swords Road in Santry from Shanrath Road to the Omni Centre: If bus lanes were provided in each direction, this street would then only be able to accommodate one general traffic lane. Under this arrangement, the street would become one way (outbound) for general traffic, with inbound traffic routed via Coolock Lane and Santry Bypass. A new slip road would be incorporated to link the southbound Santry Bypass to Shantalla Road.

- Bus Route
- Alternative Cycle Route

Ballymun > City Centre

Core Bus Corridor (bus & cycle infrastructure)

Key Facts

- Route length **6kms**
- Current bus journey time up to **45mins**
- BusConnects journey time **20-25mins**
- Future bus journey time without BusConnects **55mins +**

Potential Impacts

- Parts of front gardens removed
- Loss of parking spaces
- Changes to traffic movements
- Loss of trees

Additional Specific Challenges on Route

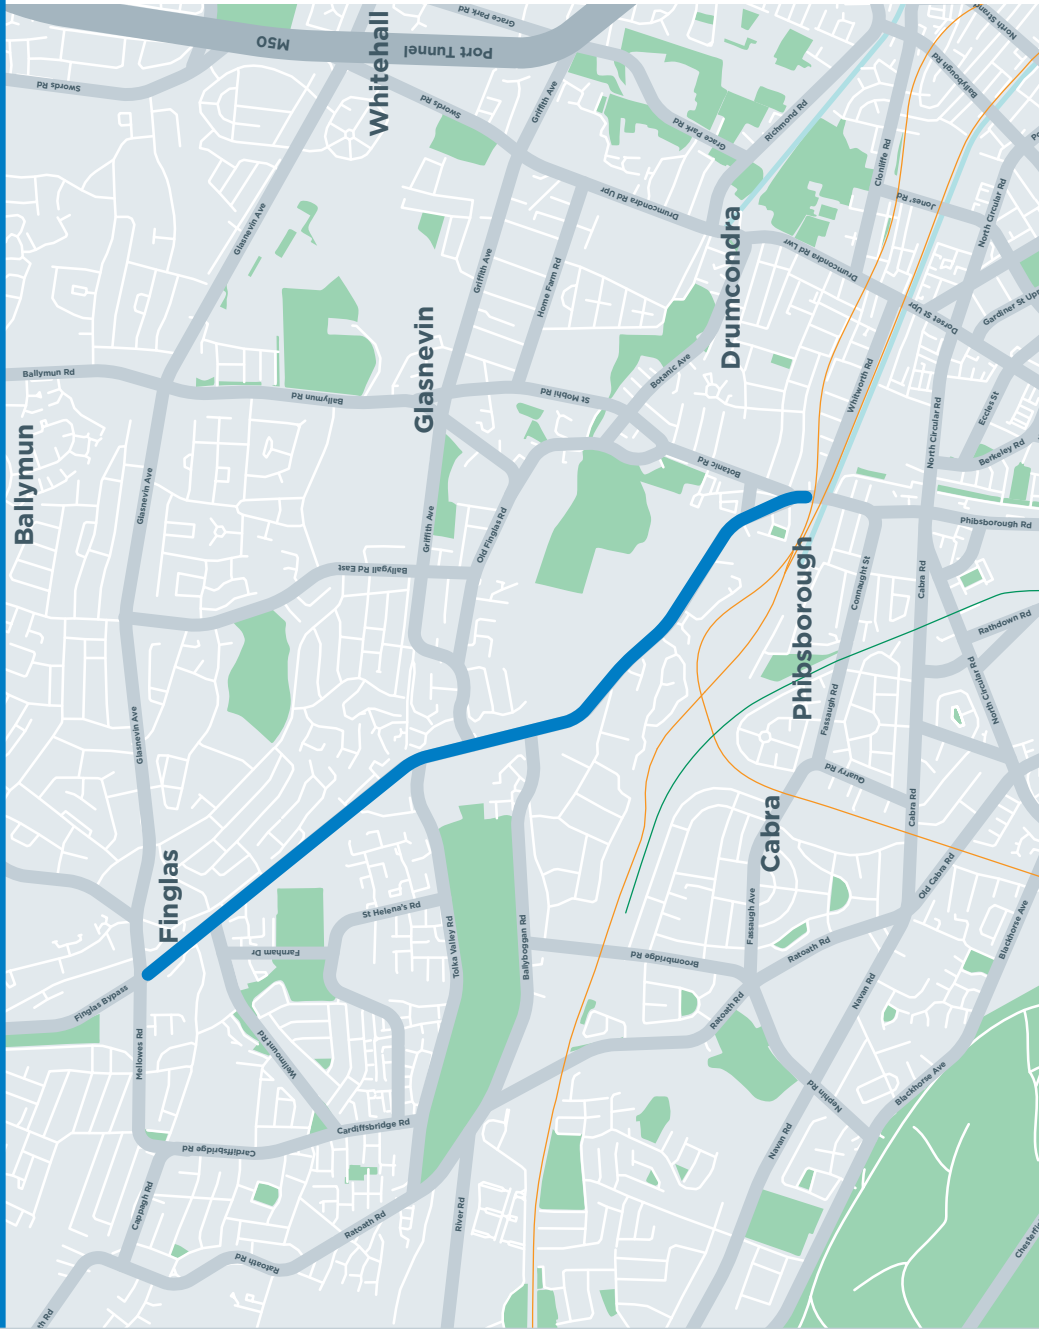

➤ Botanic Road, Glasnevin Hill, Ballymun Road: To allow a bus lane in each direction on St. Mobhi Road, while maintaining the existing mature trees along this street, outbound general traffic could be routed via Botanic Road, Glasnevin Hill and Ballymun Road. Under this arrangement, St. Mobhi Road would then become one-way southbound for general traffic, while allowing residents to also access the road in the northbound direction by using the bus lane.

- Bus Route
- Alternative Cycle Route

Finglas > Phibsborough

Core Bus Corridor (bus & cycle infrastructure)

4

Key Facts

- Route length **4kms**
- Current bus journey time up to **17mins**
- BusConnects journey time **12mins**
- Future bus journey time without BusConnects **25mins +**

Potential Impacts

- Parts of front gardens removed
- Loss of parking spaces
- Changes to traffic movements
- Loss of trees

Additional Specific Challenges on Route

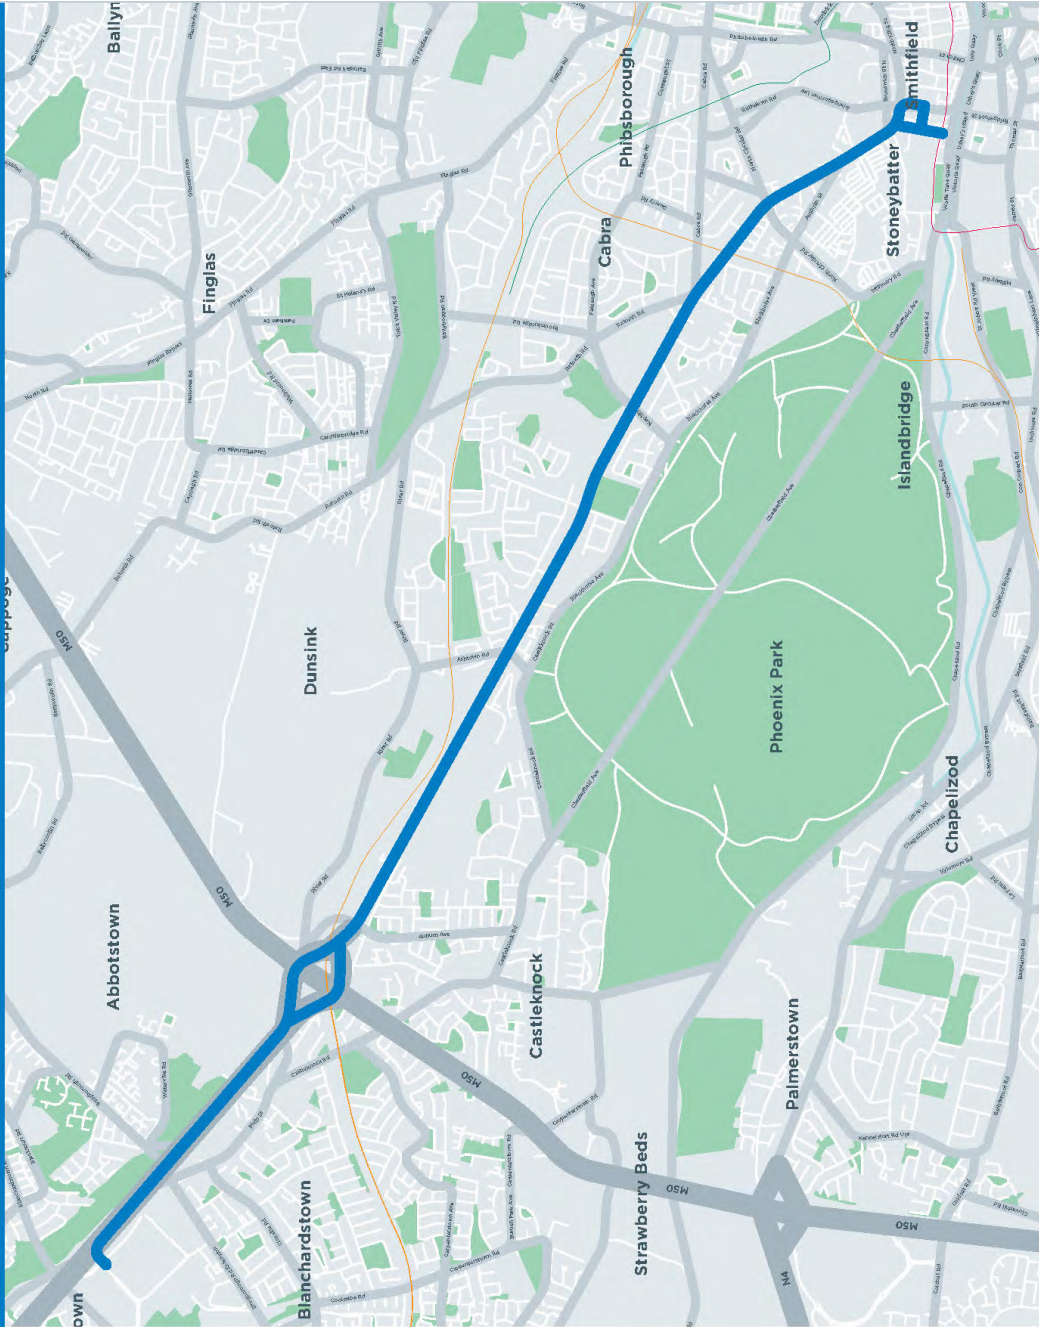

- Hart's Corner: Restricted road width and turning movements make it difficult to provide continuous bus and cycle lanes through this gyratory system.

— Bus Route

Blanchardstown > City Centre

Core Bus Corridor (bus & cycle infrastructure)

5

Key Facts

- Route length **8kms**
- Current bus journey time up to **65mins**
- BusConnects journey time **25-30mins**
- Future bus journey time without BusConnects **80mins +**

Potential Impacts

- Parts of front gardens removed
- Loss of parking spaces
- Changes to traffic movements
- Loss of trees

Additional Specific Challenges on Route

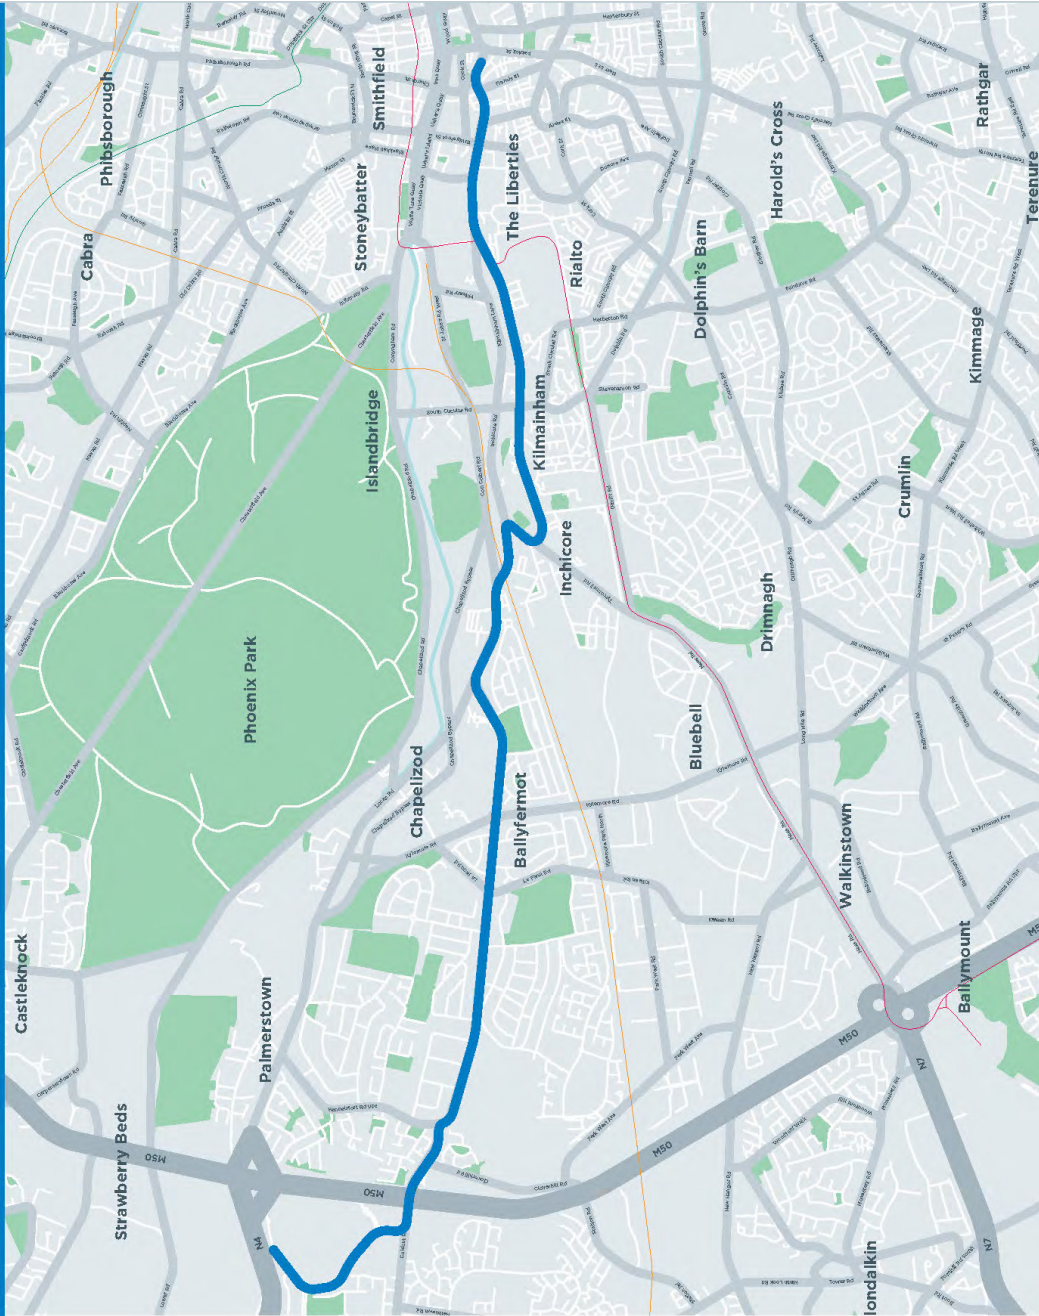

- Old Cabra Road and Prussia Street. In order to provide bus lanes, a proposal is to remove general through traffic on these two streets. Local access would still be maintained including to the shopping centre.

Bus Route

Liffey Valley > City Centre

Core Bus Corridor (bus & cycle infrastructure)

7

Key Facts

- Route length **10kms**
- Current bus journey time up to **65mins**
- BusConnects journey time **30-35mins**
- Future bus journey time without BusConnects **80mins +**

Potential Impacts

- Parts of front gardens removed
- Loss of parking spaces
- Changes to traffic movements
- Loss of trees

Additional Specific Challenges on Route

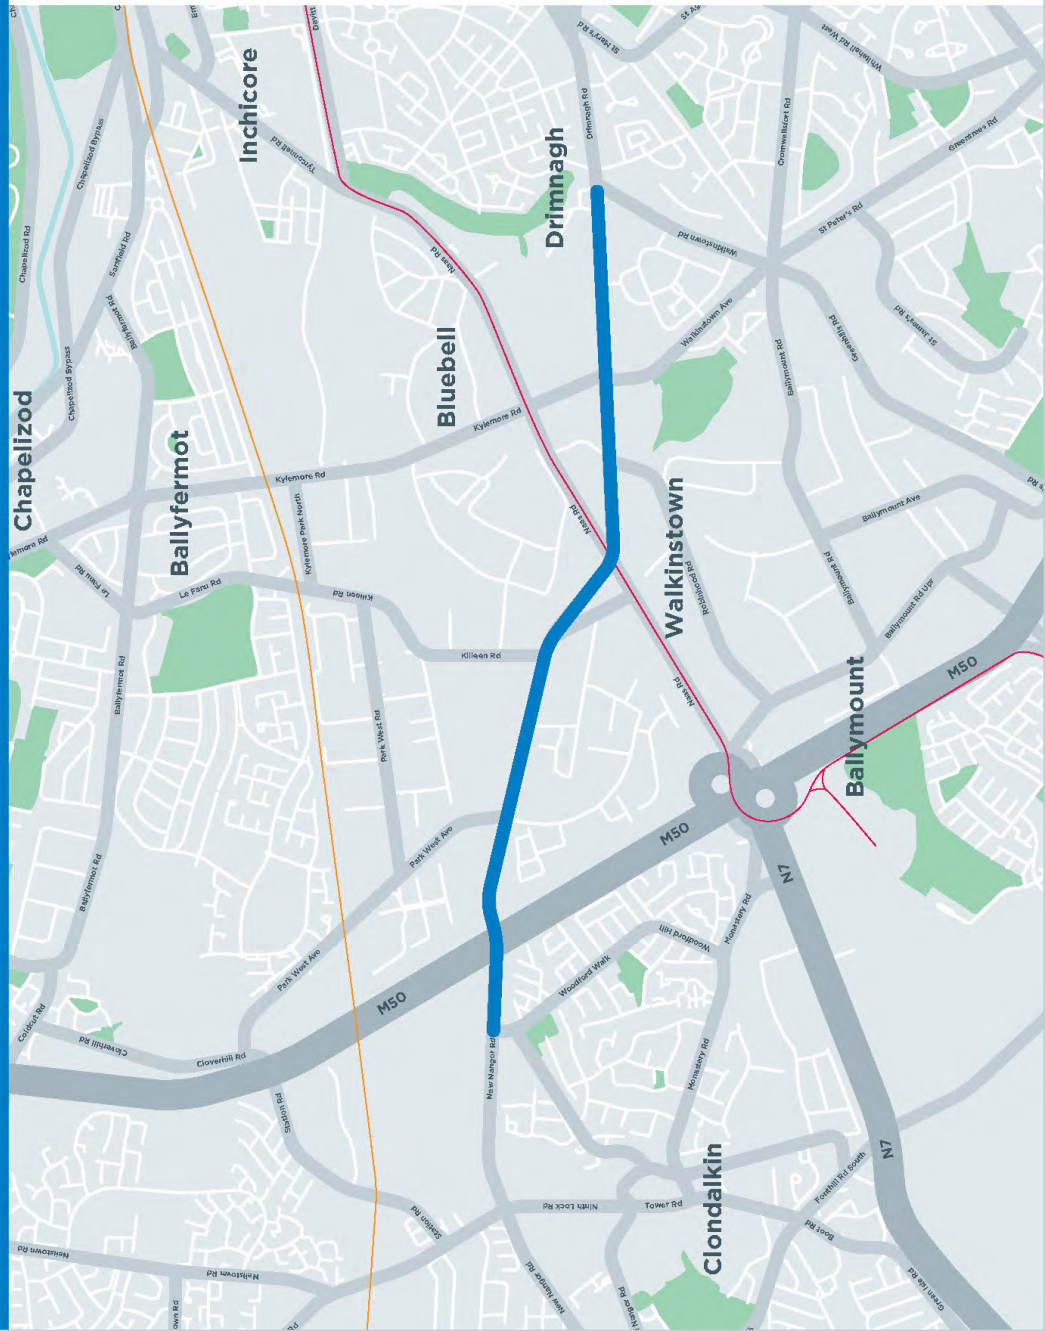

- Because of constrained width through Mount Brown and Old Kilmainham Road, both bus lanes and traffic lanes cannot be accommodated. To deliver bus priority along this section of the route, it would be necessary to restrict Mount Brown to public transport, cyclists and local access only. Through traffic would have to be diverted via the Quays or South Circular Road.
- Because of restricted width on Ballyfermot Road between Le Fanu Road and Kylemore Road, one option would be to divert inbound traffic via Le Fanu Road and Kylemore Road.

Bus Route

Clondalkin > Drimmagh

Core Bus Corridor (bus & cycle infrastructure)

8

Key Facts

- Route length **4kms**
- Current bus journey time up to **21mins**
- BusConnects journey time **14mins**
- Future bus journey time without BusConnects **25mins+**

Potential Impacts

- Parts of front gardens removed
- Loss of parking spaces
- Changes to traffic movements
- Loss of trees

Additional Specific Challenges on Route

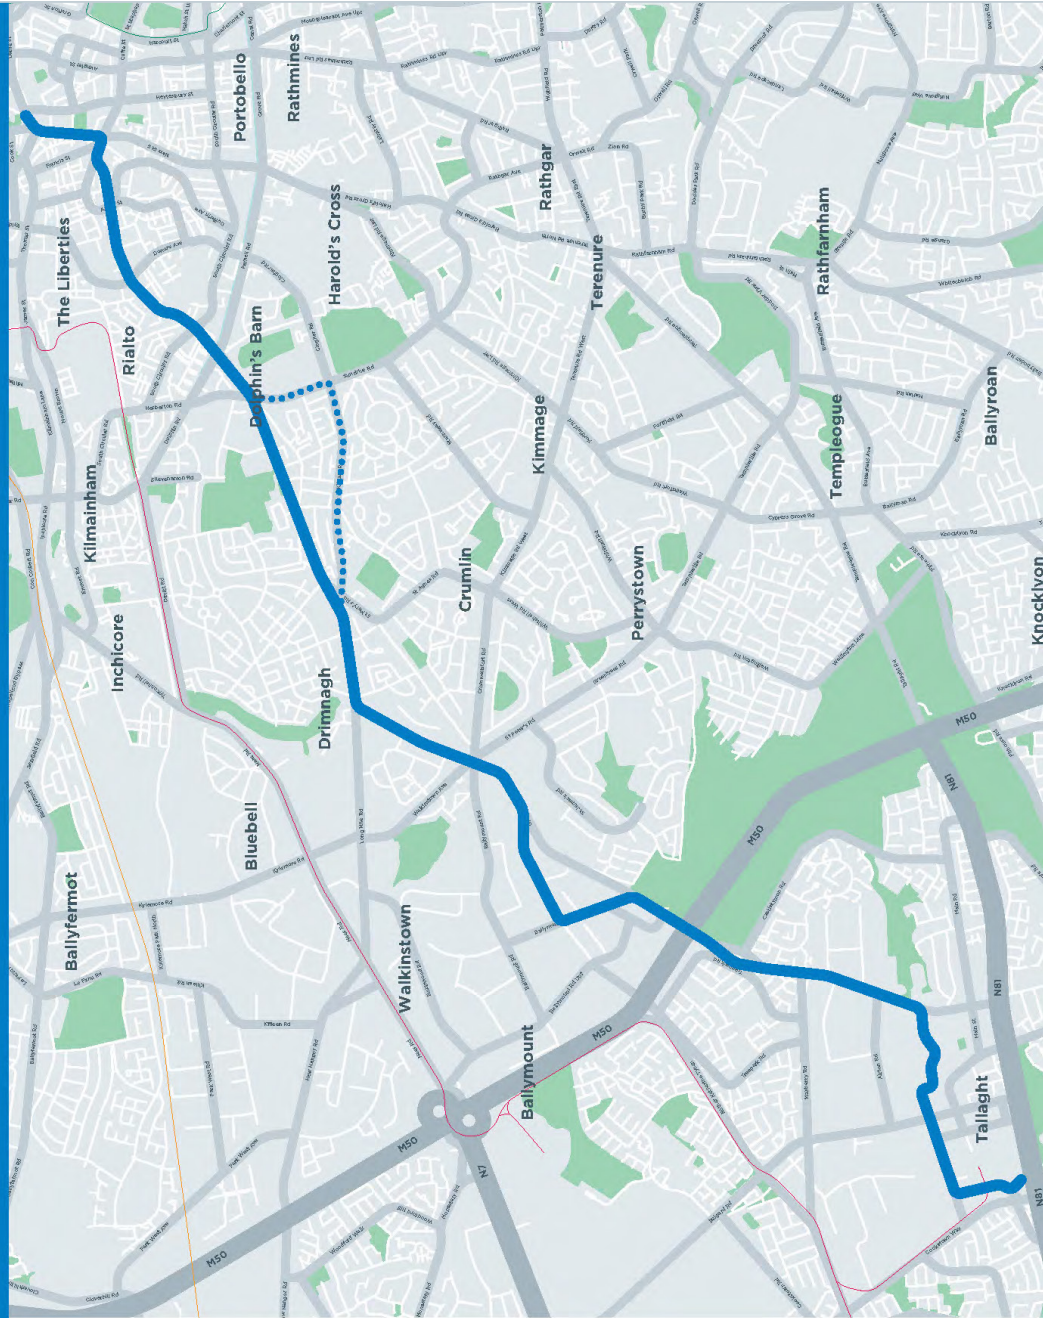

- Road width restrictions at the M50 underpass. A proposal is that cyclists will use the canal greenway at this point.

— Bus Route

Greenhills > City Centre

Core Bus Corridor (bus & cycle infrastructure)

9

Key Facts

- Route length **11kms**
- Current bus journey time up to **80mins**
- BusConnects journey time **35-40mins**
- Future bus journey time without BusConnects **100mins+**

Potential Impacts

- Parts of front gardens removed
- Loss of parking spaces
- Changes to traffic movements
- Loss of trees

Additional Specific Challenges on Route

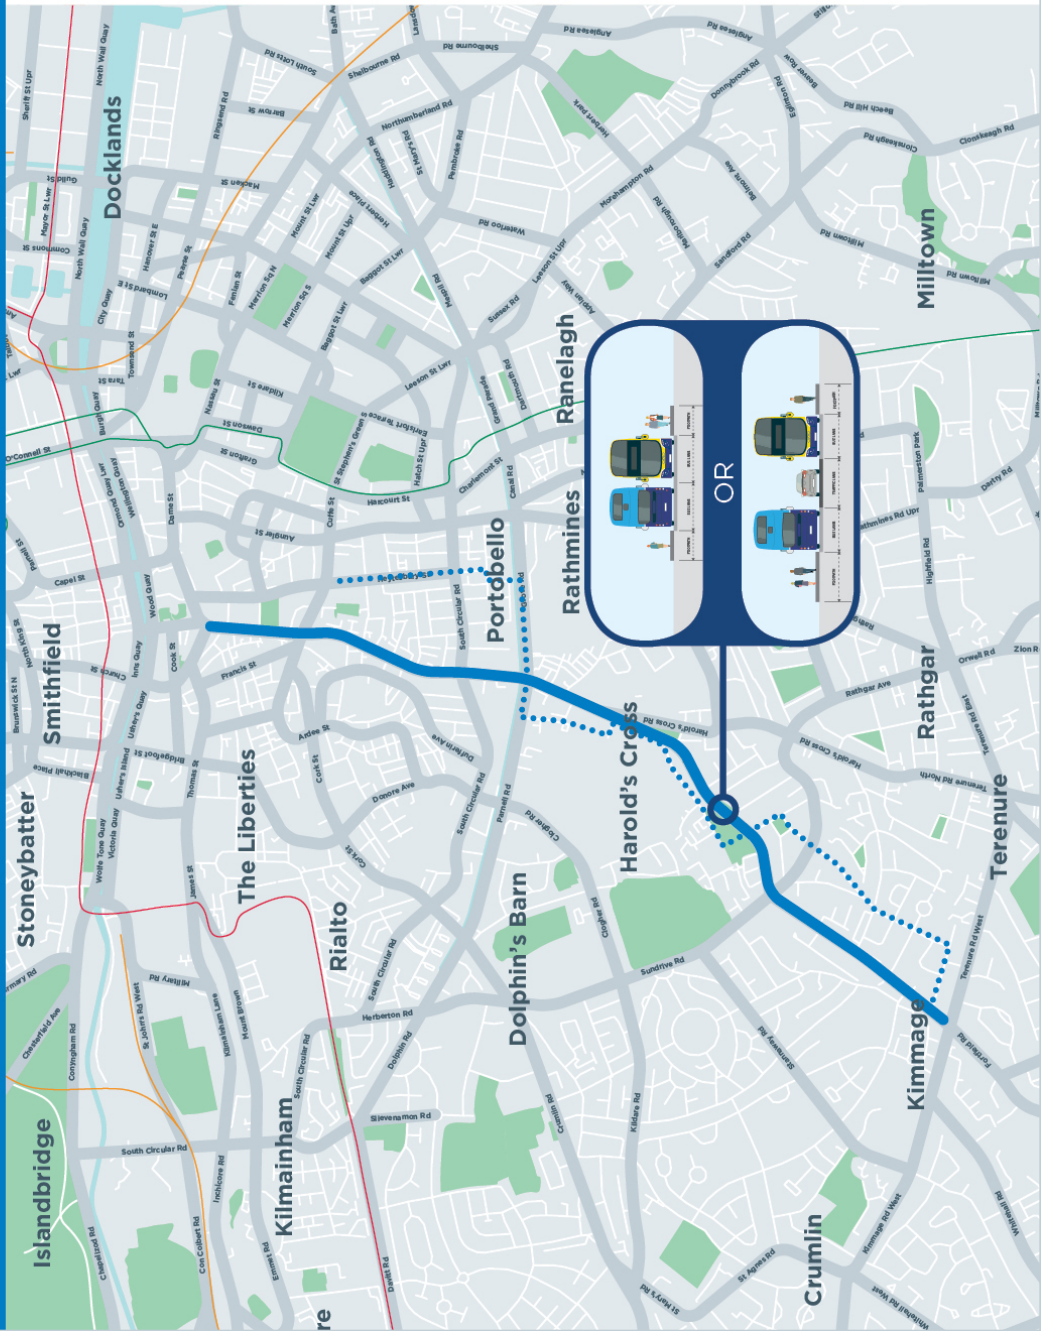

- Restricted width on many roads along this route requiring road widening.
- Walkinstown Roundabout is challenging for both bus and cycle movements.
- A proposal is to construct new link roads to divert all traffic via Calmount Avenue and Calmount Road while still maintaining access to the old section of Greenhills Road.
- A proposal is to realign a section of the Greenhills Road adjoining Castletymon Road junction.

- Bus Route
- Alternative Cycle Route

Kimmage > City Centre

Core Bus Corridor (bus & cycle infrastructure)

10

Key Facts

- Route length **4kms**
- Current bus journey time up to **45mins**
- BusConnects journey time **12-15mins**
- Future bus journey time without BusConnects **55mins+**

Potential Impacts

- Parts of front gardens removed
- Loss of parking spaces
- Changes to traffic movements
- Loss of trees

Additional Specific Challenges on Route

- Kimmage Road Lower is very constrained between Sundrive Road and Harolds Cross. A proposal is to restrict this section of Kimmage Road Lower to Bus, Cycle and Taxi only. Through traffic would then be required to divert via Larkfield Park and Harolds Cross Road or via Sundrive Road and Clogher Road.
- An alternative to this would be to permit inbound general traffic down Kimmage Road Lower to Harolds Cross while diverting outbound general traffic via Harolds Cross Road and Larkfield Park or via Clogher Road and Sundrive Road.

- Bus Route
- Alternative Cycle Route

Tallaght > Terenure

Core Bus Corridor (bus & cycle infrastructure)

11

Key Facts

- Route length **4kms**
- Current bus journey time up to **32mins**
- BusConnects journey time **10-12mins**
- Future bus journey time without BusConnects **45mins+**

Potential Impacts

- Parts of front gardens removed
- Loss of parking spaces
- Changes to traffic movements
- Loss of trees

Additional Specific Challenges on Route

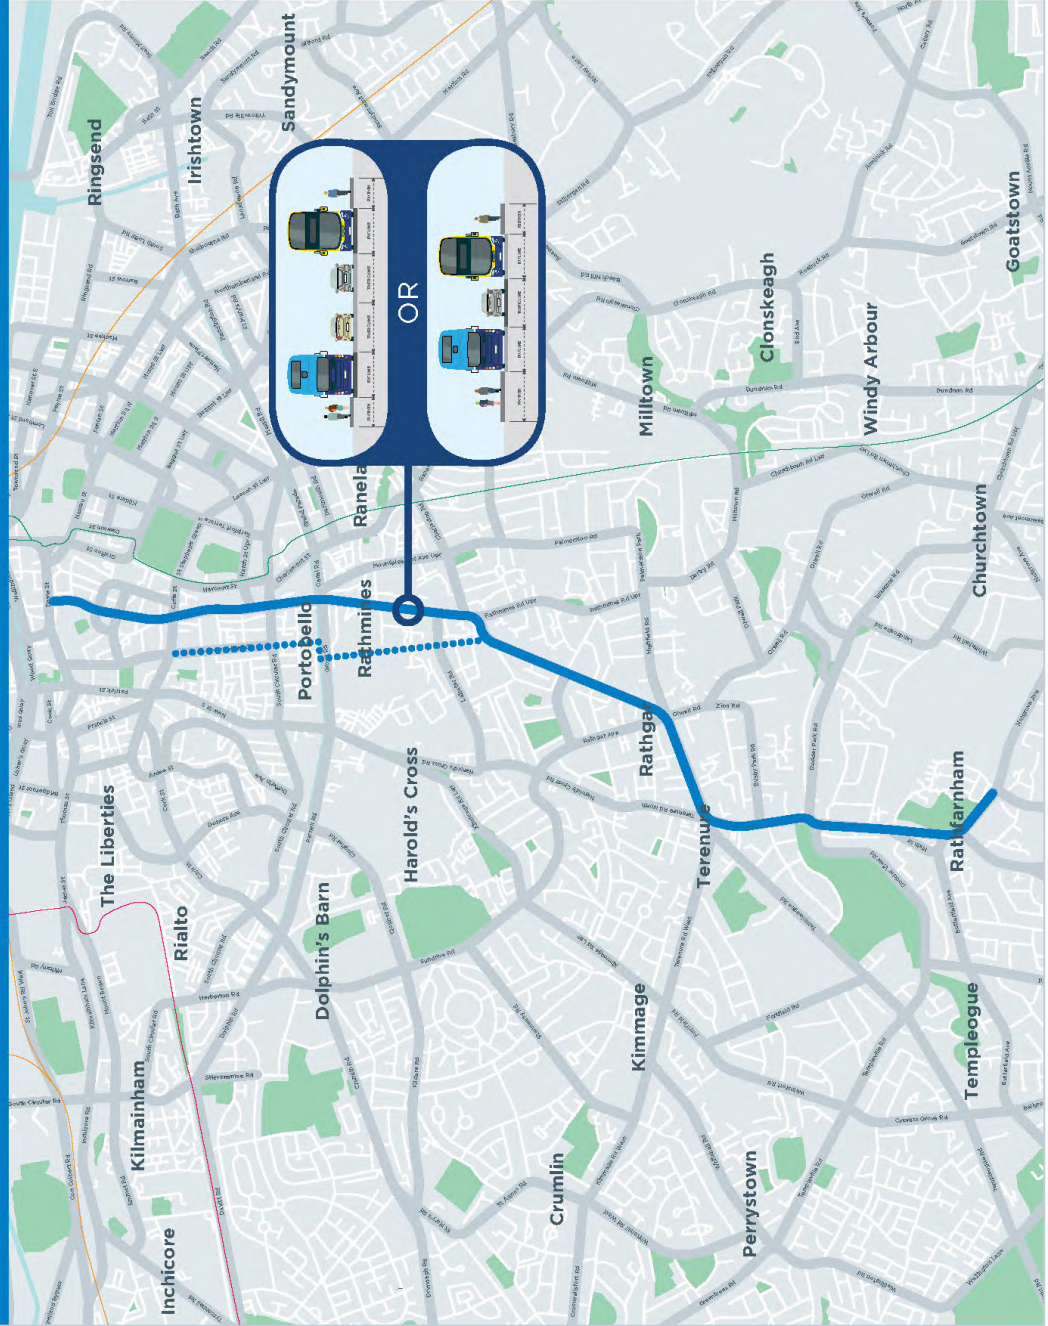

- Templeogue Road is particularly constrained in Terenure. To provide bus priority, a proposal is to make Templeogue Road one way outbound for general traffic while permitting bus, taxis and bicycles travel in both directions. Under this arrangement, inbound general traffic will be asked to divert via Cypress Grove Road to the Kimmage Cross Roads or via Springfield Road to Rathfarnham Road.

Bus Route

Rathfarnham > City Centre

Core Bus Corridor (bus & cycle infrastructure)

12

Key Facts

- Route length **6kms**
- Current bus journey time up to **75mins**
- BusConnects journey time **20-25mins**
- Future bus journey time without BusConnects **90mins+**

Potential Impacts

- Parts of front gardens removed
- Loss of parking spaces
- Changes to traffic movements
- Loss of trees

Additional Specific Challenges on Route

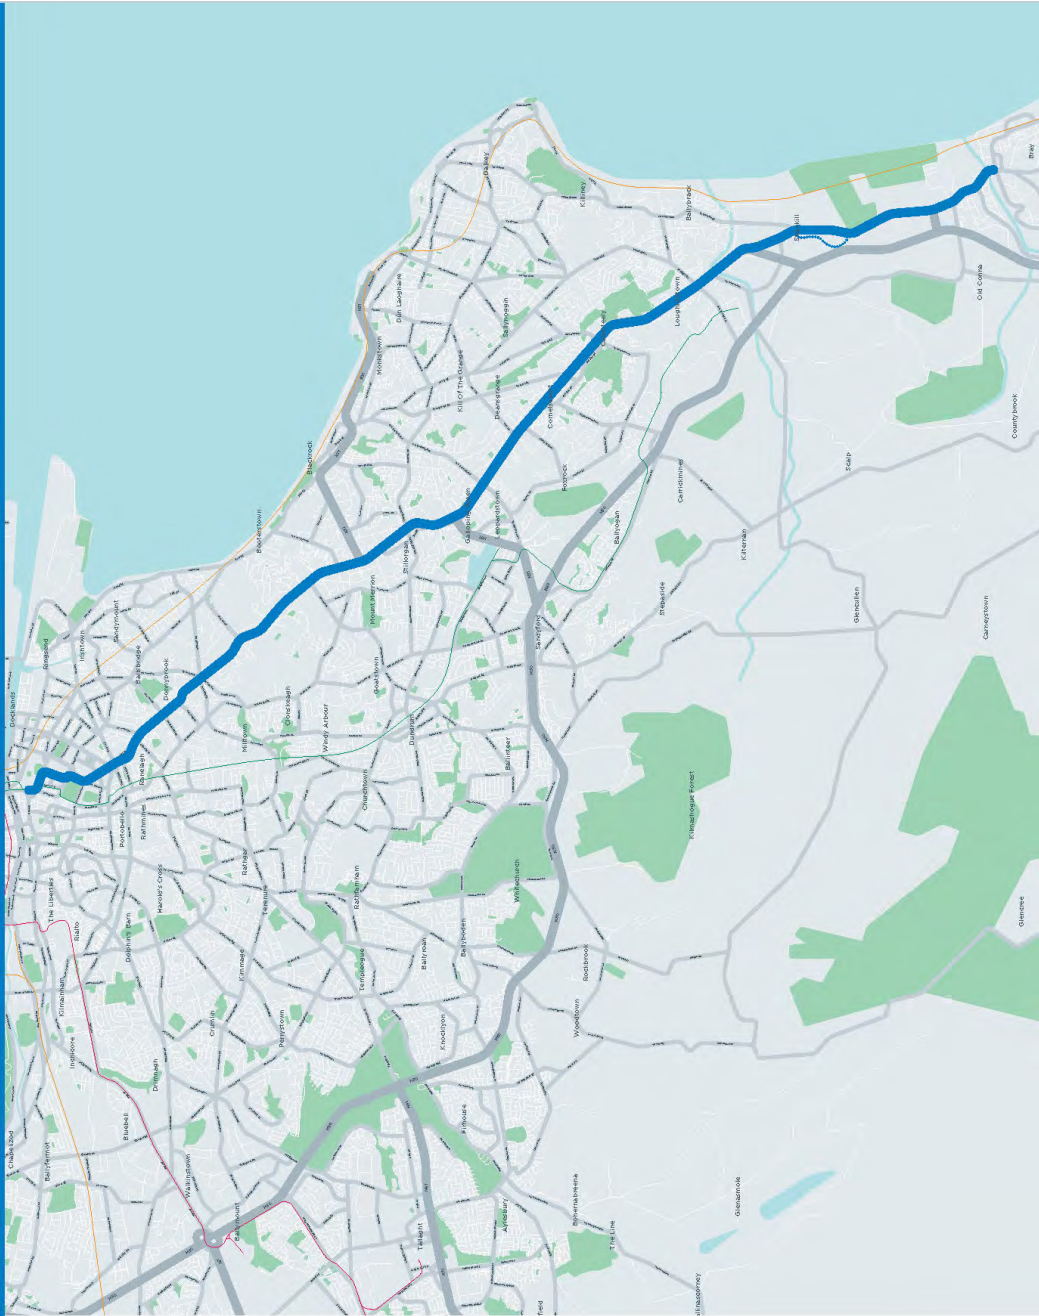

- Rathmines Road - to provide one bus lane and one traffic lane in each direction would require narrowing the street's footpaths. An alternative option is to divert outbound traffic via Ranelagh and make Rathmines Road one way for general traffic in addition to providing two bus lanes.
- Cycling - because of width constraints on Rathmines Road, an alternative off-line cycle route is proposed on the east side.

— Bus Route
⋯ Indicative Cycle Route

Bray > City Centre

Core Bus Corridor (bus & cycle infrastructure)

13

Key Facts

- Route length **13kms**
- Current bus journey time up to **55mins**
- BusConnects journey time **40-45mins**
- Future bus journey time without BusConnects **70mins+**

Potential Impacts

- Parts of front gardens removed
- Loss of parking spaces
- Changes to traffic movements
- Loss of trees

Additional Specific Challenges on Route

- Shankill Village is constrained in terms of available road space, making bus and cycle provision very challenging. A proposal is to divert cyclists around Shankill Village via a series of quiet routes and new cycling links to the east of the village.

- Bus Route
- Alternative Cycle Route

UCD Ballsbridge > City Centre

Core Bus Corridor (bus & cycle infrastructure)

14

Key Facts

- Route length **4kms**
- Current bus journey time up to **35mins**
- BusConnects journey time **14-15mins**
- Future bus journey time without BusConnects **45mins+**

Potential Impacts

- Parts of front gardens removed
- Loss of parking spaces
- Changes to traffic movements
- Loss of trees

Additional Specific Challenges on Route

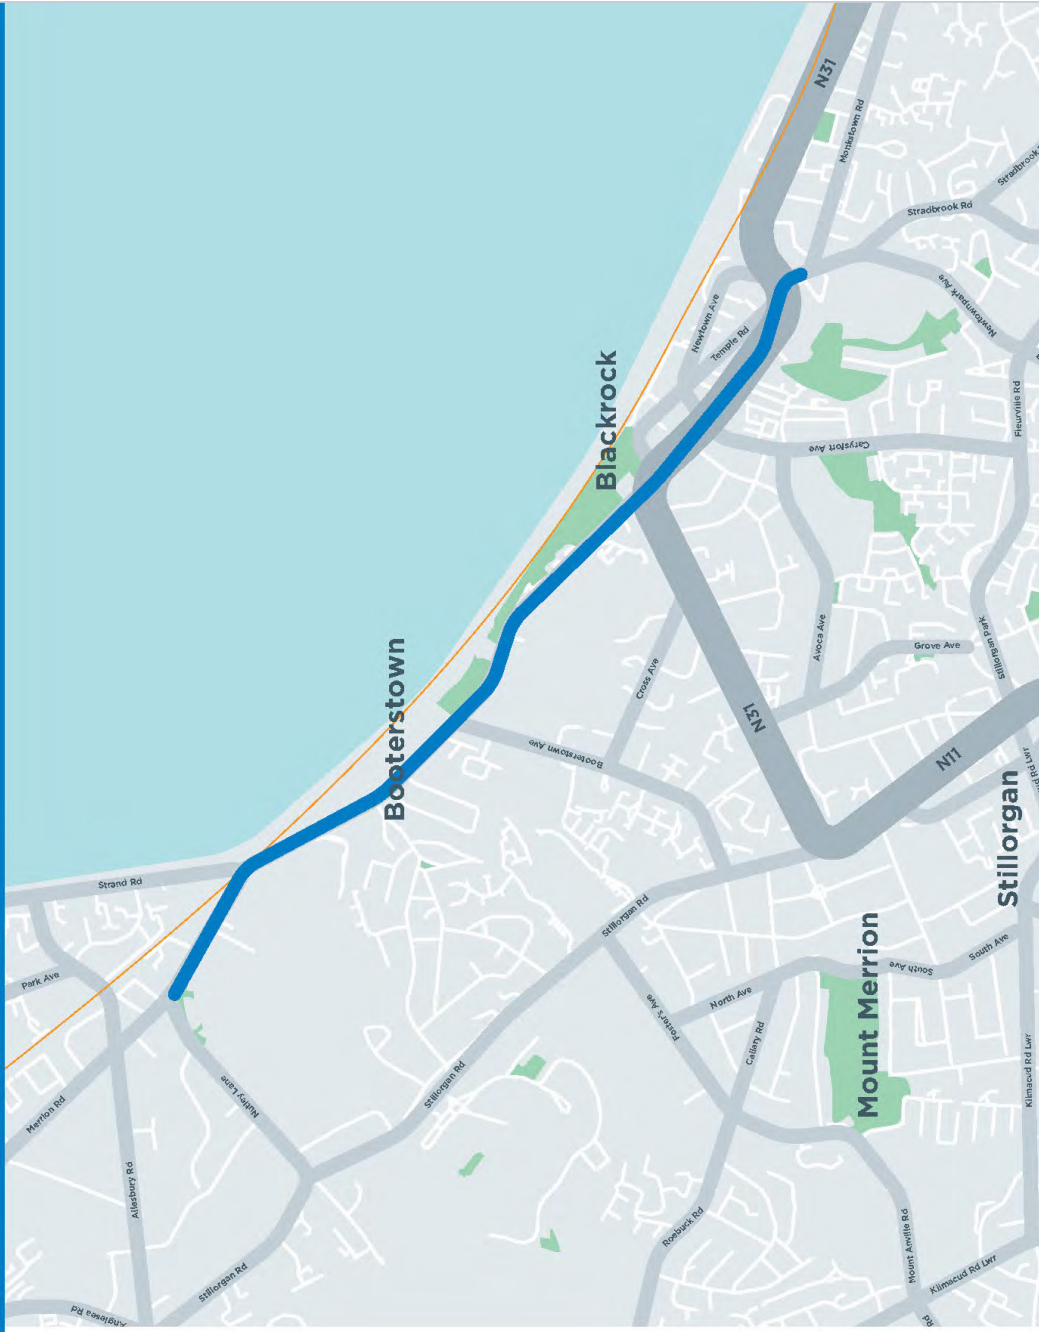

- A number of significant traffic junction reconfigurations would be required together with some traffic movement restrictions at these locations.

Bus Route

Blackrock > Merrion

Core Bus Corridor (bus & cycle infrastructure)

15

Key Facts

- Route length **4kms**
- Current bus journey time up to **30mins**
- BusConnects journey time **13-15mins**
- Future bus journey time without BusConnects **40mins+**

Potential Impacts

- Parts of front gardens removed
- Loss of parking spaces
- Changes to traffic movements
- Loss of trees

Additional Specific Challenges on Route

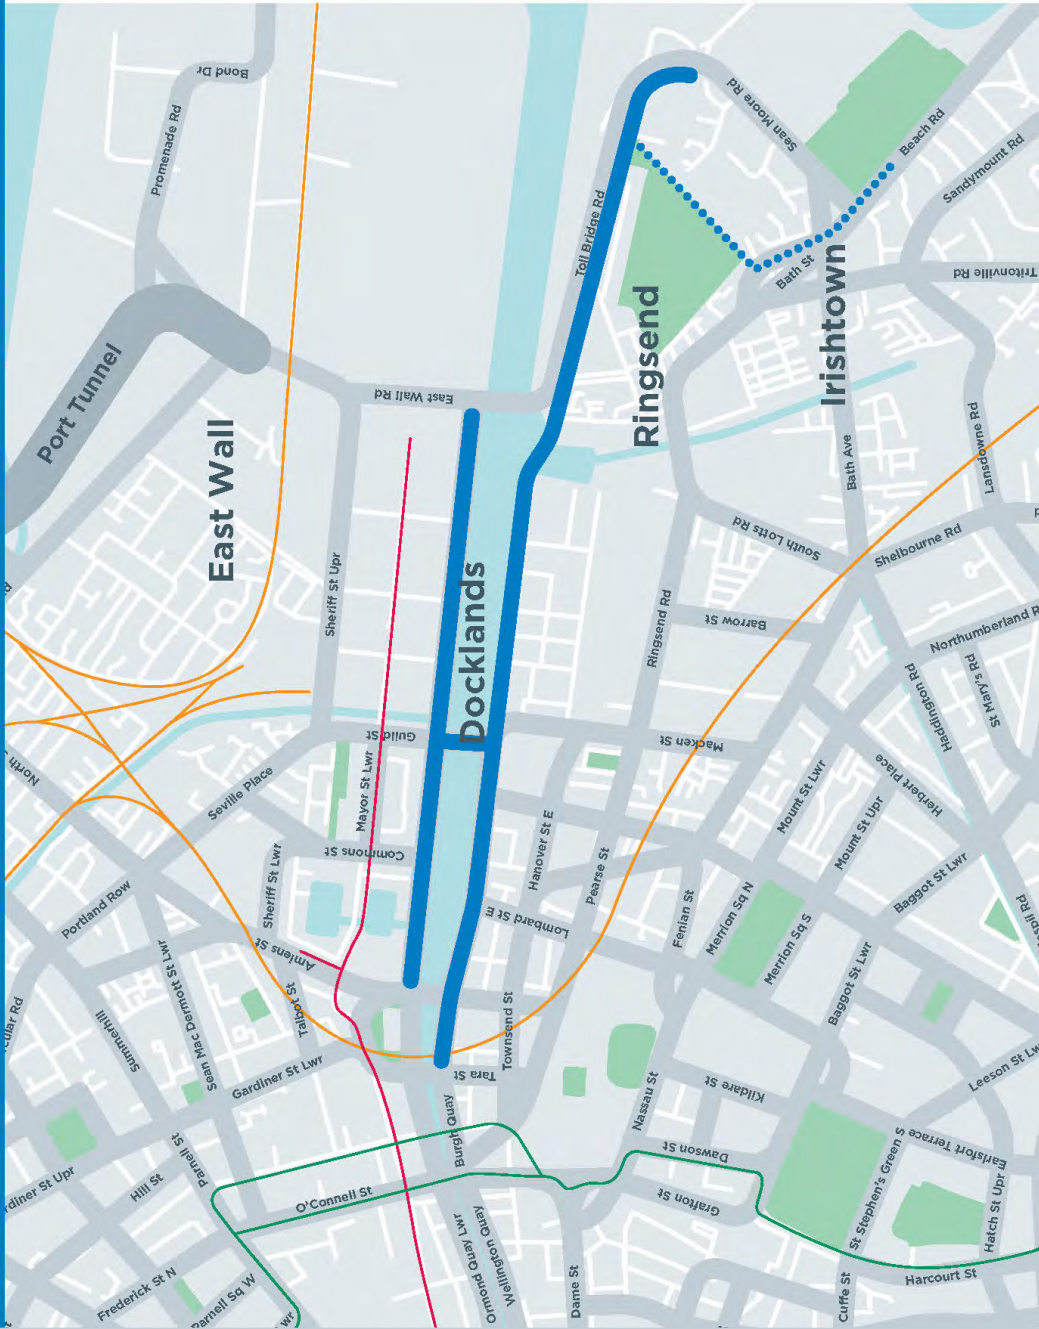

- Layout at Merrion Gates junction.
- Proximity to Booterstown Marsh, an environmentally designated area.

Bus Route

Ringsend > City Centre

Core Bus Corridor (bus & cycle infrastructure)

16

Key Facts

- Route length **5kms**
- Current bus journey time up to **35mins**
- BusConnects journey time **15-18mins**
- Future bus journey time without BusConnects **45mins+**

Potential Impacts

- Loss of parking spaces
- Changes to traffic movements
- Loss of trees

Additional Specific Challenges on Route

- Will require the introduction of a contraflow bus lane on City Quay.
- Restricted width at two Scherzer lifting bridges, which are protected structures.
- New bridge required over the River Dodder at the east end of Sir John Rogerson's Quay.

6

BusConnects – a national programme

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

Our Core Bus Corridor Project is part of a wider BusConnects programme that will deliver improvements in bus services across the country.

- Under the NDP, funding has been earmarked for investment in a full BusConnects programme for all of Ireland's cities, including ticketing systems, bus corridors, additional capacity, new bus stops and bus shelters.
- Galway BusConnects will deliver a rationalised network of five high-performing cross-city routes.
- Cork BusConnects will comprise the delivery of crucial bus corridors, enhanced services, cashless fares and account-based ticketing.

7

Fitting into the big picture by 2027

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

BusConnects Dublin is part of a major public transport 10-year investment programme. That programme also includes:

- Dart Expansion Programme which will see the implementation of high-frequency Dart services on the Northern Line, the Kildare Line, and the Maynooth Line.
- MetroLink, a largely underground rail link between Swords and Sandyford, serving the airport and the city centre.

This integrated public transport network will provide new opportunities to enable easier, more reliable and flexible travel across a range of modes.

8

Where are the radial Core Bus Corridors

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

- Clongriffin to City Centre
- Swords to City Centre
- Ballymun to City Centre
- Finglas to Phibsborough
- Blanchardstown to City Centre
- Lucan to City Centre
- Liffey Valley to City Centre
- Clonsilla to Drimnagh
- Greenhills to City Centre
- Kimmage to City Centre
- Tallaght to Terenure
- Rathbarham to City Centre
- Bray to City Centre
- LICO Ballybride to City Centre
- Blackrock to Merrion
- Ringsend to City Centre

9

Why invest in bus?

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

More people choosing bus transport

- More people than ever – almost 70% – are travelling into Dublin using sustainable modes.
- Within that, bus is the most popular mode of sustainable transport in Dublin, and getting more popular.
- In our recent cordon count report, bus accounted for 56% of all public transport trips.
- The snap-shot report counted all journeys into the city centre during the morning peak time.

10

Bus trends – annual passenger demand

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

- Bus is clearly the most popular mode of public transport in Dublin, and its getting more popular.
- Overall last year Dublin Bus provided the largest ever number of passenger journeys at over 136m.
- This represents an increase of almost 9% over 2016 and represents four straight years of passenger growth.
- In other words, demand for bus services is strong and getting stronger.
- That is why we need to make sure the bus infrastructure is up to the job

11

What will our Core Bus Corridors look like Layout

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

Optimum layout

- The proposal envisages the provision of about 230km of bus lane on sixteen of the busiest bus corridors in Dublin.
- Our objective is to provide a continuous bus lane in each direction as well as maintaining two general traffic lanes.
- We also want to provide a dedicated cycle track on each side of the road providing safe cycling facilities, segregated from other vehicular traffic.

12

Benefits

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

Good for cyclists

- BusConnects is not just about buses. It is also about provide high quality cycling facilities, segregated from the bus lanes and general traffic lanes.
- There will be an estimated 200kms of cycle tracks/lanes.
- This initiative forms the foundation of the overall Greater Dublin Area cycle network plan.
- BusConnects is the single biggest cycling infrastructure plan in the history of the state

13

Benefits

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

Good for bus passengers

The core bus corridor project will deliver on improving journey times and creating certainty and confidence in the bus system.

Potential journey time savings of up to 40-50% per corridor

14

Benefits

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

Good for environment

Tackling the challenges of climate change is a national priority and BusConnects will contribute significantly to that objective.

It will do this by:

- Encouraging people to move from cars onto a sustainable transport mode such as bus.
- Making bus journeys shorter and quicker.
- Reducing overall congestion

15

Benefits

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

Good for jobs

- A well-functioning public transport system is a basic requirement when it comes to creating good employment opportunities.
- By improving the overall public transport offering, these proposals will make commutes shorter and more reliable, and will therefore make Dublin a more attractive location for employers.
- It will also make it easier for people to get out and enjoy the city and all it has to offer, which is good news for businesses in the city centre and beyond.

16

Benefits

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

Good for city living

- By providing a high-quality, frequent and reliable bus service, we can make Dublin a more attractive place to live, work and visit.
- With quicker journeys and reliable services, the city will seem like a smaller, more accessible place and everywhere will be within an easy bus ride of just about anywhere else.
- All of Dublin – all of its colleges, offices, retail streets; all of its coffee shops; all of its pubs and bookshops; all of its restaurants and theatres; all of its character - will be opened up, to all of its citizens and all of its visitors.

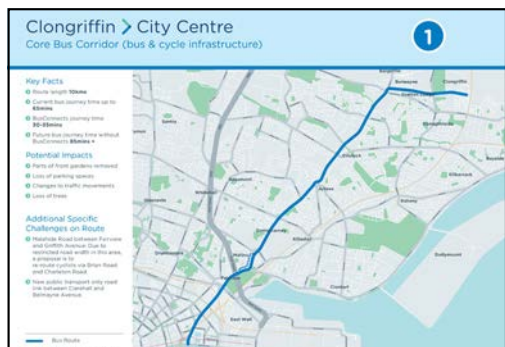

17

Key Challenges

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

Challenges	Mitigations
Acquisition of parts of land in front of properties including portions of gardens and walls	Purchase the portion of gardens/land; ensure new landscaping, full replanting in the garden, build new walls, new fencing and gates. Identify areas for improvements to local spaces, landscaping and provide funding for urban centre improvements.
Reduction of on-street parking - public and private	Provide where feasible alternative parking close by for residents and businesses, compensate for loss of parking
Removal of trees	Put in place a replanting programme. Mature or semi-mature ready-grown trees where feasible and planted as close to original locations as possible.
Traffic movements and road works	Local access will be maintained for houses and businesses. Rerouting of traffic will be supported by signage, markings and traffic calming measures.

Core Bus Corridors Project Discussion Document - 12th June 2018

2C Public Representative Engagement

Email issued to all public representatives in the Greater Dublin Area (GDA) on 12th June 2018 regarding the launch of the Core Bus Corridors Project Report on 12 June 2018:

New message

To: All Public Representatives in the Greater Dublin Area

Subject: BusConnects Dublin - Core Bus Corridors Project

From: info@busconnects.ie
Sent: Tuesday 12 June 2018 16:31
Subject: BusConnects Dublin - Core Bus Corridors Project

Dear Deputy,

Today the National Transport Authority is publishing a discussion document on the Core Bus Corridors Project, which sets out draft proposals to vastly improve bus journey times and cycling priority along congested corridors in Dublin. The project is a central element of the BusConnects strategy launched last year.

By dramatically increasing the level of segregated bus infrastructure on 16 core bus corridors identified in the attached map, we can improve the bus experience for a growing number of passengers in our capital city. On each of these corridors, we will also provide high quality cycling facilities segregated from bus and general traffic lanes as far as is practicable.

We are publishing the discussion document to ensure you and members of the public are kept informed of the progress made on the overall plan. In October, we will publish detailed proposals for each of the corridors and undertake a full public consultation. At this stage, we will be in a position to answer detailed questions on specific local issues.

For more information on the project and to read the details discussion document, please visit www.busconnects.ie. Moreover, a printed version of the document will also be delivered to you.

Yours sincerely,
Anne Graham
CEO, NTA

Re: BusConnects Dublin – Core Bus Corridors Project

Dear Deputy,

Please find attached a copy of the BusConnects Core Bus Corridors Project report that we are unveiling today.

This discussion document sets out draft proposals to vastly improve bus journey times and cycling priority along congested corridors in the Dublin region. The project is a central element of the National Transport Authority's €2 billion BusConnects strategy to transform the city's bus system, so it is fast, reliable, punctual, convenient and affordable.

Currently buses running on the major arteries into the city centre are sharing road space with trucks, vans and cars for all but 30% of the journey despite the bus system accounting for 67% of public transport journeys in the Greater Dublin Area. However, levels of congestion are increasing daily and it is anticipated that by 2040 the Dublin region will have increased by 25% to 1.5 million.

When BusConnects was announced last year, the NTA provided a broad overview as to which corridors would be included in the plan and the resulting positive outcomes would be for communities around the region and for the city itself.

We also announced that BusConnects would provide for the creation of a "next generation" network of cycling facilities. On each of the core bus corridors, we will provide high quality cycling facilities segregated from the bus lanes and general traffic lanes as far as is practicable. When implemented, this will result in a safer experience for city cyclists.

The unveiling of BusConnects last year marked the beginning of a conversation on the role that this ambitious programme of investment in our bus services can play in meeting the future transport needs of the people of Dublin. One year on, we want to make sure the conversation continues, and that's why we are publishing this discussion document.

Significant progress has been made in putting together the overall plan, and in October this year we will be publishing our detailed proposals for each of the 16 corridors. At that stage we will be in a position to identify precise alignment along each of the corridors and to pinpoint the specific challenges and opportunities that will arise as a result.

As that work on evaluating options and assessing alternatives is complete, we will undertake a full public consultation, and at that point, we will be in a position to answer detailed questions on specific local issues. In the meantime, we are anxious to ensure that we keep you and members of the public informed.

You should also be aware that a separate but related announcement on the redesigned bus network for Dublin will take place in July. This will include proposals on a redesign of routes, schedules, timetables and fare structures to meet the changing needs of passengers in Dublin.

There is no doubt that congestion in the capital city is negatively impacting bus journey times, but with ambitious measures such as BusConnects, we can vastly improve the bus experience for the growing number of passengers who wish to use sustainable transport modes in and around the city.

Yours sincerely,

Anne Graham
CEO, NTA

Core Bus Corridors Project Discussion Document - 12th June 2018

2E Press Release & Media Engagement

Press Release issued 12th June 2018:

PRESS RELEASE BY NTA

Tuesday 12th June 2018

NTA SETS OUT PROPOSALS TO IMPROVE BUS JOURNEY TIMES FOR PASSENGERS IN DUBLIN

The National Transport Authority has today published the Core Bus Corridors Project report. This discussion document sets out draft proposals to vastly improve bus journey times and cycling priority along an increasing number of congested corridors in the Dublin region. The project is part of the NTA's €2bn BusConnects Dublin programme to transform the city's bus system.

The proposals, which if implemented, will provide the following:

- 230kms of continuous bus priority over 16 radial core bus corridors
- 200kms of cycle tracks and cycle lanes provided on the corridors
- Journey time savings of up to 40%-50% across the 16 radial core bus corridors

In 2017 Dublin Bus combined with Bus Éireann carried over 147 million passengers in the Dublin area, about 67% of public transport journeys in the Greater Dublin Area. This is about four times the number of passengers carried by Luas and close to five times the number of passengers carried by DART and commuter rail.

However, despite the importance of the bus system, the main corridors in and out of the city only have bus lanes for about one third of their length. This means that for most of the journey, buses are competing for space with other traffic and are affected by general traffic congestion. With the population of the Dublin region projected to increase to 1.5 million by 2040, a jump of 25% from today's 1.2million, that trend of increasing congestion will continue unless significant and radical action is taken.

When BusConnects was announced last year, NTA outlined how it would provide the opportunity to improve the bus experience for passengers by providing faster journey times in comfortable, modern vehicles with high frequency services on busy routes.

The Authority also announced that BusConnects would provide for the creation of a "next generation" network of cycling facilities. On each of the Core Bus corridors, we will provide high quality cycling facilities, segregated from the bus lanes and general traffic lanes as far as is practicable.

Significant progress has been made in putting together the overall plan, and in October of this year NTA will publish detailed and considered proposals for each of the 16 corridors. At that stage a full public consultation process will commence. This will allow people to provide feedback and their thoughts on the proposals and the NTA will fully engage with people along the corridors and surrounding areas.

Anne Graham, CEO of the NTA said: "Everybody agrees that something needs to be done to improve our bus services. Passenger numbers on public transport continue to increase, but as the economy continues to improve, and as demands on public transport increase, our infrastructure will come under more and more strain.

"People want to use public and sustainable transport in and out of the city. Our recent canal cordon 2017 figures are showing us this with almost 70% of daily trips across the canals of Dublin being made by sustainable transport. The NTA needs to support these trips and to improve the journey times for public transport users and to offset the negative impact of congestion.

"Unless we address the infrastructure issues, it is inevitable that in the years ahead, travelling by bus will become slower, less reliable and more frustrating for everybody. But with BusConnects there is a solution on offer."

"Last year's BusConnects announcement marked the beginning of a conversation on the role that this ambitious programme of investment in our bus services can play in meeting the future transport needs of the people of Dublin. One year on, we want to make sure that the conversation continues, and that is why we are publishing this document.

"As the project development work is complete, we will of course be undertaking a full process of public consultation, and at that point, we will be in a position to answer detailed questions on specific local issues.

"There is no doubt that congestion in Dublin is getting worse, but with the ambitious measures put forward today, there is light at the end of the tunnel. We believe that our plans have the potential to completely transform public transport, to make travelling by bus more attractive, and to get more people using sustainable modes of transport in and around the city."

ENDS

1. Introduction

SECTION 1

1.1 Background

In June 2018 the National Transport Authority (NTA) published the Core Bus Corridors Project Report. The report was a discussion document outlining proposals for the delivery of a core bus corridor network across Dublin. It set out the vision for the provision of 230kms of dedicated bus lanes and 200km of cycle lanes/tracks on sixteen key bus corridors.

Continuous bus lanes and cycle tracks

230kms
of continuous
bus priority

200kms
of cycle tracks/
lanes provided

Separately in July 2018 the **Dublin Area Bus Network Redesign**, which is the redesign of bus services, started its first public consultation phase. Around 30,000 submissions including signed petitions and online survey responses were received by the end of September. Over the coming months all of these submissions will be reviewed and assessed. Following that process a revised network design will be published during 2019 for a second public consultation. It is envisaged that the implementation of the final network will take place in 2020. The network redesign can be implemented on the existing road network with some enhancements at key interchange locations.

The public consultation for the sixteen radial core bus corridors will now take place on a phased basis from November 2018 until May 2019. Each phase will be for a set number of corridors to be consulted on over a period of months. These public consultations phases will be the start of a detailed process of engagement and communication. All of which will take place prior to detailed designs being finalised and planning permissions sought.

This document is one of a series of sixteen, each dedicated to a single core bus corridor. The document provides a written description of the emerging preferred route from start to finish with supporting route maps. It explains the step by step process for engagement and consultation for potentially impacted property owners and the general public. It also outlines the process for planning and construction of the core bus corridor network including expected timelines.

SECTION 1

1.2 Why does Dublin need a core bus corridor network?

➤ **Congestion** – Congestion is one of the most significant challenges facing the Dublin region and needs to be addressed to safeguard the growth of the Dublin region and keep people moving. Ireland's economic recovery from the recession is seeing significant increases in the number of people working and travelling across Dublin. The number of commercial vehicles continues to rise as does the number of tourists. The commuter areas surrounding Dublin continue to spread and grow in a low density manner. Growth areas can only be served in the short and medium term by the bus as opposed to long-term projects such as rail and Luas.

At present bus lanes are in place for less than one third of a bus journey on the busy corridors. This means buses are competing for space with general traffic and so are affected by the increasing levels of congestion.

➤ **Growing Population** – It is predicted that the population for the Dublin region will grow 25% by 2040, bringing it to almost 1.5m for the region. This huge growth in population has to be accommodated with a quality public transport system.

➤ **The bus system can deliver** – We need to invest in the bus system because the bus system is the main component to meet our future transport needs. A good bus system has the reach and flexibility to service all the new housing developments, business parks, hospitals, colleges and retail shops across Dublin. It is a proven solution and is the main form of public transport across Dublin with 67% of public transport journeys each day made by bus. The bus system carries three and four times the number of people who travel on Luas or Dart and commuter rail.

Forecast Population Growth in Dublin Region

4 BusConnects Core Bus Corridors
11: Kimmage > City Centre

➤ **People want to cycle** – The core bus corridor project is not just about the provision of bus lanes. Under this project we will also deliver 200km of segregated cycling infrastructure to make cycling safer and more attractive than ever before. This initiative is the foundation of the overall cycle network for the Greater Dublin Area.

Commuting to work by bicycle has increased by 43% since 2011. Again this growth represents a clear choice that people are making to cycle. This project will support that trend and is a vital component of creating a sustainable transport system for people across Dublin. Safe cycling facilities across the 16 key bus corridors will provide people, families and their children a suitable environment to cycle where they want and when they want

➤ **People want to use public transport** – The need to build a core bus network is being driven by increases in congestion and also by the significant shift of people choosing to use public transport. People want to use it and should have a reliable and efficient bus system to travel on. Based on 2017 canal cordon figures over 70% of people travelling into the city each morning do so by sustainable transport modes and mostly by bus. Cars only account for 30% of travel into the city centre each day and therefore the amount of road space allocated to sustainable transport needs to reflect that position.

Dublin Canal Cordon 2017 Statistics - 7am to 10am

SECTION 1

1.3 What is BusConnects Dublin?

BusConnects Dublin is a major investment programme to improve public transport in Dublin.

It aims to overhaul the current bus system in Dublin through a 10 year programme of integrated actions to deliver a more efficient, reliable and better bus system for more people.

- Building a network of new bus corridors to make journey's faster and more reliable.
- New network of cycle lanes/tracks.

- Redesign of the Dublin area bus network to provide a more efficient network with high frequency spines, new orbital routes and increased bus services.

- Develop a state-of-the-art ticketing system.
- Implementation of a cashless payment system.
- Simpler fare structure.

- New bus livery providing a common style across different operators.

- New bus stops and shelters with better signage and information.
- Provision of bus based Park and Ride sites in key locations.

- Transitioning to a new bus fleet with low emission vehicle technologies.

1.4 What are the benefits of this project?

- Journey Time Savings** – The core bus corridor project will deliver journey time savings of up to 40-50% on each corridor. Dedicated bus lanes can significantly increase bus travel speeds and reliability. Improved journey times and reducing the amount of time people spend commuting will make bus travel more attractive and reduce our reliance on car travel. The more convenient the bus system is, the faster the modal shift will be for people from the car to the bus. Not only will current bus users and cyclists benefit but future commuters will be able to avail of a better system as the improved bus and cycle lanes are built.
- Accessibility for all** – Accessibility is about people’s ability to reach the destinations and services they want to get to. This means both people’s level of mobility and the costs of travelling. There are many tens of thousands of people across Dublin who cannot drive a car, do not have a car and are completely reliant on the bus service. The bus lane improvements will enhance accessibility for the elderly and mobility impaired because all buses are accessible and bus stops, bus shelters and footpaths will support easy boarding and disembarking of the buses.
- Better cycling facilities** – This project will see the provision of much needed cycling facilities around the city region. Across the 16 radial bus corridors there will be over 200kms of high quality cycling facilities provided. These new or improved cycle lanes will be segregated from bus lanes and general traffic where feasible.

Journey Time Savings

BusConnects Core Bus Corridors
 11: Kimmage > City Centre

- **Pedestrians and Local Urban Centres** – In addition to bus lanes and cycling facilities this project is an opportunity to enhance and improve local areas. This project is focused on making things better for commuters and communities around the bus corridors. Along each route, improvements and enhancements will be made to footpaths, walkways and pedestrian crossings. Funding and investment for local urban centres with additional landscaping and outdoor amenities will be provided.
- **Building a sustainable city and addressing climate change** – By providing a better bus system for Dublin we can make it a more attractive place to live, work and visit. A good public transport system is vital to support the economic activity of any city and can also address the need to improve air quality and reduce CO² emissions. Tackling the challenges of climate change is a priority for the Government and moving more people to public transport is a key component of the solution.

1.5 What does the core bus corridor project entail?

The core bus corridor project proposes the provision of 230 kilometres of bus lanes on sixteen of the busiest bus corridors and 200 kilometres of cycle lanes and tracks as published in the discussion document, Core Bus Corridor Project Report June 2018.

The layout below shows the arrangement that we are seeking to achieve on each corridor. However, this optimal layout is difficult to achieve in practice and we have proposed alternative solutions in various places to deliver the required bus and cycling lanes.

Bus lanes are needed to make the current and future bus system operate efficiently, reliably and punctually. Our intention is to develop these bus corridors so that each will have continuous bus priority – in other words, a continuous bus lane in each direction as well as maintaining two general traffic lanes. In addition we also want to provide safe cycling facilities, segregated where possible from other vehicular traffic. This will remove the delays currently experienced which will grow worse as congestion increases.

Optimum Road Layout

2. Emerging Preferred Route

2.1 Emerging Preferred Route for Kimmage to City Centre

The Emerging Preferred Route set out in this consultation document was identified following an assessment of various alternatives.

The route selection process involved identification and consideration of possible options taking account of criteria including local impacts on property frontage, existing traffic patterns and broad assessment of environmental impacts. A Feasibility Report setting out details of the assessment work undertaken is available on www.BusConnects.ie.

Arising from that work an Emerging Preferred Route has been identified for this corridor and public feedback on that proposal is now sought. It is important to know that this option is not adopted yet. Only following this public consultation and the review of the submissions received will a decision on the final Preferred Route be made.

2.2 Kimmage to City Centre Overview

The Kimmage to City Centre Core Bus Corridor commences on the R817 Kimmage Road Lower at the junction with Terenure Road West and Fortfield Road and is routed via the R817 along Kimmage Road Lower to R137 Harolds Cross Road, and then along the R137 through Harolds Cross Road, Clanbrasil Street Upper & Lower and New Street South where it will join the Greenhills Core Bus Corridor at Kevin Street Upper junction. Priority for buses is provided along the entire route, consisting

primarily of dedicated bus lanes in both directions, with alternative measures proposed at particularly constrained locations along Kimmage Road Lower. Due to constraints throughout an alternative route along the same corridor is proposed for the cycle tracks.

2.2.1 Terenure Road West to Sundrive Road – Kimmage Road Lower

At the Kimmage Road West junction with Fortfield Road and Terenure Road West, it is proposed to upgrade the junction to provide bus priority and enhanced pedestrian / cyclist facilities. To accommodate these proposed improvements works, it is proposed to use some limited land take from the green space located to the north of the junction.

The section of Kimmage Road Lower between Kimmage Road West and Sundrive Road / Larkfield Avenue is heavily constrained. It is proposed to provide footpaths plus one bus and one general traffic lane in each direction on this section. Due to various pinch points along this section, it is proposed to use some limited areas of land take between Corrib Road and Sundrive Road. The indicative extents of this land take are included in the Appendix in this brochure.

There is insufficient space to provide cycle facilities on this stretch of the road. To accommodate cyclists, it is intended to direct them on to an alternative cycle route along Kimmage Road Lower from the junction with Fortfield Road and Terenure Road West to Hazelbrook Road. Then along Hazelbrook Road, Hazelbrook Drive, Derravagh Road to Larkfield Grove and through the Priory Road Park and along Priory Road, returning to Kimmage Road Lower.

It is proposed to modify junctions along this route to provide priority for cyclists.

SECTION 2

2.2.2 Sundrive Road to Harolds Cross Road – Kimmage Road Lower

At the junction of Sundrive Road and Kimmage Road Lower, it is proposed to limit access to Kimmage Road Lower to buses, taxis and cyclists only. This restriction is intended to be maintained between this junction and Harold's Cross. Right turning traffic from Larkfield Avenue and left turning traffic from Sundrive Road is proposed to be banned. Local access for residents on this section of Kimmage Road Lower and adjoining streets can be maintained through Larkfield Avenue, Priory Road, Westfield Road, Kenilworth Park and Casimir Road.

Through traffic is proposed to be redirected along the following alternative traffic routes;

- Sundrive Road and Clogher Road; and
- Larkfield Park, Clareville, Kenilworth Park and Harold's Cross Road.

Junctions along these proposed alternative traffic routes will be altered where necessary to facilitate these traffic movements. On the west side of the Harold's Cross Park, additional bus stop facilities will be provided.

2.2.3 Harolds Cross Road to Kevin Street Upper - Harolds Cross Road, Clanbrassil Street Upper & Lower, and New Street South

Between Harold's Cross Park and Parnell Road it is proposed to provide a footpath, one bus lane and one general traffic lane in each direction on this section.

Between Parnell Road and Lombard Street West, it is proposed to maintain a footpath, one bus lane and one general traffic lane in each direction. To accommodate this cross section, the following works may be required:

- Proposed cantilevered footway across the Grand Canal adjacent to access road for Gordons Oil;
- Retention of on-street parking where the road width permits;
- Limited landtake on Clanbrassil Street Upper north of the Grand Canal, and at the junction of Clanbrassil Street Lower and St. Vincent Street South. The indicative extents of this land take are included in the Appendix in this brochure.

Between Lombard Street West and Kevin Street Upper, it is proposed to maintain a footpath, one cycle track, one bus lane, and one general traffic lane in each direction. It is proposed to close access from Vincent Street South to Clanbrassil Street. To maintain bus priority through the South Circular Road Junction, it is proposed to introduce bus priority signals for city bound traffic. Access from Clanbrassil Street to Vincent Street South will remain unchanged. At Kevin Street Upper, this scheme ties in with the Greenhills to City Centre CBC.

There is insufficient space to maintain cycle facilities through this section from north of Harolds Cross Park to Kevin Street Upper. To cater for cyclists, it is proposed to direct cyclist into the entrance road for Our Lady's Hospice & Care Services, and to construct a new cycle track linking the entrance route to Greenmount Lane. This will require land take from the Hospice. Cyclists will be able to access Parnell Road from Greenmount Lane. Once on Parnell Road, cyclists will be directed to Grove Road. It is proposed to include a new crossing point

BusConnects Core Bus Corridors
11: Kimmage > City Centre

12

over the Grand Canal for cyclists / pedestrians linking Grove Road and Portobello Road. Cyclists will then be directed to a shared street facility on the following streets;

- Martin Street;
- Lennox Street;
- Stamer Street;
- Heytesbury Street; and
- New Bride Street leading on to Kevin Street Upper.

It is proposed to restrict local access for Heytesbury Street by introducing a road closure at the Long Lane junction. This street would remain accessible for pedestrians and cyclist however through general traffic will no longer be permitted. General traffic on New Bride Street will be directed up Long Lane or Camden Row.

At the junction with Parnell Road / Grove Road it is proposed to provide a right turn ban on to Grove Road. Drivers currently making this traffic movement will be required to continue as far as the South Circular Road and make the right turn movement at this junction.

2.3 Key Facts

- Approximate number of properties that may be impacted: **75**
- Approximate number of on-street parking spaces that may be removed: **65**
- Approximate number of roadside trees that may be removed: **70**
- Approximate route length: **4kms**
- Approximate new cycle lane length: **1.5kms**
- Current bus journey time: up to **45 mins**
- BusConnects journey time: **12-15 mins**
- Future Bus journey time without BusConnects: **55 mins +**

Bus Connects Core Bus Corridors
11: Kimmage > City Centre

13

SECTION 2

3. Challenges and Mitigations

3.1 The Challenges

It's important to acknowledge that the choices required to deliver this step-change in the performance of the bus system will be difficult. However, the decision-making needs to be done now and not postponed until the problem is far greater. Some of the decisions may be hard but they are being made because we believe that these plans have the potential to fundamentally transform the way public transport works in Dublin.

Our challenge now is to respond to the needs of a modern city by providing a fit-for-purpose bus system, built on a streetscape that dates back centuries. Needless to say the streets were not designed to move the number of people that now need to travel in and out of the city each day. Some of the city's inner suburbs date back to Victorian times, with road layouts suited to more modest levels of traffic than we see today.

- We will need to widen roads;
 - We will have to convert current traffic lanes to bus lanes;
 - We will need to restrict on-street parking;
 - We will need to remove trees or parts of front gardens.
- Not all the impacts will be felt equally and some locations will require more changes than others. Over the years those modifications that were easier to implement - the ones that caused little or no disruption - have been made. This means that there are no longer any simple changes which we can make that would generate meaningful benefits.

If we don't decide to make these changes now, then we need to accept that Dublin will become increasingly congested and a less attractive place to live and work, both for us now and for future generations.

3.2 Potential Impacts

3.2.1 Traffic changes

By creating more priority for buses and cycling there will be changes to how traffic currently moves around the streets. On some corridors, certain roads may become one-way, new bus-only sections will be introduced and in some places general traffic will have to take new routes in and out of the city. Additional cycle routes will be built, generally segregated from vehicular traffic, and pedestrian crossings will be added and moved in some areas.

3.2.2 Land take

Because there is so little unused space along these busy roads, it will often not be possible to accommodate the bus lanes and cycle lanes in the width available. In order to achieve the required space it will be necessary, in places, to acquire parts of front gardens, driveways and land in front of commercial properties to allow the bus and cycle lanes to be provided. This would require rebuilding new garden walls and driveways a short distance back from the existing road boundary.

3.2.3 Reduction of On-Street Parking and Loading Facilities

Because the roads that need widening travel through residential and business areas there will be a need to reduce the amount of on-street parking and loading facilities to accommodate the new layout.

SECTION 3

There are principles for mitigation, statutory compensation and reparation which will be adhered to by the NTA as part of the statutory planning process. However, below are some of the measures that we envisage will be included. This list is not exhaustive and we anticipate that there will be other measures that will need to be put in place.

3.3.1 Traffic Changes

Where general traffic is diverted and re-routed, adequate signage and road markings will be provided for people to find their way. Measures will be implemented to ensure that “rat-runs” do not emerge as a consequence of the re-routed traffic. Also, local access will be maintained where new bus-only sections or one-way systems are brought in for residents and commercial properties.

3.3.2 Land take

Where lands, such as parts of gardens and driveways, are being acquired for widening we will purchase the portion of front gardens and driveways from property owners; ensure new landscaping and replanting of the gardens, reinstatement of driveways as well as providing compensation for the garden and driveway portion loss and disruption.

Where private and public walls or fencing are removed we will rebuild new garden walls and replace fencing where gardens have been affected and shortened. Also, where public or commercial walls and fencing have been taken they will be rebuilt and replaced.

3.2.4 Removal of Trees

As with the need to remove some parts of front gardens and footpaths there will be a need to remove trees along some of the corridors.

3.2.5 Road Works and Construction Sites

Widening roads, and building bus and cycle lanes, requires construction work. There will be excavation of the existing roads, plus parts of gardens and footpaths where needed. There will be resurfacing, kerbing, replanting and landscaping. As with any work site and road works, there will be a certain level of noise, dust and temporary traffic diversions.

3.3 How we will address those challenges

Obviously these challenges and impacts are significant. Every feasible option is being looked at to minimise the disruption to people, their property and the wider local community. Where there is simply no viable alternative, and where we know we have to remove trees, portions of gardens, driveways or parking, we will ensure appropriate mitigation measures are put in place, wherever practicable.

As part of this public consultation potentially impacted property owners will be contacted directly by the NTA and a direct dialogue will commence. As each individual property owner will have specific and personal issues there will be a dedicated liaison team to engage with this group on an individual basis.

3.3.3 On street parking and Loading Facilities

Where there is a loss of on-street parking and loading facilities we will seek to provide, where feasible, alternative arrangements close by for residents and businesses.

3.3.4 Trees

Where trees are removed from roadsides and footpaths we will put in place a comprehensive replanting programme. This programme will use mature or semi-mature ready-grown trees where appropriate and, where it is feasible, plant them as close as possible to the original locations.

3.3.5 Urban Centre Improvements

We will look for areas along the busy corridors where it is possible to improve the existing local spaces and the existing landscaping. It is important to use this opportunity to not only replace what is removed but to enhance the local areas. To do so, we will consult with the local authorities on such urban centre improvements and collectively seek to create attractive local environments.

3.3.6 Road Works and Construction Sites

During the construction stages the construction sites will be localised and managed on a road by road basis. The size of each work site and the hours of working will have to take into consideration the residential nature of many of the roads. Traffic management will be very important to keep the traffic moving and ensuring local access for people and deliveries is always maintained.

BusConnects Core Bus Corridors
11: Kimmage > City Centre

17

SECTION 3

4. The Process for the Acquisition of Land

Where the potential for impacts on private lands have been identified, the following process applies:

Q4 2018 – Q2 2019 NTA will issue information letters (not formal compulsory purchase order (CPO) notifications) to potentially impacted land owners and/or occupiers along each Core Bus Corridor. *Potentially impacted includes for example, the acquisition of parts of front gardens, walls, fences, gates, driveways and the rebuilding of same to make way for street widening.* The intention of this is to start a direct dialogue between NTA and the potentially impacted parties.

During 2019 to prepare the statutory planning documentation, the project design and environmental impact assessment will be progressed. During this time NTA will endeavour to minimise impacts on private lands. Direct dialogue between NTA and potentially impacted parties will continue to understand the likely impact of the proposed development and what arrangements can be made to minimise and where possible avoid those impacts.

End of 2019 / start of 2020 NTA will finalise the statutory planning documentation and will serve formal notice on the actual impacted owners of land proposed to be compulsorily purchased for the project. It will make a formal application to An Bord Pleanála for confirmation to compulsorily purchase necessary lands for purposes of constructing upgraded bus-lanes and bike-lanes.

During 2020 An Bord Pleanála will consider the planning application. There will be a period of statutory public consultation to allow those notified as being subject to CPO, and the public at large, to make submissions and/or objections to An Bord Pleanála. This will be followed by an Oral Hearing by An Bord Pleanála if deemed necessary. The statutory process will conclude with a decision by An Bord Pleanála on whether to:

1. approve the application, approve with conditions, or refuse the application; and
2. confirm, amend, or reject the CPO.

From 2021 onwards if An Bord Pleanála grants approval NTA will commence valuations and negotiations to acquire the lands in the CPO, and progress construction of the project. The construction of each core bus corridor will take up to two years to complete. The construction start dates for each of the 16 corridors will be managed over the period 2021 through 2027.

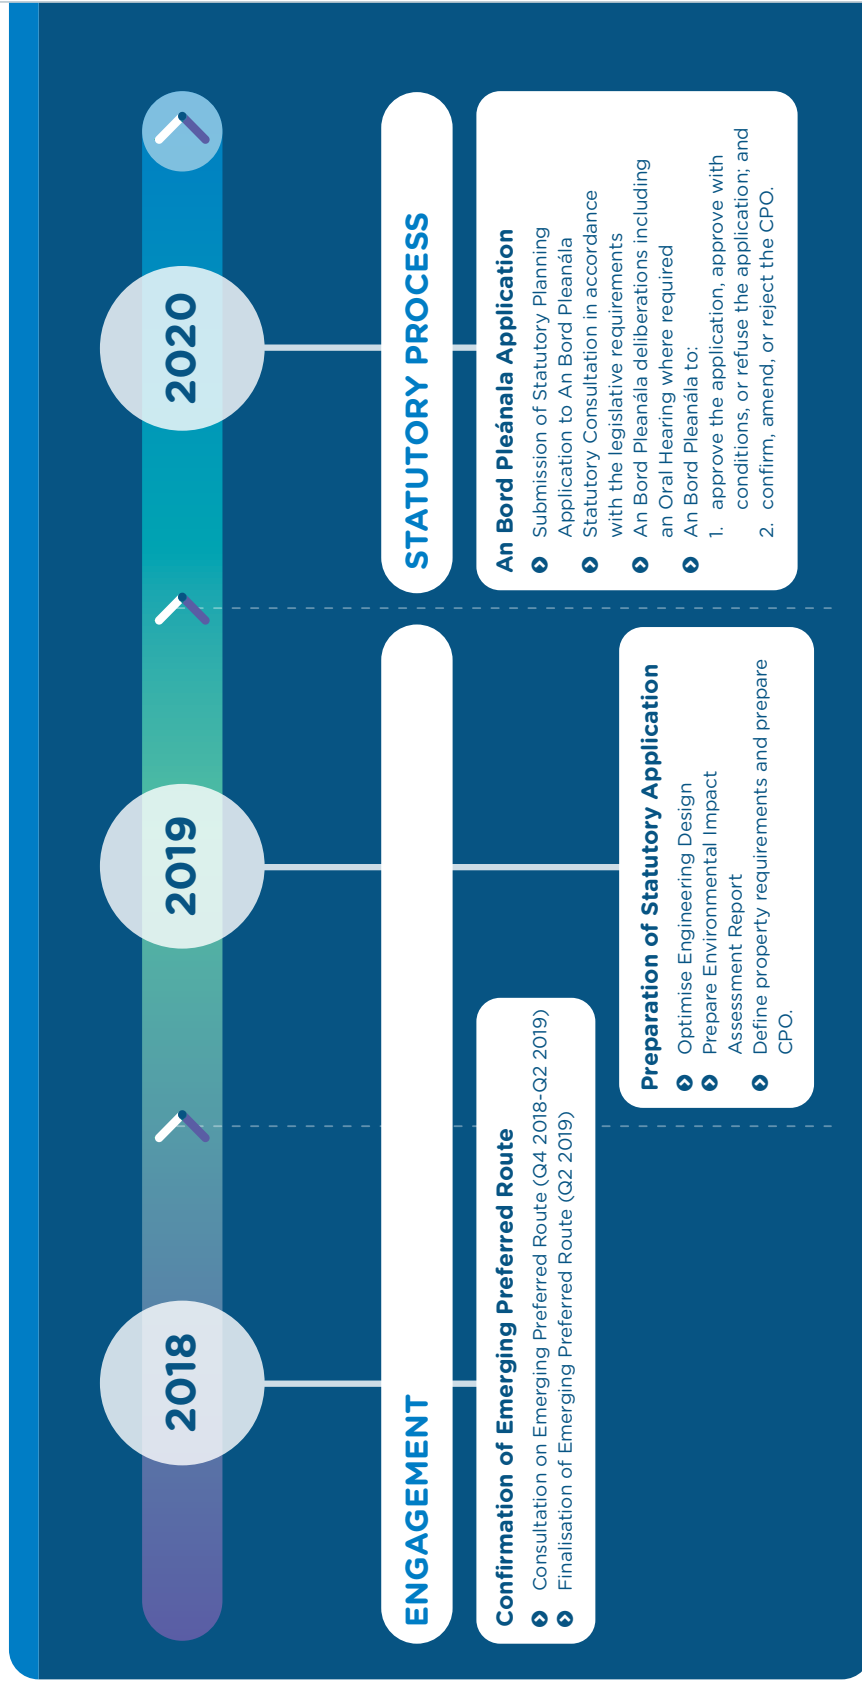

19
BusConnects Core Bus Corridors
11: Kimmage > City Centre

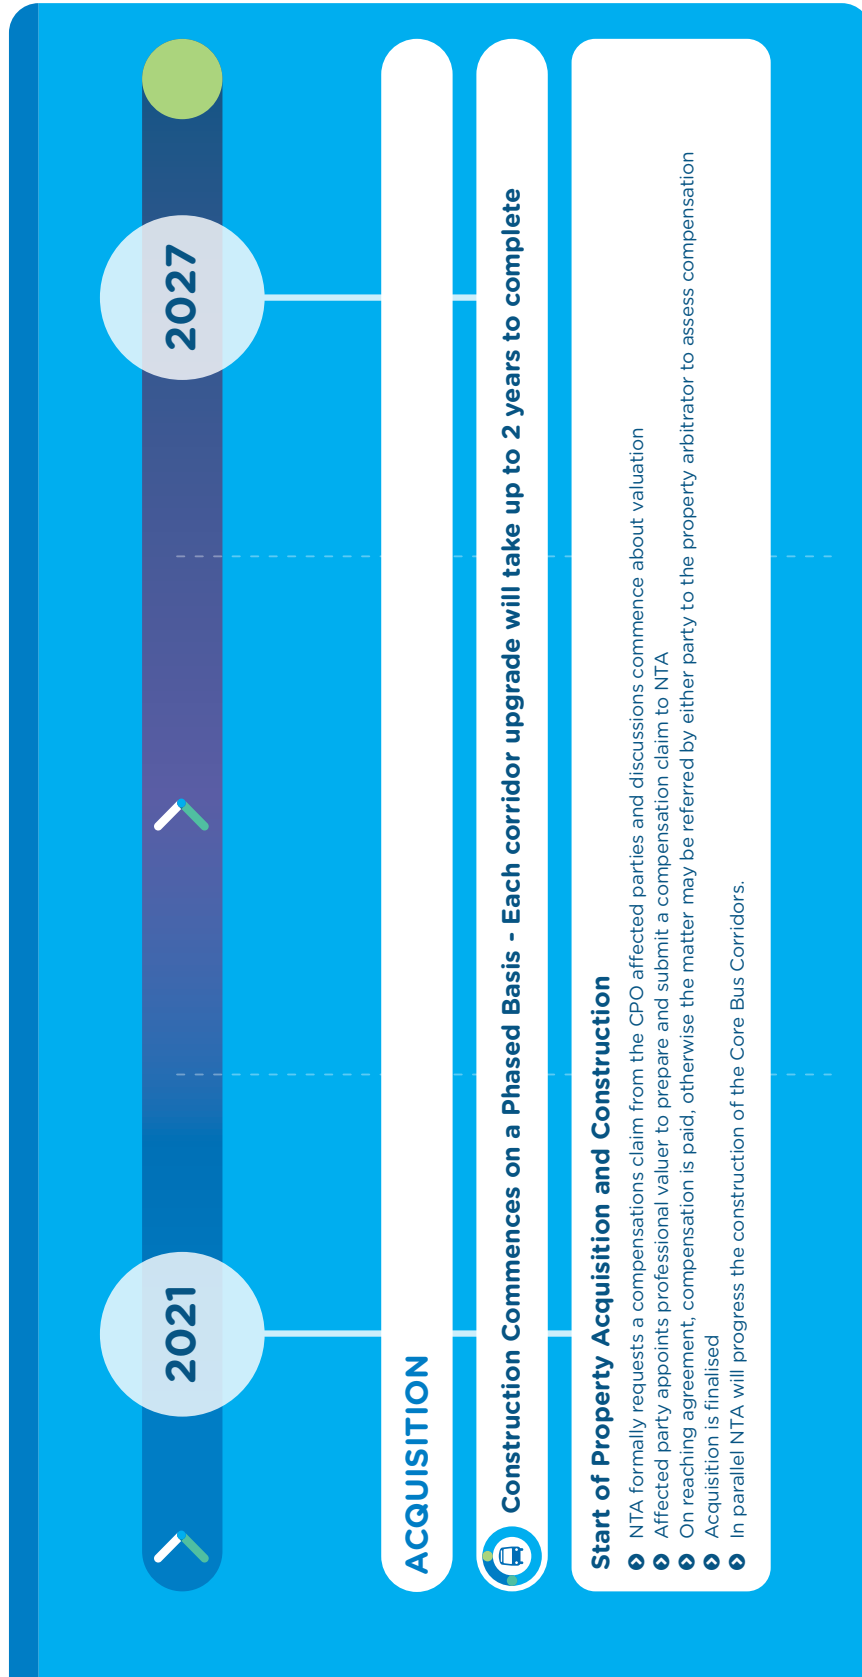

SECTION 4

4.1 How the project will progress

How & when to get involved

SECTION 4

5. How to take part in the public consultation

Please remember that the plans that we are publishing are proposals and that no final decision has been made on these matters in advance of the public consultation. We welcome all of your views.

Where you do not like a proposal, please consider suggesting an alternative solution or other option for consideration. But do bear in mind that bus transport is, and will continue to be, the main form of public transport for most areas of the Dublin region and an alternative of providing an underground rail system is simply not a viable option for most parts of Dublin.

5.1 Potential impacted lands

If your property is potentially impacted by the proposals, a letter will have been hand delivered to the property and details of how to engage with the NTA are detailed in that letter. A dedicated property liaison representative will be available to meet with individual property owners and provide regular updates on the project.

5.2 General queries

The project website www.busconnects.ie has a dedicated section for the Core Bus Corridor project. Users can access the site to find out more about the project and download copies of the key studies that have been carried out.

General queries can be directed to a dedicated Freephone - **1800 303 653** or by email to cbc@busconnects.ie

5.3 How to engage

We are inviting submissions in relation to the proposals set out in this Public Consultation Document.

Written submissions and observations may be made by:

Online:

Through the online form in the "Public Consultation" section of the Core Bus Corridor page on our website: www.busconnects.ie

Core Bus Corridors Kimmage to City Centre

There has been a lot of thinking and work on the best routes for bus corridors.

These are known as Emerging Preferred Routes.

One route goes from Kimmage to the City Centre.

This bus corridor will start on Kimmage Road Lower at the junction with Terenure Road West and Fortfield Road.

It will go along Kimmage Road Lower to Harolds Cross Road.

The bus corridor will go along Harolds Cross Road, Clanbrassil Street Upper & Lower and New Street South.

Then, it will join the Greenhills Core Bus Corridor at Kevin Street Upper.

Now, the bus journey from Kimmage to the City Centre takes up to 45 minutes.

With the bus corridor, this journey will take less than 15 minutes.

The route is 4 kilometres.

There will be new cycle lanes along this route.

We need to make changes along the route to make room for the bus corridor.

For example, changing road layouts, putting in more footpaths, taking away parking spaces, taking down and replacing trees, making changes to some gardens.

You will find a map for this route and an information booklet at:

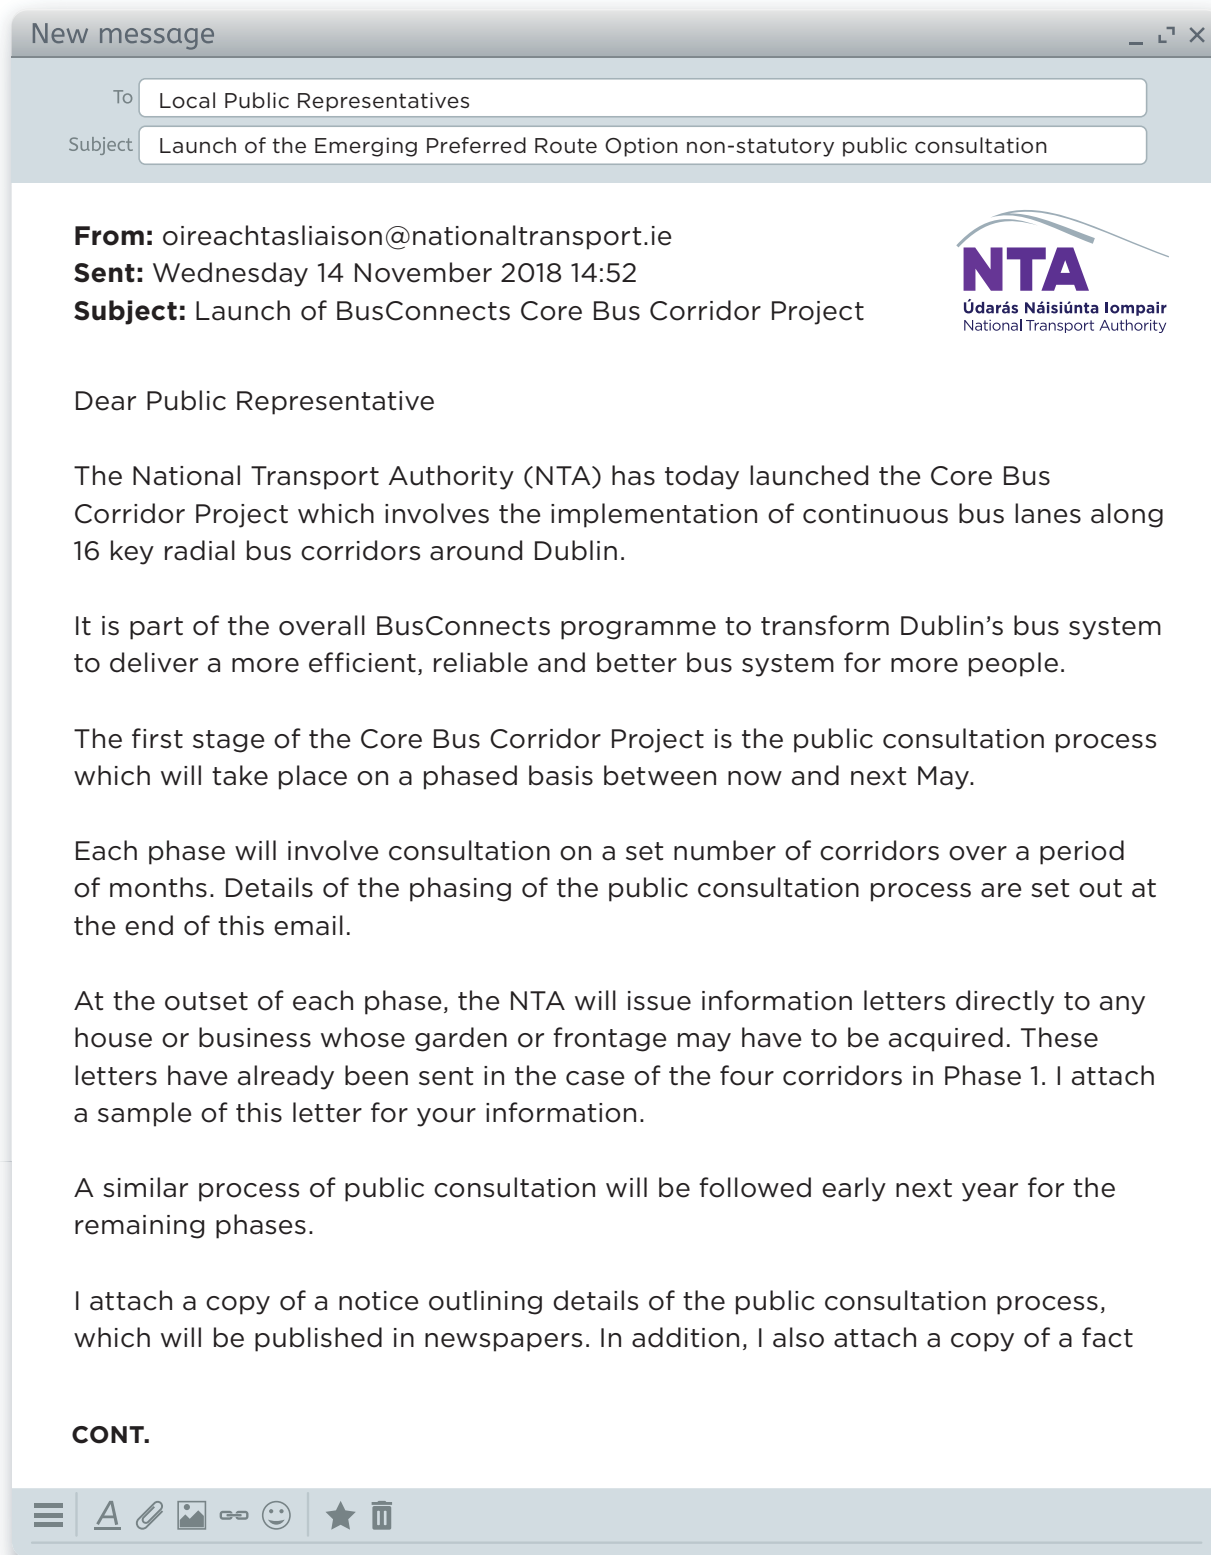

www.busconnects.ie

Emerging Preferred Route Option: First Round of Non-Statutory Public Consultation - 14th November 2018 - 31st May 2019

3B Public Representative Engagement

Correspondence with local public representatives regarding the launch of the Emerging Preferred Route Option non-statutory public consultation on 14 November 2018:

New message

To: Local Public Representatives

Subject: Launch of the Emerging Preferred Route Option non-statutory public consultation

sheet regarding the public consultation. More detailed information on the Core Bus Corridor Project is available on the BusConnects website, www.busconnects.ie.

The NTA is fully committed to working with all interested parties in the development of the Core Bus Corridors Project. In that regard we will be establishing a community forum for each corridor to facilitate engagement with all parties including individuals, residents associations, community groups, etc. Requests to participate in the community forum should be sent to cbc@busconnects.ie

In conclusion we look forward to working with you and your constituents in the coming months with a view to vastly improve the bus experience for the growing number of passengers who wish to use sustainable transport modes in and around the city.

Yours sincerely,
Anne Graham
CEO, National Transport Authority

**Re: BusConnects
to City Centre Core Bus Corridor Project**

Dear Property Owner / Occupier,

The National Transport Authority (NTA) has been tasked with delivering the BusConnects Dublin programme, which is a set of proposals to transform Dublin's bus system, so that journeys by bus will be fast, reliable, punctual, convenient and affordable. It will enable more people to travel by bus than ever before, providing an alternative to congested car journeys.

From the perspective of public transport, congestion is a major problem. On the busiest bus routes, bus lanes are only in place for less than one third of the corridor. This means that for most of the journey, buses are competing for space with general traffic and so are also affected by the increasing levels of congestion.

A key part of the BusConnects programme is the development of "Core Bus Corridors", effectively the delivery of continuous bus lanes, on the key bus routes across the city. Sixteen corridors are included in BusConnects Dublin.

Initial work has been undertaken on these corridors to identify an Emerging Preferred Route for each corridor. The Emerging Preferred Route is the proposal which, subject to a public consultation process, is considered to offer the best solution to improve the bus and cycle network.

The purpose of this letter is to inform you that the proposals contained in the Emerging Preferred Scheme for the _____ to City Centre Core Bus Corridor **may** impact on part of your property. An extract from a layout map showing an indicative layout of the scheme in the vicinity of your property is attached. The plan shows where the car lanes, bus lanes, cycle lanes and footpaths will be. Areas where land may be potentially impacted are marked with red dashed lines.

Tabhair cuairt ar www.Transportforireland.ie le haghaidh eolais agus seirbhísí iompair phoiblí do chustaiméirí
Visit www.Transportforireland.ie for public transport customer information and services

A complete public consultation document, which contains all of the relevant maps for this corridor, will be sent to you next week.

We do wish to reiterate that these are proposals only which are not fixed or finalised. They will be published in full shortly to get public feedback in relation to them. No decisions have been made to proceed with these proposals, and none would be taken until we have concluded the consultation process.

Any decision to proceed with this overall project would be subject to a statutory planning process, which would involve an application for planning consent to An Bord Pleanála. That planning application would not be made before 2020. If any garden portion or land was ultimately necessary to be acquired from your property, appropriate compensation would have to be paid in addition to the rebuilding of new garden walls, fences, gates and driveways, plus landscaping works to the residual area.

The NTA would welcome the opportunity to meet with you in relation to these proposals. That would give us the opportunity to discuss with you on a one-to-one basis, what this may mean for you and what the next steps will be over the coming months and years. If you wish to avail of this meeting please call **1800 303 653** to arrange a time and date at your earliest convenience.

Yours sincerely,

BusConnects Dublin,

National Transport Authority

TRANSFORMING CITY BUS SERVICES

BusConnects Core Bus Corridor Public Consultation

Comhairliúchán Poiblí do Chonairí Bus Lárnacha BusConnects

Clár infheistíochta suntasach is ea BusConnects d'fhonn iompar poiblí i mBaile Átha Cliath a fheabhsú. Tá sé mar aidhm aige an córas busanna reatha a leasú ó bhonn trí chlár comtháite 10 mbliana de ghníomhaíochtaí comtháite a chur i bhfeidhm d'fhonn córas busanna níos éifeachtaí, níos iontaofa agus níos fearr a chur ar fáil do níos mó daoine.

Tá sé mar aidhm ag tionscadal na gconairí bus lárnacha 230 ciliméadar de bhuslánaí tionsaíthe agus 200 ciliméadar de raonta rothaíochta a chur ar 16 cinn de na conairí bus is gnóthaí i mBaile Átha Cliath. Tá an tÚdarás Náisiúnta Iompair ag cur tús anois le comhairliúchán poiblí maidir leis na moltaí seo.

Is ar **bhonn céimnithe** a tharlóidh an comhairliúchán poiblí do sé chonaire bus lárnach déag, ag tosú an 14 Samhain 2018 agus ag leanúint ar aghaidh go dtí Bealtaine 2019.

Thosaigh an comhairliúchán poiblí don **chéad cheithre chonaire** cheana féin agus críochnóidh sé Dé hAoine, an 15 Feabhra 2019. Táimid ag lorg moltaí agus tuairimí faoi láthair maidir leis na conairí seo a leanas:

➤ **Cluain Ghrifín go Lár na Cathrach**

➤ **Sord go Lár na Cathrach**

➤ **Cluain Ghrifín go Baile Bhlainséir**

➤ **Leamhcán go Lár na Cathrach**

Is féidir mionsonraí faoi na **ceithre chonairea** íoslódáil ar an suíomh www.busconnects.ie nó glaoch a chur ar an uimhir shaorghlao 1800 303 653.

- Fóram Pobail - Cruthóidh an tÚdarás Náisiúnta Iompair Fóram Pobail do gach conaire le go mbeidh deis ag ionadaithe ó Chumainn Áitritheoirí, Grúpaí Pobail, Ionadaithe Pobail nó Grúpaí Leasmhara a bheith ar an eolas maidir leis an bpróiseas comhairliúcháin poiblí agus páirt a ghlacadh ann. Larhtar ort ríomhphost a sheoladh chuig cbc@busconnects.ie má theastaíonn uait a bheith páirteach ann.
- Ócáidí Eolais Comhairliúcháin Phoiblí - Réachtálfar sraith cruinnithe Comhairliúcháin Phoiblí in ionaid i gceantair na gconairí seo. Is féidir teacht ar shonraí maidir leo seo ar an suíomh agus sna nuachtáin áitiúla sna seachtainí atá le teacht freisin.

Foilseofar sonraí an dhá chonaire déag eile le haghaidh athbhreithniú an phobail go luath in 2019. Seo thíos liosta de na conairí agus de na céimeanna molta comhairliúcháin poiblí.

Dátaí Comhairliúcháin Phoiblí: Lár mhí Eanáir go deireadh mhí na Márta 2019	Dátaí Comhairliúcháin Phoiblí: Lár mhí na Feabhra go deireadh mhí Aibreáin 2019
Gleann na Life go Lár na Cathrach	Baile Múnna go Lár na Cathrach
Cluain Dolcáin go Droimeanach	Fionnghlas go Baile Phib
Na Glaschnoic go Lár na Cathrach	Bré go Lár na Cathrach
Tamlacht go Tír an Iúir	An Charrraig Dhúbh go Muirfin
Camaigh go Lár na Cathrach	UCD Droichead na Dothra go Lár na Cathrach
Ráth Fearnáin go Lár na Cathrach	An Rinn go Lár na Cathrach

Is féidir moltaí agus tuairimí maidir leis na **ceithre chonaire** a dhéanamh:

NTA
Údarás Náisiúnta Iompair
National Transport Authority

Details of the proposals for these **four corridors** are available for download on the website www.busconnects.ie or call Freefone 1800 303 653.

- Community Forum - The NTA will establish a Community Forum for each corridor where there will be an opportunity for a representative from Residents' Associations, Community Groups, Public Representatives and Interested Groups to get informed and engaged during the public consultation process. Please email cbc@busconnects.ie to get involved.
- Public Consultation Information events - A series of Public Consultation meetings will be held in venues along these corridors. Details of these can also be found on the website and in local newspapers in the coming weeks.

Details of the other twelve corridors will be published for public review in early 2019. Below is a list of the corridors and the proposed public consultation phasing.

Public Consultation Dates: Mid - January to End March 2019	Public Consultation Dates: Mid - February to End April 2019
Liffey Valley to City Centre	Ballymun to City Centre
Clondalkin to Drimmagh	Finglas to Phibsborough
Greenhills to City Centre	Bray to City Centre
Tallaght to Terenure	Blackrock to Merrion
Kimmage to City Centre	UCD Ballsbridge to City Centre
Rathfarnham to City Centre	Ringsend to City Centre

Written submissions and observations on the **four corridors** may be made:

Online:
Through the online form in the "Public Consultation" section of the Core Bus Corridor page on the website www.busconnects.ie

BusConnects Core Bus Corridor Phase 1 Fact Sheet:

BUS CONNECTS

TRANSFORMING CITY BUS SERVICES

BusConnects Core Bus Corridor Project

Public Consultation Key Facts

Background

- Population in the Dublin region is due to grow by 25% by 2040, bringing it to almost 1.55m.
- Bus is the proven solution and main form of public transport across Dublin with 67% of public transport journeys each day made by bus.
- Cars only account for 30% of travel into the city centre each day.
- Bus carries x3 and x4 the number of people who travel on Luas or Dart and commuter rail.
- Commuting to work by bicycle has increased by 43% since 2011.

Core Bus Corridors Project

- 230kms of continuous bus priority and 200kms of cycle tracks along 16 of the busiest corridors in Dublin.
- Delivery of journey time savings of up to 40-50% on each corridor.
- On the four corridors unveiled today, annual passenger growth in Dublin Bus services has increased by up to 14% in the years 2015 to 2017.
- Yet bus lanes account for only in place for one-third of corridors.

Phase One Facts

Route	No. of Properties Impacted	No. of on parking space being removed	No. of roadside trees being removed	Route length	Cycle lane length	Current bus journey time	BusConnects journey time	Future bus journey time without BusConnects
Clongriffin	120	31	100	10km	6km	Up to 65 mins	30-35 mins	85+ mins
Swords	110	101	170	12km	12km	Up to 71 mins	40 mins	80+ mins
Blanchardstown	100	87	200	8km	8km	Up to 65 mins	25-30 mins	80+ mins
Lucan	15	13	44	10km	5km	Up to 50 mins	30-35 mins	60+ mins

Phase Two & Phase Three

Phase Two Public Consultation Dates: Mid-January to End March 2019	Phase Three Public Consultation Dates: Mid-February to End April 2019
Liffey Valley to City Centre	Ballymun to City Centre
Clondalkin to Drimnagh	Finglas to Phibsborough
Greenhills to City Centre	Bray to City Centre
Tallaght to Terenure	Blackrock to Merrion
Kimmage to City Centre	UCD Ballsbridge to City Centre
Rathfarnham to City Centre	Ringsend to City Centre

CONT.

Buses & Annual Bus Passenger Journeys per Corridor

Corridor	Dublin Bus Routes	Annual Patronage 2017*	% Growth from 2014-2017
Blanchardstown	37,38,38a,38b,39,39a,39n,39x,70,70n,270	Approx.11m	15%
Lucan	25,25a,25b,25d,25n,25x,26,66,66a,66b,66n,66x,67,67n,67x	Approx.8.5m	14%
Clongriffin	14,15,27,27a,27b,27x,29a,29n,31,31a,31b,31n,32,32x,42,42n,43,130	Approx.22m	16%
Swords	1,16,33,33d,33n,41,41b,41c,41n,41x,44,11,13	Approx.19m	11%
Total		Approx. 61.2m	14%

*Dublin Bus passengers only. Other bus services also operate on these corridors.

Possible Costs:

Phase One Corridor	Estimated Cost	Phase One Corridor	Estimated Cost
Clongriffin to City Centre	€100m to €150m	Blanchardstown to City Centre	€120m to €170m
Swords to City Centre	€100m to €150m	Lucan to City Centre	€80m to €120m

Mitigation Efforts

- Where lands are being acquired, the NTA will ensure **new landscaping and replanting** of gardens, **reinstatement of driveways** and as well as **providing compensation** for the garden and driveway portion loss and disruption.
- Where private and public walls or fencing or removed, we will **rebuild and replace**.
- Where there is a loss of on-street parking and loading facilities, we will seek to provide, where feasible, alternative arrangements close by.
- Where trees are removed we will put in place a **comprehensive replanting programme** replacing more trees that we move. The programme will largely use mature or semi-mature ready-grown trees, and where it is feasible, plant them as close as possible to the original locations.
- We intend to create attractive local environments at key urban centres along the routes, with the provision of attractive landscaping, lighting, seating and other features.

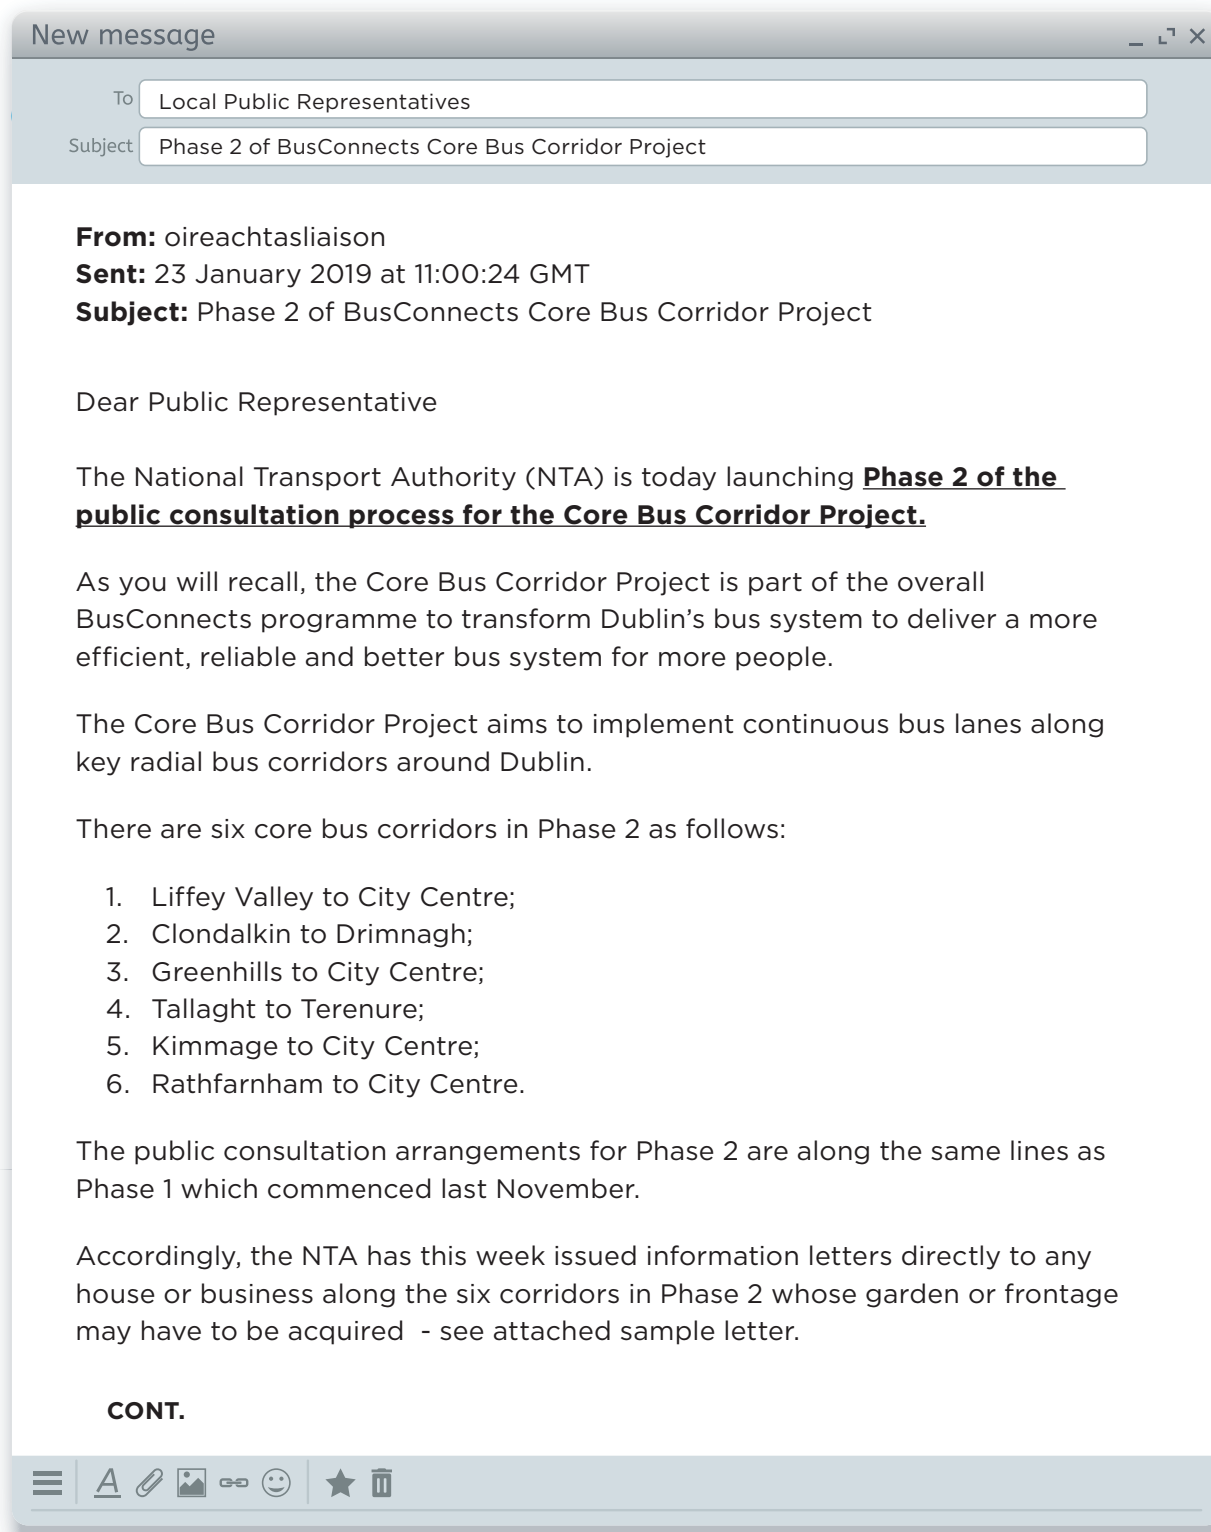

Process of Engagement

- The NTA believes a step-by-step process of engagement is the best approach to take in delivering the Core Bus Corridors project.
- All property owners potentially affected by today's announcement have been notified by post and a one-to-one meeting is being offered with each of those impacted.
- Today marks the beginning of a dialogue with those potentially impacted which will continue into 2019 and throughout the project.
- Planning approval from An Bord Pleanála will be required for this project and for the acquisition of garden portions. That planning application will only be made in 2020.

CONT.

- The NTA will also establish a Community Forum for each corridor where there will be an opportunity for a representative from Residents' Associations, Community Groups, Public Representatives and Interested Groups to get informed and engaged during the public consultation process.
- A series of public consultation meetings will be held in venues along the four corridors – details of which can be found on the BusConnects website.
- Written submissions and observations on the four corridors announced today may be made:
 - Online at: www.busconnects.ie;
 - Via post to: Core Bus Corridor Project, NTA, Dun Sceine, Harcourt Lane, Dublin 2, D02 WT20;
 - By email to: cbc@busconnects.ie.

Correspondence with local public representatives regarding the launch of Phase 2 of the Emerging Preferred Route Option non-statutory public consultation on 23 January 2019:

Subject: Phase 2 of BusConnects Core Bus Corridor Project

From: oireachtaslaiison
Sent: 23 January 2019 at 11:00:24 GMT
Subject: Phase 2 of BusConnects Core Bus Corridor Project

Dear Public Representative

The National Transport Authority (NTA) is today launching **Phase 2 of the public consultation process for the Core Bus Corridor Project.**

As you will recall, the Core Bus Corridor Project is part of the overall BusConnects programme to transform Dublin's bus system to deliver a more efficient, reliable and better bus system for more people.

The Core Bus Corridor Project aims to implement continuous bus lanes along key radial bus corridors around Dublin.

There are six core bus corridors in Phase 2 as follows:

1. Liffey Valley to City Centre;
2. Clondalkin to Drimnagh;
3. Greenhills to City Centre;
4. Tallaght to Terenure;
5. Kimmage to City Centre;
6. Rathfarnham to City Centre.

The public consultation arrangements for Phase 2 are along the same lines as Phase 1 which commenced last November.

Accordingly, the NTA has this week issued information letters directly to any house or business along the six corridors in Phase 2 whose garden or frontage may have to be acquired - see attached sample letter.

CONT.

New message _ ↗ ✕

To

Subject

I also attach a press release and some key facts relating to the Phase 2 corridors, which we are publishing today.

In due course we will be establishing a community forum for the six corridors in Phase 2 in order to facilitate engagement with all parties including individuals, residents associations, community groups, etc. All requests to participate in the community forum should be sent to cbc@busconnects.ie.

Local information events will be held at a later stage. We will send you details of the dates and venues for those events in due course.

Details of the phasing of all 16 core bus corridors are shown below. More details about the Core Bus Corridor Project, including brochures for Phase 2, are available on the BusConnects website, www.busconnects.ie.

In conclusion, it is important to point out that the public consultation process for the Core Bus Corridor Project marks the beginning of a detailed planning process that will ultimately be presented to An Bord Pleanála for approval. Accordingly, at this early in the process stage we are presenting initial concepts for the corridors and much more detailed work will be undertaken before the detailed proposals can be finalised and submitted to An Bord Pleanála.

Yours sincerely
Anne Graham

**Re: BusConnects
to City Centre Core Bus Corridor Project**

Dear Property Owner / Occupier,

The National Transport Authority (NTA) has been tasked with delivering the BusConnects Dublin programme, which is a set of proposals to transform Dublin's bus system, so that journeys by bus will be fast, reliable, punctual, convenient and affordable. It will enable more people to travel by bus than ever before, providing an alternative to congested car journeys.

From the perspective of public transport, congestion is a major problem. On the busiest bus routes, bus lanes are only in place for less than one third of the corridor. This means that for most of the journey, buses are competing for space with general traffic and so are also affected by the increasing levels of congestion.

A key part of the BusConnects programme is the development of "Core Bus Corridors", effectively the delivery of continuous bus lanes, on the key bus routes across the city. Sixteen corridors are included in BusConnects Dublin.

Initial work has been undertaken on these corridors to identify an Emerging Preferred Route for each corridor. The Emerging Preferred Route is the proposal which, subject to a public consultation process, is considered to offer the best solution to improve the bus and cycle network.

The purpose of this letter is to inform you that the proposals contained in the Emerging Preferred Scheme for the _____ to City Centre Core Bus Corridor **may** impact on part of your property. An extract from a layout map showing an indicative layout of the scheme in the vicinity of your property is attached. The plan shows where the car lanes, bus lanes, cycle lanes and footpaths will be. Areas where land may be potentially impacted are marked with red dashed lines.

Tabhair cuairt ar www.Transportforireland.ie le haghaidh eolais agus seirbhísí iompair phoiblí do chustaiméirí
Visit www.Transportforireland.ie for public transport customer information and services

A complete public consultation document, which contains all of the relevant maps for this corridor, will be sent to you next week.

We do wish to reiterate that these are proposals only which are not fixed or finalised. They will be published in full shortly to get public feedback in relation to them. No decisions have been made to proceed with these proposals, and none would be taken until we have concluded the consultation process.

Any decision to proceed with this overall project would be subject to a statutory planning process, which would involve an application for planning consent to An Bord Pleanála. That planning application would not be made before 2020. If any garden portion or land was ultimately necessary to be acquired from your property, appropriate compensation would have to be paid in addition to the rebuilding of new garden walls, fences, gates and driveways, plus landscaping works to the residual area.

The NTA would welcome the opportunity to meet with you in relation to these proposals. That would give us the opportunity to discuss with you on a one-to-one basis, what this may mean for you and what the next steps will be over the coming months and years. If you wish to avail of this meeting please call **1800 303 653** to arrange a time and date at your earliest convenience.

Yours sincerely,

BusConnects Dublin,

National Transport Authority

Press Release issued 23rd January 2019:

PRESS RELEASE

NTA LAUNCHES PUBLIC CONSULTATION ON SECOND PHASE OF THE CORE BUS CORRIDOR PROJECT

23rd January 2019 – The National Transport Authority has today announced details of the second phase of the BusConnects Core Bus Corridor project with the unveiling of a further six of the sixteen routes that are earmarked for development.

The BusConnects programme aims to transform Dublin's bus system, with the Core Bus Corridor project providing 230kms of dedicated bus lanes and 200km of cycle lanes on sixteen of the busiest bus corridors in and out of the city centre. This project is fundamental to addressing the congestion issues in the Dublin region with the population due to grow by 25% by 2040, bringing it to almost 1.55m.

The bus service is the main form of public transport across Dublin with 67% of public transport

journeys each day made by bus. The level of commuting to work by bicycle has also increased by 43% since 2011 and the need for better and safer cycling facilities will be provided through the rollout of the core bus corridor project.

The first phase of the public consultations commenced in November 2018 and is on-going. The latest public consultation for phase two is commencing today on the Emerging Preferred Routes for the following six corridors:

- ▶ **Liffey Valley to the City Centre**
- ▶ **Clondalkin to Drimmagh**
- ▶ **Greenhills to the City Centre**
- ▶ **Tallaght to Terenure**
- ▶ **Kimmage to the City Centre**
- ▶ **Rathfarnham to the City Centre**

On the six corridors announced today, annual passenger growth in Dublin Bus services has increased by up to 19% in the period 2015 to 2018. However, the millions of passenger journeys taking place on each of these corridors are facing increasing congestion with delays being frequently experienced by commuters.

All property owners potentially affected by today's announcement have been notified by post with one-to-one meetings being offered

in the coming weeks with those potentially impacted.

Phase Three of the Core Bus Corridors project will get underway in mid-February and will run until the end of April featuring the final six corridors: Ballymun to the City Centre; Finglas to Phibsborough; Bray to the City Centre; Blackrock to Merrion; UCD Ballsbridge to City Centre and Ringsend to the City Centre.

Anne Graham, CEO of the NTA said: "Today marks the second stage in a three-step process with details being unveiled of six additional Emerging Preferred Routes foreseen under the BusConnects Core Bus Corridor project. In recent days, we have notified the 665 property owners along these routes who may be potentially affected and offered one-to-one meetings to inform them of the proposals and listen to their feedback.

"We would encourage those who received the notification to get in contact with us and engage in the consultation process that runs until the 29th March. We want to hear from them to get their views on the proposals and the issues that they wish to see addressed.

"At the NTA, we are determined to deepen our engagement with

the communities along each of the identified corridors. That is why in addition to the meeting with potentially affected property owners we will also be organising public information events and Community Forums along each of the six corridors announced today.

“The Community Forums, in particular, will ensure a two-way dialogue with community leaders, residents’ associations, special interest groups and public representatives. We are eager to listen to the concerns of all those affected, and we will ensure they are kept updated on the project as it progresses.

“We have been encouraged by the positive level of engagement the NTA has witnessed since the launch of the Core Bus Corridors project public consultation in November 2018 and we will examine all observations carefully over the coming weeks as we look to develop Final Preferred Routes.

“Although we are aware that a project of this scale will bring many challenges, the BusConnects Core Bus Corridor project is needed now more than ever. With the city due to expand by 25% by 2040, continuous bus priority and segregated cycle lanes will be required to meet the growing demand for fast, reliable, punctual and convenient bus journeys in and out of the city centre, and safe cycling facilities for the growing numbers of cyclists.”

ENDS

BusConnects Core Bus Corridor Phase 2 Fact Sheet:

BUS CONNECTS

TRANSFORMING CITY BUS SERVICES

BusConnects Core Bus Corridor Project – Phase Two Public Consultation Key Facts

Background

- Population in the Dublin region is due to grow by 25% by 2040, bringing it to almost 1.55m.
- Bus is the proven solution and main form of public transport across Dublin with 67% of public transport journeys each day made by bus.
- Cars only account for 30% of travel into the city centre each day.
- Bus carries x3 and x4 the number of people who travel on Luas or Dart and commuter rail.
- Commuting to work by bicycle has increased by 43% since 2011.
- The performance by Dublin Bus continues to be very strong and the company provided the largest number of passenger journeys in 2018 at over 140m. This represents an increase of almost 4m over 2017, with the company posting five straight years of passenger growth.

Core Bus Corridors Project

- 230kms of continuous bus priority and 200kms of cycle tracks along 16 of the busiest corridors in Dublin.
- Delivery of journey time savings of up to 40-50% on each corridor.
- Of the next **six** corridors unveiled today, annual passenger growth in Dublin Bus services has increased by up to 15% in the years 2015 to 2017.
- Yet bus lanes account for only in place for one-third of corridors.

Phase Two Facts

The public consultation for Phase Two has now commenced and submissions can be made until Friday 29th March 2019.

Route	No. Properties Impacted	No. Parking spaces being removed	No. roadside tress being removed	Route length	Cycle lane length	Current bus journey time	BusConnects journey time	Future bus journey time without BusConnects
Liffey Valley to City Centre	60	30	90	10kms	2kms	Up to 65 mins	30-35 mins	80 mins+
Clondalkin to Drimnagh	15	0	20	4kms	4.5kms	Up to 21 mins	14 mins	25 mins+
Greenhills to City Centre	220	20	50	11kms	5kms	Up to 80 mins	35-40 mins	100 mins+
Tallaght to Terenure	40	15	15	4kms	1.2kms	Up to 32 mins	10-12 mins	45 mins+
Kimmage to City Centre	75	65	70	4kms	1.5kms	Up to 45 mins	12-15 mins	55 mins+
Rathfarnham to City Centre	255	50	45	6kms	7kms	Up to 75 mins	25-30 mins	90 mins+

Additional Notes:**Phase One**

The public consultation for Phase One is still ongoing with submission closing date of Friday 15th February 2019. The Swords to City Centre core bus corridor closing date has been extended until Friday 1st March 2019. This is to allow time for submissions to include observations for the Santry alternative layout option which is now included in the Swords to City Centre corridor consultation.

Phase One – Core Bus Corridor Routes

Clongriffin to City Centre
Swords to City Centre
Blanchardstown to City Centre
Lucan to City Centre

Phase Three

The final phase of the core bus corridor project public consultation will commence mid-February and run until the end of April 2019. The following table lists the core bus corridors for Phase Three.

Phase Three – Core Bus Corridor Routes

Ballymun to City Centre
Finglas to Phibsborough
Bray to City Centre
Blackrock to Merrion
UCD Ballsbridge to City Centre
Ringsend to City Centre

Mitigation Efforts

- Where lands are being acquired, the NTA will ensure **new landscaping and replanting** of gardens, **reinstatement of driveways** as well as **providing compensation** for the garden and driveway portion loss and disruption.

CONT.

- Where private and public walls or fencing are removed, we will **rebuild and replace**.
- Where there is a loss of on-street parking and loading facilities, we will seek to provide, where feasible, alternative arrangements close by.
- Where trees are removed we will put in place a **comprehensive replanting programme** replacing more trees than removed. The programme will largely use mature or semi-mature ready-grown trees, and where it is feasible, plant them as close as possible to the original locations.
- We intend to create attractive local environments at key urban centres along the routes, with the provision of attractive landscaping, lighting, seating and other features.

Process of Engagement

- The NTA believes a step-by-step process of engagement is the best approach to take in delivering the Core Bus Corridors project.
- All property owners potentially affected by today's announcement have been notified by post and a one-to-one meeting is being offered with each of those impacted.
- Today marks the beginning of a dialogue with those potentially impacted which will continue during 2019 and throughout the project.
- Planning approval from An Bord Pleanála will be required for this project and for the acquisition of garden portions. That planning application will be made in 2020.
- The NTA has already established four Community Forums for Phase One corridors and will now commence the establishment for the six corridors in Phase Two. These forums are an opportunity for a representative from Residents' Associations, Community Groups, Public Representatives, disability groups and Interested Groups to get informed and engaged during the public consultation process. Interested groups can register by emailing cbc@busconnects.ie.
- A series of public consultation meetings will be held in venues along the six corridors – details of which can be found on the BusConnects website in the coming days.
- Written submissions and observations on the six corridors announced today may be made:
 - Online at: www.busconnects.ie;
 - Via post to: Core Bus Corridor Project, NTA, Dun Sceine, Harcourt Lane, Dublin 2, D02 WT20;
 - By email to: cbc@busconnects.ie.

Public Representative Correspondence regarding the public information events and the Community Forums for the Kimmage to City Centre Core Bus Corridor:

New message

To: Local Public Representatives

Subject: BusConnects Phase 2 Community Forums

From: cbc
Sent: Tuesday 5 February 2019 15:38
Subject: BusConnects Phase 2 Community Forums

Dear Public Representative,

Last year, the NTA announced details of the public consultation process in respect of the BusConnects [Core Bus Corridor Project](#) which involves the implementation of continuous bus lanes along 16 key radial bus corridors around Dublin. As you may recall, the process has been broken up into three separate phases.

Phase 1 began in December of last year with the publication of the initial proposals for the following corridors with community forums and public information events for all corridors being established.

- Clongriffin to City Centre
- Swords to City Centre
- Blanchardstown to City Centre
- Lucan to City Centre

Phase 2 was launched in mid-January. This phase contains the following corridors and the NTA are now establishing Community Forums:

- Liffey Valley to City Centre;
- Clondalkin to Drimnagh;
- Greenhills to City Centre;
- Tallaght to Terenure;
- Kimmage to City Centre;
- Rathfarnham to City Centre.

Membership of the Community Forum comprises of a single representative from resident and community associations, disability and special interest groups and business organisations within each corridor, along with local public representatives.

As places are limited, only one representative per group can be accepted. We would ask all public representatives to make residents associations and community groups within their area aware of the Community Forum and pre-register as a Forum member by emailing the name and contact details of its representative to BusConnects at cbc@busconnects.ie in advance of the meeting.

To Local Public Representatives

Subject BusConnects Phase 2 Community Forums

In addition the Community Forum meetings there will be general open public information events held along each corridor in the coming weeks. Details of those events will be announced next week.

Community Forum Meetings Dates Only:

CORRIDOR	DATE	LOCATION	TIME
Rathfarnham to City Centre	Monday 11th February	Hilton Hotel, Charlemont Place, Dublin 2, D02 A893	18:30 – 20:00
Clondalkin to Drimnagh/ Greenhills to City Centre	Tuesday 12th February	Our Lady's Hall, Mourne Road, Drimnagh, D12, D12 DW68	18:30 – 20:00
Liffey Valley to City Centre	Wednesday 13th February	Hilton Hotel, Kilmainham Square, Inchicore, Dublin 8, D08 XAK3	18:30 – 20:00
Kimmage to City Centre	Monday 18th February	Hilton Hotel, Charlemont Place, Dublin 2, D02 A893	18:30 – 20:00
Tallaght to Terenure	Monday 25th February	St. Mary's Rugby Football Club, Templeville Road, Dublin 6W, D6W X652	18:30 – 20:00

Phase 3 will be launched in the coming weeks and we will be then publishing details of the final six corridors and establishing community forums for each corridor and hosting public information events.

- Ballymun to City Centre;
- Finglas to Phibsborough;
- Bray to City Centre;
- Blackrock to Merrion;
- UCD Ballsbridge to City Centre;
- Ringsend to City Centre.

Yours sincerely,
Bus Connects Team

TRANSFORMING CITY BUS SERVICES

BusConnects Core Bus Corridor Public Consultation

BusConnects is a major investment programme to improve public transport in Dublin. It aims to overhaul the current bus system through a 10 year integrated programme of integrated actions to deliver a more efficient, reliable and better bus system for more people.

The core bus corridor project aims to deliver 230kms of dedicated bus lanes and 200kms of cycle tracks along 16 of the busiest corridors in Dublin. The National Transport Authority has commenced a public consultation in relation to these proposals.

The public consultation for the sixteen core bus corridors will take place over a phased basis. Phase 1 commenced in November 2018 and will conclude Friday 15th February 2019. Details can be found on www.busconnects.ie.

The public consultation for **phase two** has now commenced and will end Friday 29th March 2019. We are now seeking submissions and observations for the following:

Liffey Valley to City Centre

Clondalkin to Drimnagh

Greenhills to City Centre

Tallaght to Terenure

Kimmage to City Centre

Rathfarnham to City Centre

Details of the proposals for these **6 corridors** are available for download on the website www.busconnects.ie or call Freefone 1800 303 653.

Community Forum - The NTA will establish a Community Forum for each corridor where there will be an opportunity for a representative from Residents' Associations, Community Groups, Public Representatives and Interested Groups to get informed and engaged during the public consultation process. Please email cbc@busconnects.ie to get involved.

Public Consultation Information events - A series of Public Consultation meetings will be held in venues along these corridors. Details of these will be available on the website and in local newspapers in the coming weeks.

Details of the remaining six corridors (Phase 3) will be published for public review in mid February. Below is a list of the corridors and the proposed public consultation phasing for phase 3.

Public Consultation Dates: Mid - February to End April 2019

Ballymun to City Centre

Finglas to Phibsborough

Bray to City Centre

UCD Ballsbridge to City Centre

Blackrock to Merrion

Ringsend to City Centre

Written submissions and observations on the six corridors may be made:

Project Ireland 2040
Building Ireland's Future

BusConnects is a major investment programme to improve public transport in Dublin. It aims to overhaul the current bus system through a 10 year integrated programme of integrated actions to deliver a more efficient, reliable and better bus system for more people.

The core bus corridor project aims to deliver 230kms of dedicated bus lanes and 200kms of cycle tracks along 16 of the busiest corridors in Dublin. The National Transport Authority has commenced a public consultation in relation to these proposals.

Community Forum

The NTA is fully committed to working with all interested parties in the development of the Core Bus Corridors project. We want to keep everyone informed on the proposed bus corridors fully in the picture at all times. As such, we have established a Community Forum for each corridor.

Phase 2 Public Consultation has now commenced and we are calling for a single representative from **resident** and **community associations, disability** and **special interest groups** and **business organisations** on the corridors, along with public representatives. As places are limited, only one representative per group can be accepted.

Liffey Valley to City Centre, Clondalkin to Drimnagh, Greenhills to City Centre, Tallaght to Terenure, Kimmage to City Centre and Rathfarnham to City Centre.

The aim is to create two-way communication with local communities allowing information and feedback to be relayed clearly, quickly and accurately.

If you would like to nominate a representative for the phase 2 corridors above, please let us know by emailing **cbc@busconnects.ie**

Community Forums are being set up for each of the sixteen corridors. Phase 1, the first 4 routes is currently underway. Phase 3, the remaining 6 corridors is due to be published for Public Consultation shortly.

General Information

Public Consultation is now live for these six corridors and will end Friday 28th March 2019
Written submissions and observations on the **six corridors** may be made:

BUSCONNECTS CORE BUS CORRIDORS PROJECT COMMUNITY FORUM TERMS OF REFERENCE

1. Membership of the Community Forum will comprise of two representatives from residents'/community associations, disability groups, special interest groups and business organisations on the corridor, along with local public representatives, together with personnel from the National Transport Authority (NTA).
2. Meetings of the Community Forum will be chaired by an independent chairperson.
3. The core objective of the Community Forum is to facilitate a two-way dialogue process between representatives of communities / groups and the NTA in relation to the Core Bus Corridor proposals.
4. It will enable information to be provided more directly by the NTA to the parties most impacted by the proposals.
5. It will allow concerns about the proposals to be raised by the participants and for the NTA to address and respond to those concerns.
6. It will allow constructive ideas and viable alternatives to be brought forward to improve the overall proposals.
7. It will assist in enabling the resolution of local issues within the proposals in a timely manner.
8. It will allow discussions and suggestions in relation to ideas for urban centre improvements that could be incorporated into the project.

**Re: BusConnects
to City Centre Core Bus Corridor Project**

Dear Property Owner / Occupier,

The National Transport Authority (NTA) has been tasked with delivering the BusConnects Dublin programme, which is a set of proposals to transform Dublin's bus system, so that journeys by bus will be fast, reliable, punctual, convenient and affordable. It will enable more people to travel by bus than ever before, providing an alternative to congested car journeys.

From the perspective of public transport, congestion is a major problem. On the busiest bus routes, bus lanes are only in place for less than one third of the corridor. This means that for most of the journey, buses are competing for space with general traffic and so are also affected by the increasing levels of congestion.

A key part of the BusConnects programme is the development of "Core Bus Corridors", effectively the delivery of continuous bus lanes, on the key bus routes across the city. Sixteen corridors are included in BusConnects Dublin.

Initial work has been undertaken on these corridors to identify an Emerging Preferred Route for each corridor. The Emerging Preferred Route is the proposal which, subject to a public consultation process, is considered to offer the best solution to improve the bus and cycle network.

The purpose of this letter is to inform you that the proposals contained in the Emerging Preferred Scheme for the _____ to City Centre Core Bus Corridor **may** impact on part of your property. An extract from a layout map showing an indicative layout of the scheme in the vicinity of your property is attached. The plan shows where the car lanes, bus lanes, cycle lanes and footpaths will be. Areas where land may be potentially impacted are marked with red dashed lines.

Tabhair cuairt ar www.Transportforireland.ie le haghaidh eolais agus seirbhísí iompair phoiblí do chustaiméirí
Visit www.Transportforireland.ie for public transport customer information and services

A complete public consultation document, which contains all of the relevant maps for this corridor, will be sent to you next week.

We do wish to reiterate that these are proposals only which are not fixed or finalised. They will be published in full shortly to get public feedback in relation to them. No decisions have been made to proceed with these proposals, and none would be taken until we have concluded the consultation process.

Any decision to proceed with this overall project would be subject to a statutory planning process, which would involve an application for planning consent to An Bord Pleanála. That planning application would not be made before 2020. If any garden portion or land was ultimately necessary to be acquired from your property, appropriate compensation would have to be paid in addition to the rebuilding of new garden walls, fences, gates and driveways, plus landscaping works to the residual area.

The NTA would welcome the opportunity to meet with you in relation to these proposals. That would give us the opportunity to discuss with you on a one-to-one basis, what this may mean for you and what the next steps will be over the coming months and years. If you wish to avail of this meeting please call **1800 303 653** to arrange a time and date at your earliest convenience.

Yours sincerely,

BusConnects Dublin,

National Transport Authority

Emerging Preferred Route Option: First Round of Non-Statutory Public Consultation - 14th November 2018 - 31st May 2019

3G

Press Release & Media Engagement

Press Release issued 23rd January 2019:

PRESS RELEASE

NTA LAUNCHES PUBLIC CONSULTATION ON SECOND PHASE OF THE CORE BUS CORRIDOR PROJECT

23rd January 2019 – The National Transport Authority has today announced details of the second phase of the BusConnects Core Bus Corridor project with the unveiling of a further six of the sixteen routes that are earmarked for development.

The BusConnects programme aims to transform Dublin’s bus system, with the Core Bus Corridor project providing 230kms of dedicated bus lanes and 200km of cycle lanes on sixteen of the busiest bus corridors in and out of the city centre. This project is fundamental to addressing the congestion issues in the Dublin region with the population due to grow by 25% by 2040, bringing it to almost 1.55m.

The bus service is the main form of public transport across Dublin with 67% of public transport

journeys each day made by bus. The level of commuting to work by bicycle has also increased by 43% since 2011 and the need for better and safer cycling facilities will be provided through the rollout of the core bus corridor project.

The first phase of the public consultations commenced in November 2018 and is on-going. The latest public consultation for phase two is commencing today on the Emerging Preferred Routes for the following six corridors:

- ▶ **Liffey Valley to the City Centre**
- ▶ **Clondalkin to Drimmagh**
- ▶ **Greenhills to the City Centre**
- ▶ **Tallaght to Terenure**
- ▶ **Kimmage to the City Centre**
- ▶ **Rathfarnham to the City Centre**

On the six corridors announced today, annual passenger growth in Dublin Bus services has increased by up to 19% in the period 2015 to 2018. However, the millions of passenger journeys taking place on each of these corridors are facing increasing congestion with delays being frequently experienced by commuters.

All property owners potentially affected by today’s announcement have been notified by post with one-to-one meetings being offered

in the coming weeks with those potentially impacted.

Phase Three of the Core Bus Corridors project will get underway in mid-February and will run until the end of April featuring the final six corridors: Ballymun to the City Centre; Finglas to Phibsborough; Bray to the City Centre; Blackrock to Merrion; UCD Ballsbridge to City Centre and Ringsend to the City Centre.

Anne Graham, CEO of the NTA said: “Today marks the second stage in a three-step process with details being unveiled of six additional Emerging Preferred Routes foreseen under the BusConnects Core Bus Corridor project. In recent days, we have notified the 665 property owners along these routes who may be potentially affected and offered one-to-one meetings to inform them of the proposals and listen to their feedback.

“We would encourage those who received the notification to get in contact with us and engage in the consultation process that runs until the 29th March. We want to hear from them to get their views on the proposals and the issues that they wish to see addressed.

“At the NTA, we are determined to deepen our engagement with

the communities along each of the identified corridors. That is why in addition to the meeting with potentially affected property owners we will also be organising public information events and Community Forums along each of the six corridors announced today.

“The Community Forums, in particular, will ensure a two-way dialogue with community leaders, residents’ associations, special interest groups and public representatives. We are eager to listen to the concerns of all those affected, and we will ensure they are kept updated on the project as it progresses.

“We have been encouraged by the positive level of engagement the NTA has witnessed since the launch of the Core Bus Corridors project public consultation in November 2018 and we will examine all observations carefully over the coming weeks as we look to develop Final Preferred Routes.

“Although we are aware that a project of this scale will bring many challenges, the BusConnects Core Bus Corridor project is needed now more than ever. With the city due to expand by 25% by 2040, continuous bus priority and segregated cycle lanes will be required to meet the growing demand for fast, reliable, punctual and convenient bus journeys in and out of the city centre, and safe cycling facilities for the growing numbers of cyclists.”

BusConnects Core Bus Corridor Phase 2 Fact Sheet:

BUS CONNECTS

TRANSFORMING CITY BUS SERVICES

BusConnects Core Bus Corridor Project – Phase Two Public Consultation Key Facts

Background

- Population in the Dublin region is due to grow by 25% by 2040, bringing it to almost 1.55m.
- Bus is the proven solution and main form of public transport across Dublin with 67% of public transport journeys each day made by bus.
- Cars only account for 30% of travel into the city centre each day.
- Bus carries x3 and x4 the number of people who travel on Luas or Dart and commuter rail.
- Commuting to work by bicycle has increased by 43% since 2011.
- The performance by Dublin Bus continues to be very strong and the company provided the largest number of passenger journeys in 2018 at over 140m. This represents an increase of almost 4m over 2017, with the company posting five straight years of passenger growth.

Core Bus Corridors Project

- 230kms of continuous bus priority and 200kms of cycle tracks along 16 of the busiest corridors in Dublin.
- Delivery of journey time savings of up to 40-50% on each corridor.
- Of the next **six** corridors unveiled today, annual passenger growth in Dublin Bus services has increased by up to 15% in the years 2015 to 2017.
- Yet bus lanes account for only in place for one-third of corridors.

Phase Two Facts

The public consultation for Phase Two has now commenced and submissions can be made until Friday 29th March 2019.

Route	No. Properties Impacted	No. Parking spaces being removed	No. roadside tress being removed	Route length	Cycle lane length	Current bus journey time	BusConnects journey time	Future bus journey time without Bus-Connects
Liffey Valley to City Centre	60	30	90	10kms	2kms	Up to 65 mins	30-35 mins	80 mins+
Clondalkin to Drimnagh	15	0	20	4kms	4.5kms	Up to 21 mins	14 mins	25 mins+
Greenhills to City Centre	220	20	50	11kms	5kms	Up to 80 mins	35-40 mins	100 mins+
Tallaght to Terenure	40	15	15	4kms	1.2kms	Up to 32 mins	10-12 mins	45 mins+
Kimmage to City Centre	75	65	70	4kms	1.5kms	Up to 45 mins	12-15 mins	55 mins+
Rathfarnham to City Centre	255	50	45	6kms	7kms	Up to 75 mins	25-30 mins	90 mins+

CONT.

Phase Two - Buses & Annual Bus Passenger Journeys per Corridor

Corridor	Routes	Annual Patronage*			Average Daily Patronage			Annual Growth %
		2017	2016	2015	2017	2016	2015	2015 - 2017

*Dublin Bus passengers only. Other bus services also operate on these corridors.

Additional Notes:

Phase One

The public consultation for Phase One is still ongoing with submission closing date of Friday 15th February 2019. The Swords to City Centre core bus corridor closing date has been extended until Friday 1st March 2019. This is to allow time for submissions to include observations for the Santry alternative layout option which is now included in the Swords to City Centre corridor consultation.

Phase One – Core Bus Corridor Routes

Clongriffin to City Centre
Swords to City Centre
Blanchardstown to City Centre
Lucan to City Centre

Phase Three

The final phase of the core bus corridor project public consultation will commence mid-February and run until the end of April 2019. The following table lists the core bus corridors for Phase Three.

Phase Three – Core Bus Corridor Routes

Ballymun to City Centre
Finglas to Phibsborough
Bray to City Centre
Blackrock to Merrion
UCD Ballsbridge to City Centre
Ringsend to City Centre

Mitigation Efforts

- Where lands are being acquired, the NTA will ensure **new landscaping and replanting** of gardens, **reinstatement of driveways** as well as **providing compensation** for the garden and driveway portion loss and disruption.

CONT.

- Where private and public walls or fencing are removed, we will **rebuild and replace**.
- Where there is a loss of on-street parking and loading facilities, we will seek to provide, where feasible, alternative arrangements close by.
- Where trees are removed we will put in place a **comprehensive replanting programme** replacing more trees than removed. The programme will largely use mature or semi-mature ready-grown trees, and where it is feasible, plant them as close as possible to the original locations.
- We intend to create attractive local environments at key urban centres along the routes, with the provision of attractive landscaping, lighting, seating and other features.

Process of Engagement

- The NTA believes a step-by-step process of engagement is the best approach to take in delivering the Core Bus Corridors project.
- All property owners potentially affected by today's announcement have been notified by post and a one-to-one meeting is being offered with each of those impacted.
- Today marks the beginning of a dialogue with those potentially impacted which will continue during 2019 and throughout the project.
- Planning approval from An Bord Pleanála will be required for this project and for the acquisition of garden portions. That planning application will be made in 2020.
- The NTA has already established four Community Forums for Phase One corridors and will now commence the establishment for the six corridors in Phase Two. These forums are an opportunity for a representative from Residents' Associations, Community Groups, Public Representatives, disability groups and Interested Groups to get informed and engaged during the public consultation process. Interested groups can register by emailing cbc@busconnects.ie.
- A series of public consultation meetings will be held in venues along the six corridors – details of which can be found on the BusConnects website in the coming days.
- Written submissions and observations on the six corridors announced today may be made:
 - Online at: www.busconnects.ie;
 - Via post to: Core Bus Corridor Project, NTA, Dun Sceine, Harcourt Lane, Dublin 2, D02 WT20;
 - By email to: cbc@busconnects.ie.

Key Facts & Benefits – Kimmage to City Centre Core Bus Corridor:

BUS CONNECTS

TRANSFORMING CITY BUS SERVICES

Core Bus Corridor Fact Sheet for Kimmage to City Centre

Key Facts:

- Approximate number of properties that may be impacted: **75**
- Approximate number of on-street parking spaces that may be removed: **65**
- Approximate number of roadside trees that may be removed: **70**
- Approximate route length: **4kms**
- Approximate new cycle lane length: **1.5kms**
- Current bus journey time: **up to 45 mins**
- BusConnects journey time: **12-15 mins**
- Future bus journey time without BusConnects: **55 mins +**

Benefits of this project:

- Journey time savings – the core bus corridor project will deliver journey time savings of up to 40-50% on each corridor;
- Accessibility for all;
- Better cycling facilities;
- Along each route improvements and enhancements will be made to pedestrian and local urban centres;
- Building a sustainable city and addressing climate change.

How to make a submission:

The project website www.busconnects.ie has a dedicated section for the Core Bus Corridor project. Users can access the site to find out more about the project and download copies of the key studies that have been carried out.

General queries can be directed to a dedicated freephone – 1800 303 653 or by email to cbc@busconnects.ie.

We are inviting submissions in relation to the proposals set out within the public consultation document. Please note that the public consultation for the first four corridors has commenced and will end on 29th March.

Written submissions and observations may be made by:

Online:

Through the online form in the “Public Consultation” section of the core bus corridor page on our website: www.busconnects.ie

Or by email to: cbc@busconnects.ie

The Benefits it will bring

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

- **Cycling:** BusConnects is the single biggest cycling infrastructure plan in the history of the state.
- **Greater Dublin Area Cycle Network Plan:** This initiative forms the foundation of the overall Greater Dublin Area cycle network plan.
- **Accessibility:** Improved footpaths and pedestrian facilities to access bus stops.
- **Improved urban centres:** Additional landscaping and outdoor amenities for local areas will be included as part of the building and design.

- Current Bus Journey Time **50 mins**
- BusConnects Journey Time: **30-35 mins**
- Future Bus Journey Time without BusConnects: **60 mins +**

15

The project is not without its challenges

To achieve the dedicated bus lanes & cycle tracks for millions of bus passengers and tens of thousands of cyclists we have limited space to work with:

- Potential loss of portions of gardens, gardens walls and fencing
- Traffic changes
- Reduction of on-street parking
- Removal of trees
- Road works

16

How we will mitigate the impacts

- Impacted Property – appropriate compensation for any garden loss
- New landscaping and replanting of gardens
- Reinstatement of driveways

17

How we will mitigate and improve

- Where private and public walls or fencing are removed, we will **rebuild and replace**.
- Where trees are removed we will put in place a **comprehensive replanting programme** replacing more trees that we move.
- We intend to create attractive local environments at key urban centres along the routes, with the provision of attractive landscaping, lighting, seating and other features.

18

How we will engage with general public? **BUS CONNECTS**
TRANSFORMING CITY BUS SERVICES

- **Property owners** - All property owners potentially affected by today's announcement have been notified by post and a one-to-one meeting is being offered with each of those impacted.
- **Community Forum** - The establishment of a community forum for each corridor where there will be an opportunity for a representative from Residents' Associations, Community Groups, Public Representatives and Interested Groups to get informed and engaged during the public consultation process.
- **Public Information Events** - A series of public information meetings will be held in venues along the four corridors.
- **Submissions** - Written submissions and observations on the four corridors announced today may be made:
 Online at: www.busconnects.ie;
 Via post to: Core Bus Corridor Project, NTA, Dun Sceine, Harcourt Lane, Dublin 2, D02 WT20;
 By email to: cbk@busconnects.ie.

20

Media Plan:

The first round of Non - Statutory Public Consultation was run over 3 phases from November 2018 to April 2019. We used press and digital.

National print titles were used to gain a broad reach. Regional print titles were used to support this and covered Dublin city and the Greater Dublin Area, including Wicklow.

For Digital, we included Social, Display and Near Targeting. NEAR activity allows us to target users on mobile devices within specific geo-fenced areas. For Near we targeted busy commuter routes, all major hospitals, shopping centres and universities/colleges in Dublin city.

Press	x44 press ads across 13 newspapers for Public consultation launch, Community Forum advertising and Public Information events advertising.	Advertising dates from 15th November 2018 through to 28th March 2019	<ul style="list-style-type: none"> The Irish Times Irish Independent Herald Dublin Gazette (City, North, West & South) Dublin People Echo (Tallaght, Clondalkin) Wicklow Times (North & South) Fingal Independent

BUS CONNECTS

TRANSFORMING CITY BUS SERVICES

Croí-Chonair Bhus BusConnects Comhairliúchán Poiblí

Is mórchlár infheistíochta é BusConnects chun feabhas a chur ar an lompár poiblí i mBaile Átha Cliath. Is é is aidhm dó an córas bus reatha a leasú ó bhonn trí chláir comhtháite 10 mbliana de ghníomhartha comhtháite chun córas bus ar féidir brath air agus atá níos éifeachtúla agus níos fearr a chur ar fáil do níos mó daoine.

Is é is aidhm do thionscadal na croí-chonaire bus ná 230 km de lánáil bus tiomnaíthe agus 200 km de raonta rothar a chur ar fáil ar 16 cinn de na conairí is gnóthaí i mBaile Átha Cliath. Tá tús curtha ag an Udarás Náisiúnta Iompair le comhairliúchán poiblí i ndáil leis na moltaí seo.

Reachtálfar an comhairliúchán poiblí do na sé chroí-chonair bhus de réir a chéile. Cuireadh tús le Céim 1 i Samhain 2018 agus tíofoaidh deireadh léi Dé hAoine, an 15 Feabhra 2019. Tá sonraí le fáil ar www.busconnects.ie

Tá tús curtha anois leis an gcomhairliúchán poiblí do **chéim a dó** agus tíofoaidh deireadh leis Dé hAoine, an 29 Márta 2019. Táimid ag lorg aighneachtaí agus tuairimí anois do na conairí seo a leanas:

Gleann na Life go dtí Lár na Cathrach

Cluain Dolcáin go dtí Droimeanach

Na Glaschnoic go dtí Lár na Cathrach

Tamlacht go dtí Tír an Iúir

Camaigh go dtí Lár na Cathrach

Ráth Fearnáin go dtí Lár na Cathrach

Is féidir sonraí faoi na **6 chonair** seo a ioslódáil ar an suíomh gréasáin www.busconnects.ie nó is féidir iad a fháil ach gaoch ar Shaorfhón 1800 303 653.

Fóram Pobail - Bunóidh an tUdarás Náisiúnta Iompair Fóram Pobail do gach conair áit a mbeidh deis ag ionadaí ó Chumann Cónaitheoirí, ó Ghrúpaí Pobail agus ó Ghrúpaí Leasmhara, agus ag Ionadaithe Poiblí, eolas a fháil agus a bheith páirteach sa chomhairliúchán poiblí. Seol ríomhphost chuig cbc@busconnects.ie, le do thoil, chun bheith páirteach.

Imeachtaí eolais an chomhairliúcháin poiblí - Mar chuid den chomhairliúchán poiblí, tionólfar sraith cruinnithe in ionaid ar na conairí seo. Beidh sonraí ina dtaobh sin ar fáil ar an suíomh gréasáin agus i nuachtáin áitiúla sna seachtainí atá amach romhainn.

Foilseofar sonraí faoi na sé chonair eile (Céim 3) le haghaidh athbhreithniú ag an bpobal i lár mhí Feabhra. Tá liosta de na conairí thíos mar aon leis na dátaí atá molta le haghaidh an chomhairliúcháin poiblí do chéim 3.

Dátaí an Chomhairliúcháin Poiblí: Lár mhí Feabhra go dtí deireadh mhí Aibreáin 2019

Baile Múnna go dtí Lár na Cathrach

Fionnghlas go dtí Baile Phib

Bré go dtí Lár na Cathrach

COBÁC, Droichead na Dothra go dtí Lár na Cathrach

An Charraig Dhubh go dtí Muirfin

An Rinn go dtí Lár na Cathrach

Is féidir aighneachtaí agus tuairimí i scríbhinn a chur isteach maidir leis na sé chonair:

Ar líne: Tríd an bhfoirm ar líne sa chuid "Public Consultation" ar leathanach na Croí-Chonaire Bus ar an suíomh gréasáin www.busconnects.ie

Tríd an bpost chuig: Tionscadal na Croí-Chonaire Bus, An tUdarás Náisiúnta Iompair, Dún Sceine, Lána Fhearchair, Baile Átha Cliath 2, D02 WT20

Tríd an ríomhphost chuig: cbc@busconnects.ie

BUS CONNECTS

TRANSFORMING CITY BUS SERVICES

BusConnects Core Bus Corridor Public Consultation

BusConnects is a major investment programme to improve public transport in Dublin. It aims to overhaul the current bus system through a 10 year integrated programme of integrated actions to deliver a more efficient, reliable and better bus system for more people.

The core bus corridor project aims to deliver 230kms of dedicated bus lanes and 200kms of cycle tracks along 16 of the busiest corridors in Dublin. The National Transport Authority has commenced a public consultation in relation to these proposals.

The public consultation for the sixteen core bus corridors will take place over a phased basis. Phase 1 commenced in November 2018 and will conclude Friday 15th February 2019. Details can be found on www.busconnects.ie.

The public consultation for **phase two** has now commenced and will end Friday 29th March 2019. We are now seeking submissions and observations for the following:

Liffey Valley to City Centre

Clondalkin to Drimnagh

Greenhills to City Centre

Tallaght to Terenure

Kimmage to City Centre

Rathfarnham to City Centre

Details of the proposals for these **6 corridors** are available for download on the website www.busconnects.ie or call Freefone 1800 303 653.

Community Forum - The NTA will establish a Community Forum for each corridor where there will be an opportunity for a representative from Residents' Associations, Community Groups, Public Representatives and Interested Groups to get informed and engaged during the public consultation process. Please email cbc@busconnects.ie to get involved.

Public Consultation Information events - A series of Public Consultation meetings will be held in venues along these corridors. Details of these will be available on the website and in local newspapers in the coming weeks.

Details of the remaining six corridors (Phase 3) will be published for public review in mid February. Below is a list of the corridors and the proposed public consultation phasing for phase 3.

Public Consultation Dates: Mid - February to End April 2019

Ballymun to City Centre

Finglas to Phibsborough

Bray to City Centre

UCD Ballsbridge to City Centre

Blackrock to Merrion

Ringsend to City Centre

Written submissions and observations on the six corridors may be made:

Online: Through the online form in the "Public Consultation" section of the Core Bus Corridor page on the website www.busconnects.ie

By post to: Core Bus Corridor Project, National Transport Authority, Dun Sceine, Harcourt Lane, Dublin 2, D02 WT20

By email to: cbc@busconnects.ie

Press Advertisement published in the Herald - 25 January 2019:

THE HERALD FRIDAY 25 JANUARY 2019

News 7

The wreckage of the car after the crash in which the woman suffered 'catastrophic' injuries

Woman killed in M50 crash horror as car hits barrier

Robin Schiller, Amy Molloy and Luke Byrne

A WOMAN died after suffering catastrophic injuries in a motorway crash yesterday. The accident happened at around 11.30am at Junction 5 of the M50 northbound, near Finglas. The woman, named locally as Jackie Griffin, from Tallaght, who was in her 30s, was pronounced dead at the scene. An investigation is under way into the tragedy. Gardai were forced to appeal to people to stop circulating images of the crash on social media out of respect for the victim's family and others involved in the incident.

Officers also urged people to drive with care past the site. Four vehicles were involved, but it was an impact between two cars that caused the most serious damage, including the loss of life. "As far as we are aware, one car was in a collision with another car, which then collided with a crash barrier," a source told the *Herald* last night. **GEM** "The woman in that vehicle which hit the barrier suffered catastrophic injuries. "The other car then came to a stop a couple of hundred metres away." Tallaght councillor Louise Dunne said: "My thoughts are

with the victim's family and with her friends. "It's an absolutely tragic and horrific thing for her family and her friends to have to go through." Another family friend described Ms Griffin as "a gem of a person." The driver of the other car, a man in his 50s, was taken to Connolly Hospital, though he is not understood to have suffered life-threatening injuries. A truck that was not involved in the initial impact also sustained damage, as did another car. The road was closed into late last night as officers carried out investigations, with drivers hit by long delays during rush hour.

'I'm innocent', says Salmond as he faces rape bid charges

Elisabeth O'Leary

FORMER Scottish first minister Alex Salmond has denied committing any crimes after he appeared in court charged with multiple sex offences including two counts of attempted rape. Scottish prosecutors said Salmond (64) had also been charged with nine counts of sexual assault, two counts of indecent assault and one of breach of the peace. "I am innocent of any criminality whatsoever," Salmond, a figurehead of Scotland's independence movement, told

reporters outside Edinburgh Sheriff Court. "I refute absolutely these allegations of criminality and I will defend myself to the utmost in court. **COMPLAINTS** "I would love to say a great deal more, but I've got to observe the rules of the court." Salmond (inset) was released on bail, and it was not disclosed when further hearings would take place. The combative politician led

the devolved Scottish government for seven years until 2014. As leader of the Scottish National Party (SNP), he helped drive growing support for independence, but Scotland ultimately voted to stay part of the UK in a 2014 referendum. Earlier this month, Salmond won a judicial review against the Scottish government over how it handled a complaints process against him in a sexual harassment case.

BUS CONNECTS Croi-Chonair Bhus BusConnects Comhairliúchán Poiblí

Is mórchláir infheistíochta é BusConnects chun feabhas a chur ar an lompár poiblí i mBaile Átha Cliath. Is é is aidhm dó an córas bus reatha a leasú ó bhonn trí chlár comhtháite 10 mbliana de ghníomhartha comhtháite chun córas bus ar féidir brath air agus atá níos éifeachtúla agus níos feara a chur ar fáil do níos mó daoine. Is é is aidhm do thionscadal na croi-chonair bus ná 230 km de lánai bus tiomnaithe agus 200 km de raonta rothar a chur ar fáil ar 16 cinn de na conairí is gnóthaí i mBaile Átha Cliath. Tá tús curtha ag an Udarás Náisiúnta lompair le comhairliúcháin poiblí i ndáil leis na moltaí seo. Réachtálfar an comhairliúchán poiblí do na sé chroi-chonair bhus de réir a cheile. Cuirfeadh tús le Céim 1 i Samhain 2018 agus tiocfaidh deireadh léi De hAoine, an 15 Feabhra 2019. Tá sonraí le fáil ar www.busconnects.ie Tá tús curtha anois leis an gcomhairliúchán poiblí do **chéim a dó** agus tiocfaidh deireadh leis De hAoine, an 29 Márta 2019. Táimid ag lorg aighneachtai agus tuairimí anois do na conairí seo a leanas:

- Gleann na Life go dtí Lár na Cathrach
- Cluain Dolcáin go dtí Droimeanach
- Na Glaschnoic go dtí Lár na Cathrach
- Tamhlacht go dtí Tír an Iúir

BUS CONNECTS BusConnects Core Bus Corridor Public Consultation

BusConnects is a major investment programme to improve public transport in Dublin. It aims to overhaul the current bus system through a 10 year integrated programme of integrated actions to deliver a more efficient, reliable and better bus system for more people. The core bus corridor project aims to deliver 230kms of dedicated bus lanes and 200kms of cycle tracks along 16 of the busiest corridors in Dublin. The National Transport Authority has commenced a public consultation in relation to these proposals. The public consultation for the sixteen core bus corridors will take place over a phased basis. Phase 1 commenced in November 2018 and will conclude Friday 15th February 2019. Details can be found on www.busconnects.ie. The public consultation for phase two has now commenced and will end Friday 29th March 2019. We are now seeking submissions and observations for the following:

- Liffey Valley to City Centre
 - Clondalkin to Drimnagh
 - Greenhills to City Centre
 - Tallaght to Terenure
 - Kimmage to City Centre
 - Rathfarnham to City Centre
- Public Consultation Dates: Mid - February to End April 2019**
Ballymun to City Centre
Finglas to Phibsborough
Bray to City Centre
UCD Ballsbridge to City Centre
Blackrock to Merrion
Ringsend to City Centre

Written submissions and observations on the six corridors may be made:
Online: Through the online form in the "Public Consultation" section of the Core Bus Corridor page on the website www.busconnects.ie
By post to: Core Bus Corridor Project, National Transport Authority, Dun Sceine, Harcourt Lane, Dublin 2. D02 WT20

News

Statement: A 'No Border, No Brexit' sticker is seen on a road sign in front of the Peace statue entitled 'Hands Across the Divide' in Derry. PHOTO: REUTERS

but can't stop hard Border

of no deal blame lands on London.

Let's get that blame issue out of the way right now: Up to this point the Irish Government, and especially its key diplomatic negotiators, have done a very good job.

They got the "backstop", an insurance policy which gave the North special status within the EU customs union, obviating prospective trade tariffs, and staying close to the single market, minimising product standard controls. We know the Democratic Unionist Party and eventually the uber-Brexiters cried foul, and used it as their main reason to up-end the draft EU-UK draft divorce deal.

That deal was beaten by "two tonne-plus" in a vote in the British parliament. But Dublin cannot be blamed for this. Irish representatives cannot re-write centuries of British social, economic and political history.

It is political nonsense to blame Ireland pursuing her national interests for the fallout from Britain's long-standing problems about EU membership.

You could say that it is time our leaders spelled this one out. But in politics sometimes you may not, for many reasons, deploy your best arguments. Among the reasons for reticence in this

instance is the inevitability of being accused of "stoking things up", and making Theresa May's impossible job that bit harder.

And any suggestion by Dublin that they could overcome Border controls in the wake of a no-deal Brexit would only encourage the radical Brexiters. The already ear-dinning rhetoric would gain even more volume in those quarters. So, we get this rather strange and potentially damaging stance by the Irish Government which is

Ireland can't re-write centuries of British political history

neither flesh, nor foul, nor good red herring. It is easier to ask probing questions on radio and television than it is to plot a way forward through this rather tricky minefield. In fairness to all the Opposition parties at Leinster House, they have totally recognised this reality. We have seen an encouraging version of "green jersey time" being played out over the past few days.

Eventually, in extremis, there will be scope to negotiate how and where controls North and south in

Ireland will be applied in a no-deal Brexit. But in such a grim eventuality there must be controls.

So far, the Taoiseach's suggestion that Dublin would seek a kind of no-deal fallback, keeping the North in the EU customs union and close to the single market - a "backstop to the backstop" - is nothing short of risible. This was among the very reasons which led to such a serious Westminster defeat for Mrs May's draft EU-UK divorce deal.

The bigger worry is suggestions that product and tariff controls regarding Ireland North and south could happen on mainland Europe. The reality of that suggestion is that it could limit the Republic of Ireland's EU membership.

There is mounting evidence that a no-deal crash-out Brexit would also inflict huge economic harm on very many UK citizens as it cut jobs and threatened general economic disruption. But given the experience since the Brexit referendum result in June 2016, we cannot presume that this will change things dramatically and belatedly.

There are few options here beyond staying with the EU and avoiding quixotic suggestions that London-Dublin talks offer any remedy.

THE HERALD THURSDAY 7 FEBRUARY 2019

News 5

Hutch relative held in armed swoop as gardai arrest three over Michael Keogh murder

Robin Schiller and Ken Foy

AN under-threat Hutch family member has been arrested by detectives investigating the feud murder of Michael Keogh. Armed gardai swooped on a number of properties in Dublin yesterday morning and arrested three people - including a relative, aged in his 40s, of Gerry "The Monk" Hutch, who has survived two attempts on his life.

The suspected getaway driver - also in his 40s - in the 2017 murder of Keogh was arrested in prison, while his girlfriend, aged in her 30s, was arrested in the north inner city.

All three were being questioned about the murder of Keogh, but gardai suspect the actual shooter was slain gangster Jason 'Buda' Molyneux.

Gardai believe Keogh (35) - brother of jailed Kinahan hitman Jonathan Keogh - was targeted after becoming involved in a number of attacks

on associates of the Hutch mob in the weeks before his murder.

The Hutch family member being quizzed over the killing has survived at least two attempts on his life linked to the Hutch-Kinahan feud, which has so far claimed 19 lives.

He was also previously arrested over the Regency Hotel murder of David Byrne three years ago this week, but has not been charged over the killing.

The Michael Keogh murder,

on May 31, 2017, is one of only two killings believed to have been carried out by the Hutch faction as part of the ongoing feud.

His body was found in an underground car park at Sheridan Court by Dublin City Council workers.

Gardai quickly identified two notorious inner city criminals suspected of being the hitmen.

VOLATILE

They included gangland mobster Molyneux, who was himself gunned down as part of the feud in January last year, and the dangerous north inner city mobster arrested by gardai yesterday.

Molyneux is suspected of having been joined on the murder job by a currently jailed armed robber from the north inner city whose home was searched by detectives on the day of the shooting.

He is before the courts on serious non-feud related charges

and is considered a "volatile and highly dangerous criminal" who has links to a number of Hutch gang associates.

A garda spokesman said yesterday: "Gardai investigating the murder of Michael Keogh on May 31, 2017, at Sheridan Court, Dublin 1, have arrested two men in their 40s and a woman in her 30s in Dublin today.

"One man and one woman are detained under Section 50 of the Criminal Justice Act 2007 and the second man is detained under Section 4 of the Criminal Justice Act 1984.

"They are detained at Dublin city centre garda stations." Michael Keogh's brother Jonathan was jailed for life last year for the feud murder of The Monk's nephew Gareth Hutch in May 2016.

Gardai believe that incident also made Michael a huge target for the Hutch mob as Jonathan was on the run in the UK when the gang murdered his brother.

Michael Keogh was gunned down in an underground car park at Sheridan Court, inset

Christy Gilroy is believed to have been lured to his death by Gary Hutch (below right). Inset, Michael 'Roly' Cronin, who was gunned down in Summerhill, below left

The aim is to create two-way communication with local communities allowing information and feedback to be relayed clearly, quickly and accurately.

If you would like to nominate a representative for the phase 2 corridors above, please let us know by emailing cbc@busconnects.ie

Community Forums are being set up for each of the sixteen corridors. Phase 1, the first 4 routes is currently underway. Phase 3, the remaining 6 corridors is due to be published for Public Consultation shortly.

General Information

Public Consultation is now live for these six corridors and will end Friday 28th March 2019. Written submissions and observations on the **six corridors** may be made:

Online:
 Through the online form in the "Public Consultation" section of the Core Bus Corridor page on the website www.busconnects.ie

By email to:
cbc@busconnects.ie

By Post to:

BUS CONNECTS

TRANSFORMING CITY BUS SERVICES

Project Ireland 2040
Building Ireland's Future

Public Consultation Information Events

A series of information events are being held about the BusConnects core bus corridors project public consultation. The core bus corridors project aims to deliver 230kms of dedicated bus lanes and 200kms of cycle tracks along 16 of the busiest corridors in Dublin. The public consultation for the sixteen core bus corridors is taking place on a phased basis and will run until May 2019. The Public Consultation for Phase 1 is on-going. Phase 2, the corridors listed below has now commenced.

Public information events for

Liffey Valley to City Centre, Clondalkin to Drimnagh, Greenhills to City Centre, Tallaght to Terenure, Kimmage to City Centre, and Rathfarnham to City Centre are being held in the following venues:

CORRIDOR	VENUE	DATE & TIME
Clondalkin to Drimnagh	Our Lady's Hall, Mourne Road, Drimnagh, Dublin 12, D12 DW68	Tuesday 19th February 3.00pm to 8.00pm
Greenhills to City Centre	Red Cow Morans Hotel, Naas Road, Dublin 22, D22 YX80	Tuesday 26th February 3.00pm to 8.00pm
Clondalkin to Drimnagh/ Liffey Valley to City Centre	Clayton Hotel, Fonthill Road, Liffey Valley, Dublin 22, D22 X4W6	Thursday 28th February 3.00pm to 8.00pm
Kimmage to City Centre	Dublin City Council, Civic Offices, Wood Quay, Dublin 8, D08 RF3F	Tuesday 5th March 3.00pm to 8.00pm
Tallaght to Terenure	St. Mary's Rugby Football Club, Templeville Road, Dublin 6W, D6W X652	Thursday 7th March 3.00pm to 8.00pm
Rathfarnham to City Centre	Hilton Hotel, Charlemont Place, Dublin 2, D02 A893	Monday 11th March 3.00pm to 8.00pm
All of the above corridors	Dublin City Council, Civic Offices, Wood Quay, Dublin 8, D08 RF3F Quay, Dublin 8, D08 RF3F	Tuesday 12th March 3.00pm to 8.00pm

All are welcome to attend. The NTA team will be there to answer your queries.
Phase 3 (remaining 6 corridors) will be published for Public Consultation shortly.

1. Introduction

1.1 What has happened so far?

Between November 2018 and May 2019 the National Transport Authority (NTA) carried out the first round of public consultation on initial proposals for the Emerging Preferred Routes of sixteen Core Bus Corridors across the Greater Dublin Area (GDA). During this consultation phase thirteen thousand submissions were received in total. A Consultation Submissions Report for each corridor is available to view and download on our website www.busconnects.ie.

All of the submissions were reviewed and considered as part of the design preparation for the Preferred Route for each corridor. We have amended our initial proposals to address some of the issues raised in submissions, including incorporating suggestions and recommendations from local residents, community groups and stakeholders. We are now publishing the Preferred Routes for sixteen Core Bus Corridors and commencing a second round of public consultation.

This document is one of a series of sixteen, each dedicated to a single Core Bus Corridor. The document provides a written description of the Preferred Route from start to finish with supporting maps and includes information on revisions made, if any, from the initial emerging preferred route.

The original brochures detailing each Emerging Preferred Route, published last year, are available to view and download on our website www.busconnects.ie. These brochures contain information on the process for impacted property owners, the project timelines and steps required for statutory planning application.

1.2 What is BusConnects?

BusConnects is the National Transport Authority's programme to greatly improve bus services. It is a key part of the Government's policies to improve public transport and address climate change in Dublin and other cities. It is included within the following Government policy strategies:

- The National Development Plan 2018 - 2027;
- Transport Strategy for the Greater Dublin Area 2016 - 2035; and
- The Climate Action Plan 2019.

Dublin is growing and needs a bus network that works for a developing city. The aim of BusConnects is to deliver an enhanced bus system that is better for the city, its people and the environment. BusConnects is designed to provide a better, more reliable and more efficient bus service for everyone.

BusConnects: The facts at a glance

230km of bus priority making journeys faster and more reliable

200km of cycle lanes/tracks

Transitioning to a new
low emissions bus fleet

State of the art
ticketing system

Cashless payment system

Simpler fare structure

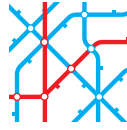

New Park & Ride
sites in key locations

New bus livery
providing a common style across all operators

New bus stops and shelters
with better signage and information

Dublin area bus network redesign
creating a more efficient network with high frequency spines, new orbital routes and increased bus services

1.3 What are the benefits of this project?

Journey Time Savings -

This project will deliver journey time savings of up to 40-50% on corridors. Dedicated bus and cycle lanes can significantly increase bus travel speeds and reliability.

Accessibility for all -

More bus shelters, with seating where possible, new footpaths and better information at bus stops, will make using the fully accessible bus fleet easier for all, including the elderly and mobility impaired.

Pedestrians and Urban Realms -

Along each route, improvements and enhancements will be made to footpaths, walkways and pedestrian crossings. Funding and investment for local urban realms with additional landscaping and outdoor amenities will be provided.

Building a sustainable city and addressing climate change -

Tackling the challenges of climate change is a priority for Ireland and moving more people to public transport is a key component of the solution.

Better cycling facilities -

This project will see the provision of much needed cycling facilities around the city region with over 200kms of high quality cycle routes provided.

1.4 Understanding the terminology

1. Core Bus Corridor (CBC):

Part of the overall BusConnects Programme is to create 16 radial Core Bus Corridors (CBC). A CBC is an existing road with bus priority so that buses can operate efficiently, reliably and punctually. This generally means full length dedicated bus lanes on both sides of the road from start to finish of each corridor or other measures to ensure that buses are not delayed in general traffic congestion. The bus lanes will be alongside general traffic and segregated cycle lanes/tracks where feasible.

2. Segregated Cycle Tracks:

A segregated cycle track is a separate section of the road dedicated for cycling only. This space will generally be isolated from other vehicular traffic by a physical kerb. Where it is not physically possible to have segregated cycle tracks there will be the option of quiet roads and shared cycling on reduced speed roads for cyclists.

3. Emerging Preferred Route (EPR):

The NTA published outline plans for each of the 16 CBCs in a non-statutory public consultation process in 2018/2019. The options were called Emerging Preferred Routes (EPR), in some cases with multiple sub-options, to inform the public of the likely layout of the roadway with the necessary CBC infrastructure in place. They included possible impacts on front gardens, and likely changes to how traffic will operate to facilitate bus priority.

4. Preferred Route Option (PRO):

Following consideration of the public submissions about the 16 EPR's, the Core Bus Corridor proposals have been reviewed and amended. They are now being presented as the Preferred Route Option (PRO) and are subject to a second round of non-statutory public consultation.

They are not final proposals as they are subject to further consideration from the second round of public consultation and also subsequent examination in the context of Environmental Impact Assessment.

5. Bus Gate

A Bus Gate is a sign-posted short length of stand-alone bus lane. This short length of road is restricted exclusively to buses, taxis and cyclists plus emergency vehicles. It facilitates bus priority by removing general through traffic along the overall road where the bus gate is located. General traffic will be directed by signage to divert away to other roads before they arrive at the Bus Gate.

6. Signal Controlled Priority:

Signal Control Priority uses traffic signals to enable buses to get priority ahead of other traffic on single lane road sections, but it is only effective for short distances. This typically arises where the bus lane cannot continue due to obstructions on the roadway. An example might be where a road has pinch-points where it narrows due to existing buildings or structures that cannot be demolished to widen the road to make space for a bus lane. It works through the use of traffic signal controls (typically at junctions) where the bus lane and general traffic lane must merge ahead and share the road space for a short distance until the bus lane recommences downstream. The general traffic will be stopped at the signal to allow the bus pass through the narrow section first and

when the bus has passed the general traffic will then be allowed through the lights.

7. Toucan Crossing:

A Toucan Crossing is a roadway crossing designed to enable both pedestrians and cyclists to cross the road with purposefully designed signal controls.

8. Quiet Street Treatment:

Where CBC roadway widths cannot facilitate cyclists without significant impact on bus priority, alternative cycle routes are explored for short distances away from the CBC bus route. Such offline options may include directing cyclists along streets with minimal general traffic other than car users who live on the street.

They are called Quiet Streets due to the low amount of general traffic and are deemed suitable for cyclists sharing the roadway with the general traffic without the need to construct segregated cycle tracks or painted cycle lanes. The Quiet Street Treatment would involve appropriate advisory signage for both the general road users and cyclists.

9. Urban Realm:

Urban Realm refers to the everyday street spaces that are used by people to cross, shop, socialise, play, and use for activities such as walking, exercise or commute to/from work. The Urban Realm encompasses all streets, squares, junctions, and other rights-of-way, whether in residential, commercial or civic use. When well-designed and laid out with care in a community setting, it enhances the every-day lives of residents and those passing through. It typically relates to all open-air parts of the built environment where the public has free access. It would include seating, trees, planting and other aspects to enhance the experience for all.

Signal Controlled Priority (SCP)

- 1. Traffic proceeds as normal.
- 2. As the bus approaches, the light signal changes to halt general traffic.
- 3. The bus has priority to proceed.
- 4. When the bus has cleared the junction, general traffic proceeds.

2. Preferred Route Description

2.1 Overview

The Kimmage to City Centre Core Bus Corridor (CBC) commences on Kimmage Road Lower at the junction with Terenure Road West and Fortfield Road. It is routed via Kimmage Road Lower to Harold's Cross Road, and then along Harold's Cross Road, Clanbrassil Street Upper & Lower and New Street South, where it will join the Greenhills CBC at the Kevin Street Upper junction. Priority for buses is provided along the entire route, consisting primarily of dedicated bus lanes in both directions, with alternative measures proposed at particularly constrained locations along Kimmage Road Lower.

An alternative cycle route is also proposed along a part of the CBC in the southern half.

The following paragraphs will describe each section of the CBC in more detail, identifying the key revisions which have been incorporated into the design since the publication of the Emerging Preferred Route (EPR) in January 2019.

2.2 Terenure Road West to Sundrive Road – Kimmage Road Lower

The Kimmage to City Centre CBC commences on Kimmage Road Lower at the Kimmage Road West junction with Fortfield Road and Terenure Road West. It is proposed to upgrade the junction to provide bus priority and enhanced pedestrian/cyclist facilities.

The EPR previously proposed a Bus Gate at the junction of Sundrive Road and Kimmage Road Lower. It is now proposed to locate the Bus Gate just north of the Ravensdale Park junction, 0.8km further south along Kimmage Road Lower. This change will achieve bus priority by deflecting through traffic off the Kimmage Road Lower, without the need for road widening to provide bus lanes. This will remove the requirement for land take along this section of Kimmage Road Lower. The existing street layout and on-street parking arrangements will remain unchanged on Kimmage Road Lower north of Ravensdale Park.

The existing cycle lanes will be retained on this stretch of the road and conditions for cyclists

will be greatly improved through reduced general traffic as a result of the proposed Bus Gates. Local traffic will be permitted access from the south via Sundrive Road or Larkfield Avenue.

Traffic management measures will be required on the adjoining residential streets of Poddle Park to the west and Derravaragh Road to the east. These streets will be closed to through traffic, apart from cyclists, at suitable locations to prevent through traffic diverting off Kimmage Road Lower inappropriately. Traffic management measures such as turning restrictions at junctions or road closures will also be considered on other adjoining residential streets at suitable locations as required.

A new proposal has been developed for a cycle route through the small park alongside the River Poddle just north of Kimmage Cross-Roads, which will continue generally parallel to Kimmage Road Lower over a length of 2.3km to Harold's Cross Park. It will mainly follow quiet local streets including Poddle Park and Blarney Park with appropriate traffic management and will also include short sections of greenway across public park lands.

Urban Realm improvements will be made at the focal points on Kimmage Road Lower where there are clusters of shops and business at the Corrib Road junction and at the Sundrive Road junction.

2.3 Sundrive Road to Harold's Cross Road - Kimmage Road Lower

With the previously proposed Bus Gate moved south to Ravensdale Park, local traffic access will remain available from Sundrive Cross to both the southern and northern part of Kimmage Road Lower. However, the left-turn from Sundrive Road will be restricted so as to prevent through traffic from using Kenilworth Park instead of Clareville Road. The existing street layout and parking arrangements along Kimmage Road Lower will remain unchanged.

To accommodate local access to Kimmage Road Lower from the north, the junction of Harold's Cross Road and Kenilworth Park will be modified to provide for the southbound right-turn movement. The operation and capacity of this junction will be improved by restriction of the link from Kenilworth Square to a westbound Bus

BusConnects Core Bus Corridors / 11: Kimmage > City Centre

Gate, with westbound general traffic diverted via Rathgar Avenue.

The proposed Poddle Cycleway will run along Sundrive Road from Blarney Park to the shopping centre entrance and then follow the river northward to Mount Argus Park. The cycleway travels through the car park of Mount Argus Church to Mount Argus Road, utilizing a Quiet Street Treatment to Harold's Cross. Previous proposals to divert cyclists via quiet streets east of Kimmage Road Lower at Priory Road, Larkfield Avenue and Larkfield Grove are no longer required with reduced general traffic on Kimmage Road Lower between the Bus Gates.

2.4 Harold's Cross Road to Kevin Street Upper - Harold's Cross Road, Clanbrassil Street Upper & Lower, and New Street South

The EPR proposed to provide a footpath, one bus lane and one general traffic lane in each direction in this section. Between Harold's Cross Park and Parnell Road it is now proposed to also include a cycle track to this section of

road. To accommodate the addition of cycle tracks along this street it is proposed to acquire small areas of land from adjacent properties. The indicative extents of this land take are included in the Appendix of this brochure. It is no longer proposed to provide a separate cycle route to the west via Our Lady's Hospice and Greenmount Lane.

Between Parnell Road and Lombard Street West, it is proposed to maintain a footpath, one bus lane and one general traffic lane in each direction as in the EPR, with the new addition of segregated cycle tracks. The northbound bus lane will not continue between Leonard's Corner junction at South Circular Road and Lombard Street West, where the street is not wide enough. Signal Controlled Priority will enable buses to pass through this short section ahead of general traffic. To accommodate this cross section, the following works will be required:

- Widening of Robert Emmett Bridge across the Grand Canal on the western side and along the retaining wall at Gordon's Fuel Merchants;
- Removal of some on-street parking; and

- Limited land-take on Clanbrassil Street Upper north of the Grand Canal, and at the junction of Clanbrassil Street Lower and St. Vincent Street South.

Between Lombard Street West and Kevin Street Upper, it is proposed to modify the street layout to accommodate a cycle track alongside a bus lane and one general traffic lane in each direction. The existing central median island will be largely retained along with all existing trees in the median. It is proposed to close access from Vincent Street South to Clanbrassil Street. At Kevin Street Upper, this scheme ties in with the Greenhills to City Centre CBC.

In the EPR it was proposed to provide a cycle route along Grove Road with a new footbridge over the Grand Canal to Martin Street. With the addition of continuous cycle tracks along Clanbrassil Street and New Street, the plans for this CBC no longer include proposals for an alternative cycle route through Portobello.

2.5 Key Changes from the Published EPR

- A revised Bus Gate location at Ravensdale Park is proposed resulting in no widening of Kimmage Road Lower and eliminating the need for land take in this section.
- A cycleway along the River Poddle to the west of Kimmage Road Lower between Kimmage Cross-Roads and Harold's Cross to improve the cycle network.
- Urban Realm improvements are proposed at Sundrive Road and Corrib Road.
- It is proposed to introduce a right turn from Harold's Cross Road to Kenilworth Park to improve local access.
- Continuous, segregated cycle tracks are proposed along Harold's Cross Road and Clanbrassil Street, eliminating the need for an offline cycle route.
- The revised proposals allow the retention of the tree lined median on Clanbrassil Street and New Street

2.6 Key Facts

- Approximate number of properties that may be impacted **17**
- Approximate number of designated on-street parking spaces that may be removed: **88**
- Approximate number of trees that may be removed: **21**
- Approximate route length: **4kms**
- Approximate cycle route length: **4.3kms**
- Current bus journey time: **Up to 45 mins**
- BusConnects journey time: **12-15 mins**
- Future Bus journey time without BusConnects: **55 mins +**

3. How to take part in the public consultation

This brochure provides details of the proposed Preferred Route Option for this core bus corridor. These proposals are subject to a second non-statutory round of public consultation, and subsequent design refinement and environmental impact assessment, before a formal statutory application will be made by the NTA to An Bord Pleanála for approval.

3.1 General queries

The project website www.busconnects.ie has a dedicated section for the Core Bus Corridor project. All previous emerging preferred route brochures are available on the website. Users can access the site to find out more about the project and download copies of the key documents.

General queries can be directed to a dedicated Freephone – **1800 303 653** or by email to cbc@busconnects.ie

3.2 How to engage

We are inviting submissions in relation to the Preferred Route Options set out in this document. The closing date for submissions is stated on the website.

Written submissions and observations may be made by:

cbc@busconnects.ie

Core Bus Corridor Project
National Transport Authority,
Dún Sceíne, Harcourt Lane, Dublin 2
D02 WT20

3.3 What happens next?

Following the second round of public consultation the NTA will finalise the Preferred Route Options for all sixteen corridors. The scheme designs will be finalised, transport and environmental impact assessments will be completed. This will culminate in the preparation of an Environmental Impact Assessment Report (EIAR) for the scheme together with details of land to be acquired. This will be submitted to An Bord Pleanála during Q4 2020 for its consideration and determination. A formal statutory consultation process will be undertaken as part of that process.

BusConnects Core Bus Corridor - Community Forum Next Round of Meetings starting in September

Please be aware these Community Forums are for the Core Bus Corridors - Bus Lanes & Cycle Tracks/Lanes ONLY

There will be a separate 2nd round of public consultation for the Network Redesign - Bus Services later in September

Dear Public Representative,

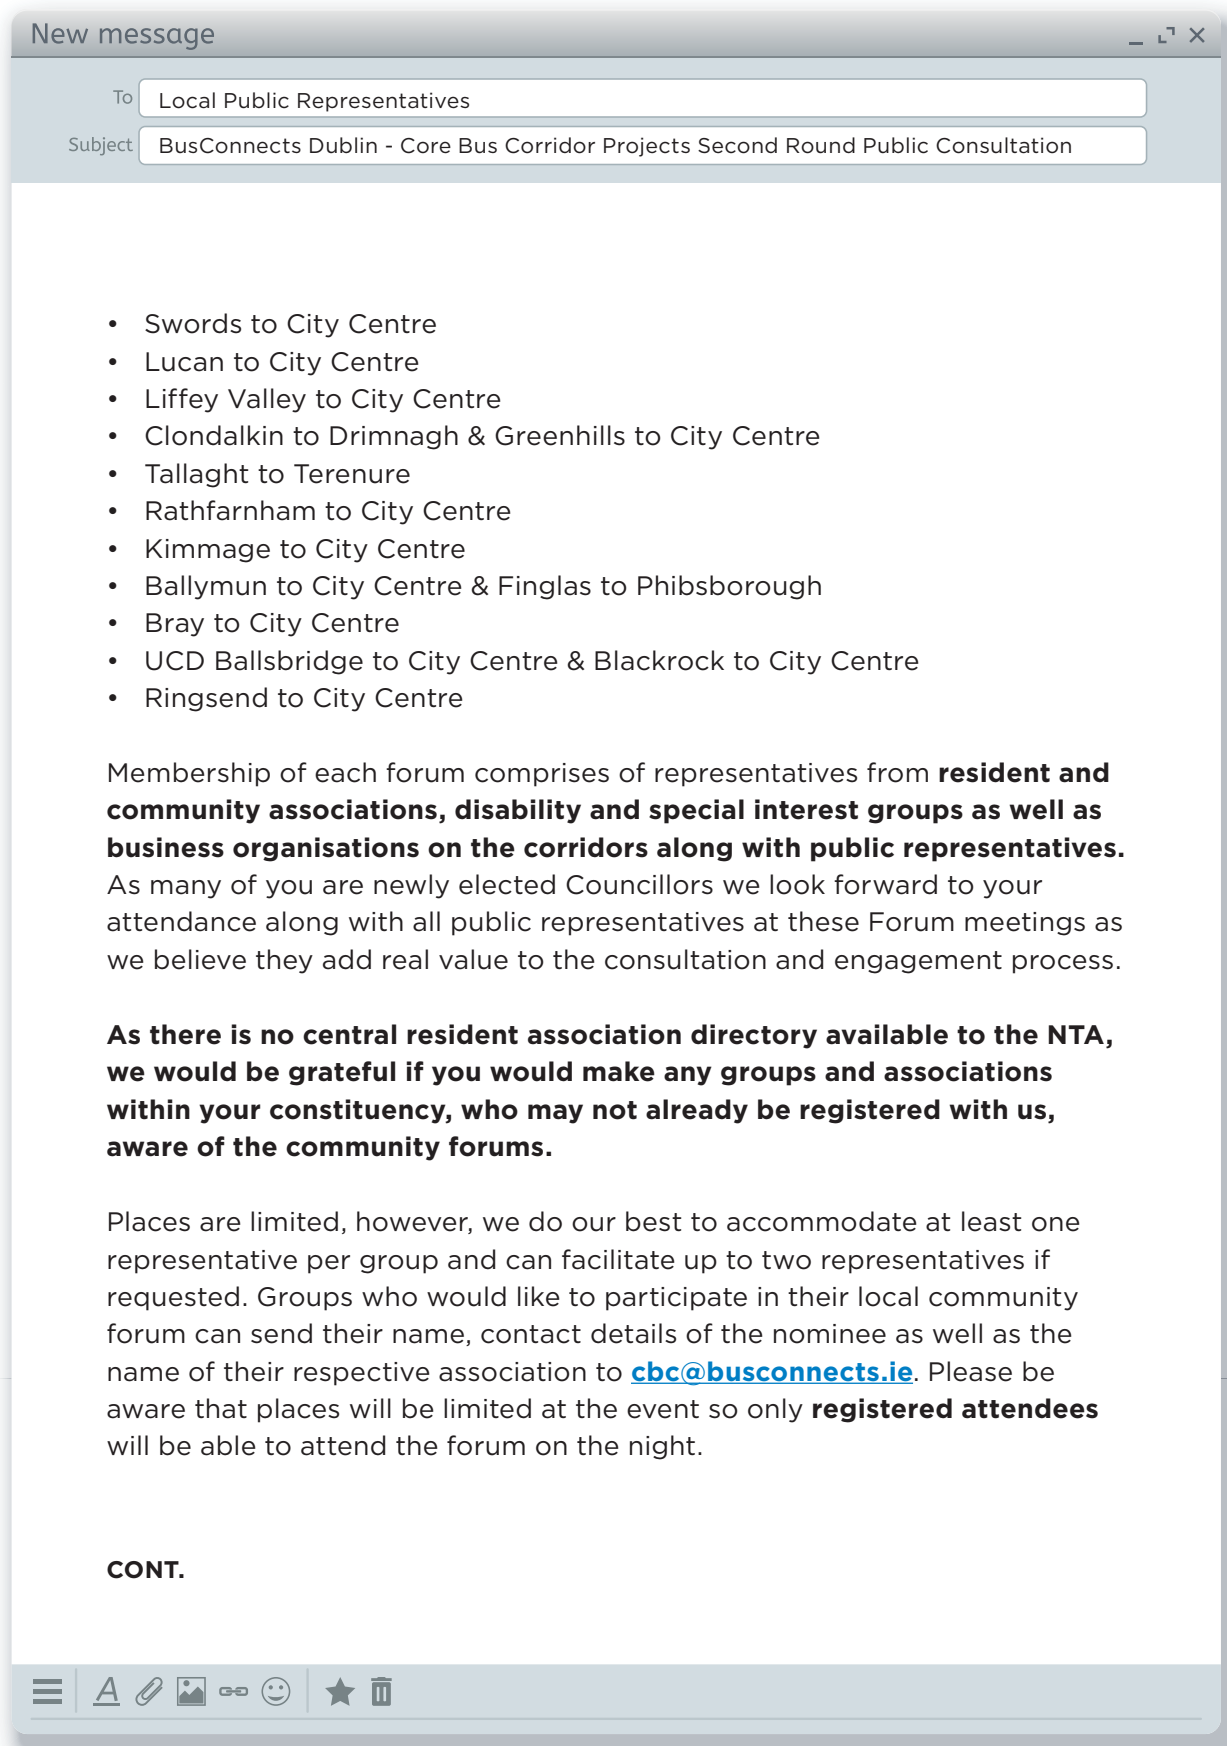

The NTA is fully committed to working with all interested parties in the development of the Core Bus Corridors Project (Bus Lanes and Cycle Tracks/Lanes). We want to keep everyone on the proposed bus corridors fully informed at all times. You may recall that during the first round of public consultation, we established a Community Forum for each corridor. The first round of the Community Forum meetings took place earlier this year and we would now like to schedule the second round.

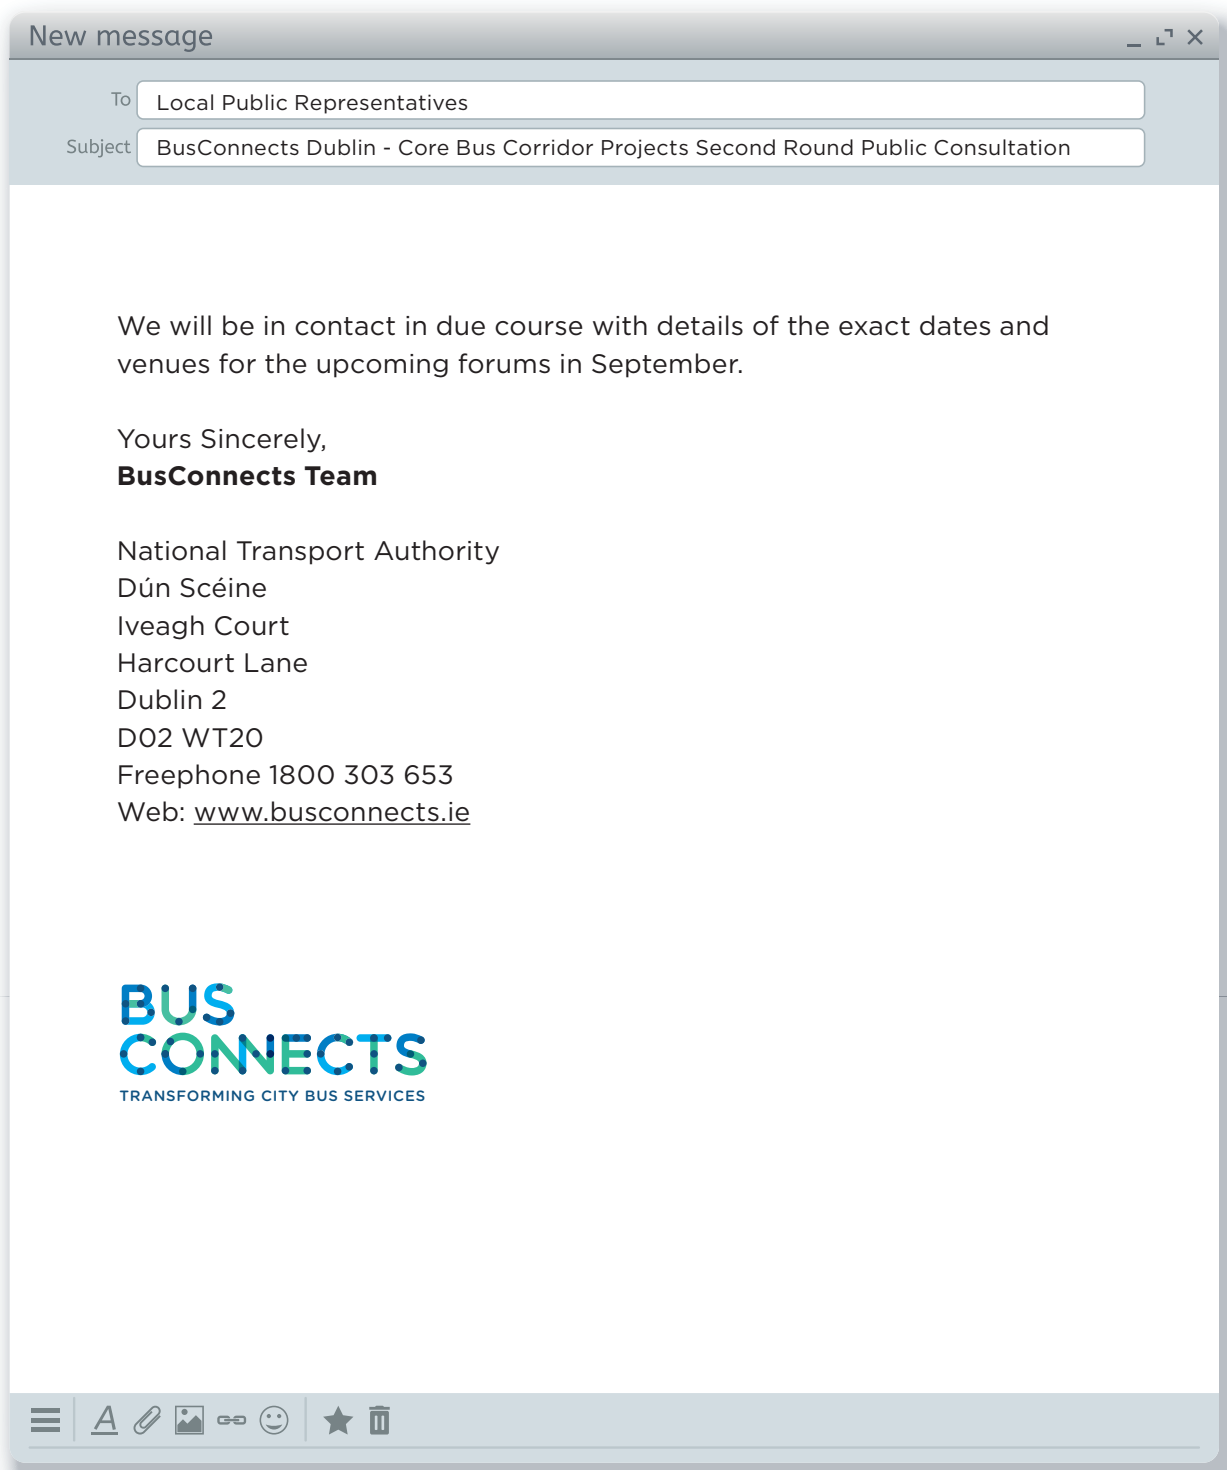

The Community Forums were established for the following Core Bus Corridors:

- Clongriffin to City Centre
- Blanchardstown to City Centre

Subject: Kimmage to City Centre Community Forum

Dear Public Representative,

BusConnects - Core Bus Corridor Project

Dear Public Representative,

Please note that there will be a meeting of the **Kimmage to City Centre Community Forum in The Hilton Hotel, Charlemont on Tuesday 24th September @7pm.**

The purpose of this second meeting of the Community Forum is to provide an update on work-in-progress for each of the proposed Core Bus Corridors. At the Forum meeting we will provide an overview of the following:

1. Summary of Key Issues from the Submissions made from the BusConnects Infrastructure Public Consultation;
2. And to present Indications of Key Changes being considered to the Core Bus Corridor Proposals;

This meeting is being held in advance of the second round of public consultation, which will take place in November 2019 so it is important to note that the proposals and designs that will be presented at the meeting are still in draft status.

It will be after the second round of public consultation that the finalisation of the preferred route for each core bus corridor will be made. We anticipate

Subject: Kimmage to City Centre Community Forum

the submission of the statutory planning application will then be made to An Bord Pleanála during mid-2020.

Membership of each forum comprises of representatives from **resident and community associations, disability and special interest groups as well as business organisations on the corridors along with public representatives**. As many of you are newly elected Councillors we look forward to your attendance along with all public representatives at these Forum meetings as we believe they add real value to the consultation and engagement process.

As there is no central resident association directory available to the NTA, we would be grateful if you would make any groups and associations within your constituency, who may not already be registered with us, aware of the community forums.

Places are limited, however, we do our best to accommodate at least one representative per group and can facilitate up to two representatives if requested. Groups who would like to participate in their local community forum can send their name, contact details of the nominee as well as the name of their respective association to cbc@busconnects.ie. Please be aware that places will be limited at the event so only **registered attendees** will be able to attend the forum on the night.

Yours Sincerely,
BusConnects Team

engagements, and have developed revised proposals, representing the “Preferred Route Option”, for each core bus corridor.

We will be issuing, by email on Wednesday morning, further details of the proposals to all public representatives in the areas covered by the corridors, including dates and venues for the public information sessions.

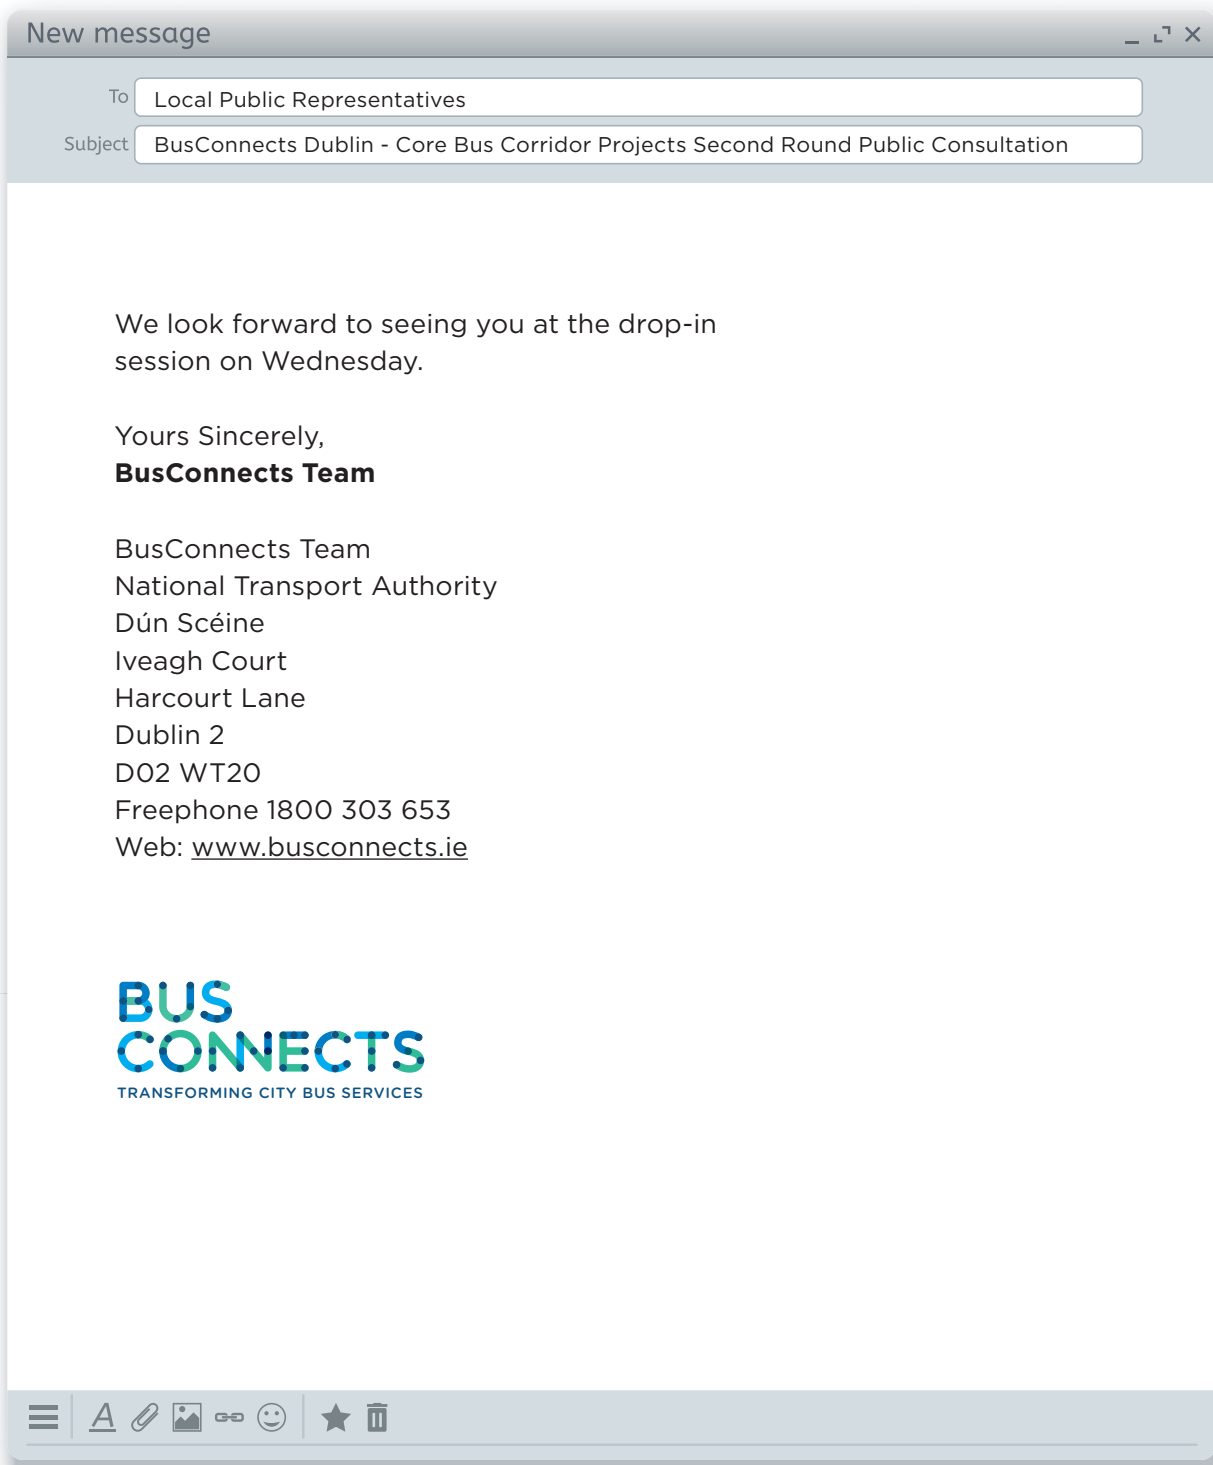

In addition, we have arranged a drop-in session for public representatives in the **Alex Hotel** (Fenian Street, Dublin 2) on **March 04th between 2pm - 6pm**. All public representatives across the Dublin region are invited to drop-in during those times and meet representatives of the NTA and the BusConnects team, who can provide information and address any queries that you may have.

In addition to the drop-in session on Wednesday, additional information will be available as follows:

- A **hard copy brochure** will be delivered to all elected public representatives in the relevant areas in the coming days detailing the Core Bus Corridor(s) relevant to your local area;
- In addition, **all brochures and maps** for each of the 16 Core Bus Corridors will be on the BusConnects website www.busconnects.ie from Wednesday and will be available in HTML, PDF and Audio versions to download; and
- **Public information sessions** will take place for communities served by the Core Bus Corridors. The dates and locations of these local information sessions will be available on our website (www.busconnects.ie) from Wednesday and will be advertised locally.

Correspondence with local public representatives regarding the launch of the Preferred Route Option non-statutory public consultation on 04 March 2020:

New message

To: Local Public Representatives

Subject: BusConnects Dublin - Core Bus Corridor Projects Second Round Public Consultation

From: cbc

Sent: Wednesday 4 March 2020 11:35

Subject: BusConnects Dublin - Core Bus Corridor Projects Second Round Public Consultation

Dear Public Representative,

Today, Wednesday 04th March 2020, the National Transport Authority (NTA) published for public consultation, the Preferred Route Options for the 16 Core Bus Corridors of BusConnects Dublin. The consultation period will run from Wednesday 04th March until Friday 17th April 2020.

Last year, we held our first round of public consultation on the Core Bus Corridor projects and approximately 13,000 submissions, including petitions, were received. The NTA have carefully considered these submissions, together with other feedback received from community engagements, and have developed revised proposals, representing the “Preferred Route Option”, for each core bus corridor. Details of these revised proposals are now available for review and we welcome all feedback and submissions.

In parallel with this second round of public consultation, work is ongoing on developing the technical, environmental, and transport impact assessment reports necessary for the full evaluation of each corridor as part of the planning process. This requires detailed and comprehensive analysis, coupled with extensive survey work, all of which must be based on the finalised design option. Accordingly, transport assessment reports and environmental reports will not be available until later this year.

It is expected that planning applications for the individual Core Bus Corridors will be submitted, at the end of this year, to An Bord Pleanála

To Local Public Representatives

Subject BusConnects Dublin - Core Bus Corridor Projects Second Round Public Consultation

for its determination. A statutory consultation process will be undertaken in conjunction with that formal planning application. A timeline for 2020 with the next steps and milestones is attached with this email for your convenience and to help understand all the stages.

On the website www.busconnects.ie you will now find:

- All 16 Preferred Route Options to view and download;
- A list of public information events dates and locations;
- Traffic Count Data for November 2019 (available from Friday 6th March); and
- Consultation Submission Reports (available from Friday 6th March).

Please be aware that any property owners either potentially impacted or no longer impacted under the Preferred Route Options have been contacted directly.

Public Information Events

The NTA is fully committed to working with all interested parties in the development of the Core Bus Corridors Project. A series of public consultation events will be held in venues along these corridors. Details of these are below and can also be found on the BusConnects website and in local newspapers in the coming weeks.

DATES	CORE BUS CORRIDOR	VENUE'S	Time
Wed 11th March	Clongriffin to City Centre	Bonnington Hotel	11:30am-7:30pm
	Swords to City Centre		
Thurs 12th March	Bray to City Centre	The Talbot Hotel Stillorgan	11:30am-7:30pm
Wed 18th March	Blanchardstown to City Centre	Crown Plaza Blanchardstown	11:30am-7:30pm
Thurs 19th March	Ringsend to City Centre	Hilton Garden Inn	11:30am-7:30pm

Community Forums

The NTA have found the Community Forums insightful and productive and as such we propose holding another series of forums later in the Summer, when further information, including the outcome of the this second public consultation, is available. These forums will take place before the schemes are submitted to An Bord Pleanála and in advance of the formal statutory consultation process which would takes place once submitted. The current revised designs for the various corridors have already been presented to the Community Forums at the most recent round of meetings.

In preparation for the second round of public consultation, please find attached the following documents:

Covid-19 Update

In response to the Irish Government and the National Public Health Emergency Team's latest guidelines, the following changes will apply from **6pm today (Thursday 12th March 2020)** in relation to the BusConnects Dublin second round of public consultation for the Core Bus Corridor Projects:

- All public information events are to be postponed
- The public consultation remains open and submissions can be made by email to cbc@busconnects.ie or by post.
- On the website www.busconnects.ie, all 16 Preferred Route Option brochures are available to view and download. In addition, the brochures are also available on the website in HTML and Audio files.
- Any queries and questions regarding the proposals can be emailed to cbc@busconnects.ie or please contact 1800 303 653.

We will continue to monitor developments and will follow all appropriate HSE guidelines.

Yours Sincerely,

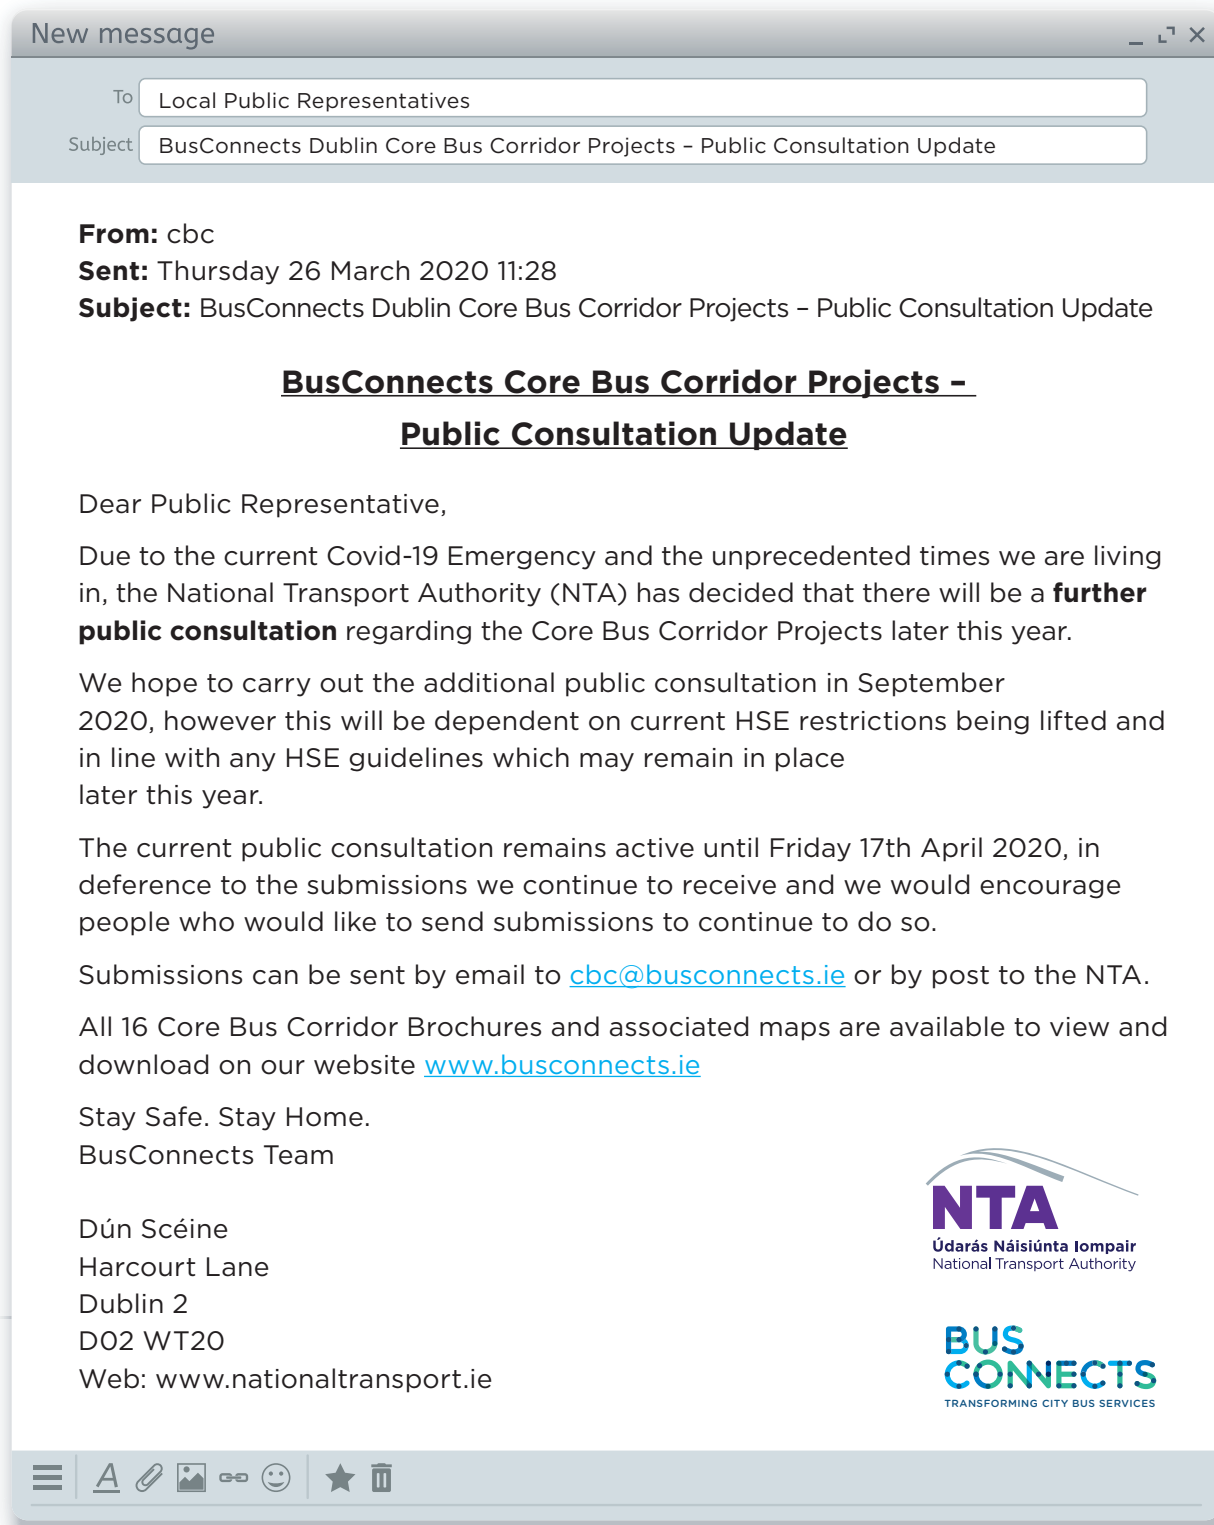

BusConnects Team

Subject: Kimmage to City Centre Community Forum

Dear Community Forum Member,

Please note that there will be a meeting of the **Kimmage to City Centre Community Forum in The Hilton Hotel, Charlemont on Tuesday 24th September @7pm.**

The purpose of this second meeting of the Community Forum is to provide an update on work-in-progress for each of the proposed Core Bus Corridors. At the Forum meeting we will provide an overview of the following:

1. Summary of Key Issues from the Submissions made from the BusConnects Infrastructure Public Consultation;
2. And to present Indications of Key Changes being considered to the Core Bus Corridor Proposals;

This meeting is being held in advance of the second round of public consultation, which will take place in November 2019 so it is important to note that the proposals and designs that will be presented at the meeting are still in draft status.

It will be after the second round of public consultation that the finalisation of the preferred route for each core bus corridor will be made. We anticipate the submission of the statutory planning application will then be made to An Bord Pleanála during mid-2020.

We look forward to seeing you at the forum.

Yours Sincerely,
BusConnects Team

BusConnects Dublin Core Bus Corridors – Community Forum Terms of Reference

BUSCONNECTS CORE BUS CORRIDORS PROJECT COMMUNITY FORUM TERMS OF REFERENCE

- 1.** Membership of the Community Forum will comprise of two representatives from residents'/community associations, disability groups, special interest groups and business organisations on the corridor, along with local public representatives, together with personnel from the National Transport Authority (NTA).
- 2.** Meetings of the Community Forum will be chaired by an independent chairperson.
- 3.** The core objective of the Community Forum is to facilitate a two-way dialogue process between representatives of communities / groups and the NTA in relation to the Core Bus Corridor proposals.
- 4.** It will enable information to be provided more directly by the NTA to the parties most impacted by the proposals.
- 5.** It will allow concerns about the proposals to be raised by the participants and for the NTA to address and respond to those concerns.
- 6.** It will allow constructive ideas and viable alternatives to be brought forward to improve the overall proposals.
- 7.** It will assist in enabling the resolution of local issues within the proposals in a timely manner.
- 8.** It will allow discussions and suggestions in relation to ideas for urban centre improvements that could be incorporated into the project.

Subject: BusConnects - Kimmage to City Centre Community Forum Presentation

Dear Community Forum Member,

Please find attached a copy of the presentation from last night's **Kimmage to City Centre Community Forum in the Hilton Hotel, Charlemont.**

This presentation includes draft designs and “work in progress” which is on-going for the Kimmage to City Centre corridors since the first round of consultation was completed in May 2019. It is important to note that there will be another round of public consultation in November of this year where the information included in this presentation will be further developed and designed. It is anticipated that the formal planning application to An Bord Pleanála will be made during the middle of 2020.

Please note that all presentations from the second round of Community Forum meetings which have taken place to-date in September (a number of meetings are still due to be held), are now available on our website at the following link. The remaining presentations will be placed on the website in due course.

Transport Modelling

Transport Modelling Work

BUS CONNECTS
TRANSFORMING CITY BUS SERVICES

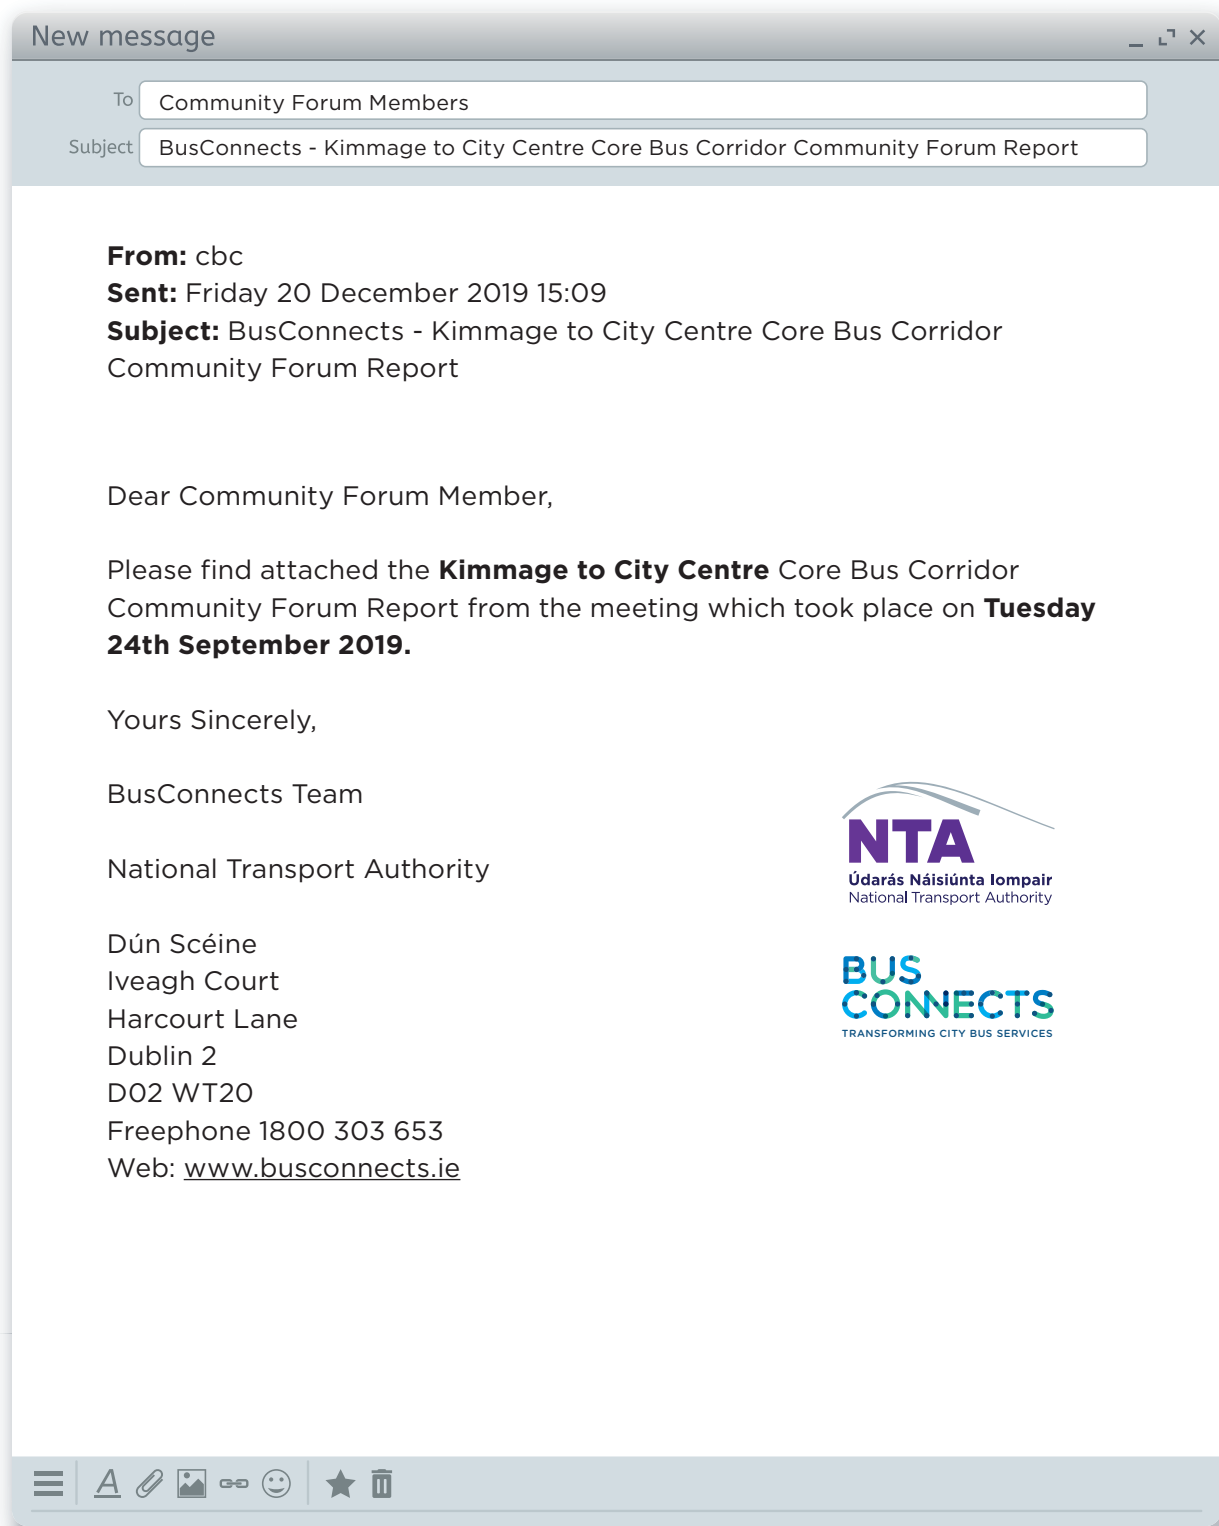

- A specialist transport analysis team is now in place.
- That team will undertake detailed transport modelling of the impacts of the various traffic changes.
- New traffic counts being undertaken during October / November.
- A computerised transport simulation model has been developed by the NTA to forecast and assess the likely impacts of changes.
- Transport simulation model will be used to identify the likely traffic changes arising from the Kimmage to City Centre proposals – what increase in bus usage is likely to occur and what routes the remaining traffic will use.
- Final design solutions required for all of the corridors to carry out analysis.
- Final designs of adjacent corridors, such as Rathfarnham and Tallaght to Terenure, are still evolving and are needed to give an accurate representation of eventual traffic patterns.
- A detailed transport report, providing comprehensive traffic information, will be available at a later stage.

Topics discussed:

- Interaction with bus network redesign including services and routes.
- Interaction with bus services.
- Tree removal and replanting programme.
- Mobility issues and vulnerable users.
- Continuity of cycling route.
- Level of segregation for cyclists.
- Rat running enforcement.
- Loss of on-street parking.
- Car parking alternatives.
- Park & ride facilities.
- Submission & consultation process.
- Mobility issues & vulnerable users.
- Interface between buses and cyclists.
- Statutory process and timeline.
- Projected traffic flow surveys & Transport Strategy.
- MetroLink.
- Future planning permission for apartment developments.
- Impact on environment and air pollution.
- Noise pollution.
- Low emission buses.
- Project budget.
- Cycle safety & children safety.
- Impact of cycle lane through Mount Argus & Church Park area.
- Traffic modelling.
- Access for funerals.
- Local access.
- Extent of time savings from project.
- Level of consideration of pedestrians.
- Bus gate options.
- Enforcement.
- Fare system.
- Impact on local businesses and jobs.
- Impact of proposal on Kenilworth junction and on local schools including on Clareville Road.
- School bus transport.
- Congestion charging.
- Traffic congestion on Whitehall Road and Stannaway Road.

Actions (NTA):

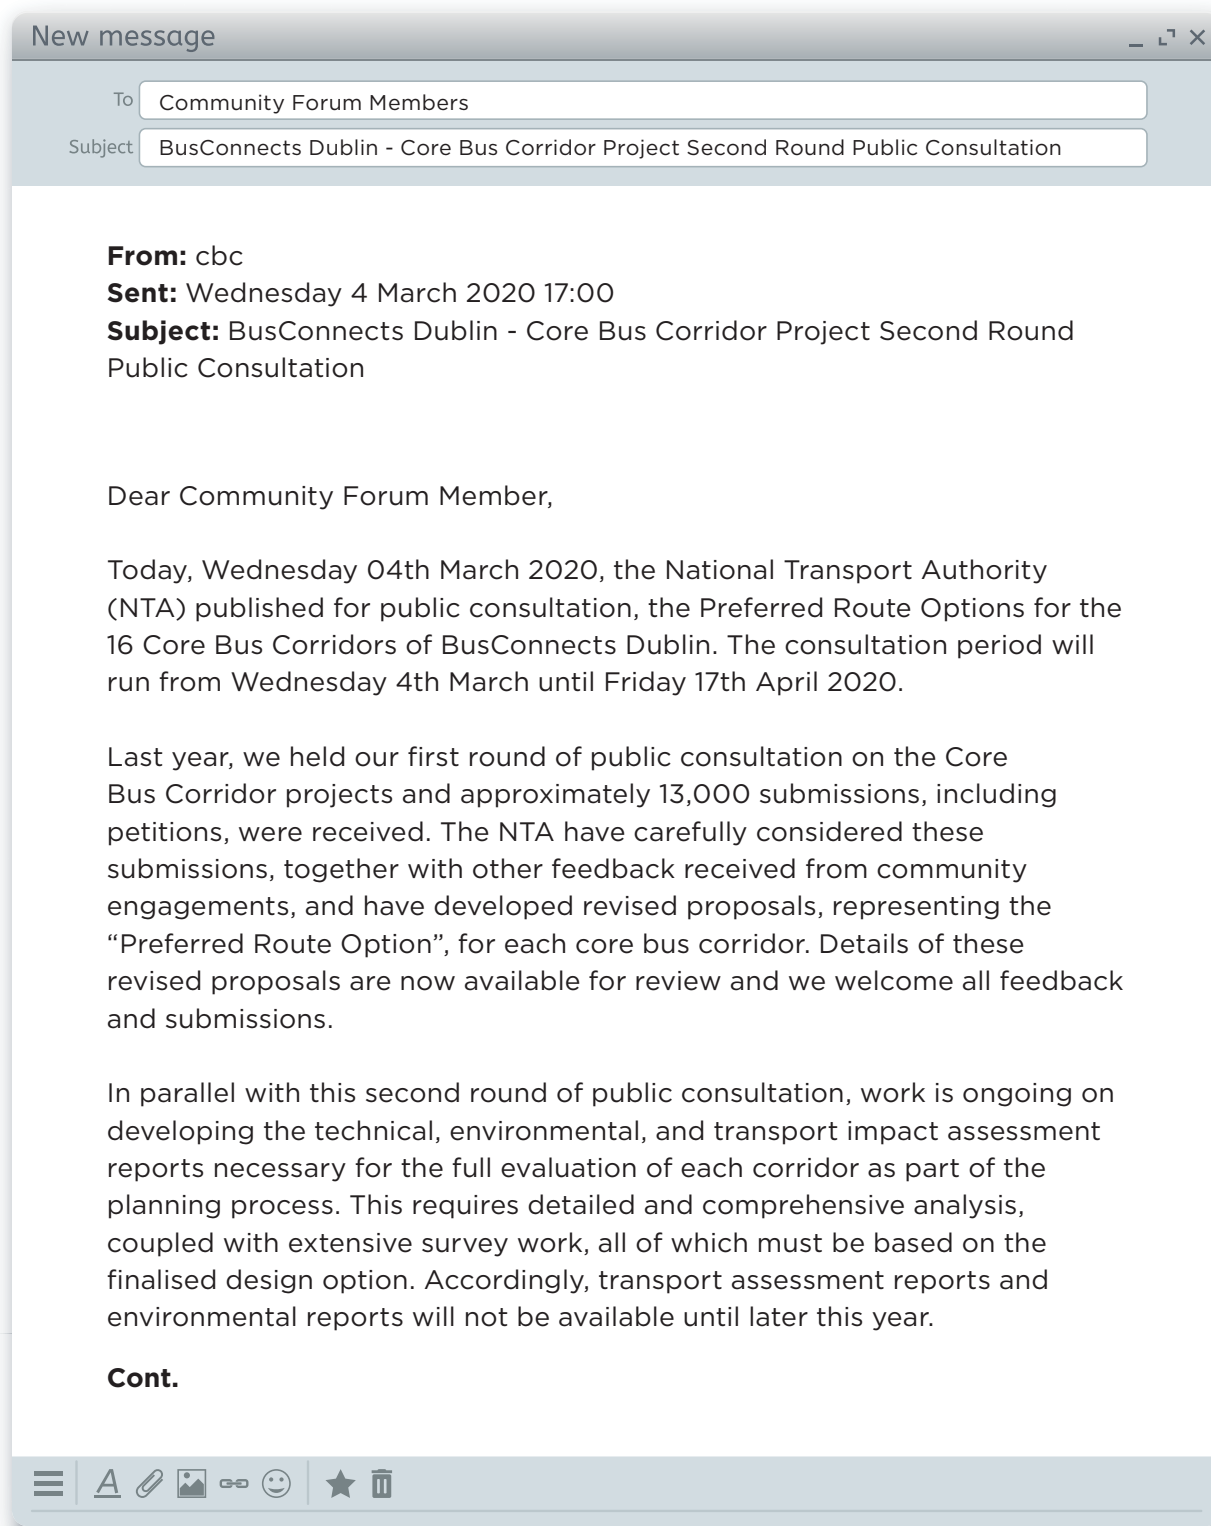

- To review traffic movements and traffic impacts.
- To refine the layouts for cycling at junctions along the scheme.
- Review pedestrian arrangements.
- To review rat running enforcement along the route.

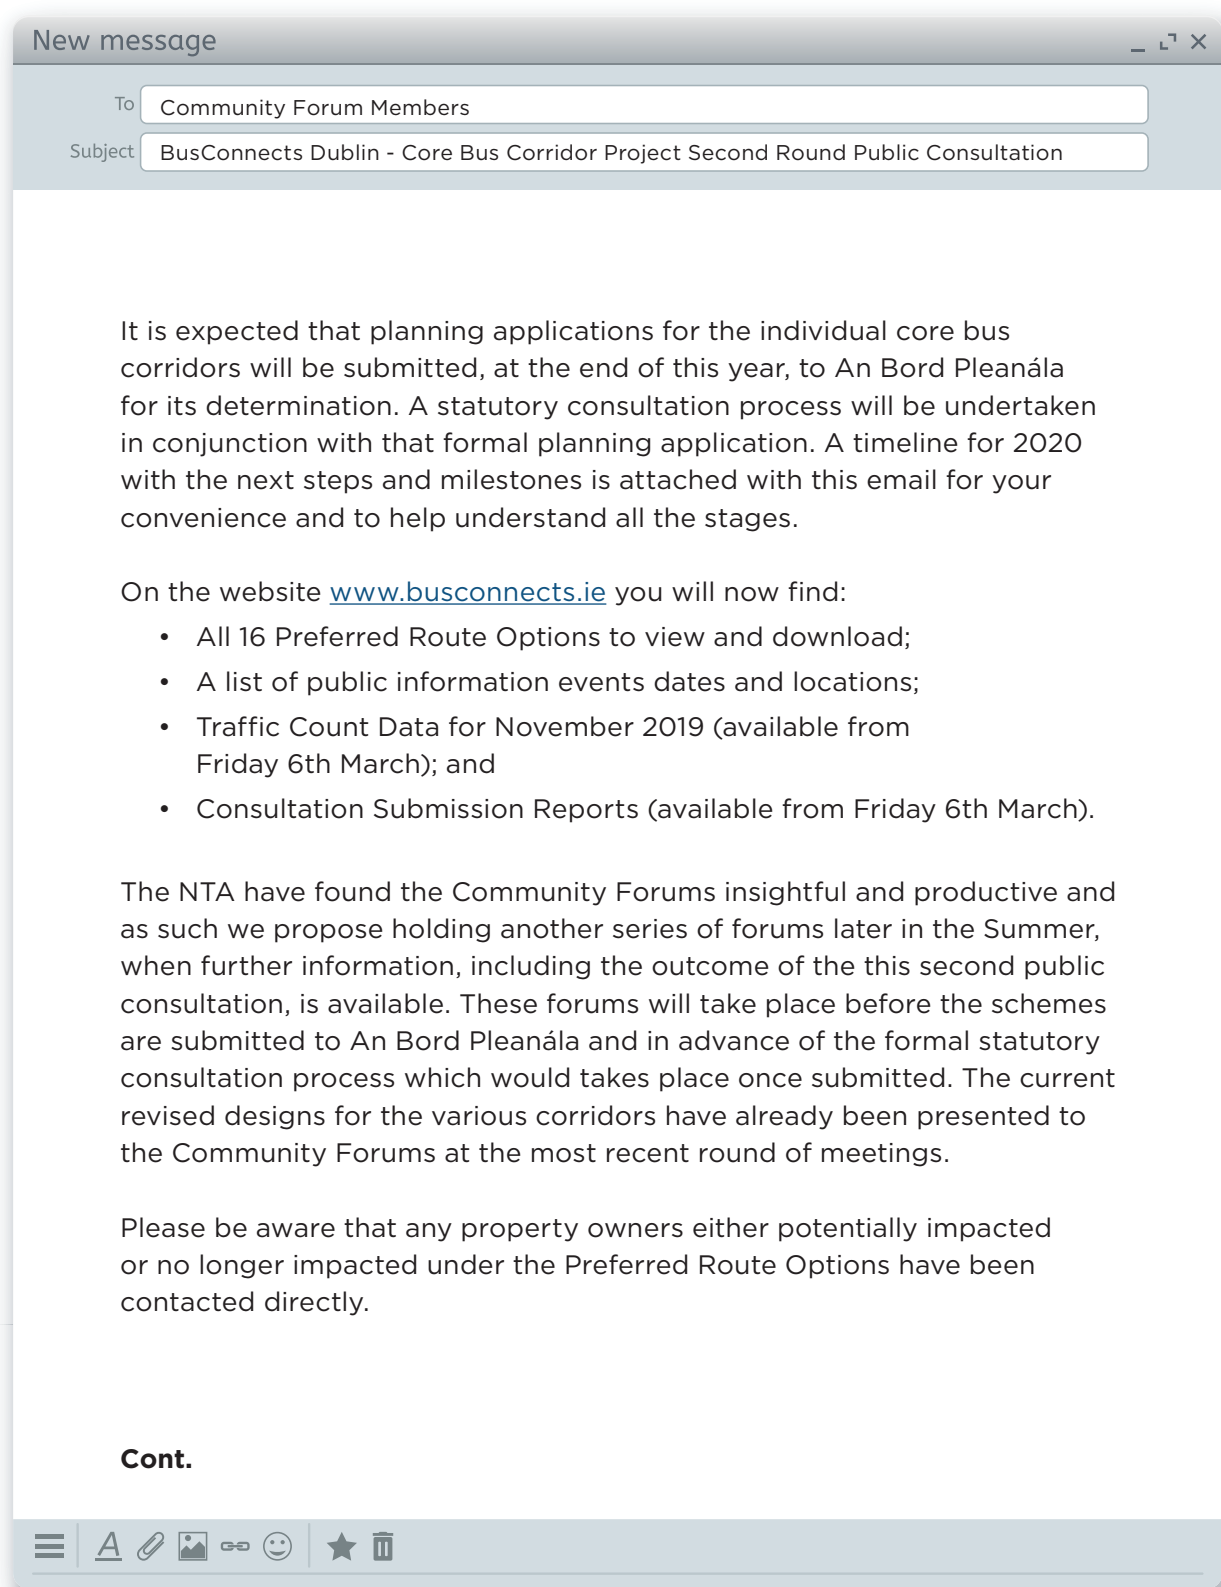

All above actions for delivery as part of next design stage of project.

Date of next meeting:

Date to be confirmed. Registered forum members to be contacted in due course.

INFORMATION NOTICE
Re: to City Centre Core Bus Corridor

Dear Property Owner/Occupier,

The National Transport Authority (NTA) has been tasked with delivering the BusConnects Dublin programme, which is a set of proposals to transform Dublin's bus system, so that journeys by bus will be fast, reliable, punctual, convenient and affordable. It will enable more people to travel by bus than ever before, providing an alternative to congested car journeys.

Congestion is one of the most significant challenges facing the Dublin region and needs to be addressed to safeguard the growth of the Dublin region and keep people moving. At present bus lanes are in place for less than one third of a bus journey on the busy corridors. A key part of the BusConnects project is the development of sixteen "Core Bus Corridors" or CBCs. These corridors will effectively deliver continuous bus lanes, on the key bus routes across the city along with improved pedestrian and cycling facilities along these Core Bus Corridors, building a sustainable city and addressing climate change.

328

A consultation on an Emerging Preferred Route for each corridor concluded in 2019. Following this public consultation process the NTA and its service providers have reviewed the submissions from the public to consider any changes appropriate to the Core Bus Corridor proposals. This review coupled with updated topographical survey information has led to changes to the proposals culminating in a Preferred Route proposal.

A letter was previously sent to this property advising that it was identified as being potentially impacted by the project, and an opportunity was given to meet NTA personnel to discuss the potential impacts. **The purpose of this letter is to inform you that the proposals contained in the Preferred Route Option for the [redacted] to City Centre Core Bus Corridor may continue to impact on part of the property.** A layout map showing an indicative layout in the vicinity of the property can be found on Map [redacted] of the Public Consultation Document, which will be published on our website www.busconnects.ie on 4 March 2020, and a brochure will be sent to you shortly.

The plan shows where the car lanes, bus lanes, cycle tracks and footpaths will be. Areas where land may be potentially impacted are marked with red dashed lines.

Please note these are proposals only and as such are not fixed or finalised.

The new proposals will be published on our website www.busconnects.ie on 4 March 2020, at which point the NTA will be welcoming feedback as part of the public consultation process. **No decisions have been made to proceed with these proposals, and will not be made until we have concluded the consultation process.**

Any decision to proceed with this project will be subject to a statutory planning process, which would involve an application for planning consent to An Bord Pleanála. The proposal is still subject to final detailed design, an environmental and transport impact assessment. The statutory planning application will not be made before the fourth quarter of 2020. Should the statutory planning application be consented by An Bord Pleanála, appropriate compensation will be paid to the owners for any garden portion or land that is ultimately necessary to be acquired from the property. This would also cover the rebuilding of new garden walls, fences, gates and driveways, as well as landscaping works to the residual area.

Cont.

The NTA would again welcome the opportunity to meet with you in relation to these proposals, to discuss with you on a one-to-one basis, what this may mean for you and what the next steps will be over the coming months and years. If you wish to avail of this meeting please call **1800 303 653** to arrange a time and date at your earliest convenience.

Yours sincerely,

INFORMATION NOTICE
Re: to City Centre Core Bus Corridor

Dear Property Owner/Occupier,

The National Transport Authority (NTA) has been tasked with delivering the BusConnects Dublin programme, which is a set of proposals to transform Dublin's bus system, so that journeys by bus will be fast, reliable, punctual, convenient and affordable. It will enable more people to travel by bus than ever before, providing an alternative to congested car journeys.

Congestion is one of the most significant challenges facing the Dublin region and needs to be addressed to safeguard the growth of the Dublin region and keep people moving. At present bus lanes are in place for less than one third of a bus journey on the busy corridors. A key part of the BusConnects project is the development of sixteen "Core Bus Corridors" or CBCs. These corridors will effectively deliver continuous bus lanes, on the key bus routes across the city along with improved pedestrian and cycling facilities along these Core Bus Corridors, building a sustainable city and addressing climate change.

A consultation on an Emerging Preferred Route for each corridor concluded in 2019. Following this public consultation process the NTA and its service providers have reviewed the submissions from the public to consider any changes appropriate to

Visit www.Transportforireland.ie for public transport customer information and services

333

the Core Bus Corridor proposals. This review coupled with updated topographical survey information has led to changes to the proposals culminating in a Preferred Route proposal.

A letter was previously sent to this property advising that it was identified as being potentially impacted by the Emerging Preferred Scheme, and an opportunity was given to meet NTA personnel to discuss the potential impacts. **The purpose of this letter is to inform you that the proposals contained in the Preferred Route Option for the [redacted] to City Centre Core Bus Corridor indicate that this property is no longer potentially impacted.**

Please note these are proposals only and as such are not fixed or finalised

The new proposals will be published on our website www.busconnects.ie on 4 March 2020, at which point the NTA will be welcoming feedback as part of the public consultation process. **No decisions have been made to proceed with these proposals, and will not be made until we have concluded the consultation process. Consequently future amendments to the plans could potentially result in the property again being impacted.**

Any decision to proceed with this project will be subject to a statutory planning process, which would involve an application for planning consent to An Bord Pleanála. The proposal is still subject to final detailed design, an environmental and transport impact assessment. The statutory planning application will not be made before the fourth quarter of 2020. Should the statutory planning application be consented by An Bord Pleanála, appropriate compensation will be paid to the owners for any garden portion or land that is ultimately necessary to be acquired from the property. This would also cover the rebuilding of new garden walls, fences, gates and driveways, as well as landscaping works to the residual area.

If you require any clarification regarding this letter please call **1800 303 653**. A project team representative will respond to your query. Once the consultation on the Preferred Route Option has commenced, members of the public and interested parties will be invited to send in submissions. All information on how to take part in the consultation will be made available on our website www.busconnects.ie

Yours sincerely,
BusConnects Infrastructure Dublin,
National Transport Authority

Preferred Route Option: Second Round of Non-Statutory Public Consultation - 4th March 2020 - 30th April 2020

4F Press Release & Media Engagement

Press release issued for launch of Second Round of Public Consultation on 4th March 2020:

PRESS RELEASE

NTA LAUNCHES SECOND ROUND CONSULTATION ON THE CORE BUS CORRIDOR PROJECTS

Preferred Route Options for 16 Core Bus Corridors included in second round consultation

Revisions ensure 42% reduction in properties impacted by the plans

Majority of landmark trees in historic areas of Dublin no longer impacted

4th March 2020 – The National Transport Authority (NTA) has today launched the second round of public consultation on the sixteen core bus corridors earmarked for development as part of the BusConnects programme.

The latest round of public consultation on the Core Bus Corridor Projects centres on the Preferred Route Options for all sixteen corridors. This comes following the first round of public consultation on the Emerging Preferred Routes in late 2018 and early 2019.

The BusConnects programme is an integral element of Project Ireland 2040, the Transport Strategy for the Greater Dublin Area 2016-2035 and the Climate Action Plan published in June 2019. Its aim is to develop an enhanced bus system that is better for the city, its people and the environment.

By delivering 230km of continuous bus priority and 200kms of cycle tracks, the Core Bus Corridor Projects will help more people from their cars to a better, more reliable and more efficient bus system is a critical element in reducing carbon emissions and congestion in the capital city.

During the six-month consultation process, the NTA received approximately 13,000

written submissions, including those with multiple signatories. Community Forums were also established for each corridor to enable a two-way dialogue with local communities where solutions to certain challenges were co-created.

Despite the issues varying across each corridor, a number of common issues were identified including the potential impact on properties.

Following extensive engagement with the local communities across Dublin, the NTA's revised proposals contain several design changes that aim to minimise the impact of the project on properties while maintaining bus priority and enhancing cycling facilities.

Revisions to the initial proposals have ensured a 42% decrease in the number of properties impacted by the project, with:

- A Bus Gate at Ravensdale Park eliminating the need for land acquisition on this part of the Kimmage to City Centre corridor

Cont.

<ul style="list-style-type: none"> • Signal Controlled Priority on either side of Templeogue Village reducing the need for road widening along this section • A one-way inbound system on Rathgar Road removing the need for land take on that segment of the Rathfarnham to City Centre corridor • Signal Controlled Priority along Rathfarnham Road reducing the impact on properties along a section of the Rathfarnham to City Centre corridor 	<p>of trees in historic areas of the city. The NTA has introduced multiple changes to protect long-established trees in historic parts of Dublin, which have resulted in:</p> <ul style="list-style-type: none"> • No tree being removed along Rathgar Road • All trees on the residential side of Nutley Lane being retained • Up to 90% of existing mature trees being retained on Baggot Street Upper and Lower 	<p>systems, the introduction of Signal Controlled Priority Bus Gates and off route cycle tracks.</p> <p>Less developed trees along a select number of Core Bus Corridors have been identified for replacement to ensure the provision of safe cycling infrastructure. This follows extensive topographical surveys in recent months. Included is a new two-way segregated cycle-track running inside the grounds of the Hermitage Golf Club on the Lucan to City Centre corridor.</p>
<ul style="list-style-type: none"> • An altered road layout and Signal Controlled Priority significantly reducing land acquisition on Crumlin Road along the Greenhills to City Centre corridor 	<ul style="list-style-type: none"> • Up to 90% of existing mature tress along Pembroke Road being retained • 80% of trees along Merrion Road being maintained 	<p>A comprehensive replanting programme will ensure more trees are replaced than are removed during the development of Core Bus Corridor Projects.</p>
<ul style="list-style-type: none"> • An adjustment to the road layout on the Rock Road between Booterstown Avenue and Blackrock Clinic reducing the need for land take along this segment of the Blackrock to Merrion corridor 	<ul style="list-style-type: none"> • Over 85% of existing tress along St. Mobhi Road being retained • 75% reduction in the number of trees along Finglas Road being removed 	<p>Consultation on the revised proposals begins today and runs until Friday, 17th April. A series of information events will be hosted across the Greater Dublin Area during March. Dates, times and venues are available at www.busconnects.ie.</p>
<p>One of the biggest concerns raised during the first round of consultation was the removal</p>	<p>This has been achieved through the maximisation of existing road space by new one-way</p>	<p>All submissions in the second round of public consultation will be reviewed by the NTA.</p>

Cont.

Technical, environmental, and transport impact assessment work will then take place with final plans due to be presented to An Bord Pleanála for statutory approval in the fourth quarter of 2020.

Anne Graham, NTA Chief Executive Officer said: “In 2018, we first unveiled our plan to deliver continuous bus priority along Dublin’s busiest bus corridors and high-quality cycling facilities. Through extensive public consultation and direct engagement with communities across the region, we’ve been able to pinpoint areas of concern along each of the sixteen routes.

“We have responded constructively to the issues raised and have put forward alternative proposals that help to mitigate many of these challenges raised by the public. This has helped to dramatically reduce the number of properties that will be impacted and to work with communities to create new public realms across the city.

“Considerable emphasis has been given to meeting the needs of the increasing number across the city choosing to cycle to work and college. We’re proposing modern infrastructure that will provide new options for children and their families to be able to cycle safely both between, and within, their local communities.

“I’m confident that the revised routes will greatly improve journey times and most importantly will reduce CO2 emissions by having more people move from their car and onto the bus. We are also moving forward to creating a fleet of low emissions vehicles with half of the fleet due to be converted to low emission buses by 2023.

“Although we are aware that a project of this scale and investment will bring challenges, BusConnects is needed now more than ever. With our cities growing, continuous bus priority and more cycle lanes will be needed to create a sustainable public transport system fit for the future.

“I would invite the people of Dublin to share their views on the Preferred Route Options in the coming weeks.”

End

8

Summary of Key Issues Raised

Traffic and access impacts	Environmental Impacts - Trees
Impact of Displaced Traffic	Impact on Properties (CPD)
Cycling Facilities	Bus Services and Stops
Safety Concerns	Bus Lanes & Road Widening
Community Impacts	Route Specific Issues
Parking and Loading	

BUS CONNECTS
TRANSFORMING PUBLIC TRANSPORT

9

Solutions to address issues raised

- Use of Bus Gates
- Introduction of Signal Controlled Priority
- Off-line cycle routes
- One-way general traffic layouts
- Quiet Street Treatments

BUS CONNECTS
TRANSFORMING PUBLIC TRANSPORT

10

Benefits of Changes

- 42% reduction in number of properties potentially impacted
- Urban Realm Improvements
- Enhanced cycling facilities
- Significantly reduced impact on mature trees

BUS CONNECTS
TRANSFORMING PUBLIC TRANSPORT

11

Solutions to address issues raised

Use of Bus Gates

- Northbound Bus Gate at the junction of St. Mobhi Road and Griffith Avenue will reduce the need to widen St. Mobhi Road and allow for the retention of trees.
- A new Bus Gate location just north of Kimmage Cross Roads will result in no widening of Kimmage Road Lower, eliminating the need for land take in this section.
- Bus Gate on Rathmines Road Lower between Military Road and Richmond Hill facilitating bus priority and wider footpaths through Rathmines village.

BUS CONNECTS
TRANSFORMING PUBLIC TRANSPORT

12

Cont.

13

Solutions to address issues raised

Signal Controlled Priority

- Signal Controlled Priority proposed for Botanic Road allowing for segregated cycle tracks to be provided.
- Signal Controlled Priority proposed through Rathgar Village to minimize impacts on parking and loading, this will also allow Urban Realm improvements.
- Signal Controlled Priority will allow the northbound traffic lane and bus lane on Manor Street south of Manor Place to merge into a single lane, facilitating improved cycling facilities and Urban Realm enhancements.
- Continuous bus priority and segregated cycle tracks are proposed in each direction from Morehampton Road to UCD through a combination of bus lanes and Signal Controlled Priority

14

15

Solutions to address issues raised

Off Line Cycle Routes

- New cycle/pedestrian bridge over the Royal Canal and new underpass is proposed under North Circular Road in the Phibsborough area.
- Between Griffith Avenue junction and Clontarf Road junction it is proposed to close Haverty Road to general traffic at St Aidan's Park, creating a quiet street for cyclists.
- The proposed alternative cycle route on Kildare Road is now redirected towards the Grand Canal via Clogher Road along which cycle lanes are to be provided.
- Cycleway proposed along the River Poddle between Kimmage Crossroads and Harold's Cross
- An alternative cycle route is proposed along the Owendoher River in Rathfarnham, creating a link to the proposed Dodder Greenway and connecting back to Rathfarnham Road at Rathdown Park.

16

Solutions to address issues raised

One-way General Traffic Layouts

- A one-way traffic system and segregated cycle tracks proposed on Camden Street between Charlotte Way and Cuffe Street, enhancing cycle facilities and maintaining commercial loading where feasible.
- St Joseph's Road to be one-way towards Prussia Street at its eastern end in order to control local access.
- One-way general traffic system is proposed on Grattan Crescent removing the impact on trees and allowing for Urban Realm improvements. To facilitate this a two-way general traffic system is proposed on Memorial Road.

17

Solutions to address issues raised

Quiet Street Treatments

- A Quiet Street Treatment is to be introduced on Rathdown Crescent, tying into the Rathfarnham CBC to improve the cycling network.
- An alternative cycle route will now be facilitated between Omni Park Shopping Centre and the Shantalla Road junction, with a Quiet Street Treatment implemented on Lorcan Road and Shanrath Road.
- Two-way cycle track proposed on Constitution Hill with a Quiet Street Treatment link to the Liffey Cycle Route.

18

Cont.

Examples of corridors where property impacts are reduced:

- Ballymun - City Centre: 60% less impacted properties
- Kimmage - City Centre: 75% less impacted properties
- UCD - Ballsbridge: 85% less impacted properties
- Rathfarnham - City Centre: 55% less impacted properties
- Finglas - Phibsborough: 50% less impacted properties

19

Examples of areas with reduced impact on trees:

Merrion Road	Baggot Street	St. Mobhi Road
		
80% reduction	90% reduction	Over 85% reduction

There will be a comprehensive replanting programme during the construction of BusConnects with more trees being replanted than removed. In addition there are a number of Urban Realm areas identified across the corridors where significant planting will form an important part of their design.

Where the majority of trees are to be removed they are mostly younger, smaller and less established.

20

Urban Realm Improvements

21

Urban Realm concept Phibsborough Centre

22

Urban Realm concept Booterstown

23

Urban Realm concept Georges Dock

Media Plan

For the second Round of Non – Statutory Public Consultation, we used Radio, Press and Digital.

(Radio was paused on the 15th March, press ran until the 12th March and digital was paused on the 18th March following the emergence of Covid-19).

Radio was planned to reach Dublin and the Greater Dublin Area audience, extending into Wicklow. A mixture of national and regional stations gave us strong coverage for the two weeks the campaign was on-air for. Today FM and Newstalk are national stations and index high for the Dublin commuter audience. Regional stations, 98FM, FM104 and Nova focused on the Dublin region, while East Coast FM gave us presence in Wicklow.

National print titles were used to gain broad reach. Regional print titles were used to support this and covered Dublin city and Greater Dublin, including Wicklow.

For Digital, we included Social, Display and Near Targeting. NEAR activity allows us to target users on mobile devices within specific geo-fenced areas. For Near we targeted busy commuter routes, all major hospitals, shopping centres and universities/colleges in Dublin city.

ODD THINGS THAT CAUGHT OUR EYE THIS WEEK
BITS & BOBS

Ruff work for Texas cops

A DOG in Texas reported itself missing last week, after strolling through the doors of a local police department and putting his paws up on the counter (right).

The dog entered Odessa Police Department in Texas and hopped up onto the counter, though he didn't seem distressed at all.

Speaking to The Dodo, Sergeant Rusty Martin said everyone played with the dog for a short while, whilst trying to find his owners.

Sergeant Martin said: "We were all excited to have him in the building. We had a tennis ball and threw it in the lobby for a bit. Everyone loved him."

The dog was wearing a collar when he arrived at the station, but the ID tag had apparently fallen off, so animal control came to check for a micro-chip.

However, the dog had other ideas, and left the station before animal control could arrive.

"He ran out just as quick as he came in," Sergeant Martin posted online. "The owner responded the next day (to say that) it was his dog and he had returned home. He lives about a mile from the station."

THIS WEEK'S TOP TWEETS

"As much as I would like to believe I'm not an Irish stereotype, I did just use the buffet in this 4-star London hotel to make a ham and cheese roll for lunch later."
@samwhatslife

"A slice of apple pie is \$1.40 in Jamaica, and \$2.60 in the Bahamas. These are the pie rates of the Caribbean."
@StephanieYeboah

"Yesterday I met my arch nemesis. It was a Trinity masters student who came on my campus tour. He already knew everything and ruined all my punchlines, exposing how scripted my jokes are and that I am not organically funny. Also did not tip."
@mistress_mick

"Gwen Stefani was right. Don't speak."

Number of trees to be felled under bus route scheme jumps from 1,500 to 2,500

More than 770 properties to lose part of garden under latest bus route plan
More trees will be replanted than removed, says transport agency

SARAH BERRY

The number of trees to be felled under the proposed bus route plan in Dublin has jumped from 1,500 to 2,500, according to the latest draft of the Kimmage to City Centre bus route plan. The number of trees to be replanted has also jumped from 1,500 to 2,500. The National Transport Authority (NTA) says the number of trees to be replanted will be 2,500, more than the 1,500 trees to be removed. The NTA says the number of trees to be replanted will be 2,500, more than the 1,500 trees to be removed.

The NTA's latest revised route plan for the Kimmage to City Centre bus route scheme. The original proposal, published in 2018, called for the removal of 1,500 trees and the replanting of 1,500 trees. The latest proposal, published in 2020, calls for the removal of 2,500 trees and the replanting of 2,500 trees. The NTA says the number of trees to be replanted will be 2,500, more than the 1,500 trees to be removed.

Half of applicants for Irish Water's 'first fix free' offer withdrew before leak fixed

More than half of those who applied for the 'first fix free' offer by Irish Water have withdrawn their applications before the leak was fixed. The offer was intended to help homeowners with the cost of installing a water meter. However, many homeowners have withdrawn their applications because they are unable to access their properties to have the meter installed.

Irish Water is offering a 'first fix free' offer to homeowners who are installing a water meter. The offer is intended to help homeowners with the cost of installing a water meter. However, many homeowners have withdrawn their applications because they are unable to access their properties to have the meter installed.

Campaigner says prostitution is 'abuse' and 'torture'

KITTY HILLARD

A campaigner has said that prostitution is an abuse and a form of torture. She is calling for the government to take action to end prostitution. She says that prostitution is a form of abuse and torture because it involves the exploitation of women and girls.

A campaigner, Kitty Hillard, with activists from the 'Don't Buy It' campaign. They are holding a sign that says 'DON'T BUY IT'. They are standing in front of a building. The sign is black with white text.

Vacant council seats are filled

FOLLOWING the election of two local councillors to the Dail last month as a result of the General Election, two new councillors were co-opted onto South Dublin County Council last week to fill the vacant seats.

Francis Noel Duffy, who was a Green Party councillor in the Rathfarnham ward from 2014 until his election to the Dail last month, has been replaced by Green Party member and Rathfarnham resident Claire O'Ryane.

Cllr O'Ryane joined the Green Party in 2017 on her return to Ireland after spending a decade abroad, and she currently works in the public sector and volunteers with a mental health charity.

Fine Gael's Emer Higgins, who was a councillor for the Clonsilla Local Electoral Area for seven years before being elected to the Dail last month, has been replaced by Sinn Féin's O'Hara.

Cllr O'Hara was co-opted to replace Deputy Higgins last month, after members of Fine Gael DUBLIN Mid-West selected her to fill the vacant seat.

Work starts on new Dodder bridge

SCHEME: Work has begun on the new bridge at Bolbrook.

Dodder Scheme will be a greenway of 'international renown'

By Mary Dennehy
mary@echo.ie

WORK has started on a new four-metre-wide bridge at Bolbrook, which will span the Dodder as part of an ambitious greenway scheme set to enhance, connect and protect.

The Echo this week contacted South Dublin County Council after a number of trees and some vegetation were removed from an area close to the Bolbrook Enterprise Centre.

Replying to The Echo, the council confirmed that this work is due to the construction of a bridge across the Dodder at Bolbrook, which is part of the Dodder Greenway Scheme.

The council added that a landscape plan at this location, incorporating native hedgerow, woodland plants and shrub

planting, will be carried out as part of the development.

The Dodder Greenway Scheme will comprise of works along the banks of the Dodder at points in Killaght, Tallaght, Firsense, Templeogue, Terenure and Rathfarnham.

According to the council, the scheme, which went to public consultation in 2017, will develop a greenway of "international renown" - one that is "on par with the best greenways in the world".

Approximately 14km in length, the

greenway will travel along the Dodder Valley from Orwell/Terenure, through to the outer suburbs of Tallaght and up into the rural and inland community to the entrance of the Bohernabreena reservoir at Glensmole.

The detailed scheme has a number of elements, including the widening and upgrading of existing paths, bridges, underpasses and junctions - and the construction of new paths and bridges.

Improved landscape treatment is also on the cards alongside ecological enhancements which include species-rich grassland management, the planting of native trees and the provision of bat boxes and bat-friendly public lighting.

New entrances to the greenway will

also be developed.

In a response to The Echo this week, the council said that the timeline for the construction of these bridges is 12 months, with the handover due in February 2021.

The pedestrian bridges will be located over the River Dodder at the Tallaght Bypass and to the rear of the Bolbrook Enterprise Centre, which will link the eastern part of Tallaght the N81 to the Greenway.

The second bridge will stretch over the Dodder from Kilver to Riverside cottages, linking Templeogue Village with the greenway park, while the third bridge will span the Dodder to Rishy Park, to the rear of Rathfarnham village.

AFTER DRIVER OF VAN AND MOUNTS A PATH

● Mum Nuala was out for evening jog when struck

lethal weekend in which seven people died in road accidents, described by the Road Safety Authority (RSA) as "an appalling level of carnage".

RSA spokesman Brian Farrell said those deaths brought to 18 the total number of road fatalities in February alone. He described the weekend's

carnage as being "close to double the monthly fatality rate". In the worst single loss of life, three people were killed in a two-car collision in Co Louth on Saturday. Another and son, Mary Faxon (58) and Kevin Faxon (58), from Bessbrook in Co Armagh, were pronounced dead in one car.

In the second vehicle, Bryan Magill (25), from Newry, was killed. The crash happened at around 2.15am on the N1 at Carrickcuman, near Dundalk. A man in his 20s, also from the North, was charged on Monday with dangerous driving in connection with the accident.

NEWS 3

GREENS DON'T WANT N11 FUNDING

Following recent remarks about the N11 improvement scheme made by Green Party Leader, Eamon Ryan TD, advocating not proceeding with them, Independent councillor Joe Behan has urged Wicklow County Council not to delay the works as it could result in the project missing out on vital funding.

The Green Party leader said that money spent on widening the N11 would be better invested in improving the rail line between Wicklow and Dublin. Speaking at last week's meeting of Wicklow County Council, Cllr Behan said "As we know, there are negotiations in progress at the moment for the formation of a new Government. The Green Party are central to those negotiations at the moment. And the leader of the Green Party made a statement in the Dail about the N11 and works that may be happening with regard to the N11&M11. It was to the effect that if they get into Government they are going to stop those works and I think there is a very serious threat to improvement works on the N11 if that particular threat is carried out."

"I raised this before the election and I remember the one issue that I think most people were agreed on at the time is that there needs to be a combination of works done there, not just widening a road, but also public transport options for people and we all agree with that. "But the Chief Executive at the time said we are on a particular funding track for that work. Having got to this stage, I am concerned that that particular funding track will be taken away from us."

Cllr Behan asked that the Council send a letter to the Department outlining the view that funding for the upgrade must be retained. "As a body, we should be indicating very clearly to the Department of Transport and the Department of Local Government that we do not want to see the priority of that particular road being removed by a future Government and we should make our views very clearly known on that subject. "I am sure we would all agree, that whatever

Cllr Joe Behan

else happens we don't want to lose the funding. We have to do something for the tens of thousands of people stuck in this misery gridlock morning and night, who are still stuck in it three weeks after an election with very little hope of things improving in the short-term."

Chief Executive of Wicklow County Council, Frank Carran, said that the scheme is mentioned in the National Development Plan as being among the category of schemes that will progress to design phase and that could get the green light. He said "Obviously we don't want to delay it, because we are in with a chance of it progressing. We want to stay in that category and complete the design work."

Green Party Councillor Louisa Scott said that Cllr Behan's remarks were a "moon protest" until a new Government is formed.

Green Party Leader Eamon Ryan TD

Firefighters last Wednesday attended a fire which broke out in a derelict building on Arklow's Main Street. There have been several fires in the building in recent years but last week's was the largest, with fire crews from Wicklow and Arklow joining forces to fight the blaze.

Harris raises the need for increased police presence

Minister Simon Harris has written to the Minister for Justice about the need for an increased police presence in Charlestown and Enniskerry.

Minister Harris said that the recent attack on two joggers in Charlestown "caused great alarm in the community. I have requested the County Wicklow Policing Committee discuss the recent increase in burglaries in residential areas adjacent to the N11 including the communities of Enniskerry, Deltany, Charlestown and Kilsode.

"I have also written to the Minister for Justice seeking an update on how to extend the opening hours for Enniskerry Garda station in light of a number of incidents in the community since the start of the year including the recent attempted robbery on Enniskerry Post Office. The North Wicklow area has a rapidly growing population and policing resources must keep up with the related demographic and social pressures that come with new housing developments."

Three teenage males were arrested for the for the mugging at knife-point of three female joggers that took place in Charlestown on the evening of Thursday, 20th February.

Fionnghuala's Miss Universe Ireland call

THE search is on for competitors to take part in this year's Miss Universe Ireland contest.

Last year's winner, Fionnghuala O'Reilly, from Swords, along with Gráinne Gallanagh and Cailín Ní Toibín, who won the 2018 and 2017 titles respectively, last week launched the search for finalists for the 2020 competition.

The event will take place in the Round Room of the Mansion House on July 2. The winner on the night will walk away with over €70,000 worth of prizes and go on to represent Ireland at Miss Universe at the end of the year.

In 2019 Fionnghuala wowed with her poise, passion and intelligence and was named unanimously as the

winner by the esteemed panel of judges.

Fionnghuala went on to represent Ireland in the international competition last December in South Korea.

The first NASA datanaut to compete in the event, Fionnghuala was the ambassador for Ireland's Engineers Week which took place from February 29 to March 6.

The First Round applications to compete as one of up to 30 finalists for the title of Miss Universe Ireland 2020 are being accepted from now until Friday, April 3.

The online application form and further requirement details can be found here: <http://missuniverseireland.eu/apply-2020/>

Social media reacts to new TV series on Garda district

SOCIAL media was set alight last week following the first episode of *The Guards Inside the K*, Virgin Media One's gripping new series about the country's most challenging policing district.

While there was some discomfort over how local communities were portrayed in the heart-breaking programme, there was overwhelming sympathy expressed for the daily challenges faced by gardai in combatting gangland violence and serious criminality. The five-part series provides viewers

with unprecedented insight into the lives of gardai working in the K District, which includes Finglas, Cabra and Blanchardstown and serves a population of 175,000 people.

While problems with crime levels in these Northside communities were highlighted in the programme, it was pointed out by gardai that affected areas such as Blanchardstown and Finglas were also home to many ordinary, decent people.

As reported in last week's edition of *Northside People*, Dublin

West TD Paul Donnelly (SF) had expressed concerns over how local areas were depicted in promotional trailers for the series, which contained references to the K District being like the "Wild West" and "Heint".

However, after the show aired last week, many people commenting on social media praised the gardai who featured in the show, particularly those who showed great restraint in the face of blatant provocation.

The next episode airs this Wednesday, March 11, at 9pm on Virgin Media One.

A video still from *The Guards Inside the K*, a gripping new series on Virgin Media One.

Finglas Suicide Network fundraiser

FINGLAS Suicide Network (FSN) will hold a special community event on Saturday, March 21, in the grounds of Coláiste Iride on Cardiffsbridge Road in Finglas.

The event is being

organised to raise badly needed funds for FSN and to raise awareness around the issue of suicide.

The Gardaí Band will kick-off proceedings at 11.45am, followed by a sponsored walk.

Throughout the day there will be live music, kids' entertainment and food stalls. The younger ones will be kept happy with face painting and bouncy castles while the adults can enjoy the sounds of

the Dublin Gospel Choir and the band, Dextra.

All are welcome to come out and support this most worthy cause.

Visit www.fsn.support.ie/coláiste-iride-events for more details.

Royals check out new-look Gravity Bar at the Storehouse

Neil Fetherstonhaugh

THE Guinness Storehouse has unveiled its new €20 million Gravity Bar with unrivalled views across the city skyline.

Developed over three years, with over 175,000 man hours and almost €20 million investment, Gravity Bar has now more than doubled in size.

It now offers visitors extended panoramic views which include the historic Phoenix Park and new vistas over the Dublin Mountains.

The footprint of Gravity Bar is now constructed as a figure of eight, designed to give visitors maximum views across Dublin's city skyline.

The new bar is 721 square metres and will be able to host up to 500 people at a time.

Since its opening in 2000, Gravity Bar, which stands at 46 metres

high, has become one of the world's most iconic viewing decks.

It has hosted high profile guests from across the globe, with everyone from Queen Elizabeth to Bill Clinton, Tom Cruise and Kyle Minogue visiting, and more recently the The Duke and Duchess of Cambridge.

Fifty panes of glass were used to create the panoramic view over the Dublin cityscape that has become the jewel in the crown of the home of Guinness.

The architects behind Gravity Bar's new innovative design, RKD, also led the initial development of the Guinness Storehouse 20 years ago, transforming it from a derelict grain store into a seven-storey storytelling showcase, and Ireland's number one tourist attraction.

The interior designers,

O'Donnell O'Neill Design, were tasked with creating the contemporary interior.

Dublin-based street artist Aches was commissioned to create bespoke art installation that features on four walls throughout the bar.

These unique, eye-

catching artworks demonstrate the evolving creativity of the city of Dublin and the story of Guinness through the ages.

With 1.7 million people through the doors of the Guinness Storehouse every year, this will make Aches' original works

one of the most viewed artworks in the country.

Speaking about the launch of the newly developed bar, Paul Carty, Managing Director of the Guinness Storehouse, said: "We have been so proud to see our visitor numbers grow each year, and what better way to

celebrate our twentieth year than with the launch of our stunning new Gravity Bar.

"This demonstrates our commitment to the future of tourism here in Ireland and our dedication to giving our guests the best possible visit when they come to the home of

Guinness.

"We look forward to welcoming guests to enjoy what we believe is the very best view of Dublin." Paul Kelly, CEO of Fáilte Ireland, added: "Tourism is a vital industry to the Irish economy, generating revenue of €7.5 billion annually."

ODD THINGS THAT CAUGHT OUR EYE THIS WEEK **BITS & BOBS**

Barking mad vote sees a dog end up as mayor

A DOG in Colorado received a prestigious honour recently, when he was sworn in as the honorary mayor of his town.

Parker the Snow Dog, dressed in a patriotic tie and becoming glasses, was voted into the position of mayor of Georgetown unanimously on February 11.

The pooch and his pawlicies proved popular amongst humans, which included bringing "hugs, love, and rookies to the people of Georgetown".

Parker's inauguration ceremony took place at Georgetown Community Center, with Clear Creek County sharing some adorable pictures from the ceremony on Facebook.

The caption of the pictures read: "It was a packed house Tuesday night at the Georgetown Community Center for Parker's inauguration ceremony.

"Local law enforcement, citizens of Georgetown and fans of Parker the Snow Dog attended the event. Police Judge Lynette Kelsey administered the Mayor oath to Parker."

Parker - with more than 6,700 likes on his own Facebook page - now keeps his constituents up to date by sharing 'MayorMonday' content, thoroughly enjoying his new role.

THIS WEEK'S TOP TWEETS

“ Today I completed a chore I have been putting off for six months. It took 15 minutes. I will learn nothing from this.
 @ashley1cole

“ Liverpool have now lost to Atletico, Watford and Chelsea since the young fella in Donegal wrote to Jürgen Klopp.
 @newschambers

“ Setting up an online-only dating facility for everyone who can't leave the house while we're all in self-isolation and calling it Quarantinder.
 @Ciarach

“ The RTE archives report of the first McDonald's opening in the Soviet Union looks like it could be the opening of Phibsboro Shopping Centre. Brutalist architecture knows no bounds.

Gas-fired power plant in the pipeline for Newcastle

Development plans provide for operational facilities for a period of ten years

PLANS for the development of a gas-powered power plant in Milltown, Newcastle have been lodged with South Dublin County Council.

Data and Power Hub Services Ltd, with an address in Meath, submitted their application for planning permission last month.

It is proposed that an existing single-storey stable building, a single-storey house called Little Acre, and its associated garage and other buildings, are to be demolished to make way for the development, located within the townland of Milltown, to the north of

By Aideen O'Flaherty
aideen@echo.ie

Peamount Road (R120), in Newcastle. However, the applicants noted in their application that they will not be demolishing the part single- and part two-storey property of Baumer and an agricultural building to the east of the overall site.

The power plant compound of 14,475sqm is to contain two power units, each with 1.25m height stack (two overall), transformers, air intakes

and electrical modules.

The power plant compound will also contain a two-storey administration and workshop building (427 sqm) and LV switchgear building (140 sqm) (567 sqm in total), plus an AGU connection, gas compressor, water tank, water treatment, firewater tank, and pumps.

Provision for fuel skids, a fuel tank and one emergency diesel generator is included, and the proposal also includes a battery energy storage system composed of 3,300 sqm containing 15 battery containers and 15 inverters that

will be linked to the power plant.

It is also stated in the application that the development will be accessed from a new vehicular entrance from Peamount Road that will provide access to the power plant at the rear of the site.

Provision for all ancillary site development works, including attenuation pond and dry swales to connect to existing infrastructural services and network as well as fencing, signage, services road entrance gate and eight car-parking spaces is included.

There are plans for the development to be enclosed with landscaping to all frontages.

The application was concluded with the statement that an EPA-Industrial Emissions Directive (IED) license will be applied for to facilitate the operation of the proposed development for a period of ten years on a site of 8.2 hectares, on lands that contain the two residential properties of Little Acre and Baumer.

A decision on the application is due from South Dublin County Council by April 23.

BusConnects Core Bus Corridors / 11: Kimmage > City Centre

1. Introduction

1.1 What is BusConnects?

BusConnects is the National Transport Authority's (NTA) programme to greatly improve bus and sustainable transport services. It is a key part of the Government's policies to improve public transport and address climate change in Dublin and other cities. Dublin is growing and needs a bus network that works for a developing city. The aim of BusConnects is to deliver an enhanced bus system that is better for the city, its people and the environment.

BusConnects is included in the Programme for Government "Our Shared Future" 2020, as well as within the following Government strategies:

- ▶ The National Development Plan 2018 - 2027;
- ▶ Transport Strategy for the Greater Dublin Area 2016 - 2035
- ▶ The Climate Action Plan 2019.

BusConnects Dublin is a programme of 9 elements

BUS  **230km** of bus priority making journeys faster and more reliable

CYCLE  **200km** of cycle routes

 **low emissions bus fleet**
Transitioning to a new

State of the art
ticketing system

Cashless payment system

 **Simpler fare structure**

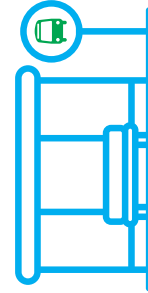

New Park & Ride
sites in key locations

New bus livery

providing a common style across all operators

New bus stops and shelters
with better signage and information

Dublin area bus network redesign

creating a more efficient network with high frequency spines, new orbital routes and increased bus services

1.2 What are the aims and objectives of BusConnects Core Bus Corridors?

Aims: The aim of BusConnects Core Bus Corridors is to provide enhanced walking, cycling and bus infrastructure on key access corridors in the Dublin region, which will enable and deliver efficient, safe, and integrated sustainable transport movement along these corridors.

Objectives:

Enhance the capacity and potential of the public transport system by improving bus speeds, reliability and punctuality through the provision of bus lanes and other measures to provide priority to bus movement over general traffic movements;

Support the delivery of an efficient, low carbon and climate resilient public transport service, which supports the achievement of Ireland's emission reduction targets;

Enable compact growth, regeneration opportunities and more effective use of land in Dublin, for present and future generations, through the provision of safe and efficient sustainable transport networks;

Enhance the potential for cycling by providing safe infrastructure for cycling, segregated from general traffic wherever practicable;

Improve accessibility to jobs, education and other social and economic opportunities through the provision of improved sustainable connectivity and integration with other public transport services; and

Ensure that the public realm is carefully considered in the design and development of the transport infrastructure and seek to enhance key urban focal points where appropriate and feasible.

1.3 What has happened so far?

Between November 2018 and May 2019 the National Transport Authority (NTA) carried out the first round of public consultation regarding proposals for the Emerging Preferred Routes of 16 Core Bus Corridors (CBC) across Dublin. During this first round of consultation we received 13,000 submissions in total. These submissions were reviewed and considered as part of the design process for the Preferred Route option for each corridor.

A second round of public consultation on the Preferred Route options commenced in March 2020 and continued until mid-April 2020. Notwithstanding the Covid-19 pandemic and subsequent Government restrictions, the consultation continued due to the level of interest. The focus of public queries and submissions came through emails, post, phone conversations and online submissions as all the information was available on the BusConnects website for review.

It was decided in March that an additional third round of public consultation would take place in the latter part of this year to provide further opportunities for the public to review and submit feedback to the latest set of designs.

1.4 What is in this brochure?

This document is one of 16, each dedicated to a single core bus corridor. The document provides a written description of the Preferred Route from start to finish with supporting maps. It includes all revisions made, if any, since the last round of public consultation. It also includes a revised timeline for the progress of the programme due to Covid19 implications.

The brochures detailing the Emerging Preferred Route and the brochures from the second round of consultation earlier this year are available to view and download on our website www.busconnects.ie.

Definitions of the terminology used in the document can be found in chapter 4 of this brochure.

2. What has been happening over the last number of months?

Considerable design work has been continuing since the last round of consultation. This work includes the following:

2.1 Technical Design

Designs have progressed with further refinements being made to elements of each corridor such as junctions, alignments, bus stops, cycling and walking facilities, and urban realm features. Engagement with stakeholders is continuing including engagement with individual householders directly impacted. The developing design has been, and continues to be, informed by stakeholder engagement and further detailed surveys. These include the identification of underground services and detailed assessment of trees along the routes.

Draft Preferred Route Option Reports have been prepared for each CBC detailing the

development of each corridor from the Emerging Preferred Route through to the draft Preferred Route Option. These draft "Preferred Route Option Reports" are being published as part of the public consultation and will be finalised following this third round of public consultation and the inclusion of feedback received. **These draft reports are available to view and download on the website www.busconnects.ie.**

2.2 Environmental Impact Assessment

As part of the intended planning application for each corridor, the NTA will be preparing an Environmental Impact Assessment Report (EIAR) in accordance with current Irish and European legislation. This document will identify the anticipated environmental effects of the scheme during both the construction and operational stages. This assessment is being undertaken by environmental specialists on behalf of the NTA. As part of this assessment, these specialists are undertaking studies of the current condition of the receiving environment within the identified corridor extents. This involves a combination of on-site surveys and desktop study of existing records. At the time

of this public consultation, various surveys and studies are underway. The information collected will also be shared with the technical designers for consideration in the design decision making process for the infrastructure works.

Further details of the environmental assessment approach for each scheme are outlined in an individual corridor document called "Information on the Proposed Approach to Environmental Assessment". This document gives a more in-depth description of the determination of the extents of anticipated impacts and how the cumulative impacts of adjacent core bus corridors and other construction projects will be assessed.

These draft reports are available to view and download on the website www.busconnects.ie.

2.3 Transport Impact

The transport assessment of the core bus corridor proposals is focussed on the "movement of people" rather than, solely, the "movement of vehicles". In order to adequately determine the impact on public transport, active modes (walking and cycling), and general traffic, a comprehensive suite of transport models have been developed.

An extensive set of traffic counts were undertaken in late 2019 and early 2020 and this data, along with other sources, has been used to calibrate and validate the models to assist in the evaluation of the core bus corridors. On a strategic level, the Eastern Regional Model has been used to forecast the modal split for future years. At a more refined level, a Local Area Model has been developed to examine the potential displacement of traffic.

In addition, detailed modelling is ongoing in terms of junction and corridor analysis tests and to quantify the effect on the movement of people through each junction and along the corridor itself.

Each EIAR will contain a section on the potential traffic and transport impacts associated with the construction and operational phases of the core bus corridors. This assessment will be informed by the following reports:

- ▶ Transport Impact Assessment (TIA)
 - this will include the comprehensive assessment of each core bus corridor covering all modes and will include a cumulative assessment of all corridors; and

➤ Transport Modelling Report – this will detail the model development, data inputs, calibration and validation, and forecast model development for the set of models used to support the assessment.

A draft, work-in-progress version of the “Transport Modelling Reports” for each core bus corridor, together with a summary of the work-in-progress strategic modelling results to-date, are being published as part of the public consultation and will be finalised following this third round of public consultation and the inclusion of feedback received. **These draft reports are available to view and download on the website www.busconnects.ie.**

2.4 Urban Realm

In tandem with the technical design work on finalising the road alignment in the urban cross sections across the core bus corridors, planning has also progressed for refining the Urban Realm design proposals. These designs are being developed in consultation with the local authorities to ensure tie-in to existing schemes and initiatives. The NTA is focusing on finishing the layout of spaces, considering desire lines (how people want to move through spaces) and

the placement of urban furniture (trees, bins, bollards, benches, bike stands, railings, etc.)

Urban Realm improvement opportunities along the routes present themselves through the civil/physical works needed to reach the BusConnects objective to provide bus priority, along with improved cycling and pedestrian facilities. All put together, the core bus corridors provide an opportunity for lots of continuous interventions that, together, can give a general city-wide lift.

The Urban Realm improvement opportunities are spread out along the core bus corridors and need to respond to and reflect specific locality and context. In the design of the urban spaces we will be using appropriate materials and urban furniture that comply with standards for use, durability and maintenance as well as carbon footprint considerations.

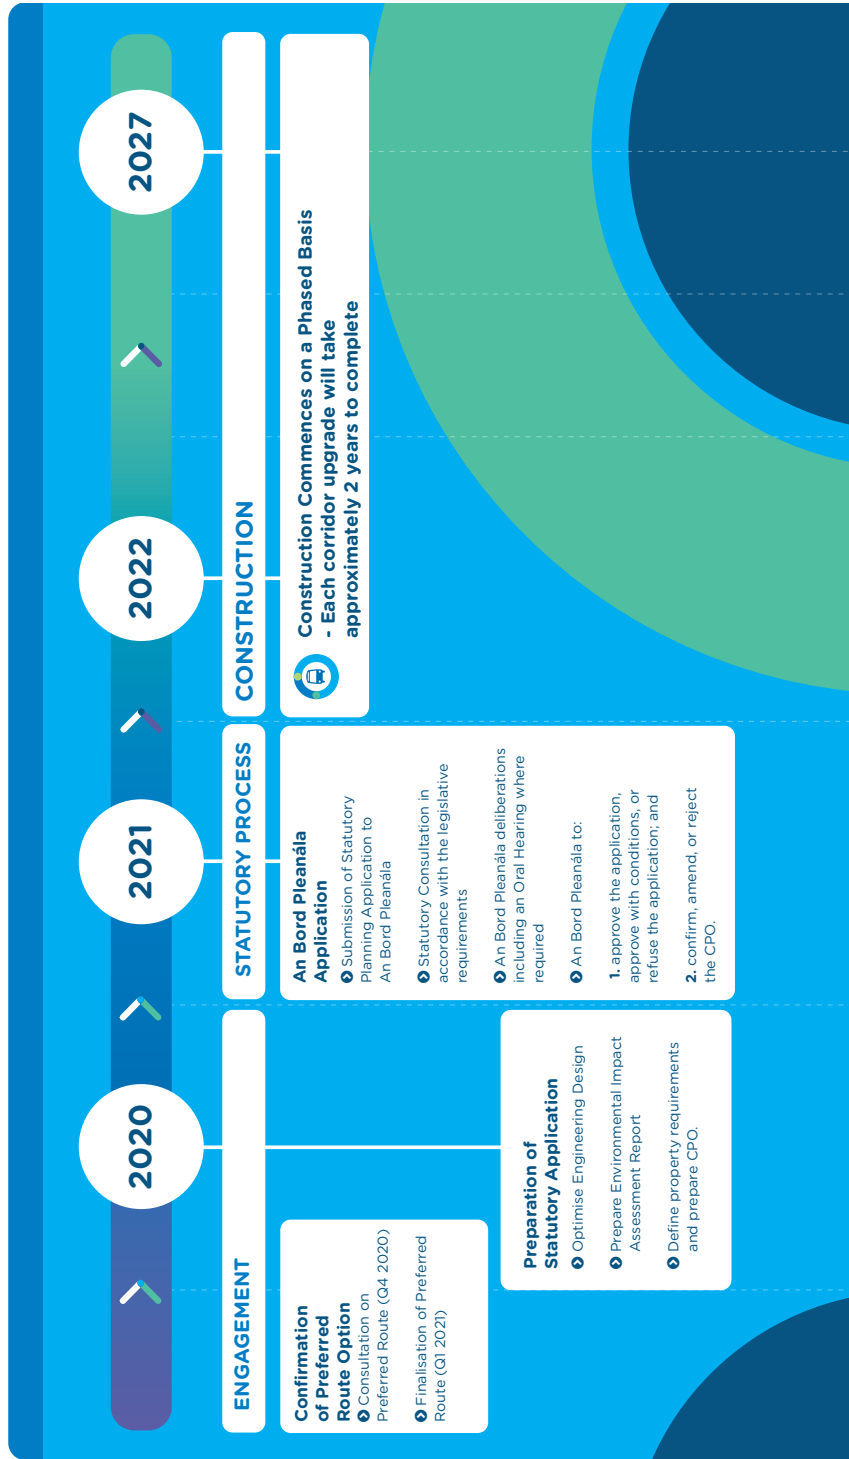

Further details of the urban realm design approach can be found in a document called “BusConnects Urban Realm Concept Design” published as part of the public consultation. **This document is available to view and download on the website www.busconnects.ie.**

2.5 Compulsory Purchase Maps & Schedules

In tandem with the technical design work the designers will be starting the work of preparing the various maps and schedules of areas that are proposed to be acquired under the statutory compulsory purchase order process (CPO). The attached Maps in this brochure indicate Proposed New Boundaries (Possible Land Acquisition) represented by broken red lines. These boundaries are indicative of potential areas for permanent CPO, and are not yet finalised. As detailed plots are finalised the designers will be continuing to seek to meet those with an interest in the impacted areas.

In some cases there may also be a need to realign driveways and/or redo the landscaping of property front gardens, or reorganise business accesses and/or loading areas. Some of these works may be outside the permanent CPO area, and consequently there may be a need to put in place temporary arrangements to ensure access during construction to carry out necessary accommodation works. Similar to the permanent CPO development, the designers will be continuing to seek to meet those with an interest in the impacted areas.

2.6 Timeline for the Core Bus Corridor Process

3. How to take part in the public consultation

This brochure provides details of the proposed Preferred Route Option for this core bus corridor. These proposals are subject to a third non-statutory round of public consultation, and subsequent design refinement and environmental impact assessment, before a formal statutory application will be made by the NTA to An Bord Pleanála for approval.

Virtual consultation rooms for each Core Bus Corridor can be found on www.busconnects.ie. These rooms will provide a description of each Preferred Route from start to finish with supporting maps and include information of all revisions made, if any, since the last round of public consultation as well as other supporting documents.

3.1 General queries

The project website www.busconnects.ie has a dedicated section for the Core Bus Corridor

project. All previous emerging preferred route brochures are available on the website. Users can access the site to find out more about the project and download copies of the key documents.

General queries can be directed to a dedicated Freephone – **1800 303 653** or by email to cbc@busconnects.ie

3.2 How to engage

We are inviting submissions in relation to the Preferred Route Options set out in this document. The closing date for submissions is stated on the website.

Written submissions and observations may be made by:

cbc@busconnects.ie

BusConnects Core Bus Corridors
National Transport Authority,
Dún Scéine, Harcourt Lane, Dublin 2
D02 WT20

3.3 What happens next?

Following the third round of public consultation, the NTA will finalise the Preferred Route Options for all sixteen corridors. The scheme designs will be finalised, transport and environmental impact assessments will be completed. This will culminate in the preparation of an Environmental Impact Assessment Report (EiAR) for the scheme together with details of land to be acquired. This will be submitted to An Bord Pleanála in 2021 for its consideration and determination. A formal statutory consultation process will be undertaken as part of that process.

BusConnects Core Bus Corridors / 11. Kimmage > City Centre

12

4. Preferred Route Description

4.1 Overview

The Kimmage to City Centre Core Bus Corridor (CBC) commences on Kimmage Road Lower at the junction with Terenure Road West and Fortfield Road. It is routed via Kimmage Road Lower to Harold's Cross Road, and then along Harold's Cross Road, Clanbrassil Street Upper & Lower and New Street South, where it will join the Greenhills CBC at the Kevin Street Upper junction. Priority for buses is provided along the entire route, consisting primarily of dedicated bus lanes in both directions, with alternative measures proposed at particularly constrained locations along Kimmage Road Lower.

An alternative cycle route is also proposed along a part of the CBC in the southern half.

The following paragraphs will describe each section of the CBC in more detail, identifying the key design revisions which have been incorporated into the design since the publication of the Preferred Route Option in March 2020.

4.2 Terenure Road West to Sundrive Road - Kimmage Road Lower

The Kimmage to City Centre CBC commences on Kimmage Road Lower at the Kimmage Road West junction with Fortfield Road and Terenure Road West. It is proposed to upgrade the junction to provide bus priority and enhanced pedestrian/cyclist facilities.

It is proposed to locate a Bus Gate just north of the Ravensdale Park junction. This will achieve bus priority by deflecting through traffic off the Kimmage Road Lower, without the need for road widening to provide bus lanes. The existing street layout and on-street parking arrangements will remain unchanged on Kimmage Road Lower north of Ravensdale Park aside from the Urban Realm improvements proposed at Sundrive Cross.

The existing cycle lanes will be retained on this stretch of the road and conditions for cyclists will be greatly improved through reduced general traffic as a result of the proposed Bus Gates. Local traffic will be permitted access

from the south via Sundrive Road or Larkfield Avenue.

Traffic management measures will be required on the adjoining residential streets of Poddle Park to the west and Derravaragh Road to the east. These streets will be closed to through traffic, apart from cyclists, at suitable locations to prevent through traffic diverting off Kimmage Road Lower inappropriately. Traffic management measures such as turning restrictions at junctions or road closures will also be considered on other adjoining residential streets at suitable locations as required.

A new proposal has been developed for a cycle route through the small park alongside the River Poddle just north of Kimmage Cross-Roads, which will continue generally parallel to Kimmage Road Lower over a length of 2.3km to Harold's Cross Park. It will mainly follow quiet local streets including Poddle Park and Blarney Park with appropriate traffic management and will also include short sections of greenway across public park lands. The section of two-way cycleway in the park is shortened by half to provide earlier transition onto the road north of

the KCR junction. This will reduce impact in the park.

Urban Realm improvements will be made at the focal points on Kimmage Road Lower where there are clusters of shops and business at the Corrib Road junction and at the Sundrive Road junction.

4.3 Sundrive Road to Harold's Cross Road - Kimmage Road Lower

With the proposed Bus Gate moved south to Ravensdale Park, local traffic access will remain available from Sundrive Cross to both the southern and northern part of Kimmage Road Lower. However, the left-turn from Sundrive Road will be restricted so as to prevent through traffic from using Kenilworth Park instead of Clareville Road. The existing street layout and parking arrangements along Kimmage Road Lower will remain unchanged.

To accommodate local access to Kimmage Road Lower from the north, the junction of Harold's Cross Road and Kenilworth Park will be modified

BusConnects Core Bus Corridors / 11: Kimmage > City Centre

to provide for the southbound right-turn movement. The operation and capacity of this junction will be improved by restriction of the link from Kenilworth Square to a westbound Bus Gate, with westbound general traffic diverted via Rathgar Avenue.

The proposed Poddle Cycleway will run along Sundrive Road from Blarney Park to the shopping centre entrance and then follow the river northward to Mount Argus Park. The cycleway travels through the car park of Mount Argus Church to Mount Argus Road, utilizing a Quiet Street Treatment to Harold's Cross.

4.4 Harold's Cross Road to Kevin Street Upper – Harold's Cross Road, Clanbrassil Street Upper & Lower, and New Street South

Between Harold's Cross Park and Parnell Road it is proposed to include a cycle track to this section of road. To accommodate the addition of cycle tracks along this street it is proposed to acquire small areas of land from adjacent properties.

An additional parking bay is proposed with 4 spaces on the eastern side south of Mount Drummond Avenue.

The indicative extents of this land take are included in the Appendix of this brochure.

Between Parnell Road and Lombard Street West, it is proposed to maintain a footpath, one bus lane and one general traffic lane in each direction, with the addition of segregated cycle tracks. The northbound bus lane will not continue between Leonard's Corner junction at South Circular Road and Lombard Street West, where the street is not wide enough. Signal Controlled Priority will enable buses to pass through this short section ahead of general traffic. To accommodate this cross section, the following works will be required:

- A new footbridge is proposed on each side of the existing Robert Emmett Bridge to provide additional space for cyclists, and pedestrians at a key pinch-point;
- Removal of some on-street parking; and

- Limited land-take on Clanbrassil Street Upper north of the Grand Canal. Adjustment of the design proposals has reduced the extent of land acquisition requirements with fewer properties affected.

Between Lombard Street West and Kevin Street Upper, it is proposed to modify the street layout to accommodate a cycle track alongside a bus lane and one general traffic lane in each direction. The existing central median island will be largely retained along with all existing trees in the median. It is proposed to close access from Vincent Street South to Clanbrassil Street. At Kevin Street Upper, this scheme ties in with the Greenhills to City Centre CBC.

4.5 Key Changes from the Preferred Route Published in March 2020

- The section of two-way cycleway in the park is shortened by half to provide earlier transition onto the road north of the KCR junction. This will reduce impact in the park;
- An additional parking bay is proposed with 4 spaces on the eastern side south of Mount Drummond Avenue;
- An additional footbridge is proposed beside the existing Robert Emmett Bridge on the eastern side to provide additional space for high-quality provisions for bus, cyclists, and pedestrians at a key pinch-point;
- Adjustment of the design proposals on Clanbrassil Street Lower has reduced the extent of land acquisition requirements with fewer properties effected;
- Bus stop locations have been modified in this revised proposal – with some bus stops relocated or removed to achieve a better spacing between stops, while also ensuring that each stop is sited in the best location to serve surrounding neighbourhoods. These proposals will also ensure a more efficient bus network operation. The stops which have been identified for relocation are presented in drawings in the Appendix of this brochure.

4.6 Key Facts

- Approximate number of properties that may be impacted **18**
- Approximate number of designated on-street parking spaces that may be removed **35**
- Approximate number of roadside trees that may be removed **15**
- Approximate route length: **4kms**
- Approximate new cycle route length: **4.3kms**
- Current bus journey time: **up to 45 mins**
- BusConnects journey time: **12-15 mins**
- Future Bus journey time without BusConnects: **55 mins +**

5. Understanding the terminology

1. Core Bus Corridor (CBC):

Part of the overall BusConnects Programme is to create 16 radial core bus corridors (CBC). A CBC is an existing road with bus priority so that buses can operate efficiently, reliably and punctually. This generally means full length dedicated bus lanes on both sides of the road from start to finish of each corridor or other measures to ensure that buses are not delayed in general traffic congestion. The bus lanes will be alongside segregated cycle lanes/tracks where feasible and general traffic.

2. Segregated Cycle Tracks:

A segregated cycle track is a separate section of the road dedicated for cycling only. This space will generally be isolated from other vehicular traffic by a physical kerb. Where it is not physically possible to have segregated cycle tracks there will be the option of quiet roads and shared cycling on reduced speed roads for cyclists.

3. Emerging Preferred Route (EPR):

The NTA published outline plans for each of the 16 CBCs in a non-statutory public consultation process in 2018/2019. The options were called Emerging Preferred Routes (EPR), in some cases with multiple sub-options, to inform the public of the likely layout of the roadway with the necessary CBC infrastructure in place. They included possible impacts on front gardens, and likely changes to how traffic will operate to facilitate bus priority.

4. Preferred Route Option (PRO):

Following consideration of the public submissions about the 16 EPR's, the core bus corridor proposals have been reviewed and amended. They are now being presented as the Preferred Route Option (PRO) and are subject to a further round of non-statutory public consultation.

They are not final proposals as they are subject to further consideration from this round of public consultation and also subsequent examination in the context of environmental impact assessment.

5. Bus Gate

A Bus Gate is a sign-posted short length of stand-alone bus lane. This short length of road is restricted exclusively to buses, taxis and cyclists plus emergency vehicles. It facilitates bus priority by removing general through traffic along the overall road where the bus gate is located. General traffic will be directed by signage to divert away to other roads before they arrive at the bus gate. To see an animation of a how a Bus Gate will work, please visit our website www.busconnects.ie.

6. Signal Controlled Priority (SCP):

Signal Control Priority uses traffic signals to enable buses to get priority ahead of other traffic on single lane road sections, but it is typically only effective for short distances. This typically arises where the bus lane cannot continue due to obstructions on the roadway. An example might be when a road has pinch-points where it narrows due to existing buildings or structures that cannot be removed to widen the road to make space for a bus lane. It works through the use of traffic signal controls (typically at junctions) where the bus lane and general traffic will be stopped at the signal to allow the bus pass through the narrow section first, when the bus has passed the general traffic will then be allowed through the lights. To see an

animation of a how Signal Controlled Priority will work, please visit our website www.busconnects.ie

7. Toucan Crossing:

A Toucan Crossing is a roadway crossing designed to enable both pedestrians and cyclists to cross the road with purposefully designed signal controls.

8. Quiet Street Treatment:

Where CBC roadway widths cannot facilitate cyclists without significant impact on bus priority, alternative cycle routes are explored for short distances away from the CBC bus route. Such offline options may include directing

cyclist along streets with minimal general traffic other than car users who live on the street. They are called Quiet Streets due to the low amount of general traffic and are deemed suitable for cyclists sharing the roadway with the general traffic without the need to construct segregated cycle tracks or painted cycle lanes. The Quiet Street Treatment would involve appropriate advisory signage for both the general road users and cyclists.

9. Urban Realm:

Urban Realm refers to the everyday street spaces that are used by people to cross, shop, socialise, play and use for activities such as walking, exercise or commuting to/from work. The Urban Realm encompasses all streets, squares, junctions and other rights-of-way in residential, commercial and civic use areas as well as seating, trees and other enhancements. When well designed and laid out with care in a community setting, it enhances the everyday lives of residents and those passing through.

Signal Controlled Priority (SCP)

1. Traffic proceeds as normal.
2. As the bus approaches, the light signal changes to halt general traffic.
3. The bus has priority to proceed.
4. When the bus has cleared the junction, general traffic proceeds.

After registering, you will receive a confirmation email containing information about joining the webinar.

A Zoom link to register for the other Community Forum webinars in your constituency/local electoral area will be sent to you in advance of these webinars taking place. Please find the **Core Bus Corridors Community Forum Webinar schedule** attached once again for your information.

☰ A 📎 🖼️ 🔗 😊 ★ 🗑️

BUSCONNECTS CORE BUS CORRIDORS PROJECT COMMUNITY FORUM WEBINAR (VIA ZOOM) PROTOCOLS

1. Registering for the Community Forum:

- In order to register for the Community Forum webinar, the NTA will share the registration link to all Community Forum members the week before the webinar.
- All those who wish to attend will then complete the registration form.
- Once registered, they will receive an email notification with a unique Zoom 'join link'
- for the Community Forum webinar.
- All attendees must be registered before 2pm on the day of their respective
- Community Forum webinar.

2. Logging into Webinar

- The webinar will commence at 6.30pm and is due to conclude at 8pm.
- At 6.30pm, the Webinar 'host' allows registered attendees to join the meeting.

3. Participants on the webinar:

- **Webinar Host:** Representative of the NTA. The host of the webinar is the user who the webinar is scheduled under. They have full permissions to manage the webinar, panelists, and attendees. The host starts and stops the webinar when it concludes.
- **Independent chairperson:** The Community Forum Webinar will be chaired by an independent chairperson.
- **Panelists:** NTA representatives who will provide a presentation on the Core Bus Corridor in question.
- **Webinar Attendees:** Registered Community Forum members who are view-only participants. Attendees are automatically muted upon entrance to the Webinar (and can be unmuted by the host at any time). This function of the Zoom Webinar prevents background noise and distractions and allows all attendees to clearly hear the independent chairperson and NTA panelists.

4. Asking a Question:

- Once the presentation has concluded, there will be a Q&A session for attendees to pose questions to the NTA representatives.
- Webinar Attendees can interact with the host and the panelists through the chat box.
- To ask a question, enter your name **and** that of the resident group/ association you are representing into the ‘Chat’ box on the Zoom controls panel.
- - The Independent chairperson will then ask the host to unmute the audio button for each individual sequentially to ask their question to the NTA representatives.
- The Independent chairperson will then ask the NTA representatives to answer these questions sequentially in batches of three.
- A Core Bus Corridors webinar briefing took place for all public representatives on Wednesday 4th November. Therefore, whilst there will be an opportunity for public representatives to ask additional questions, this will be in the last quarter of the Q&A section. This is to allow priority for the representatives of Resident groups, Special interest groups and Community Forum members to ask questions.

5.

Preferred Route Option: Third Round of Non-Statutory Public Consultation - 4th November 2020 - 16th December 2020

5C Public Consultation
Virtual Information Rooms

Kimmage to City Centre Core Bus Corridor Scheme – Public Consultation Virtual Information Room

A public consultation virtual information room was created for each of the Core Bus Corridor Schemes. These were available on our website www.busconnects.ie and remained open for a six week period. Each virtual room provided details of the Preferred Route Option for each corridor including maps and supporting documents. There was also an audio option available for the virtual information room. Below is a snippet of the landing page of the virtual information room.

From: BusConnects Core Bus Corridor
Sent: Wednesday 4 November 2020 11:53
Subject: BusConnects Dublin - Launch of Third Round of Public Consultation for Core Bus Corridors (Bus Priority & Cycle Lanes/Tracks)

Dear Community Forum member,

Today, the National Transport Authority (NTA) announced details of the third round of public consultation, of Preferred Route Options for the 16 Core Bus Corridors of BusConnects Dublin. **The Core Bus Corridors aims to deliver 230km of bus priority and 200km of cycle lanes/tracks.**

The consultation period will run from **Wednesday 04th November until Wednesday 16th December 2020.**

A second round of public consultation on the Preferred Route options commenced in March 2020 and continued until mid-April 2020. Due to the pandemic and Government restrictions, it was decided by the NTA in March that an additional third round of public consultation would take place later in the year to provide further opportunities for the public to review and submit feedback to the latest set of designs.

These proposals are subject to a third non-statutory round of public consultation, and subsequent design refinement and environmental impact assessment, before a formal statutory application will be made by the NTA to An Bord Pleanála for approval during the first quarter of 2021.

Due to the ongoing Covid-19 restrictions, this public consultation will take place using virtual and online facilities. However, potentially impacted property owners will be contacted directly by BusConnects and offered one to one calls with our design team members.

For the general public there will be a range of public consultation facilities:

Subject: BusConnects Dublin - Launch of Third Round of Public Consultation for Core Bus Corridors

- **Virtual Public Information Rooms** - A virtual information room has been created for each of the 16 Core Bus Corridors. These can be accessed on our website www.busconnects.ie and will remain open for a six week period. Each virtual room provides details of the Preferred Route Option for each of the corridors including maps and supporting documentation. There is also an Audio option available for the virtual information room.
- **Website** - Updated versions of the 16 Core Bus Corridor Brochures as well as additional supporting documentation are available to view and download on our website www.busconnects.ie. The brochures are also available in HTML, PDF and Audio versions on our website.
- **Community Forums** - We will carry out a series of Community Forums via online webinars. Please find attached the schedule for the Community Forum meetings which begin on Tuesday 10th November. Community Forum members will receive an email a week in advance of their meeting with a link to register. After registering, they will receive a confirmation email containing information about joining the meeting. Please note all Community Forum members must be registered before 2pm on the day of the forum.
- **General queries and Submissions** - Submissions and general queries can be sent to our email address cbc@busconnects.ie or to our NTA postal address.

Yours Sincerely,

BusConnects Dublin Core Bus Corridors – Community Forum Terms of Reference

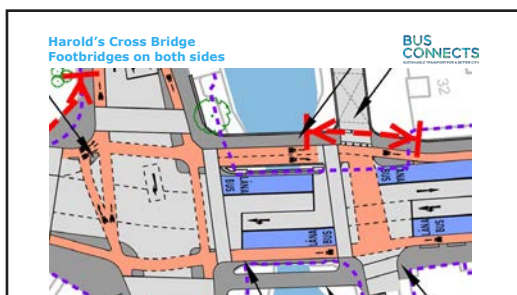

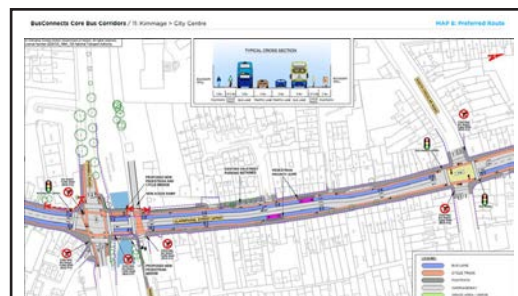

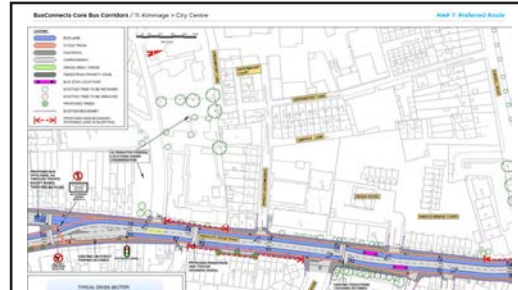

BUSCONNECTS CORE BUS CORRIDORS PROJECT COMMUNITY FORUM TERMS OF REFERENCE

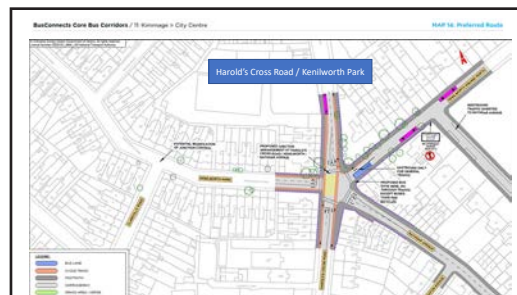

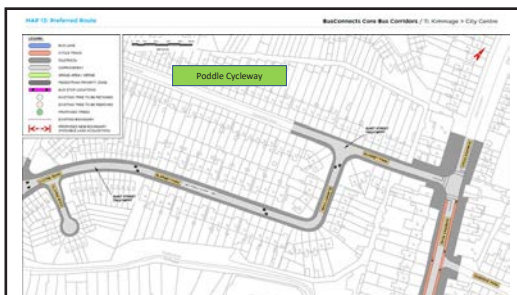

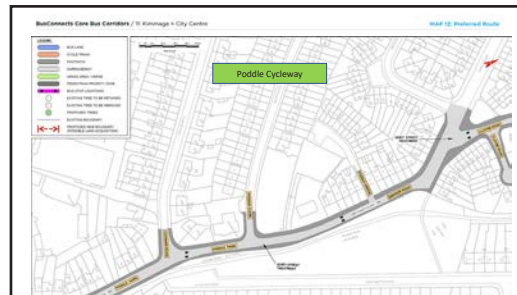

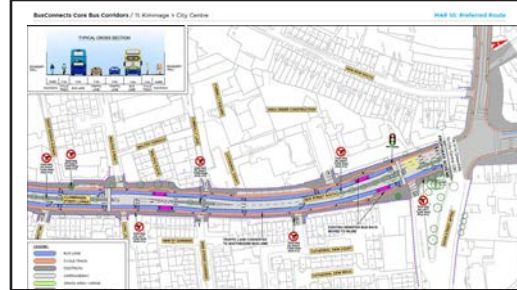

- 1.** Membership of the Community Forum will comprise of two representatives from residents'/community associations, disability groups, special interest groups and business organisations on the corridor, along with local public representatives, together with personnel from the National Transport Authority (NTA).
- 2.** Meetings of the Community Forum will be chaired by an independent chairperson.
- 3.** The core objective of the Community Forum is to facilitate a two-way dialogue process between representatives of communities / groups and the NTA in relation to the Core Bus Corridor proposals.
- 4.** It will enable information to be provided more directly by the NTA to the parties most impacted by the proposals.
- 5.** It will allow concerns about the proposals to be raised by the participants and for the NTA to address and respond to those concerns.
- 6.** It will allow constructive ideas and viable alternatives to be brought forward to improve the overall proposals.
- 7.** It will assist in enabling the resolution of local issues within the proposals in a timely manner.
- 8.** It will allow discussions and suggestions in relation to ideas for urban centre improvements that could be incorporated into the project.

INFORMATION NOTICE

Re: to City Centre Core Bus Corridor

Dear Property Owner/Occupier,

The National Transport Authority (NTA) has been tasked with delivering the BusConnects Dublin programme, which is a set of proposals to transform Dublin's bus system, so that journeys by bus will be fast, reliable, punctual, convenient and affordable. It will enable more people to travel by bus than ever before, providing an alternative to congested car journeys.

Congestion is one of the most significant challenges facing the Dublin region and needs to be addressed to safeguard the growth of the Dublin region and keep people moving. At present bus lanes are in place for less than one third of a bus journey on the busy corridors. A key part of the BusConnects programme is the development of sixteen "Core Bus Corridors" or CBCs. These CBCs will effectively deliver continuous bus lanes, on the key bus routes across the city along with improved pedestrian and cycling facilities along these routes, building a sustainable city and addressing climate change.

A non-statutory public consultation on an Emerging Preferred Route for each CBC concluded in 2019, and a second non-statutory public consultation on a Preferred Route Option Proposal for each corridor was concluded in April 2020. Due to the introduction of Covid restrictions during March and April this year public information events were cancelled during the second consultation period. NTA determined that, while the planning work for the CBCs would continue, it would be appropriate to schedule a third round of non-statutory public consultation prior to finalising the CBC proposals for formal statutory planning application to An Bord Pleanála.

The planning work has continued since April including ongoing consideration of submissions from the public, updated topographical survey information, and other surveys, transport assessment, and environmental assessment. As a consequence further refinement and amendments to the CBC proposals have resulted.

Tabhair cuairt ar www.Transportforireland.ie le haghaidh eolais agus seirbhísí iompair phoiblí do chustaiméirí
Visit www.Transportforireland.ie for public transport customer information and services

The purpose of this letter is to inform you that the proposals contained in the updated Preferred Route Option for the [redacted] to City Centre Core Bus Corridor may continue to impact on part of the property. A layout map showing an indicative layout in the vicinity of the property can be found on **Map [redacted]** enclosed.

In addition, a hard copy brochure will also be sent to you in the coming days.

The plan shows where the car lanes, bus lanes, cycle tracks and footpaths will be. Areas where land may be potentially impacted are marked with red dashed lines.

Please note these are proposals only and as such are not fixed or finalised.

Over the summer months this year efforts were made to engage with residents or persons with an interest in this property.

The new proposals will be published on our website www.busconnects.ie on 4 November 2020, at which point the NTA will be welcoming feedback as part of the third public consultation process. **No decisions have been made to proceed with these proposals, and will not be made until we have concluded the consultation process.**

Any decision to proceed with this CBC will be subject to a statutory planning process, which would involve an application for planning consent to An Bord Pleanála. The proposal is still subject to final detailed design, and finalisation of environmental and transport impact assessment. The statutory planning application will not be made before the end of the first quarter of 2021. Should the statutory planning application be consented by An Bord Pleanála, appropriate compensation will be paid to the owners for any garden portion or land that is ultimately necessary to be acquired from the property. This would also cover the rebuilding of new garden walls, fences, gates and driveways, as well as landscaping works to the residual area.

The NTA would welcome the opportunity to meet with you in relation to these proposals. That would give us the opportunity to discuss with you on a one-to-one basis, what this may mean for you and what the next steps will be over the coming months and years. If you wish to avail of this meeting please call **1800 303 653**. Your request will be referred to a design team representative who will respond promptly to arrange a time and date at your earliest convenience.

Once the planned consultation on the Preferred Route Option has commenced, members of the public and interested parties will be invited to send in submissions. All information on how to take part in the consultation will be made available on our website www.busconnects.ie

Yours sincerely,
BusConnects Infrastructure Dublin,
National Transport Authority

The National Transport Authority (NTA) has been tasked with delivering the BusConnects Dublin programme, which is a set of proposals to transform Dublin's bus system, so that journeys by bus will be fast, reliable, punctual, convenient and affordable. It will enable more people to travel by bus than ever before, providing an alternative to congested car journeys.

Congestion is one of the most significant challenges facing the Dublin region and needs to be addressed to safeguard the growth of the Dublin region and keep people moving. At present bus lanes are in place for less than one third of a bus journey on the busy corridors. A key part of the BusConnects programme is the development of sixteen "Core Bus Corridors" or CBCs. These CBCs will effectively deliver continuous bus lanes, on the key bus routes across the city along with improved pedestrian and cycling facilities along these routes, building a sustainable city and addressing climate change.

A non-statutory public consultation on an Emerging Preferred Route for each CBC concluded in 2019, and a second non-statutory public consultation on a Preferred Route Option Proposal for each corridor was concluded in April 2020. Due to the introduction of Covid restrictions during March and April this year public information events were cancelled during the second consultation period. NTA determined that, while the planning work for the CBCs would continue, it would be appropriate to schedule a third round of non-statutory public consultation prior to finalising the CBC proposals for formal statutory planning application to An Bord Pleanála.

The planning work has continued since April including ongoing consideration of submissions from the public, updated topographical survey information, and other surveys, transport assessment, and environmental assessment. As a consequence further refinement and amendments to the CBC proposals have resulted.

Tabhair cuairt ar www.TransportforIreland.ie le haghaidh eolais agus seirbhísí iompair phoiblí do chustaiméirí
Visit www.TransportforIreland.ie for public transport customer information and services

A letter was previously sent to this property in March 2020 advising that it was identified as being potentially impacted by the Preferred Route Option Proposal, and an opportunity was given to meet NTA personnel to discuss the potential impacts. **The purpose of this letter is to inform you that the proposals contained in the updated Preferred Route Option for the [redacted] to City Centre Core Bus Corridor indicate that this property is no longer potentially impacted.**

Please note these are proposals only and as such are not fixed or finalised.

The new proposals will be published on our website www.busconnects.ie on 4 November 2020, at which point the NTA will be welcoming feedback as part of the third public consultation process. **No decisions have been made to proceed with these proposals, and will not be made until we have concluded the consultation process. Consequently future amendments to the plans could potentially result in the property again being impacted.**

Any decision to proceed with this CBC will be subject to a statutory planning process, which would involve an application for planning consent to An Bord Pleanála. The proposal is still subject to final detailed design, and finalisation of environmental and transport impact assessment. The statutory planning application will not be made before the end of the first quarter of 2021. Should the statutory planning application be consented by An Bord Pleanála, appropriate compensation will be paid to the owners for any garden portion or land that is ultimately necessary to be acquired from the property. This would also cover the rebuilding of new garden walls, fences, gates and driveways, as well as landscaping works to the residual area.

If you require any clarification regarding this letter please call **1800 303 653**. Your query will be referred to a design team representative who will respond promptly. Once the planned consultation on the Preferred Route Option has commenced, members of the public and interested parties will be invited to send in submissions. All information on how to take part in the consultation will be made available on our website www.busconnects.ie

Yours sincerely,
BusConnects Infrastructure Dublin,
National Transport Authority

Preferred Route Option: Third Round of Non-Statutory Public Consultation - 4th November 2020 - 16th December 2020

5G Press Release & Media Engagement

Press Release for launch of Preferred Route Option Public Consultation on 4th November 2020:

PRESS RELEASE

NTA LAUNCHES 3RD ROUND OF PUBLIC CONSULTATION ON THE 16 CORE BUS CORRIDORS

To deliver 230km Bus Priority and 200km cycle lanes/tracks

Virtual consultation process underway until 16th December at www.busconnects.ie

4th November 2020 – The National Transport Authority (NTA) has today launched the third round of public consultation on the 16 core bus corridors being developed as part of the BusConnects programme. The Core Bus Corridor Projects will see the roll-out of 230km of continuous bus priority and 200km of cycle routes. In providing enhanced walking, cycling and bus infrastructure on key access routes into Dublin, the BusConnects Core Bus

Corridors will enable and deliver efficient, safe and integrated sustainable transport into and out of the city.

The third round of public consultation on the Core Bus Corridor Projects focuses on the updated Preferred Route Options of all sixteen corridors. Over recent months the NTA has been making refinements along each corridor to take into account feedback received by the public in addition to further technical design work and urban realm improvements along each route.

The first round of public consultation on the Emerging Preferred Routes took place during late 2018 and early 2019 which received thirteen thousand submissions. A second round of public consultation on the Preferred Routes took place in March of this year. However, this round was restricted due to COVID-19, and it was decided that an additional third round of public consultation would take place in the latter part of this year.

Over the last six months design work has been ongoing and has culminated in the development of new Preferred Route Option

brochures, detailing each corridor, together with a number of draft technical supporting reports. Whilst the supporting documents are draft and will not be completed until the formal planning application is made they provide a significant amount of information on the following:

- Proposed approach to environmental assessment for each of the 16 corridors
- Draft Transport Modelling Reports for each 16 corridors
- BusConnects Urban Realm Concept Designs document
- Draft Preferred Route Options Reports for each 16 corridors

Consultation on the proposals begins today and runs until **Wednesday, 16th December**. Due to current COVID-19 public health restrictions, the NTA has created virtual consultation rooms for each Core Bus Corridor which allows for review and feedback. The public will have the opportunity to view each Preferred Route, maps, timelines and any

Cont.

revisions made, since the last round of consultation. Further information and contact details are available at www.busconnects.ie.

Submissions will be reviewed by the NTA with final transport and environmental impact assessments to be completed in the coming months. The NTA is due to submit the formal planning application to An Bord Pleanála for statutory consultation and approval in March 2021. Subject to approval, construction will commence on a phased basis in 2022 with each corridor upgrade taking approximately two years to complete.

Minister for the Environment, Climate, Communications and Transport, Eamon Ryan TD said:

“We are committed to a fundamental change in the nature of our transport system. Sustainable modes of travel such as cycling, walking, and public transport, has an enormous potential to facilitate a large proportion of our daily trips, but only if we provide the correct environment which protects and prioritises this mode of travel. The BusConnects Core Bus Corridor Projects is central to achieving this objective. By improving our city’s transport system and ensuring that public transport, walking and cycling options are prioritised, we can encourage more and more people to make the switch to

sustainable transport modes.

The development of this project will also support the delivery of an efficient, low carbon and climate resilient public transport service. In moving more people from their car and onto the bus or on their bike, BusConnects can help to achieve Ireland’s carbon reduction targets as set out in the Programme for Government.

This is our opportunity to make our city a more liveable and active environment and I would encourage those living in Dublin to engage in the NTA consultation and share their views on the future of our city’s transport network. While Covid 19 is having a severe impact on lives and livelihoods, we must continue to plan for the economic and social renewal of our city.”

Anne Graham, NTA Chief Executive Officer said: “The BusConnects Core Bus Corridor Projects is at the heart of the NTA’s efforts to improve transport services across our capital city. By providing continuous bus priority and much improved and safer options to walk and cycle within the city, we can incentivise more people to sustainable transport modes.

“Enhancing transport infrastructure has become all the more important as an ever-growing number of people choose to walk or cycle within the city

over recent months. These shifts in travel patterns are likely to have a long-lasting impact. Buses will continue to be the most important mass public transport mode for our cities. Through the rollout of the sixteen Core Bus Corridors, we can put in place a long-term solution to meet the evolving travel needs of the public. Modern cycling infrastructure will provide new options for families within communities throughout Dublin to cycle safely “Although COVID-19 has meant we are unable to roll-out in-person information events, I would encourage the people of Dublin to visit our virtual consultation rooms and share their views on the revised proposals in the coming weeks.”

For further information on the consultation and on the BusConnects Core Bus Corridor Projects, visit:

<https://busconnects.ie/>

ENDS

Media Plan:

For the third round of Non Statutory Public Consultation, we used radio, press, digital and OOH.

As this plan occurred during Covid-19, we saw the general population turn to trusted news sources and radio consumption increased. For the November plan, we used both local and national radio targeting Great Dublin and Wicklow. National radio gave us broad reach and many local stations have built up a loyal audience base over the years, which again we were able to tap into. On the press, we included national and regional titles to reach the target audience across Greater Dublin and Wicklow.

As transport was at limited capacity, OOH was used to reach the target audience in a retail environment instead, and while they were out & about in their local areas.

As digital channels worked well for us in the 2nd round of non-statutory public consultation, we expanded our digital presence in November. One of the standout behaviour changes we saw during Covid-19 restrictions was the increase in digital audio consumption and this channel was added to the November plan. Social Media, Display, Digital Audio, YouTube and Near were used in the November plan. YouTube and social media allowed us to utilise video assets, which had a very strong performance over the course of the campaign.

WICKLOW PEOPLE | Wednesday, November 4, 2020

IN BRIEF

Permission for new classrooms

Permission is being sought to install four temporary classrooms at Colaiste Bhríde in Carnew.

The Kildare and Wicklow Education and Training Board have lodged an application with the local authority for four 48-sqm temporary prefabricated classrooms and all associated site works at the school in Carnew.

The application, which was received by Wicklow County Council's planning section on October 27, is still at the pre-validation stage.

A decision is expected to be made by December 21.

Calendars on sale

Arklow RNLI's 2021 calendar is now on sale.

The calendar costs €5 with proceeds going to support the life-saving work of the local volunteer-run organisation. Like many other charities, usual fundraising events for the Arklow RNLI have been hit by the Covid-19 pandemic.

The calendar is available from the following shops in Arklow: Myles Doyle Sweet Shop, Lower Main Street; Computerdo Main Street; Arklow Computer Solutions Upper Main Street; Ashgrove Interparts, Wexford Road; Paul Doyle's Shop Main Street; and Kavanagh's Shop on the Wexford Road.

The calendars can also be posted worldwide. For more information, visit the Arklow RNLI fundraising branch page on Facebook.

Planning granted

An extension to the period of planning permission for safety and engineering works at East Avoca Mines has been granted by Wicklow County Council.

The Minister for Communications, Climate Action and the Environment submitted the application last month which relates to a site at Tigrooney West in Avoca.

The local authority initially granted permission for the safety and engineering works in 2015. The project includes the re-routing of existing electricity line to run underground along the access road to the east of the site and removal of the pylon located within the site.

Permission was also granted for stabilisation, safety and drainage works at the site, the development of a surface and underground drainage network on the road to the rear of the site and across the spoil heap to facilitate improved site drainage and other associated works at the protected East Avoca Mines site.

The planning section noted that works at the site had almost been completed and the Department stated the project would be finished within five years, subject to funding.

An extension of the grant of planning permission by an additional five years was granted.

Resurfacing

Road resurfacing works are to take place in Grangecon in the coming weeks.

Cllr Edward Timmins described the move as 'very welcome'. The project follows from resurfacing works that have recently taken place in Dunlavin and Stratford-upon-Avony.

'I want to compliment council staff for managing the projects so that enough money was left over to do this work in Grangecon,' Cllr Timmins said.

Closing date for wind farm public consultation coming to an end

SSE Renewables is looking for potential suppliers that may be interested in carrying out work on the Arklow Bank Wind Farm.

The company released two periodic indicative notices recently last.

The preliminary notices, which are available to view on the EU's tenders website, are designed to give information to SSE Renewables about sup-

pliers who may be interested in carrying out the potential works.

The first notice is in relation to transmission and marine works packages which include the construction of offshore platforms and cables.

The second notice refers to vessels for the installation of wind turbines. The notice also states that estimated start date of the tenders process is

early 2021.

The closing date for both notices is Tuesday, November 10.

Meanwhile, the virtual public consultation on the Arklow Bank Wind Farm Phase 2 is continuing. More information is available at www.sserenewables.com/arklowbank. The public consultation remains open until November 11.

New location for centre

Arklow Community Action Resource Centre is in the process of moving to a temporary new location.

The local group will be operating from the Silver Band Hall near Lower Main Street over the coming months. Volunteers are currently working to move items from their current location at Paramount Arcade to their temporary home. The move is expected to be completed over the next two weeks.

Hilary Sharpe of Arklow Community Action Resource Centre said 'we are overwhelmed by the offers of support from the community. However, we can't take any items until the move is completed. We're asking people to hold onto the donations for another week or two.'

Meanwhile, the Arklow Community Action Resource Centre's work from Tesco Extra on the Wexford Road will continue as usual. The group thanked all those who have offered donations or any support.

Details of the annual Christmas food appeal will also be announced in the coming weeks.

Power outage in Rathdrum

Over 1,000 homes and businesses in the area of Rathdrum were without power on Thursday due to a power outage.

It's understood that fallen branches caused a fault in a power line with 1,050 homes and business in Avoca, Rathdrum and the surrounding areas affected by the incident. Power was restored to the affected homes and businesses by 12 p.m.

A spokesperson for ESB Networks confirmed that a fault occurred which impacted on about 1,050 homes, farms and businesses in the area.

'Initial indications are that the fault was as a result of some fallen branches on a line and we continue to monitor the situation.'

'We apologise to all customers in the area for the inconvenience caused,' the spokesperson added.

BUS CONNECTS
SUSTAINABLE TRANSPORT FOR A BETTER CITY

BusConnects is holding a third round of Public Consultation for the Core Bus Corridors.

The Core Bus Corridors aims to deliver **230km of bus priority** and **200km of cycle tracks and lanes** along 16 of Dublin's busiest corridors.

These improved routes will:

- make bus services more reliable
- enable safe cycling
- reduce congestion
- decrease pollution.

They will play a significant role in creating a more **sustainable city** with improved pedestrian and cycling facilities.

In a challenging year for everyone, we have continued to work on the preferred route option proposals for the 16 corridors and are now asking for **your feedback**.

Due to Government Covid-19 restrictions, we have endeavoured to create a public consultation experience through a **virtual consultation room** of each corridor on our website busconnects.ie. Each virtual room shows detailed maps and design proposals with background information to view and download.

View the detailed proposals and have your say at www.busconnects.ie

Tá an tríú chéim den comharliúchán phoiblí ar na Conairí Bus ar súil ag BusConnects anois.

Is é aidhm na Conairí Bus **230km cead bealaigh bhús** a soláthair agus **200km de raon rothar** a soláthair ar 16 de na conairí boithre is gnóthai i mBaile Atha Cliath.

Mar gheall ar na bealaí feabhsaithe seo:

- beidh seirbhísi bus níos iontaoifa
- beidh rothaocht níos sábháilte;
- agus beidh brú tráchtá agus trailliú laghdaithe sa chathair.

Beidh ról suntasach ag na feabhsaithe seo i gcathair níos **inbhuanaithe** a chruthú le áiseanna rothaocht agus coisithe níos fearr.

I rith an bhliain seo, bliain deacair d'achan duine, lean muid ar aghaidh ag obair ar na bealaí roghnaithe le haghaidh na 16 Conairí Bus agus anois tá muid ag iarraidh d'aiseolas.

Mar gheall ar na srianta coróinvíreas, chrúthaigh muid an tathú comharliúchán phoiblí tríd **seomraí comharliúcháin** fíorúil le haghaidh gach conair ar ár suíomh busconnects.ie. Tá léarscáileanna mionsonraithe, tograí dearaidh agus roinnt eolas cúlra ar teaspáint sna seomraí fíorúil.

Le haghaidh do smaointí a chur isteach agus na tograí mionsonraithe a fheiceáil, téigh chuig www.busconnects.ie

Application to change use of industrial unit

Plans have been submitted to extend an industrial unit in Croghan Industrial Estate in Arklow.

SU Outparts Ltd are seeking to extend a section of a building

and for elevation changes at Unit C in the Croghan Industrial Estate, Emoclew Road in the town.

The application also seeks the change of use to light in-

dustrial storage and the appropriate treatment and recycling or reclamation of metals and metal compounds from end of life vehicles. Permission is also

sought for new front boundary security fencing, storage racking for up to ten end of life vehicles awaiting de-pollution and other associated works.

The application states the proposed development will be subject to a Waste Facility Permit.

A decision on the application is due to be made by December 16.

Coveney insists he supports Shared Island Unit despite row

Foreign Affairs Minister clashed with Taoiseach over the issue

Cormac McGuinn

FOREIGN Affairs Minister Simon Coveney has insisted he is "supportive" of the Government's Shared Island Unit in the aftermath of a row over the issue with Taoiseach Micheál Martin.

The *Irish Independent* revealed how the Fine Gael and Fianna Fáil colleagues clashed during exchanges over the establishment of the new unit in the Department of the Taoiseach.

Mr Coveney told the Cabinet on Tuesday that while he supported the concept of the Shared Island Unit, he feared its establishment was "undermining" the work of his department in relation to Northern Ireland, according to sources.

The Fine Gael deputy leader said to have suggested the unit will reduce the standing of his position as Foreign Affairs Minister.

He also raised concerns over a decision to second a senior civil servant from his department to oversee the Shared Island Unit.

The Taoiseach defended the creation of the Shared Island Unit, which he noted was a commitment in the Programme for Government.

He was supported by Fianna Fáil ministers Darragh O'Brien and Michael McGrath, who insisted the unit was a good policy objective and had been well considered.

Tánaiste Leo Varadkar told the meeting he understood his deputy leader's concerns, but ultimately said he supported the creation of the unit as proposed.

Last night Mr Coveney did not comment directly on the concerns he raised about the unit at Cabinet.

He said: "Conversations in Cabinet are confidential."

But Mr Coveney insisted: "I am supportive of the Shared Island Unit. I made that clear yesterday and I've made it clear publicly."

"I'm supportive also of the Shared Island Unit having a significant budget in terms of focusing on shared projects, north and south, that we can help to fund and make happen in the years ahead."

Mr Coveney added: "I make the point that both my department in terms of the Department of Foreign Affairs – and our experience in Northern Ireland – and the Taoiseach's Department, who are also very engaged in the politics of Northern Ireland, need to work together to ensure that the Shared Island Unit functions as well as it has the potential to do."

He reiterated: "I am, and have from the outset, been very supportive of that Shared Island Unit."

Plans for €500m in spending to support cross-border projects under the Shared Island initiative over the next five years were outlined in the Budget.

Of this, €50m is to be spent next year.

Mr Martin launched the initiative last month, saying the 'Brits out' rhetoric will "get you nowhere".

He said: "You have to go the hard yards and speak to people about the challenges facing the island."

Mr Martin said his goal is to bring people from different perspectives together to create a "shared agenda" which is set out under the Good Friday Agreement.

He added: "I've heard all the rhetoric, I've heard it for years. I grew up through the 'Brits

€500m commitment: Taoiseach Micheál Martin

out' – that gets you nowhere." Mr Martin said the €500m budgeted for the Shared Island Unit showed his commitment to an all-island approach to the challenges both jurisdictions

are facing over the coming years.

He said progress was "overdue" on longstanding joint commitments to cross-border investment in the A5 transport corridor, the Ulster Canal and the Narrow Water Bridge.

Mr Coveney was speaking at the launch of the Government's 'Be Winter Ready' information campaign, which offers advice to the public on how to prepare for extreme weather events and stay safe during storms in the coming months.

He referred to last weekend's weather as well as Storm Emma and Storm Ophelia in outlining the importance of such information campaigns.

Mr Coveney said this year the

country faces the additional challenge of the ongoing pandemic and he encouraged people to follow public health advice and download the Covid-19 Tracker App.

He also said: "Of course, we all hope that there will be no severe weather events in store for us this winter."

"Unfortunately, that may not be the case and our preparedness as individuals across our various communities, and as a Government, should be based on prudent planning and not good fortune or hope."

The Government Task Force on Emergency Planning met yesterday to discuss the winter readiness campaign. The information is available at www.winterready.ie.

dishes out unpalatable truths

impacts will be more acceptable if those least equipped, financially and practically, to cope with them are well supported to do so. How could that principle be enshrined in legislation, the committee wondered?

Too late, Prof Anderson said. "Let's be clear, the Paris Agreement is unjust," he said, stripping away any fleck of wishful thinking that might have adorned the accord.

Holding global temperature rise to 1.5 degrees Celsius, as is the hope of the agreement,

or even to 2 degrees Celsius, which is now more likely, will still bring much death and suffering, mainly to the poorer communities of the climate-vulnerable parts of the world.

"Those suffering will primarily be people of colour, and initially the burden will fall disproportionately on women and children," he said.

"These are impacts that we, in the wealthy high-emitting nations, have chosen to impose upon poor and low-emitting communities by preferring rhetoric

and unfounded optimism over genuine action to cut emissions."

By "we, the wealthy", he meant comparatively speaking, for a typical Irish person's emissions are 50pc higher than the Chinese, as well as almost twice the global mean and over eight times that of the average African.

That's the ungarish, unjust, depressing truth.

The question is, has the Government the stomach to swallow it?

THE HERALD THURSDAY 5 NOVEMBER 2020

News 19

'I want to learn and change, keep exploring', says Daisy

Tom Horton

DAISY Edgar-Jones has said she would like to "morph" as an actress. The *Normal People* star (22) told *Harper's Bazaar* she is "really excited to keep exploring the things I want to do".

The young Londoner has been named among the magazine's women of the year.

Edgar-Jones discussed the future of her career in an interview with the publication.

"I'd like to see how much I can morph and change and learn," she said.

"I'm excited to keep exploring what I can do." Reflecting on the worldwide success of *Normal People*, she said she feels "very lucky to have been part of such a special show that has resonated with a lot of people everywhere".

MAGICAL

"Television has been the thing that has got us all through," she added.

Edgar-Jones said attending the Baf-tas was "the most magical day". "Getting my make-up and hair was fun, and showing off my shoes," she said.

"Now I'm just sitting here in my slippers."

The actress, who played Marianne in the BBC adaptation of Co Mayo author Sally Rooney's novel, also discussed what auditioning is like during the Covid-19 pandemic.

"I've got quite good at balancing up the camera and doing the lighting," she said.

"The only thing is working out your eyeline. "Sometimes I get a bit shy if I'm staring at the camera too much."

She also discussed working with new social distancing rules in place, saying it feels "a wee bit strange at first, but it's mad how used to things you get".

"Actually, I'm just so happy to be back working," she added.

New plan to build flats on Drake Inn site is thrown out

Seán McCárthaigh

PLANS to build an apartment block on the site of a historic pub in the centre of Finglas village have been rejected.

An Bord Pleanála turned down an application by developer Mulsh Sarl to demolish the former Drake Inn on the corner of Main Street and Jamestown Road and put up a six-storey building comprising 32 apartments, a gastropub and shop.

The board rejected an appeal by the developer against Dublin City Council's decision to turn down the proposal to convert the existing two-storey building, even though Mulsh Sarl had revised its original plan to reduce the height of the structure and number of apartments.

CRITICISED

The council claimed the company's plans represented over-development of the site and criticised the lack of communal space.

An Bord Pleanála said the proposed development was "visually incongruous" in terms of its design quality and scale and would set an undesirable precedent for future development in the area.

The board said the plans to redevelop the former pub would also seriously injure the visual amenity of Main Street and would run contrary to the council's stated policy on urban regeneration.

Proposal to knock down Drake Inn and build flats was rejected

It also claimed the design of the units did not meet standards set for new apartments by the Department of Housing in terms of the required number with dual aspect.

A planning inspector with An Bord Pleanála said Finglas lacked a centre or focal point and described its streetscape as "of poor standard", which had resulted from the division of the village by new roads.

The inspector said the proposed building would be overbearing on neighbouring properties and dominate views in the area.

Concern about the plans had also been raised by local TDs, including Sinn Féin's Dessie

Ellis and Fianna Fáil's Paul McAuliffe, as well as Finglas Tidy Towns and the Finglas Historical Society.

Several submissions noted the proposed height of the apartment block, at 19 metres, was in excess of the maximum limit of 16 metres allowed in Dublin's outer suburbs.

Others pointed out that no car parking spaces were provided as part of the development, while also highlighting that bus services through Finglas were already at capacity during the morning peak period.

Mulsh Sarl said it believed the revisions it had made to its original plans had addressed concerns raised by the council.

BUS CONNECTS

SUSTAINABLE TRANSPORT FOR A BETTER CITY

BusConnects is holding a third round of Public Consultation for the Core Bus Corridors.

The Core Bus Corridors aims to deliver 230km of bus priority and 200km of cycle tracks and lanes along 16 of Dublin's busiest corridors.

These improved routes will:

- make bus services more reliable
- enable safe cycling
- reduce congestion
- decrease pollution.

They will play a significant role in creating a more sustainable city with improved pedestrian and cycling facilities.

In a challenging year for everyone, we have continued to work on the preferred route option proposals for the 16 corridors and are now asking for your feedback.

Due to Government Covid-19 restrictions, we have endeavoured to create a public consultation experience through a virtual consultation room of each corridor on our website busconnects.ie. Each virtual room shows detailed maps and design proposals with background information to view and download.

View the detailed proposals and have your say at www.busconnects.ie

Tá an tríú chéim den comharliúchán phoiblí ar na Conairí Bus ar súil ag BusConnects anois.

18 months for man who stole six kegs of beer from outside a pub

A MAN who stole six kegs of beer from outside a pub has received an 18 month suspended sentence., reports Fiona Ferguson and Sonya McLean.

Peter Brazil (41) was caught on CCTV stealing the four kegs of Fosters and two kegs of Beamish. Brazil, who has 268 previous

convictions, was identified by gardai from the footage.

Brazil, of Saint Ronans Drive, Clondalkin, pleaded guilty at Dublin Circuit Criminal Court to theft of the alcohol from The Great Wood Wetherspoons Pub, Westend Retail Park, Blanchardstown on September 7, 2016.

The total value of the goods, which were not recovered, was €800.

Judge Pauline Codd had adjourned the case having heard evidence last July to allow Brazil time to engage with the Probation Service.

On Monday, Judge Codd said

Brazil had shown "all the hallmarks of a long-term drug addiction" and his health has also been impacted by it.

She sentenced Brazil to 18 months in prison which she suspended in full for two years on the condition that he engage with the Probation Service for two

years.

"If you don't co-operate with the Probation Service you will go to prison. This level of thieving has to stop," Judge Codd told Brazil after she acknowledged that although he was not the instigator of the theft he was "nonetheless culpable".

St Vincent de Paul receives 95,000 requests for help

HELP: People are looking for support from SVP

By Aídeen O'Flaherty
aideen@echo.ie

AN additional 149,000 people around the country were going without basics in 2019 compared to 2018, according to recently released figures by the CSO – leading to a surge in demand for assistance from poverty charity the Society of St Vincent De Paul (SVP).

The charity has received almost 95,000 requests for help so far this year from struggling low-income individuals and families, and they are concerned that those households will be more likely to be exposed to an "economic shock" now compared to a decade ago.

According to SVP, in 2019, 42.7 per cent of those living below the poverty line were experiencing enforced deprivation, which means going without basics such as nutritious food or adequate heat – this is compared to 29 per cent in 2008.

While there has been an increase in average incomes in recent years, the latest findings of the CSO's Survey on Income and Living Conditions (SILC) on poverty and deprivation show that one in seven of those living in rented accommodation were defined as living in consistent poverty.

It was also revealed that over a third of renters were going without basics – and SVP have said that housing costs have been one of the main drivers of financial hardship among low-income households in recent years.

Dr Tricia Keilthy, SVP Head of Social Justice, said: "Child poverty must be tackled as it can negatively affect the entire life course of a child, limiting opportunities and making it more difficult for them to realise their full emotional, educational social and economic potential.

"While there was some progress between 2016 and 2017 with 25,000 children being lifted out of poverty, the

Contractor appointed to construct Catherine's Row, a new Killinarden social housing development

By Mary Dennehy
mary@echo.ie

A CONTRACTOR has been appointed to construct a new social housing development in Killinarden, with hopes high that the homes can be allocated to tenants by early 2022.

South Dublin County Council has this week confirmed to *The Echo* that it has appointed ML Quinn Limited as the contractor to construct Catherine's Row, a 12-home development in Killinarden.

The social housing development, which was passed in 2018, is planned for lands on a site in Killinarden Heights – adjacent to Knockmore Avenue.

Construction is expected to commence mid-November.

In a comment to *The Echo*, a council spokesperson said: "The initial site development works will take two to three months followed by an 11-month construction period."

"The council anticipates completion of the development and allocation to tenants in late 2021/early 2022."

The site for Catherine's Row lies in close proximity to local schools and an established residential area.

When asked about safety measures in place during construction, the council said: "The contractor has submitted, prior to site start, a comprehensive Health and Safety plan, which recognised and addresses the risks to local residents and the schools in the area."

"The contractor will be liaising with the schools directly to ensure that the construction does not pose a risk particularly to school children passing the site."

latest figures see a reversal of the positive trend which is very concerning.

"Now more than ever, with the pandemic disproportionately impacting low-income families, it is essential that child poverty is held as a political priority across government departments and throughout the

political system.

"Overall, these figures underline the need for government to set out a roadmap for the right kind of recovery following the pandemic, which allocates sufficient resources to tackle poverty and social exclusion as a priority.

"Any plan for Ireland's recovery

must tackle the inequalities that are preventing our people from reaching their potential and which are storing up human, economic and social costs for the future."

The charity is calling on the government to benchmark social welfare rates and the National Minimum Wage against the cost of a

Minimum Essential Standard of Living, in recognition of the real costs being faced by households in Ireland.

They added that there is a need for much greater investment in housing, childcare, health, education and energy efficiency measures so that individuals and families are supported to find a way out of poverty.

US elections 2020

Election battle to move from polling booths to courtroom as Trump defiant

Next steps

Suzanne Lynch Washington Correspondent

Supreme court could end up playing role in deciding outcome of election

Following months of campaigning, a final result in the US presidential election may still be some days, or even weeks, away. The closer than expected election results saw Democratic candidate Joe Biden edge towards victory as absentee ballots were counted in key battleground states like Wisconsin, Michigan and Pennsylvania.

This election has already been one of the most litigated in history. Dozens of lawsuits were launched by Democrats and Republicans in recent months over the rules governing the voting process. In particular, the expansion of absentee ballot options by several states prompted several lawsuits by Republicans.

In Nevada, the Trump campaign joined a lawsuit challenging the decision to automatically send mail-in ballots to all registered voters. The challenge was overturned.

Several challenges in recent weeks joined forces with Republicans to stop the count in the Las Vegas area, arguing that "meaningful observation" of signature-checking is impossible. Several cases - most involving the question of when states can accept mail-in ballots - have been brought in Wisconsin, North Carolina and Pennsylvania.

The supreme court has weighed in on several challenges, but has delivered mixed signals, permitting absentee ballots to be accepted in Pennsylvania up to three days after election day, but blocking an extension in Wisconsin.

As polls closed on Tuesday evening, Republicans were

US President Donald Trump with First Lady Melania Trump after speaking during election night in the East room of the White House. PHOTOGRAPH BY AP/WIDEWORLD

already lodging fresh legal challenges in Pennsylvania. Republican candidates brought cases in state and federal court over a decision to allow voters to correct their ballots.

In his press conference in the East Room of the White House yesterday morning, President Trump declared: "We'll be going to the US supreme court. We want all voting to stop."

In reality, the president would go directly to the supreme court if he wanted to challenge the result. A case would go through the lower courts. If he lost, he could appeal and his court eventually get the supreme court.

Yesterday afternoon the Trump campaign announced it was launching legal action in Michigan, arguing that it had not been provided with meaningful access to counting locations.

Both the Trump and Biden campaigns have been staffing up with lawyers. In the days leading up to the election, the Trump campaign was directing donors to pledge money to "keep fighting even after election day".

The Biden campaign said yesterday that they were ready for any legal challenge by the president.

"The reality of presidential elections in the US is that a winner is not decided until one candidate concedes

"This attempt... to defeat the voters' intent, to undermine the democracy is absolutely certain to fail," the campaign's senior legal adviser, former White House counsel Bill Bauer, told reporters, outlining previous Republican efforts in recent weeks to limit the vote which have failed. "We have lawyers ready to go, we have papers ready to go within an hour of any step they may

take," he said. Further, the Trump campaign yesterday said it will request a recount in Wisconsin, where Biden is ahead by about 20,000 votes. Each state has different rules regarding recounts. In Wisconsin, a recount can only begin after votes are certified, which could take some time.

As the world watches Trump's next move - he has repeatedly threatened to "go in with our lawyers" after the result - the wheels of America's constitutional norms will continue to turn.

Recounts Under the constitution, the process of selecting a president and vice-president follows a strict timetable. According to the Electoral Count Act, passed in 1887, states are freed from legal challenges if they certify election results at least six days before the state's electors meet.

With the state electors - who officially cast the ballots for each state's nominee for president and vice-president - due to gather on December 14th this year, this means that the so-called safe harbour

deadline falls on December 8th. However, technically if legal disputes are unresolved, a state legislature in some cases can appoint the state's electors. This happened, for example, in 2000 when the Florida legislature nominated George W. Bush even as the supreme court was deciding on the recounts.

The reality of presidential elections in the US is that a winner is not decided until one candidate concedes. America also has a relatively

long transition period between a presidential election and the inauguration. What is clear is that the inauguration of the president will occur on January 20th next year, according to the constitution.

No doubt, however, the current make-up of the supreme court is encouraging Trump. Since last week's confirmation of Amy Coney Barrett, the court now has a conservative majority of six to three.

Three members of the court - chief justice John Roberts,

Brett Kavanaugh and Barrett - were involved in some way in the Republican litigation efforts during the disputed 2000 election.

A written opinion by Kavanaugh last month on a Wisconsin voting case suggesting that late-arriving ballots could "flip" the results has concerned Democrats. As the US prepares for a contentious few days and potentially weeks, the supreme court could conceivably play a role in deciding the outcome of the election.

HOW TRUMP'S OPTIMISM FADED

WE ARE LOOKING REALLY GOOD! ALLOW THE COUNTRY. THANK YOU! Tuesday, 11.15pm (Irish time)

I will be making a statement tonight. A big WIN - West, 5:45am

We are up BIG, but they are trying to STEAL the Election. We will never let them do it. Votes are not cast after the Polls are closed! - West, 5:48am

Last night was leading, often solidly, in many key States, in almost all instances Democrats controlled. Then, one by one, they started to magically disappear as surprise ballots were counted. VERY STRANGE, and the "pollsters" got it completely & historically wrong! - West, 3:04pm

How come every time they count Mail-in ballot dumps they are overestimating their percentage and power of destruction? - West, 3:17pm

They are finding Biden votes all over the place - in Pennsylvania, Wisconsin, and Michigan. So bad for our Country! - West, 4:52pm

We are winning Pennsylvania big, but the PA Secretary of State just announced that there are Millions of ballots left to be counted! - West, 6:52pm

We have claimed for Electoral College purposes the Commonwealth of Pennsylvania (which won't allow legal observers) the State of Georgia, and the State of North Carolina, each of which has a BIG Trump lead. Additionally, we hereby claim the State of Michigan, instead. There was a large number of secretly dumped ballots has been widely reported. - West, 9:56pm

Ballina bides time and watches the odds reduce on its favourite son

Irish connection

Marcesh McDonagh in Ballina

The bookies were keeping hope alive in Ballina. Some time after noon yesterday there was a flurry of excitement among a small group of men peering at their phones near the Joe Biden mural on Market Square.

"He is US now," exclaimed David O'Malley, chairman of the Ballina Community Clean-Up group, which commissioned the mural. "Is that good?" we wondered. "He was still at 0/0 odds," said the bookie, who reckoned tracking the odds was as good a way as any of keeping up with this ball-betting US presidential election.

O'Malley backed Ballina's favourite son in the contest at 6/4 several months ago, and now he is dreaming of the factory that Joe Biden will bring to Ballina, although I suppose we should not be getting too ambitious just yet.

Joe Blewitt wasn't confirming or denying if he had financial skin in the game. He's the Democratic contender's third cousin once removed. "Maybe tomorrow I will be his second cousin," he laughed, his spirits better than they had been when he woke at dawn after just two hours' sleep. The plumber

Waiting for the result of the US presidential election in Ballina. Co Mayo. PHOTOGRAPH BY KETH HENEGHAN

made international headlines when he painted a slogan supporting his famous relative on his work van. "Joe Biden for the White House and Joe Blewitt for Your House," it reads. Blewitt didn't get much sleep on Tuesday night. "I went to bed at 4am. It wasn't looking good and then when I went to bed I was dreaming all night that the FBI were after me and that was I great either."

He woke at 6am, checked his phone and felt even worse. "It is looking better now but it is still tight enough," he said at lunchtime. "I'd say US president Donald Trump is serious after what he came out with this morning."

He wouldn't be a Trump fan even if his relative wasn't involved, with Imagine Michael D (Higgins) coming out with that kind of stuff.

Ageing Blewitt wasn't too surprised when by mid-morning people were asking on the radio if Biden was the wrong candidate

councillor Mark Duffy was enjoying the political drama which was creating a roller-coaster of emotions in Ballina all day Wednesday.

"We are very proud of the Biden connection. Regardless of what happens over the next 24 hours, there has been huge publicity for the town," he said. Sky News and AFP have all come to the place which Edward Blewitt, Biden's great-great-grandfather, left in 1850.

"Edward Blewitt worked for the Ordnance Survey so he literally put Ballina on the map, and now his descendant is doing that again," said the councillor.

"On a knife-edge" Councillor Duffy said he knew the US election is "still on a knife-edge" but he can but dream. "We are all hoping Air Force One will touch down in Knock airport in 2021," said the politician.

Biden has been told about the mural in Ballina created by local artist Smith Mitchell and Leslie Lackey, and he has also enjoyed the online chatter over Joe Biden's van. "He got a great kick out of the van," said the plumber.

Meanwhile, while they continue to keep an eye on the odds, the locals also have also had a big screen erected close to the mural, from where the CNN number-crunchers will be beamed if, as expected, the drama continues for some time.

Blewitt wasn't taking anything for granted. "I am still very nervous but it is going in the right direction. It could be dragged out, Trump will go the messy route."

Local historian PJ Blake (81) said it would be good for Ballina if Biden wins. He has lived in the town since he first met him. "I should say with him over there, it was only a two-minute wonder. But I found him gracious. Mayo Independent county

'Con Air'-style plan to transfer violent inmates will shut M50

All Bracken

Ireland's busiest motorway will be shut down to facilitate the transportation of more than 80 severely mentally ill people who have committed serious crimes to a new hospital to ensure public safety.

Their new home in Portrane in north Co Dublin sits at an advanced stage. Source reveal it has been decided that "in the interests of public safety" the M50 will be shut down for a short period in south Dublin and the newly constructed 170-bed mental health complex in north Dublin during transfer.

Detailed plans are currently being drawn up for the "sensitive" transportation of the country's most disturbed and violent inmates.

One well-placed source explained: "It sounds like something straight out of the movie Con Air. But closing the M50 for a short period to facilitate the transfer is seen as the safest option."

However, it did confirm that the new facility in Portrane is expected to be fully operational early next year. The current CMH is the State's only facility for holding and treating severely mentally ill people who have committed serious crimes.

James Redmond shot his neighbour Mary Duggan dead at her home in Killmarden Estate on March 15, 2014. Her daughter Karina was also shot but survived. Redmond was taken to the CMH 11 days later.

Shane Smyth stabbed shop worker Mairéad Moran to death at her workplace in Kilkenny city in May 2014. Smyth has been in custody in the CMH since the attack.

DANGEROUS: Paul Henry, who killed his mother, is in the CMH

macabre comedy-drama, Dead Still, based around the ghoulish Victorian practice of taking staged photographs with dead relatives for family portraits, has been receiving critical acclaim around the globe.

In the make-up trailer on the set, she underwent the opposite of a make-up to play grieving mother Lucinda Bresslin.

"I love going with that instead of trying to make everyone look beautiful."

with your body. It's been out everywhere - New Zealand, America, Canada, it's flying, it's doing really well."

Eight gardai are suspended in 'corruption' probe

Maeve Sheehan

EIGHT gardai were suspended across Munster yesterday in a dramatic escalation of an on-going investigation into alleged corruption in public office.

The scale of suspensions of serving members in connection with a single inquiry is thought to be unprecedented in the Force during which three gardai were arrested.

During the course of that inquiry, the NBCI came across allegations that gardai had squared summons for Garda figures which were thought to relate to road traffic issues. The homes of several players and officials were searched and mobile phones were seized.

A large number of local gardai were interviewed by detectives with the NBCI as part of that investigation. The suspension of eight serving gardai marks a significant ramping up of their inquiries.

Meanwhile, a Garda superintendent who was arrested and suspended last year in connection with the NBCI corruption inquiry is to retire.

Superintendent Eamon O'Neill, who faced criminal and disciplinary investigations, is understood to be retiring on health grounds with effect from tonight (Sunday).

'I read it, then sat on a park bench and just sobbed'

Sinéad's mum suffered delayed cancer diagnosis at Letterkenny

Maeve Sheehan

SINEAD NI BHAUIL hurried through a Toronto park in August walking her dog, Zuzu, while reading a report she had received about her late mother's cancer treatment at Letterkenny University Hospital (LUH).

The Saolta hospital group confirmed that three new cases will be referred for independent external review.

ANGRY: Sinéad Ni Bhauil and her dog Zuzu, right, her mum Bridget

recommended a repeat DNC which should have been done in weeks but was not done until March 26.

Her cancer finding is noted on her medical records on March 29, but Sinéad said her mother was not told of her cancer diagnosis until April 30, one month later. Bridget passed away on September 23, 2019, at the age of 63.

"I was not expecting it to be so awful. I sat down on a park bench, and I just sobbed. An old man came over to ask me if I was OK. The anger that I felt reading it. This is more than just a Health Service Executive report. These are actual women who are being failed."

The upshot of the report was that Sinéad's mother, Bridget Boyle, should not have had to wait so long for her cancer diagnosis.

An independent report published in August found that 38 women suffered delayed diagnoses of their uterine cancers at LUH.

It detailed how of 133 cases of endometrial cancer examined, 38 suffered delays. Over 10 years, one in three women with endometrial cancer experienced some delay in their care and nearly one in five suffered a 'potentially significant consequence' as a result.

NEWS 9

It's Fingal Inclusion Week!

by JOHN MANNING

NEXT week sees the second Fingal Inclusion Week with over 37 virtual events taking place around the region.

The week, which runs from November 16 to 21 is an initiative of Fingal County Council Community Development Department and the Fingal Public Participation Network.

Fingal Inclusion Week aims to highlight the positive work that communities, agencies and other organisations are involved in to reduce social exclusion and poverty in Fingal.

Mayor of Fingal, Cllr David Healy said: 'Social exclusion is an ongoing issue for many people

and has been brought into sharper focus in 2020 during the Covid-19 restrictions. Fingal Inclusion Week, as well as raising awareness of this issue, will allow people to interact with community groups and join in with fun activities from their homes.'

AnnMarie Farrelly, Fingal County Council Chief Executive, stated: 'Empowering communities to look after one another by staying connected to avoid social isolation has been a key objective for the Fingal Community Call Forum since it was set up last March.

'The current Keep Well campaign is aimed at creating a Healthy Fingal by showing people of all ages how we can mind our own physical

and mental health and wellbeing by adding healthy and helpful habits to our daily and weekly routines.

'We want to create a county where everyone can enjoy physical and mental health and wellbeing to their full potential; where wellbeing is valued and supported at every level of society; and where wellbeing is everyone's responsibility. The 37 events planned for Fingal's Social Inclusion Week will be important steps on our journey towards a Healthy Fingal as they will provide advice and support as well as many chances to engage personally online with organisations who are doing tremendous work in our communities.'

Fingal Inclusion Week is very important to raise awareness of the excellent work being done by community groups and the Fingal Community Development Department and the Public Participation Network to combating social exclusion.

The week also seeks to raise awareness of the barriers experienced by citizens of Fingal that lead to social exclusion and promote an understanding of inclusion in Fingal. Participating organisations and community groups are hosting events to explore such issues through a series of interviews and panel discussions.

For more information, an online event brochure of 37 events can be found on fingalinclusionweek.ie

Knuckle duster

A MAN who was in possession of a knuckle duster while intoxicated has been placed on a one year Probation Bond.

Christopher Dunne (26) was also in possession of a small amount of cocaine when gardai arrested him at Castlegrange Avenue in Swords on June 16 2019.

The defendant, of St Cronan's Lawns in Swords pleaded guilty to the offences at Swords District Court.

A positive Probation Report was handed into court and his defence barrister Deirdre Flannery told Judge Dermot Dempsey the defendant is working with the relevant programmes.

'He is drug free now and has a job lined up on a fishing boat in Skerries,' Ms Flannery told the District Court.

Judge Dempsey placed the defendant on a one year Probation Bond on his own bond of €300 and told him to 'Keep up the good work.'

Pipe theft charges

A MAN charged with the theft of a number of items including copper pipes and radiators from two separate businesses had his case adjourned until January.

Emmet Brady (37) is alleged to have stolen copper pipe and a copper cylinder worth a total of €566.77 from Chadwicks in Turvey, Donabate on February 15, 2019.

He is also alleged to have stolen four radiators from B&Q in Swords on June 1, 2019. The radiators are alleged to have been worth €424.

The accused, who has an address at Bride's Glen Park in Swords, had his case adjourned until January 8 at Swords District Court.

BUS CONNECTS

SUSTAINABLE TRANSPORT FOR A BETTER CITY

BusConnects is holding a third round of Public Consultation for the Core Bus Corridors.

The Core Bus Corridors aims to deliver **230km of bus priority** and **200km of cycle tracks and lanes** along 16 of Dublin's busiest corridors.

These improved routes will:

- make bus services more reliable
- enable safe cycling
- reduce congestion
- decrease pollution.

They will play a significant role in creating a more **sustainable city** with improved pedestrian and cycling facilities.

In a challenging year for everyone, we have continued to work on the preferred route option proposals for the 16 corridors and are now asking for **your feedback**.

Due to Government Covid-19 restrictions, we have endeavoured to create a public consultation experience through a **virtual consultation room** of each corridor on our website busconnects.ie. Each virtual room shows detailed maps and design proposals with background information to view and download.

View the detailed proposals and have your say at www.busconnects.ie

Tá an tríú chéim den comharliúchán phoiblí ar na Conairí Bus ar súil ag BusConnects anois.

Is é aidhm na Conairí Bus **230km cead bealaigh bhús** a soláthair agus **200km de raon rothar** a soláthair ar 16 de na conairí boithre is gnóthaí i mBaile Atha Cliath.

Mar gheall ar na bealaí feabhsaithe seo:

- beidh seirbhísí bus níos iortaofa
- beidh rothaloict níos sábháilte;
- agus beidh brú tráchtála agus trauilliú laghdaithe sa chathair.

Beidh ról suntasach ag na feabhsaithe seo i gcathair níos **inbhuanaithe** a chrúthú le áiseanna rothaloict agus coisithe níos fearr.

I rith an bhliain seo, bliain deacair d'achan duine, lean muid ar aghaidh ag obair ar na bealaí roghnaithe le haghaidh na 16 Conairí Bus agus anois tá muid ag iarraidh d'aiseolas.

Mar gheall ar na srianta coróinvíreas, chruthaigh muid an taithe comharliúchán phoiblí tríd **seomraí comharliúcháin fíorúil** le haghaidh gach conair ar ár suíomh busconnects.ie. Tá léarscáileanna mionsonraithe, tograí dearaidh agus roinnt eolas cúlra ar teaspeáint sna seomraí fíorúil.

Le haghaidh do smointí a chur isteach agus na tograí mionsonraithe a fheiceall, téigh chuig www.busconnects.ie

Spat at Gardaí

Balbriggan District Court.

A WOMAN who spat in the eye and face of a member of An Garda Síochána had her case adjourned until later this month for her to elect which court she wants her case heard in.

Lisa Gavin (40) is alleged to have become abusive while gardai arrested a male at Castle Hills on June 9.

It is alleged the accused was then arrested and allegedly lashed out and spat in the face of Garda Darren McGreever.

The accused, of Hastings Close, Hamilton Way in Balbriggan is charged with assaulting Garda McGreever causing him harm.

She is further charged with being intoxicated, failing to comply with garda direction and using threatening and abusive behaviour on the same date.

'It is alleged she spat in the face and eye of the member,' said Sergeant Patricia McCarthy.

The Director of Public Prosecutions has directed summary disposal of the case meaning it can stay at district court level, where if convicted, the penalties are less than those imposed at circuit court level.

On hearing an outline of the alleged facts, Judge Dermot Dempsey accepted jurisdiction and adjourned the case until November 26 for the accused to elect which court she wants her case heard in and a plea to be entered or a hearing date to be fixed.

The new department was outlined as one of the key objectives in the hospital's 2018-2020 Strategic Plan, which is on track to be delivered by year end.

New Admissions Department unveiled at Cappagh Hospital

THE National Orthopaedic Hospital Cappagh, Ireland's largest dedicated orthopaedic hospital, has opened the doors to the new admission department.

The new department was outlined as one of the key objectives in the hospital's 2018-2020 Strategic Plan, which is on track to be delivered by year end.

The former Admissions Department was located at the rear of the hospital, a considerable distance from the main hospital entrance.

This previous location had sometimes led to confusion, as patients regularly presented for admission at the main hospital reception.

In a bid to simplify the physical journey and enhance the patient experience, management identified the need to relocate the Admissions Department to a building adjacent to the main hospital entrance.

The newly opened admissions department will simplify and streamline patient flow.

The new state-of-the-art department has two consultation pods that offer patient privacy

during the admissions process. The area has several power points and is Wi-Fi-enabled so that patients can share personal electronic devices and connect to the internet prior to admission.

Angela Lee, Chief Executive Officer of the National Orthopaedic Hospital Cappagh, said: "We are delighted to open this modern facility and optimistic that it will improve patient and staff convenience and enhance the overall hospital experience.

"As demand for elective orthopaedic surgery increases, following a 15 per cent increase in activity in the hospital in the past two years, we are confident that our new Admissions Department and the Admissions Team are well-placed to accept greater patient numbers and rise to future challenges.

"We are also pleased to confirm that the vacated Admissions Department will be reassigned to the Radiology Department, and plans are progressing for the installation of a long-awaited CT scanner."

Fingal's field names are available to view on new online database

Padraig Conlon

THE Fingal Fieldnames Project has reached a milestone as the names recorded so far have now been made available online for the first time.

In a collaboration between Christine Baker, Fingal Heritage Officer and Mairéad Nic Lochlainn of Fiontar & Scoil na Gaeilge, Dublin City University the information has been made available on Meitheal Logainm.ie.

The Fingal Fieldnames Project aims to explore and record the rich legacy of fieldnames and related heritage in our local landscapes.

Every field in Fingal, and across Ireland, has a name or had one in the past. Names may derive from the topography of the land, or from the owners, or may describe the purpose of the field, its size or may relate to some event that took place in the field.

Together these names tell us much about the history and heritage of our local landscapes.

Since 2018, volunteers across the county were given the training by Abarta Heritage to record the field names of their localities.

They have been consulting old maps and documents, speaking to farmers and gathering as much knowledge as they can. 'Back of the Yard', 'Front of the House', 'Ladies Stairs', 'Long Leg' and 'Collier's Horn' are just some of the field names in Fingal which have been collected.

Now you can view the results to date of the Fingal Fieldnames project on <https://meitheal.logainm.ie/fingal-fieldnames/>

History is more than child's play

DUBLIN City's first ever Historian-in-Residence for Children has started work in her new role

Dervilla Roche began work in September after being appointed through a partnership between Dublin City Council Culture Company and Dublin City Libraries.

Her job now is to plant the seeds for a lifelong connection with and curiosity about the history of Dublin.

Press advertisement published in The Herald - 12 November 2020:

No festive cheer for Henry Street stall traders

Luke Byrne

IT'S usually one of the most lively places in Dublin in the run up to Christmas, with bright lights and street vendors shouting out offers for last-minute gifts.

However, casual traders who set up stalls on Henry Street in the lead up to Christmas will not be allowed to do so this year.

Dublin City Council today told the committee for casual trading a decision had been made "at the highest level" against allowing the traditional Christmas street market to go ahead. This was over public health concerns during the Covid-19 pandemic.

Labour Party councillor Joe Costello, who is on the committee, said there was disappointment and anger over the decision, especially given the public health advice is that outdoor settings are safer than indoors.

"There was a glimmer of hope as the situation [regarding Covid-19 case numbers] has improved in recent weeks," he said.

"Obviously, we knew it wouldn't be happening under Level 5, but it looks like we will be moving back to Level 4 or Level 3.

"This is a tradition leading up to Christmas and it only would have been for a few weeks."

Around 60 traders usually set up stalls on the street in the run up to the festive period, though only around 40 were planning to do so this year.

"There is a contradiction there because the indoor shops will be open with shoppers remain closed," Mr Costello told the Herald.

"It was quite an angry meet-

ing," he said. Mr Costello said there had been ongoing discussions and a risk assessment report had been prepared in September.

Concerns were raised about the numbers who would be attending, but he said there was no specific direction that it would not go ahead.

CHEERFUL

Traders and members of the committee were satisfied it could be held safely.

"It's very much a Christmas tradition, it's bright and cheerful and we were hoping against hope that it could go ahead."

He had argued for waiting a number of weeks before a final decision was made.

Sadie Grace (65), who has been selling lights and decorations at her stall on the street every year before Christmas since she was 13, said she was disappointed at the decision.

"This is the first year I won't be there," she said.

Dublin City Council was contacted for comment.

It's very bright and cheerful and we were hoping it could go ahead

Vendors won't be selling festive goods on Henry Street

BRIEFS

Brother murder accused in court

A MAN accused of murdering his younger brother at their home in Dublin last week has been further remanded in custody.

Gary Murtagh was arrested after the body of Paul Murtagh (42) was found at their family home at Auburn Street, Phibsborough, last Friday.

The 47-year-old faced his second hearing yesterday at Cloverhill District Court when he was remanded in custody by Judge Victor Blake to reappear on November 25. A bail application in a murder case must be made in the High Court.

Guinness recalls alcohol-free beer

GUINNESS is recalling cans of its recently launched non-alcoholic stout amid safety concerns over microbiological contamination.

The recall, which the brewer described as precautionary, impacts the UK market, as the product was not yet on sale in Ireland.

Guinness 0.0 was launched last month amid much fanfare after a four-year development process, and a statement from the company read: "The issue is isolated to Guinness 0.0 and does not impact any other Guinness variants or brands."

Pope vows to end all sexual abuse

POPE Francis has pledged to rid the Catholic Church of sexual abuse and offered prayers to victims of ex-Cardinal Theodore McCarrick, a day after the Vatican released a detailed report into the decades-long church cover-up of his sexual misconduct.

"I renew my closeness to victims of any abuse and commitment of the church to eradicate this evil," Francis said yesterday.

The report blamed a host of bishops, cardinals and popes for dismissing mountains of evidence of McCarrick's misconduct.

Torvill and Dean host climate show

JAYNE Torvill and Christopher Dean have travelled to Alaska to explore the effects of climate change in a new documentary for ITV.

The one-off film, *Dancing On Thin Ice With Torvill & Dean*, follows the duo on their trip to fulfil their dream of skating outside in nature.

However, while there they discover it is Alaska's hottest year on record. The Olympic skating champions travel into the wilderness in a hunt for wild ice, skating wherever they can, as they seek to find

Wife told to get a court order to heat half of home

Tim Healy

A HUSBAND told his estranged wife, with whom he shares the family home, that she needed a court order to cross into his side of the house to turn on the heating, the High Court has heard.

Mr Justice Max Barrett granted the woman a decree of divorce after finding her estranged husband has still not fully disclosed his financial position and engaged in "bad" and "mean-spirited" behaviour towards her.

The couple currently live separately in a partitioned family home and the man has taken to making noise at irregular hours.

He had argued that the woman required court orders to cross into his section to turn on the heating.

Mr Justice Barrett said the man had sought to depict himself as "reasonable", seeking only what was fair and wishing his estranged wife well but, over a prolonged period, he behaved badly towards her.

He had behaved in a "volatile" manner, with the result the woman previously obtained an interim barring order against

The woman was so fearful she left the family home at one point.

While the man maintained he has never been violent towards her, "by which he presumably means he has not hit her", that was to mistake the nature of an interim barring order and the undertaking.

He also sought to introduce an intimate and irrelevant detail from the woman's "long-distant past" which he "insensitively, even cruelly" described as "baggage", before the court stopped him.

DISREGARD

"If a man is inclined to treat his estranged wife with such disregard/discourtesy in court, he will find himself facing an uphill battle in seeking to establish his being more generally a reasonable man."

The couple married some years ago and have adult children. They have been separated for more than two years and the wife said there was no possibility of reconciliation.

The judge said he would grant a decree of divorce. He made orders for sale of the family home and giving the

Community stalwart Tommy always gave his time freely

Community form a guard of honour and release balloons in blue, yellow and white

By Aideen O'Flaherty
aideen@echo.ie

THE Fettercairn community formed a guard of honour on the street leading up to the Fettercairn Community and Youth Centre last month as community stalwart Tommy Cousins, who passed away on October 26 aged 73, was brought there on his final journey.

Tommy was a familiar face to many in Fettercairn and had strong belief in and praise for the area, which he moved to in the early 80s and shortly afterwards got involved in community organisations.

Philip MacAdam, the manager of the Fettercairn Community and Youth Centre, told *The Echo*: "One of the things Tommy used to say was that the original community centre in Fettercairn was built by people in the area and they paid £1 per brick every week."

When the new community centre was developed Tommy was still a dedicated community worker and volunteer, and he had a particular passion for gardening.

PROJECT: The memorial garden in Fettercairn and (right) Tommy Cousins

"He had green fingers," said Philip. "He did an awful lot of work in the community garden."

"His last project was a memorial garden for people who couldn't go to their loved ones in the graveyards in Bohernabreena or Palmerstown."

"He always gave his time freely, and even in the last few years he would still come into the centre and mop the floor and tidy the car park."

Tommy also collaborated

with another local gardener, Sean Farrell, and he was instrumental in setting up the Brookfield/Fettercairn Men's Shed.

The father-of-five was a passionate supporter of Leeds United Football Club, and he was well-liked in Fettercairn for his infectious sense of humour and his willingness to help others.

"He had no filter – he was a character," said Philip. "Behind the guarded exterior, he was a

big softy. He'd throw himself into anything to help."

When Philip would shift at the centre on Thursday mornings, on the day when *The Echo* is delivered, Tommy would routinely be there before him, to pick up a few copies of the paper to deliver them to Fettercairn residents who weren't able to pick one up themselves.

"He was always thinking of others," added Philip. Following the funeral Mass

last month, Tommy's last stop on the way to Mount Venus Cemetery was the community centre and the community garden in Fettercairn, where many residents formed a guard of honour and balloons in the blue, yellow and white of Leeds United FC were released.

Tommy sadly never got to do the next project he wanted to carry out in the community memorial garden – the construction of a pergola – but the community is determined to

carry out the project on Tommy's behalf, and a plaque will be erected in the memorial garden in honour of him.

Tommy was the husband of the late Ann, and he is survived by his sons Mark, Jonathan, Terence, Raymond and Stephen, and his grandchildren, daughters-in-law Ann-Marie, Pamela, Gemma, Sandra and Shauna, brothers, nieces, nephews, extended family, neighbours and his large circle of friends.

Council compensated with rates waiver funds

By KEN PHELAN

FINGAL County Council has been compensated by the Government for revenue lost through a commercial rates waiver designed to help local businesses through the COVID-19 crisis.

Minister for Housing, Local Government and Heritage, Darragh O'Brien TD has written to the Chief Executive of Fingal County Council to reiterate the Government's support for local government.

Minister O'Brien sent the letter as the second tranche of commercial rates rebates were issued to local authorities across the country. Fingal County Council has so far received over €50 million with further payments to issue.

As part of the July Stimulus programme, a €600 million commercial rates waiver was announced for businesses impacted by COVID-19.

This covered 100% of commercial rates from the end of March to the end of September.

As part of Budget 2021, a further €300 million commercial rates waiver was announced to cover rates to the end of the year.

Commenting, Minister O'Brien said: 'The commercial rates waiver will mean that Fingal won't be at a loss or having to make "either" or decisions when it comes to providing vital services for people.

Minister Darragh O'Brien

'I have been engaging with my party colleagues on Fingal County Council, Cllr Brigid Manton, Cllr Brian Dennehy, Cllr Eoghan O'Brien, Cllr Darragh Butler and Cllr. Adrian Henchy - who have reiterated the need for support for services in these difficult times.

consequence of the pandemic. 'I would like to take this opportunity to commend all our local authorities for the exceptional leadership they have shown through their response to the COVID-19 pandemic.'

'I am very aware that commercial rates are the backbone of local authority income which means that services such as playgrounds, sports facilities and library services can keep operating. I want to ensure that Fingal can continue their important work and Government have not been and will not be found wanting in respect to support for the sector.'

Minister O'Brien said that as Fingal County Council begins to engage in its 2021 budgetary process, they do so 'in the knowledge that Government has supported them with a commitment for commercial rates rebates in 2020.'

The Minister concluded: 'I will continue to work with my colleague Michael McGrath TD, Minister for Public Expenditure and Reform, to support local authorities meet costs and income losses that have arisen as a direct

Funding given to Oberstown

MINISTER of State at the Department of Rural and Community Development, Joe O'Brien TD has announced funding of €120,000 for Owersown Children Detention Campus in Lusk.

The funding is to develop a tailor-made Horticulture Training and Education Programme, and forms part of a €51 million fund from the Dormant Accounts Fund to address disadvantage across the country.

Minister O'Brien said: 'I am delighted to launch the Dormant Accounts Action Plan 2021 which provides funding of over €51 million to help address disadvantage right across Ireland. The 46 measures approved for funding in 2021 will be implemented across Government and will help to address a diverse range of issues such as long term unemployment, youth disadvantage, migrant integration and probation supports to prevent re-offending.'

He said: 'The funding for Oberstown, to develop a tailor-made Horticulture Training and Education Programme, will address the current gap in the provision of vocational and on the job training for young persons detained on Campus. This will assist children in understanding their own interests, aptitudes, personality and skills to give them the knowledge to inform their career decisions.'

BUS CONNECTS

SUSTAINABLE TRANSPORT FOR A BETTER CITY

BusConnects is holding a third round of Public Consultation for the Core Bus Corridors.

The Core Bus Corridors aims to deliver **230km of bus priority** and **200km of cycle tracks and lanes** along 16 of Dublin's busiest corridors.

These improved routes will:

- make bus services more reliable
- enable safe cycling
- reduce congestion
- decrease pollution.

They will play a significant role in creating a more **sustainable city** with improved pedestrian and cycling facilities.

In a challenging year for everyone, we have continued to work on the preferred route option proposals for the 16 corridors and are now asking for **your feedback**.

Due to Government Covid-19 restrictions, we have endeavoured to create a **virtual consultation room** of each corridor on our website **busconnects.ie**. Each virtual room shows detailed maps and design proposals with background information to view and download.

View the detailed proposals and have your say at www.busconnects.ie

Tá an tríú chéim den comharliúchán phoiblí ar na Conairí Bus ar súil ag BusConnects anois.

Is é aidhm na Conairí Bus **230km cead bealaigh bhús** a soláthair agus **200km de raon rothar** a soláthair ar 16 de na conairí boithre is gnóthaí i mBaile Atha Cliath.

Mar gheall ar na bealaí feabhsaithe seo:

- beidh seirbhísí bus níos iontaoifa
- beidh rothaíocht níos sábháilte;
- agus beidh brú tráchtá agus truailliú laghdaithe sa chathair.

Beidh ról suntasach ag na feabhsaithe seo i gcathair níos **inbhuanaíthe** a chruthú le áiseanna rothaíocht agus coisithe níos fearr.

I rith an bhliain seo, bliain deacair d'achan duine, lean muid ar aghaidh ag obair ar na bealaí roghnaithe le haghaidh na 16 Conairí Bus agus anois tá muid ag iarraidh d'aiseolas.

Mar gheall ar na srianta coróinvireas, chruthaigh muid an taithí comharliúchán phoiblí tríd **seomraí comharliúcháin fíorúil** le haghaidh gach conair ar ár suíomh **busconnects.ie**. Tá léarscáileanna míonsonraithe, tograí deairaidh agus rinnte eolas cúlra ar teaspeáint sna seomraí fíorúil.

Demand soars at women's refuge

By MARY FOGARTY

Bray Women's Refuge has reported a surge in requests for help, with almost double the monthly demand for places at the centre.

Minister for Health Stephen Donnelly has urged women across Wicklow to seek help if they are feeling threatened at home.

He said that it is vital women know there is always help available to them if they are feeling trapped or simply need someone to talk to.

The refuge had to reduce their capacity during Covid but are still operating a 24-hour hotline.

They say they have experienced an increase in calls from individuals and professionals seeking information and support, women seeking crisis refuge accommodation for themselves and their children as well as from individuals seeking support through the court application processes for legal protection.

Anne-Marie McMorrow, manager of Bray Women's Refuge, said that the first effect of Covid-19 was a reduction of capacity.

'We had recently renovated to increase capacity,' she said. 'But some families would have shared bathrooms so we had to reduce numbers.'

Staff numbers on-site were reduced as some of the refuge's own staff were vulnerable to the virus and needed to cocoon and work from home. 'We made a lot of changes on the hoof as required, as did a lot of services.'

'At the very beginning phones were very quiet,' said Anne-Marie. 'Women were concentrating on childcare and that's where their priorities lay.' That has changed now with referrals of women in need of accommodation - either by individuals or services - doubling.

Support for women attending court has been changed to remote support.

'That support is still there, but mainly over the phone, WhatsApp, text and emails,' said Anne-Marie.

'The calls for accommodation are up exponentially,' she said.

'From January our referrals for accommodation

per month have doubled.'

There were 28 referrals for accommodation in the month of January and more than 50 last month.

The refuge has been able to provide short-term hotel accommodation for some clients so that they don't have to stay in an unsafe environment, and are working to move people from the refuge into more medium or long-term accommodation to facilitate movement of the waiting list.

'We know that home is not a safe place for all of us, and unfortunately domestic violence increased during the initial lockdown we faced in the Covid-19 crisis,' said Minister for Health Stephen Donnelly.

'I want victims of domestic and sexual abuse to know that An Garda Síochána, the Courts Service and other services, including the vital supports provided by our community and voluntary sector, are still here for you as we now face more restrictions,' he said.

'For anyone living in an abusive relationship or living in fear for their safety right now must feel like an impossible situation.'

'If you are in this situation I want you to know there is always help out there for you at any time of day or night.'

Bray Women's Refuge offers support to women across the country as part of a national network.

They are available at any time to offer a safe haven for victims of abuse as well as advice or counselling.

Restrictions on movement related to Covid-19 do not apply to any person seeking help.

Anne-Marie said that the circumstances around Covid-19 can exacerbate situations where domestic violence exists, with pressures including both partners working at home, the children being home more and other factors.

'It's escalating to where they don't feel safe,' said Anne-Marie. 'When people don't feel safe, we help them get to safety in as much as we can. And that's what we continue to do.'

She said that the message they wish to get out to women experiencing domestic violence is that

Gillian Mangan, Josepha Madigan, then Minister for Culture, and manager Anne-Marie McMorrow.

supports are still there.

'We recognise that domestic abuse is still there,' said Anne-Marie.

She said that if there is no space in the refuge itself, they will look for short-term accommodation, or just to talk, listen and advise, and support legal applications for protection orders.

The refuge offers a 24-hour helpline. 'A person may call a few times,' said Anne-Marie. She said that her mental health may be suffering, with anxiety on top of anxiety, and she may need to reach out.

'Sometimes they just want recognition that yes, they are in abusive relationships, but they don't want to leave just yet.'

If someone feels unsafe and afraid of their partner, she suggests that they just let someone know, and get out if it's escalating. 'As much as

you might want to stay and calm everything down, the safest thing is to go to a neighbour, relative or friend until things calm down. Sometimes in the heat of the moment that's the best thing to do.'

She reiterated that a person is permitted to travel between counties in a situation of domestic violence for refuge or safety.

'Domestic violence doesn't discriminate,' she said. They have a mix of people of different nationalities and Irish, from various backgrounds and of all ages. Some women find themselves in a situation where the perpetrator of the abuse is an adult child.

Anne-Marie said that there is a high level of support from the community, including local supermarkets, hotels they contact for accommodation, gardai, fundraisers, and official bodies such as Tusla.

New funding for rural Fingal

HERE was some great news for rural areas in Fingal with the final approval of €1.4 million in funding for 11 new projects.

The Dublin Rural Leader Local Action Group (LAG) which oversees the programme in Rural Fingal, approved the investment in projects at an online meeting recently.

The approved projects are in areas of enterprise and job creation, social inclusion and rural environment. Ten of the projects approved or funding are based in Fingal.

These will generate new enterprise employment opportunities as well as significant investment in rural community facilities.

The projects awarded include Keoghs Crisps Limited (€100,615 for further development of factory resources to aid company growth), the

Ballyboughal Hedgerow Society (€6,750 for roll out training courses in biodiversity for local community groups) and Lambay Irish Whiskey Company (€192,283) to establish a micro-distillery on Lambay Island with independent energy supply. Taylor's Irish Chillies Lusk was also granted €62,228 for the development of new product lines to expand their business.

The Mayor of Fingal, Cllr. David Healy, said "I welcome this considerable funding to a wide range of recipients. I would like to thank the Local Action Group for its approval of a number of important new projects that will support the development of sustainable communities in our rural areas.

"The funding will be invaluable to the enterprises and communities involved, enabling them to continue

to contribute positively to the economic prosperity and the quality of life of Fingal in these challenging times."

Laurence Ward from the Irish Farmers' Association and current Chairperson of the Dublin Rural Leader Local Action Group, said the investment decision is a much needed boost to rural areas during a very challenging time.

"This decision is great news for many people in the rural areas," he said.

Emer O'Gorman, Fingal County Council's Director of Services for Economic, Enterprise, Tourism and Culture, added: "This most recent online meeting has approved its second largest ever investment at a single meeting.

"This investment will provide much needed stimulus in the local economy and we are very happy with this result for the project promoters."

The beautiful Lambay Island where a micro-distillery will produce whiskey.

Keoghs Crisps Limited was allocated funding for the further development of factory resources.

Church reaches out to community with ‘keep the lights on campaign’

Canon wants the community to know that church is still there for them

By Mary Dennehy
mary@echo.ie

A TALLAGHT church took inspiration from the recently launched ‘keep the lights on’ campaign and reached out to the community by illuminating the village skyline.

Last Friday, Guinness joined forces with publicans nationwide and organisations such as the Licenced Vintners Association (LVA) and the Vintners’ Federation of Ireland (VFI) to shine a light on the struggles of pubs and staff in the face of Covid-19 restrictions.

Pubs right across the country simultaneously switched on their Christmas lights last weekend.

Canon William Deverell of St Maelruain’s Church of Ireland in Tallaght Village was inspired by the campaign, and took his own approach last weekend to highlight that churches are still here, although many through Facebook Live services.

Last weekend, a sign went up outside the historic Tallaght Village church that read, ‘We are trying to keep the lights on for the Holy Spirit of Christmas’.

While reaching out to the community, Canon Deverell wanted to highlight the importance of churches in many people’s lives – and the struggles

INSPIRATION: St Maelruain’s Church of Ireland took part in the ‘keep the lights on’ campaign

faced by churches as their services and events are cancelled.

St Maelruain’s, which has taken its services online, was allowed to open

for 11 Sundays in the past seven months, with a maximum of 25 people permitted in the church.

“While recognising that we are all

trying to keep the numbers down to prevent our local hospital from being overwhelmed and to protect our senior citizens, it was the older members of

the congregation who really appreciated the 11 Sundays we were allowed open”, he told *The Echo*.

“It was one of the few places that they actually felt safe.

“Not only was it good I hope for their spiritual health but also for their mental health as it was one of the few occasions that they could meet somebody else that week, granted after the service and with a mask, outside.”

Speaking with *The Echo*, Canon Deverell said that the ‘keep the lights on’ campaign was launched the same weekend that St Maelruain’s church made an appeal to its parishioners.

“It happened to be the same weekend when we had made an appeal to our few and already hard-pressed parishioners for our annual Gift Day”, he said.

St Maelruain’s Church provides support and space to community groups and organisations throughout the year, which in turn support the church’s different fundraisers like its Spring Concert and Summer Sale, all of which have been cancelled.

Canon Deverell wants the community to know that the church is still there for them while also raising awareness of the challenges faced by parishioners and churches alike.

Follow St Maelruain’s Parish on Facebook.

Tá an tríú chéim den comharliúchán phoiblí ar na Conairí Bus ar súil ag BusConnects anois.

Is é aidhm na Conairí Bus **230km cead bealaigh bhús** a soláthair agus **200km de raon rothar** a soláthair ar 16 de na conairí boithre is gnóthaí i mBaile Atha Cliath.

Mar gheall ar na bealaí feabhsaithe seo:

- beidh seirbhísí bus níos iontaofa
- beidh rothaocht níos sábháilte;
- agus beidh brú tráchta agus truailliú laghdaithe sa chathair.

Beidh ról suntasach ag na feabhsaithe seo i gcathair níos **inbhuanaithe** a chruthú le áiseanna rothaocht agus coisithe níos fearr.

I rith an bhliain seo, bliain deacair d'achan duine, lean muid ar aghaidh ag obair ar na bealaí roghnaithe le haghaidh na 16 Conairí Bus agus anois tá muid ag iarraidh d'aiseolas.

Mar gheall ar na srianta coróinvíreas, chruthaigh muid an taidhí comharliúchán phoiblí tríd **seomraí comharliúcháin fíorúil** le haghaidh gach conair ar ár suíomh busconnects.ie. Tá léarscáileanna mionsonraithe, tograí deardaigh agus roinnt eolas cúra ar teaspeánt sna seomraí fíorúil.

Le haghaidh do smaointí a chur isteach agus na tograí mionsonraithe a fheiceall, téigh chuig www.busconnects.ie

Retailers to show their appreciation

By MYLES BUCHANAN

FOLLOWING the lifting of some government restrictions, many retailers in Wicklow town are holding a Customer Appreciation Weekend on Saturday and Sunday, December 5 and 6.

The Customer Appreciation Weekend is an initiative by the participating retailers to express thanks to the loyal customers who have supported them throughout these difficult times and to provide a warm welcome back to shoppers who have been unable to visit shops during the current lockdown.

The weekend will take the format of each participating retailer creating special offers for this weekend only or they will be offering discounts on some of their most popular products for these dates only.

Wicklow Town and District Chamber of Commerce president Rosie Cooney said: 'This is another wonderful initiative from the retailers to show their appreciation to their customers who have supported the Shop Local campaign since the first lockdown in March.'

Many shops in Wicklow town will be also open on the Sundays leading up to Christmas, with the Main Street becoming a pedestrianised area from 12 noon to 5 p.m. There will be free two-hour parking in the Abbey Street and Church Street Car Parks and on

Rosie Cooney, president, Wicklow Town and District Chamber.

designated spaces on the Main Street, with free all-day parking available in the large Murrrough Car Park and the St Manntains Car Park.

The Wicklow Town Shopping Vouchers also continue to an important part of the ongoing drive by Wicklow Town and District Chamber, the Wicklow Town Team and the Wicklow Municipal District Council to encourage shoppers to shop local this year.

The Shop Local Vouchers, designed by Wicklow Town and District Chamber of Commerce, are high-quality, prestigious shopping vouchers, which are presented in a purpose-designed

sleeve, making them a fabulous gift to receive.

They are available in denominations of €5, €10, €20 and €50 and can be purchased online via www.wicklowtown/vouchers or from Bridge Street Books, Connolly Menswear and from the Chamber office in the Wicklow Enterprise Centre. Alternatively, call 0404 66433.

Ms Cooney added: 'It is extremely important to encourage everybody to 'Shop Local' and support local shops, restaurants, coffee shops and support local employment, particularly this year, after the numerous lockdowns and the impact on all retail outlets of Covid-19. I express my continued thanks to the local community for the support they have already given to the retail and hospitality community this year.'

Businesses in the locality who give Christmas gifts are reminded that, under current Revenue rules, employers are permitted to give up to €500 worth of vouchers without any tax implications for either.

Giving a Shop Local voucher to your staff is an ideal way of expressing your thanks to them and at the same time, providing much-valued support to the local business community. Recipients of these vouchers are encouraged to use these vouchers this Christmas to provide a boost to the retail and hospitality community after this very difficult year.

15 detached houses planned for Ballyguile

THERE are plans to construct 15 detached houses along the Ballyguile Beg Road.

Wickcar Properties Ltd seek permission for the construction of 15 four-bedroom detached dwelling houses to include a proposed new entrance to Ballyguile Beg Road.

The application also includes plans

for 30 parking spaces, working out at two spaces per house. A footpath and road is proposed within the development, with the footpath extended to connect with existing footpaths on either side of the development along the Ballyguile Beg Road.

A decision by the Planning Authority is due by January 21, 2021.

THE GREAT OUTDOORS!

Martin and Ann Lennon out for a walk with Rex.

BUS CONNECTS

SUSTAINABLE TRANSPORT FOR A BETTER CITY

BusConnects is holding a third round of Public Consultation for the Core Bus Corridors.

The Core Bus Corridors aims to deliver **230km of bus priority** and **200km of cycle tracks and lanes** along 16 of Dublin's busiest corridors.

These improved routes will:

- make bus services more reliable
- enable safe cycling
- reduce congestion
- decrease pollution.

They will play a significant role in creating a more sustainable city with improved pedestrian and cycling facilities.

In a challenging year for everyone, we have continued to work on the preferred route option proposals for the 16 corridors and are now asking for **your feedback**.

Due to Government Covid-19 restrictions, we have endeavoured to create a public consultation experience through a **virtual consultation room** of each corridor on our website busconnects.ie. Each virtual room shows detailed maps and design proposals with background information to view and download.

View the detailed proposals and have your say at www.busconnects.ie

DCU launches new initiative to promote gender equality

Neil Fetherstonhaugh

NEW classroom materials and training modules which aim to tackle gender stereotyping, gender-based bullying and gender-based violence in primary and post-primary schools have been launched by Dublin City University.

Former President of Ireland, Dr Mary McAleese, and DCU Chancellor, Dr Martin McAleese, supported the launch of these educational resources at a virtual event.

Led by Dr Seline Keating from the National Anti-Bullying Research and Resource Centre

at DCU's Institute of Education, the Gender Equality Matters project is funded by the Rights, Equality and Citizenship (REC) Programme of the European Union and comprises a collaborative partnership between five EU countries.

It aims to raise awareness, build confidence and enhance capacity levels among children, adolescents, parents and educators in challenging attitudes and behaviours that undermine gender equality.

The free of charge classroom materials are available in English, Spanish, Greek, Italian and Dutch.

As part of the lessons, children will learn about: rights and equality; gender stereotyping; gender based bullying and violence; and how they can make a difference.

As a class they will discuss people in the community that have made a difference and discuss the lives of influential leaders such as Greta Thunberg, John Hume and Malala Yousafzai.

Along with work in schools with pupils and teachers, the Gender Equality Matters project also provides training to parents in the schools involved, but also through parent

groups such as parents' associations, and national representative groups such as the National Parents' Council.

Speaking about the project, Dr Seline Keating said: "Using an equality and rights-based approach and guided by an Advisory Group, we developed age-appropriate classroom materials for use in upper primary schools.

"These are grounded in the SPHE curriculum and school policies such as anti-bullying, wellbeing and child protection.

"We've been piloting these materials with over 1,000 children in Irish, Spanish, Italian and Greek schools since 2019

and the feedback has been incredibly positive as no other resource of its kind has been available until now."

It is hoped that these classroom materials will help schools when teaching about gender equality.

They are free of charge and available to any interested school by visiting www.genderequalitymatters.eu or by contacting the National Anti-Bullying Research and Resource Centre at DCU.

The study is led by Dr Seline Keating, Principal Investigator, from DCU National Anti-Bullying Research and Resource Centre.

Tackling gender stereotyping, gender-based bullying and gender-based violence is led by Dr Seline Keating.

The establishment of Community Forums

As part of the public consultation process, the NTA established a Community Forum for each corridor. The aim was to create a two way communication with local communities allowing information and feedback to be exchanged. Membership of each forum comprised of a representative from resident and community associations, disability and special interest groups and business organisations on the corridors, along with local public representatives. A meeting of each Community Forum was held during the first public consultation phase. In addition a small number of “special issue” meetings were also held for Community Forums such as Swords to City Centre “Santry one way option” and Blanchardstown to City Centre “Stoneybatter Area”.

The next round of Community Forum meetings, in relation to the Core Bus Corridors, will commence during September in advance of the next round of public consultation starting in November 2019.

Next Steps

Over the next number of months we will continue considering the submissions from the public consultation and determine appropriate design amendments with a view to selecting the Preferred Route Option for each core bus corridor. The option selection process will involve multi-criteria analysis covering engineering, environmental, and transport impact assessments. It is intended to publish, for consultation, Preferred Route Options Reports for the corridors in November 2019, which will take into account feedback from the submissions received to date, and incorporate changes arising from that process.

The second round of public consultation for the Core Bus Corridor (the “bus lanes and cycle lanes/tracks”) will commence in November 2019. This will be a further interim step in the planning process - it will take another 12 months of technical, environmental, and transport impact assessment work before any final plans are complete for presentation to An Bord Pleanála for statutory approval in second half of 2020.

SEPARATE NOTE

Amended proposals in relation to the revised network of bus services will be published for a second round of public consultation in September. These amended proposals have been developed following consideration of the approximately 30,000 submissions received during the first consultation last Summer.

Although related, the bus service proposals are separate from the Core Bus Corridor (bus lanes and cycle lanes/tracks) proposals.

Yours sincerely,

BusConnects Team

Subject: Re: BusConnects Dublin Core Bus Corridors Update

Dear Public Representative/Community Forum Member,

We hope you are keeping well and safe.

This email is a status update in relation to the BusConnects Core Bus Corridors Project.

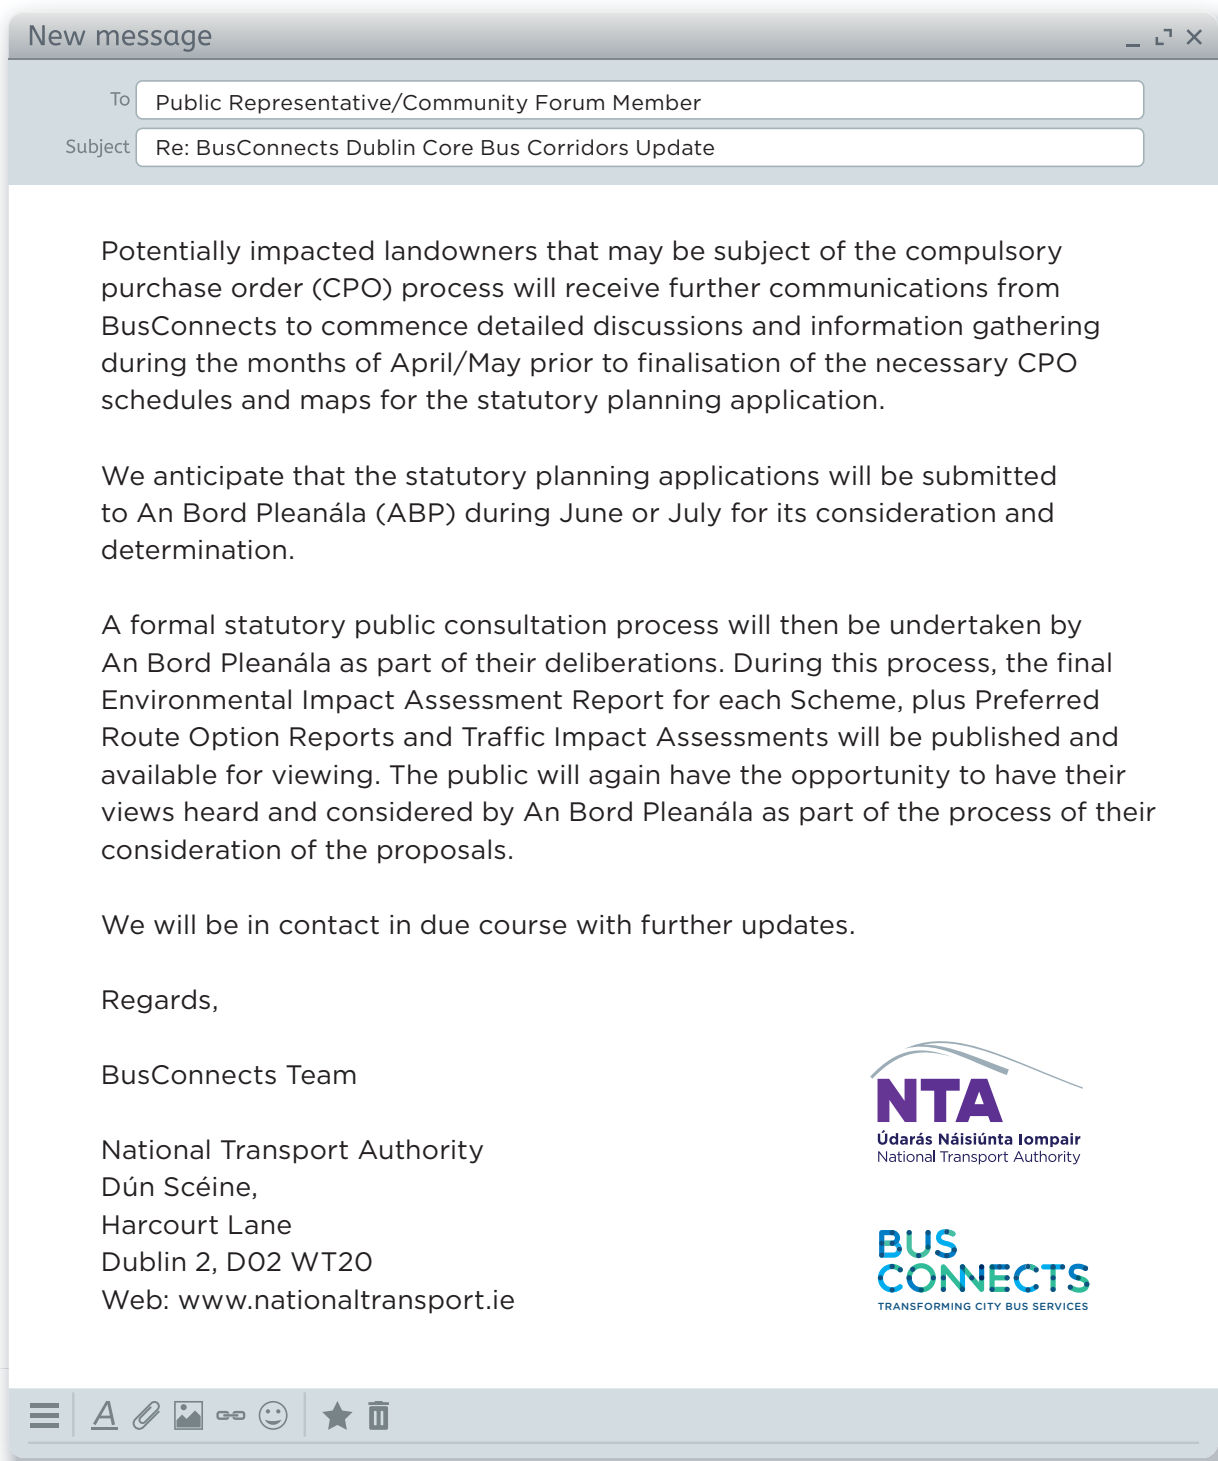

As you will all be aware, BusConnects completed its third round of non-statutory public consultation last December 2020. We received almost 3,700 submissions following this final round. Since then, we are continuing to review all submissions and consider them as part of the finalisation of Preferred Route Options Reports.

In addition, work is continuing on the transport and environmental impact assessments. Once finished these reports will culminate in the completion of an Environmental Impact Assessment Report (EIAR) for each Scheme together with the Compulsory Purchase Order Schedules and Maps with specific details of lands to be acquired.

The NTA has written to An Bord Pleanála (ABP) to commence a pre-application consultation process with the Board and is due to have an initial meeting in the coming weeks.

Subject: BusConnects Dublin Core Bus Corridors Status Update – August 2021

Dear Public Representative/Community Forum Member,
We hope you are keeping well and safe.
This email is a further status update in relation to the BusConnects Dublin Core Bus Corridors.

Current Status

As you will all be aware, the NTA completed its third round of non-statutory public consultation on the Core Bus Corridor projects in December 2020. Since then, we have reviewed and considered all submissions and are currently finalising the preliminary design of each of the Core Bus Corridor schemes. In addition, Environmental Impact Assessment Reports, inclusive of traffic impact analyses, are being prepared for each scheme. Once finished, these reports will be the basis for our applications to An Bord Pleanála, together with the Compulsory Purchase Order Schedules and Maps, with specific details of lands which are proposed to be acquired.

During May and June a pre-application consultation process was undertaken with An Bord Pleanála in accordance with the relevant legislation. This was an advance consultation procedure which precedes the submission of the intended applications for the Schemes.

Preliminary Business Case

A Preliminary Business Case for the overall BusConnects Dublin programme has been submitted to the Department of Transport for its review and for Government decision in accordance with the Public Spending Code governing capital projects.

Under the Public Spending Code, Government approval of the Preliminary Business Case is required prior to the submission of the applications for approval pursuant to section 51 of the Roads Act 1993 (as amended) to An Bord Pleanála. Accordingly, the timing of the submission of the applications for approval in respect of the individual Core Bus Corridor schemes is linked to the Government’s approval of the business case document.

Subject: Re: BusConnects Dublin Core Bus Corridors Update

The EIA Screening Determination and the EIA Screening Report for the Kimmage to City Centre Core Bus Corridor Scheme are available on the BusConnects website at <https://busconnects.ie/initiatives/core-bus-corridor/kimmage-to-city-centre/> and copies are available for inspection by members of the public.

In addition, the EIA Screening Determination and the EIA Screening Report for the Lucan to City Centre Core Bus Corridor Scheme are available on the BusConnects website at <https://busconnects.ie/initiatives/core-bus-corridor/lucan-to-city-centre/> and copies are available for inspection by members of the public.

For the avoidance of doubt, Environmental Impact Assessment Reports are automatically required to be prepared in respect of the remaining Core Bus Corridor schemes, which will also be submitted to An Bord Pleanála.

Further Updates

It is the NTA's intention to issue another update prior to submitting planning applications to An Bord Pleanala, which, as advised above, we expect to occur during October / November, assuming Government approval of the Preliminary Business Case for the BusConnects Programme. We will be in contact with you then and update you further at that point.

Regards,
BusConnects Team
